RECOMMENDATIONS

1. Review, consider and concur with the adoption of the Initial Study/Mitigated Negative Declaration (IS/MND) for the Stormwater Capture Parks Program (SCH Number 2021010053), which includes the David M. Gonzalez Recreation Center project, by the Los Angeles Department of Water and Power Board of Commissioners, finding that on the basis of the whole record of proceedings of the project, including the Draft IS/MND, all comments received, and the Final IS/MND on file in the Board Office and in custody of the RAP, Planning, Construction and Maintenance Branch located at 221 North Figueroa Street, Suite 400, Los Angeles, California, that there is no substantial evidence that the project will have a significant effect on the environment or effects have been mitigated to a level less than significant, that all potentially significant environmental effects of the project have been properly disclosed and evaluated in the IS/MND in compliance with the California Environmental Quality Act (CEQA) and the State and City CEQA Guidelines, and reflects RAP's independent judgment and analysis (Attachment No. 1);

2. Review, consider and concur with the adoption by the Los Angeles Department of Water and Power Board of Commissioners of the Mitigation Monitoring and Reporting Program (MMRP), that specifies the mitigation measures to be implemented in accordance with CEQA Guidelines Section 15074(d) (Attachment No. 1);

3. Approve the final plans (Attachment No. 4) and specifications (Attachment No. 5), substantially in the form on file in the Board of Recreation and Parks Commissioners (Board) Office and as attached to this Report, for the David M. Gonzales Recreation Center Stormwater Capture Parks project (SCP0001) (W.O # EW40078F); and,

4. Authorize RAP staff to make technical corrections as necessary to carry out the intent of this Report.

SUMMARY

The Los Angeles Department of Water and Power (LADWP), Department of Public Works, Bureau of Engineering (BOE), and the Department of Recreation and Parks (RAP) are committed to continuing the delivery of the Stormwater Capture Parks Program (Program). The goal of the Program is to alleviate local flooding, increase water supplies through stormwater capture and groundwater infiltration recharge, improve the quality of stormwater, and provide recreational, social, and economic benefits.

On January 15, 2019, the Board of Public Works approved the execution of the Memorandum of Agreement (MOA) between the BOE and the LADWP to provide design services for the Stormwater Capture Parks Program. Throughout the design process, BOE and LADWP received technical reviews from RAP staff on all nine projects.

Originally, the Program consisted of nine project sites, all located at RAP facilities; however, due to the lack of funding secured for the North Hollywood Park and Alexandria Park, these two projects are not part of the Implementation MOA that was approved by the RAP Board of Commissioners on August 1, 2024. The remaining seven projects will capture approximately 1,800 acre-feet of stormwater and urban runoff per year from a 3,410-acre drainage area and divert the runoff into subterranean infiltration galleries located under City of Los Angeles (City) parks for infiltration into the underlying groundwater basin.

One of the seven projects is the David M. Gonzales (DMG) Recreation Center Stormwater Capture Parks project, which is located at 10943 Herrick Ave, Pacoima, CA 91331. This project consists of installing a 2.6-acre underground infiltration gallery to capture, infiltrate stormwater, and recharge the San Fernando Groundwater Basin (SFGB). Construction of the underground infiltration gallery will include installation of storm drain diversion structures, storm drain pipes, hydrodynamic separators, infiltration galleries, flow measuring devices, a new irrigation system, and educational signage. Other above ground improvements include the restoration of two baseball fields, new player benches, a batting cage, bleachers, and sports field lighting.

This project was also designed in partnership with the Trust for Public Land (TPL), a national non-profit organization whose work in Los Angeles County’s urban communities centers around creating and improving parks, installing fitness zones and championing green alleys. The TPL designed the landscape around the perimeter of the park, which includes sixty new trees, a bioswale, planter areas, picnic tables, and educational signage, among other improvements.

Runoff will be collected from approximately a 759-acre tributary area and diverted into the infiltration gallery with an estimated average yield of up to 448 Acre Feet per Year (AFY).

On December 16, 2024, the Board of Public Works adopted the following:

- Memorandum of Agreement (MOA) detailing the working arrangement between LADWP, BOE, and RAP, for the construction and maintenance of the Stormwater Capture Parks Program (Attachment No. 7).

- Under California Public Resources Code Section 21166 and CEQA Guidelines Section 15162, on the basis of substantial evidence contained in the whole of record, no additional environmental review is necessary.

On August 1, 2024, the Los Angeles Department of Recreation and Parks Board of Commissioners approved the following:

- Memorandum of Agreement (MOA) detailing the working arrangement between LADWP, BOE, and RAP, for the construction and maintenance of the Stormwater Capture Parks Program (Attachment No. 7).

On July 23, 2024, Los Angeles Department of Water and Power Board of Commissioners approved the following:

- Memorandum of Agreement (MOA) detailing the working arrangement between LADWP, BOE, and RAP, for the construction and maintenance of the Stormwater Capture Parks Program (Attachment No. 7).

On September 21, 2021, Los Angeles Department of Water and Power Board of Commissioners adopted the following:

- Initial Study/Mitigated Negative Declaration (IS/MND,) according to California Environmental Quality Act (CEQA), which found that, on the basis of the whole record, with the incorporation of described mitigation measures, there was no substantial evidence that the project will have a significant effect on the environment and that the IS/MND reflects the City of Los Angeles' independent judgment and analysis (Attachment No. 1).

Community outreach was performed throughout the Predesign and Design phases of the project. Council District 7 (CD 7) has ensured the community was involved throughout the design process, by assisting us in coordinating community meetings between August 2020 through April 2022. The community showed interest in this project due to its multi-use benefit, and the long-term impact it will have on the community. The community and CD 7 are in full support of the project.

The plans were prepared by CDM Smith under the supervision of the BOE, Clean Water Division.

This project will be bid and awarded through the Department of Public Works. Construction will be managed by the Department of Public Works, Bureau of Engineering, Construction Management Division.

FUNDING SOURCE	AMOUNT
Measure W Awarded Funding	$33,370,714
LADWP	$23,887,286

TREES AND SHADE

The overall project was designed to capture the 85th percentile 24-hour storm event, while also avoiding the removal of existing trees to the extent feasible. There are 48 existing trees within the David M. Gonzales Recreation Center project site. Nine of the trees are required to be removed to make room for the infiltration gallery construction. In total 156 caliper inches will be removed. As a replacement, and following the RAP tree replacement policy, 60 new trees will be planted at the project site, which would result in 146 caliper inches added. There is a delta of minus 10 caliper inches because there isn't sufficient space within the project site to plant more than 60 trees. Per the MOA, if necessary, LADWP will collaborate with RAP after construction of the Program and enter into a separate contract to identify locations and complete any unfulfilled tree mitigation requirements at LADWP's cost, as set by RAP.

The proposed new trees include eleven Lophostemon Confertus "Brisbane Box", thirteen Cercis Occidentals "Western Redbud", seven Chilopsis 'Timeless Beauty' "Desert Willow", six Geijera Parviflora "Australian Willow", nine Pistache Chinensis 'Red Push' "Red Push Pistache", four Prosopis 'Maverick' "Honey Mesquite", four Prunus Lyonii "CatalinaCherry", and six Quercus Buckleyi "Texas Red Oak."

ENVIRONMENTAL IMPACT

LADWP served as the City's CEQA Lead Department and prepared an IS/MND that analyzed all nine original Program sites. The Draft IS/MND was released for public review in January 2021, and the Final IS/MND, prepared July 2021, was adopted by the LADWP Board of Water and Power Commissioners on September 14, 2021, along with the MMRP. A Notice of Determination was filed with the Los Angeles County Clerk on September 21, 2021. The MMRP includes 22 mitigation measures to reduce environmental impacts from construction activities.

In accordance with the requirements of the California Environmental Quality Act (CEQA), an Initial Study (IS) determined that a Mitigated Negative Declaration (MND) could be prepared for the proposed Stormwater Capture Parks Program, which includes the David M. Gonzalez Recreation Center Parks project, because all its potentially significant environmental effects could be mitigated to a level less than significant. The IS/MND was circulated to all interested parties and responsible agencies for a 30-day review and comment period from January 7, 2021 to February 8, 2021. During this public review period, eight comment letters were received. Comments pertaining to environmental issues and the information and analysis contained in the Draft IS/MND received detailed responses. Comments that raise issues not directly related to the substance of the environmental analysis in the IS/MND were noted but, in accordance with CEQA, did not receive a detailed response.

The Draft IS/MND identified environmental impacts from construction activities related to air quality, biological resources, cultural resources, geology and soils, noise, transportation, and wildfire that required mitigation measures to reduce these impacts to less than significant.

In accordance with Section 15097 of the State CEQA Guidelines, a Mitigation Monitoring and Reporting Program (MMRP), attached to this Report as Attachment No. 1, has been prepared that specifies all the mitigation measures identified in the IS/MND, which will either reduce to a level of insignificance or eliminate the potentially significant environment impact of the proposed project. These measures include stringent air quality controls such as using low-emission equipment and managing dust; protecting biological resources by conducting pre construction surveys and avoiding nesting seasons; safeguarding cultural resources through monitoring by qualified professionals and implementing cultural sensitivity training; ensuring paleontological oversight during excavations; managing hazardous materials and coordinating safety protocols near schools; and reducing construction noise impacts with equipment restrictions, noise barriers, and community notifications. The program also includes specific guidelines for addressing impacts on historical structures and protocols for dealing with unanticipated discoveries of significant resources during construction.

Additionally, the MMRP was updated in November 2024 to better detail the City's internal roles and responsibilities to implement and enforce the mitigation measures (Attachment No. 2). These findings were presented and adopted by the Board of Public Works on December 16, 2024.

The Bureau of Engineering's Environmental Management Division reviewed the environmental documents for the Program, including the IS/MND and MMRP, and prepared a technical memo (Attachment No. 3) analyzing whether additional environmental review was triggered under CEQA Guidelines Section 15162. Per the technical memo, their analysis was the following, "...the City has determined that on the basis of the substantial evidence, in light of the whole record, that no substantial changes have occurred to the Program, no substantial changes have occurred regarding the circumstances under which the Program is undertaken that would require major revisions of the adopted IS/MND, and no new information has come to light since adoption of the IS/MND that causes significant effects not discussed in the IS/MND."

Based on this information, after reviewing the IS/MND, the MMRP and the technical memo, RAP staff recommends that the Board of Recreation and Park Commissioners (Board) concur with the Los Angeles Department of Water and Power Board of Commissioners' adoption of the IS/MND on the basis of the whole record of proceedings of the project, including the Draft IS/MND, all comments received, and the Final IS/MND on file in the Board Office and in custody of RAP Planning, Construction and Maintenance Branch located at 221 North Figueroa Street, Suite 400, Los Angeles, California. Staff also recommends that the Board concur with the Los Angeles Department of Water and Power Board of Commissioners' adoption of the MMRP.

FISCAL IMPACT

The City Engineer's estimate of the project's construction cost is $53,526,241. The budgeted amount for construction contingency is $3,731,624.

The proposed construction costs, as well as RAP's additional staff to perform tasks related to this project and additional storage bin costs, is approximately $53,609,800. LADWP has secured $33,370,714 through the Measure W, Safe Clean Water Program. The remaining amount will be funded by LADWP's internal funding sources. LADWP continues to seek additional state and federal grants for this project.

There will be no fiscal impact to RAP's General Fund associated with the project. Operations and maintenance costs will be evaluated and included in future RAP annual budget requests.

This Report was prepared by Eduardo Hernandez, Project Manager, BOE Clean Water Division; reviewed by Roshanak Varjavand, Senior Civil Engineer / Clean Water Division and Christopher Johnson, Principal Civil Engineer, BOE Clean Water Division; Alfred Mata, BOE Deputy City Engineer; and Darryl Ford, Superintendent, Department of Recreation Parks, Planning, Construction and Maintenance Branch.

SECTION 3
Comment Letters

The City of Los Angeles Department of Water and Power (LADWP), Department of Public Works Bureau of Engineering (BOE) and Bureau of Sanitation (LASAN), and Department of Recreation and Parks (RAP), are collectively referred to herein as the "City." LADWP acting as Lead Agency circulated the Draft Initial Study/Mitigated Negative Declaration (Draft IS/MND) for the Stormwater Capture Parks Program (Program) for public review for 30 days (January 7, 2021 through February 7, 2021) in accordance with the requirements of the California Environmental Quality Act (CEQA) Guidelines Section 15072(a). BOE, LASAN, and RAP will act as Responsible Agencies. The City received a total of eight comment letters during the public review period, which are listed in **Table 3-1** and are included within this chapter. The letters have been marked with brackets that delineate comments pertaining to environmental issues and the information and analysis contained in the Draft IS/MND. Responses to such comments are provided in Section 4.

SECTION 4
Response to Comments

4.1 Comments on the Draft IS/MND and Response to Comments

The responses to comments included in this section correspond to each comment letter outlined in Section 3.

Letter 1: Miya Edmonson (California Department of Transportation)

Comment 1-A

The commenter summarizes the project description.

Response 1-A

The comment is noted and will be included in the project record.

Comment 1-B

The commenter states that an encroachment permit would likely be required for any project work, including road closures, done on or near California Department of Transportation's (Caltrans) right of way.

Response 1-B

As noted on page 33 of the Draft IS/MND, the City and/or its contractors will coordinate with Caltrans and will obtain all necessary permits prior to construction activities. In addition, Caltrans is an active partner in the Program, providing some funding and assisting with project level designs.

Comment 1-C

The commenter states that a Caltrans transportation permit is required for transporting any heavy construction equipment and/or materials with oversized-transport vehicles on State Highways.

Response 1-C

The City and/or its contractors will coordinate with Caltrans and will obtain all necessary permits prior to construction activities.

Comment 1-D

The commenter recommends that project construction traffic is limited to off-peak periods to minimize potential impacts on State facilities.

Response 1-D

As outlined in Mitigation Measure TR-1, the City and/or its contractors will coordinate with Los Angeles Department of Transportation (LADOT) in order to prepare a construction traffic management plan (CTMP) for the Program which will include time of day restrictions, and time limitations for construction traffic.

Comment 1-E

The commenter requests submission of a construction traffic management plan to Caltrans for review if State facilities are expected to have delays. The commenter request that the traffic management plan includes details on any traffic delays that would occur on State facilities during construction, and alternate bicycle and pedestrian routes for any routes that would be affected during construction.

Response 1-E

The City will submit the CTMP to Caltrans for review if delays are expected on State facilities.

Comment 1-F

The commenter expresses support for Transportation Demand Management (TDM) strategies which the City has incorporated into the Program and recommends additional options to further reduce Vehicle Miles Traveled (VMT) and greenhouse gas emissions impacts.

Response 1-F

The Draft IS/MND concluded that Program impacts to VMT and greenhouse gas emissions would occur at levels that are below CEQA significance thresholds, without implementation of any mitigation measures.

Letter 2: Luis Suarez

Comment 2-A

The commenter requests more information regarding the environmental impacts that would occur on homes surrounding Fernangeles Park.

Response 2-A

Residents in the vicinity of Program sites may experience temporary impacts related to construction. The City and its construction contractors are required to implement mitigation measures to ensure that nearby residents are notified of tentative construction schedules and that Program impacts remain below the specific impact thresholds identified in Appendix G of the

CEQA Guidelines. For a detailed discussion of anticipated environmental impacts, please refer to the Draft IS/MND. With respect to neighborhood impacts, the IS/MND describes effects to aesthetics on page 46, air quality on page 51, biological resources on page 72, noise on page 122, recreational resources on page 138, and traffic on page 140.

Comment 2-B

The commenter expresses concern regarding the potential for groundwater saturation in surrounding neighborhoods as a result of the proposed infiltration galleries at Fernangeles Park.

Response 2-B

The Program would include construction of underground infiltration galleries, which would capture surface flow and divert stormwater runoff from the Caltrans pump discharge to recharge the San Fernando Groundwater Basin. The infiltration galleries will be constructed of concrete and are designed to retain flows for percolation into the San Fernando Groundwater Basin. The ground surface surrounding the park would be restored to support recreational uses similar to current conditions. The Draft IS/MND evaluates the potential for groundwater mounding to occur that could affect surface infrastructure. A technical analysis prepared by Todd Groundwater Consultants is included as Appendix E. As noted in Table 1 of Appendix E, the infiltration galleries would range from 16 to 29 feet below ground surface and the groundwater levels in the area range from 105 to 335 feet below the ground surface. Mitigation measure GEO-1 has been included to monitor groundwater levels and reduce flow diversions when groundwater is within 50 feet of the surface. With mitigation implemented, the Draft IS/MND concludes that the potential for elevated groundwater levels would be minimized.

Letter 3: Marie Gordon

Comment 3-A

The commenter requests information regarding start and end dates for Program construction activities that would occur near two senior citizen apartment buildings located along Vanowen Street, between Whitsett Avenue and Rhodes Avenue, just south of Whitsett Fields Park North.

Response 3-A

As noted in Table 1-6 on page 40 of the Draft IS/MND, construction activities at Whitsett Fields Park North are expected to take approximately 18 months, starting in June 2025 and ending in November 2026. Construction at Valley Plaza Park North, located east of I-170 on Vanowen Street, is expected to take approximately 17 months, starting in November 2023 and ending in March 2025. Construction work hours would generally be restricted to times between 7 A.M. and 7 P.M., Monday through Friday.

Comment 3-B

The commenter expresses concern regarding construction mitigation measures and their potential to minimize environmental impacts on senior citizens living in nearby apartments. The commenter states that the environmental impacts of prior projects were not effectively mitigated.

Response 3-B

Residents in the vicinity of Program sites may experience temporary impacts related to construction. The City and its construction contractors are required to implement mitigation measures to ensure that nearby residents are notified of tentative construction schedules, and that Program impact levels remain below the specific thresholds identified in Appendix G of the CEQA Guidelines. For a detailed discussion of anticipated environmental impacts, please refer to the Draft IS/MND. With respect to neighborhood impacts, the IS/MND describes effects to aesthetics on page 46, air quality on page 51, biological resources on page 72, noise on page 122, recreational resources on page 138, and traffic on page 140.

Comment 3-C

Commenter states that the Notice of Intent (NOI) for the Program is dated January 7, 2021 but was not received until January 20, 2021.

Response 3-C

The comment is noted and will be included in the project record. The public review period for the Draft IS/MND was from January 7, 2021, to February 7, 2021. The commenter received the NOI within the public review period of the Draft IS/MND in compliance with CEQA.

Letter 4: Brenda Dalusong

Comment 4-A

The commenter requests that the City consider construction of sidewalks around the perimeter of Fernangeles Park as part of the Program's proposed recreational facilities enhancements. The commenter states concern for pedestrian/motor vehicle safety around the park due to the lack of sidewalks available for pedestrian use.

Response 4-A

Figures 1-4 through 1-12 provide architectural drawings for each of the proposed parks that include public access and pedestrian circulation to support existing recreational uses.

Letter 5: Erinn Wilson-Olgin (California Department of Fish and Wildlife)

Comment 5-A

The comment acknowledges that California Department of Fish and Wildlife (CDFW) received the Draft IS/MND for review and to provide comments.

Response 5-A

Comment noted.

Comment 5-B

CDFW disagrees with the City's impact analysis, which finds that the Project's diversion of water would not impact biological resources

The Project would divert dry season flow and stormwater totaling 3,010 acre-feet per year (AFY). The water would otherwise proceed downstream via concrete channels to the Los Angeles River. The Draft IS/MND concluded that "no beneficial uses would be impacted." However, flow reduction could have a significant impact on downstream biological resources, especially during the dry season proceeding after a below-average water year.

Response 5-B

The Draft IS/MND on pages 74 and 77 describes that the Program would reduce dry season flows from the Tujunga Central Branch channel that would reduce water in the Los Angeles River. In response to the comment the sentence on page 77 of the Draft IS/MND has been revised as follows:

> The Los Angeles River currently discharges an average of over 100 cubic feet per second (cfs) to the ocean during dry weather (City of Los Angeles 2018). The volume of water diverted during dry weather flow by the proposed Program would be a small percentage of the current downstream flows (1.4 percent of total annual flow or approximately 4 percent of dry weather flow), and as a result no beneficial uses, including biological resources, would be significantly impacted.

As noted in the comment, the reduction of dry weather flows is itself an impact. Therefore, the changes to the text provided above as requested in the comment are appropriate. The Draft IS/MND identifies the reduced flow impact on page 74, but concludes that no riparian or aquatic habitat would be removed or adversely affected within the downstream reaches of the Los Angeles River. Therefore, since no habitat would be lost or stressed, the flow reduction would be a less than significant impact. The analysis relies on a de minimis impact conclusion. That is, the reduction of 1.4 percent of total flow and approximately 4 percent of dry weather flow in the river would not result in loss of habitat or result in reduced habitat quality. Rather, diverting dry-weather urban runoff would benefit water quality. The Draft IS/MND describes on pages 74 and 77 how beneficial uses are well supported by the remaining dry season flows. This evidence is outlined further below.

The Draft IS/MND describes in Section 1.5 that six of the nine Program sites (see table below) would require insertion of diversion structures within underground storm drain pipes. No habitat values exist within the buried storm drain pipes. The remaining four Program sites would require installation of diversion structures within existing Tujunga Central Branch concrete box channel or reinforced concrete box culvert. The watershed drained by this Tujunga Central Branch

channel is a small portion of the San Fernando Valley adjacent to but outside of the Tujunga Wash drainage area, representing 1.7 percent of the total Los Angeles River watershed.

Infiltration Gallery Location	Diversion Structure Installation
David M. Gonzales Recreation Center	Underground Storm Drain Pipe
FernAngeles Park	Underground Storm Drain Pipe
Whitsett Fields Park North	Underground Storm Drain Pipe
Strathern Park North	Underground Storm Drain Pipe
Valley Plaza Park North	Underground Reinforced Concrete Box Culvert
Valley Plaza Park South	Concrete Channel
Alexandria Park	Concrete Channel
North Hollywood Park	Concrete Channel
Valley Village Park	Underground Storm Drain Pipe

The Draft IS/MND describes on page 74 that the Tujunga Central Branch channel is concrete-lined with no ecological value. As a result, direct impacts to habitat values from installing diversion structures would not adversely affect biological resources. Furthermore, the Draft IS/MND concludes on pages 74 and 77 that the proposed diversions would result in a small reduction of the flow in the Los Angeles River compared to the current flow, including in the dry season, and would not result in measurable effects to biological resources. The Draft IS/MND references the hydrological analysis conducted by the City for the One Water LA Program and cites that currently an average of 100 cubic feet per second (cfs) reaches the ocean in the concrete channel of the Los Angeles River during dry weather (City of Los Angeles 2018). The Program diversions represent an annual average flow of approximately 4 cfs or 4 percent of the dry weather flows to the ocean. The Draft IS/MND concludes on page 77 that the reduction caused by the project would represent 1.4 percent of the total flow in the river on an annual average. Since the river discharges substantial flow to the ocean in the dry season (>100 cfs), the Draft IS/MND concludes that the proposed project's 1.4 percent diversion of total flows and 4 percent of dry season flows would not result in significant impacts to biological resources.

The Draft IS/MND also concludes on page 153 that the flow reductions would not result in a cumulatively significant reduction, including in the dry season. This conclusion is consistent with the One Water LA Study, which provides an overview of stormwater flows in Chapter 3and the Los Angeles River in Chapter 4. (City of Los Angeles 2018).

In addition to the published One Water LA study, the City has been participating in the Los Angeles River Flows Project, a comprehensive new hydrologic study of the river led by the Southern California Coastal Watershed Research Project (SCCWRP) in partnership with the State Water Resources Control Board (SWRCB). This new study is called the Los Angeles River Flows Project and is sponsored by the City of Los Angeles (by and through LADWP and LASAN), Los Angeles Regional Water Quality Control Board (LARWQCB), and the Los Angeles County Sanitation Districts (LACSD). SCCWRP is a quasi-public agency established to

support Southern California governmental agencies with third-party, science-based analysis. The Los Angeles River Flows Project was initiated in 2019 expressly to evaluate potential effects of cumulative flow reductions in the Los Angeles River, including reductions in WRP discharges and future stormwater capture projects such as the proposed Project. CDFW has been actively participating in the Project as a member of the Technical Advisory Committee (TAC).

In May 2021, SCCWRP published a report titled Process and Decision Support Tools for Evaluating Flow Management Targets to Support Aquatic Life and Recreational Beneficial Uses of the Los Angeles River as part of the Los Angeles River Flows Project (LA River Flows Project Final Report) (SCCWRP, 2021b). This new Final report, included by reference with this Final IS/MND, characterizes the environmental attributes of the river channel and evaluates flows that support those attributes, providing flow-ecology relationships helpful in understanding dry season flow reduction impacts on ecological values. The report develops a set of tools to evaluate future flow management scenarios. One of the three objectives noted in the report is to:

> "Produce tools and approaches to help evaluate how potential modified flow regimes in the LA River may affect the likelihood of supporting aquatic life and recreational beneficial uses" (SCCWRP, 2021b)

The results of this study directly confirm the conclusions outlined in the IS/MND, including an evaluation of the effects to focal species of reduced storm flows during the dry season. See response to comment 5-I for more discussion on the new study and the conclusions regarding impacts to ecological values from reduced dry weather flow.

Comment 5-C

The Draft IS/MND does not provide sufficient analysis of the Project's potential biological impacts to allow CDFW to determine the Project's significance or need for mitigation.

Data Source: The Draft IS/MND uses data from the 2015 *Los Angeles River Ecosystem Restoration Integrated Feasibility Report* (USACE 2015). The U.S. Army Corp of Engineers (USACE) report analyzes the feasibility of restoring an 11-mile stretch of the Los Angeles River from Pollywog Park to Downtown Los Angeles, referred to in the report as the ARBOR reach (Area with Restoration Benefits and Opportunities for Revitalization) (USACE 2015). Citing the USACE report, page 77 of the Draft IS/MND states, "USACE estimated that existing water sources provide 211,348 AFY of flow within the Los Angeles River watershed on an annual basis. The proposed diversion would be approximately 1.4 percent of the existing water source […]. The volume of water diverted during dry weather flow by the proposed Program would be a small percentage of the current downstream flows (1.4 percent), and no beneficial uses would be impacted.

The Draft IS/MND may have underestimated the percentage of water diverted from the Los Angeles River in using 211,348 AFY as the basis for deriving 1.4 percent. After factoring in water demand (e.g., infiltration, evaporation, evapotranspiration), the USACE estimated that flow would be reduced from 211,348 AFY to 143,793 AFY annually and 29,166 AFY in the summer

(April through September) (USACE 2015). Based on reduced volumes, the Project's proposed diversion would be approximately 2.2 percent annually, an increase from 1.4 percent. During the summer, diversion would be approximately 10.3 percent. Based on the above, the Draft IS/MND's impact analysis may not have accurately estimated the proportion of water the Project would divert from the Los Angeles River.

Response 5-C

The calculation in the comment asserting a 10.3 percent reduction is inaccurate in that it assumes the entire diversion estimate of the proposed Program (3,010 AFY) will occur between April and September. It would be more appropriate when calculating the six-month dry season percentage from the 29,166 AFY flow assumption to compare half the annual anticipated diversion, which would be 1,505 AFY, calculated as 5.14 percent of the total dry season flow. A different way of calculating the contribution of flows attributed to the Tujunga Central Branch channel is to compare the project's diversion estimates with flow estimates at the ocean. The One Water LA Report (City of Los Angeles 2018) estimates that the river discharges 100 cfs to the ocean during summer months. The Program's proposed diversion of 3,010 AFY would constitute approximately 4 percent of the existing flow to the ocean during the summer months. This would be a conservative assumption since it does not attribute any stormwater capture to the proposed Program. The Draft IS/MND concludes that the contribution of flow to the Los Angeles River from the Tujunga Central Branch channel during the dry season is small (1.4 percent of the total volume and 4 percent of dry weather flow) compared to other sources. Furthermore, the watershed represents only 1.7 percent of the total watershed feeding stormwater to the Los Angeles River. Based on these flow estimates, the Draft IS/MND concludes that the proposed project would not significantly affect the ecology of the river.

The City, including LADWP, is participating in the Los Angeles River Flows Project in partnership with the SWRCB, and in close coordination with CDFW. The Los Angeles River Flows Project has been initiated by SWRCB to better understand the water demands of beneficial uses in the river, and to support future flow management priorities with science-based demand characterizations. See response to comment 5-I for more discussion on the new study.

Comment 5-D

Seasonality: The Draft IS/MND does not thoroughly analyze the potential significance of water diversion depending on the season. During the dry season, typically April through September in southern California, the Los Angeles River is largely maintained by urban runoff and discharge from WRPs. Diverting water could be significant during the dry season and could either significantly reduce water flow or result in complete loss of water flow from the Tujunga Central Branch channel to the Los Angeles River.

Response 5-D

The Draft IS/MND does evaluate the seasonality of the potential effects of the Program on page 74. The assessment describes the effects of the proposed Program on both dry weather flows and

wet weather flows. The Draft IS/MND notes on pages 74 and 77 that dry weather flows would be reduced slightly but would not result in loss of habitat. This is substantiated by the fact that 100 cfs currently discharges to the ocean in dry weather indicating a surplus of flow. Furthermore, the Draft IS/MND also points out that the ecological values of the river would be enhanced with the reduction of pollutant daily loads conveyed in dry weather flow. The water quality benefits of stormwater capture on downstream habitat values are described further in One Water LA, Chapter 4 Los Angeles River Study (City of Los Angeles 2018), as a fundamental benefit of the City's Program, and supports the water quality objectives of the regional Municipal Separate Storm Sewer System (MS4) stormwater NPDES permit of which the City is a participating permittee. See response to comments 5-C and 5-G.

Comment 5-E

Drought: The Draft IS/MND does not analyze the potential significance of water diversion during a below-normal water year. Since 2000, the longest duration of drought in California lasted between 2011 and 2019 (USGS 2021) and in southern California, between 2012 through 2016 (Los Angeles Almanac 2021). The 2017-2018 rainfall season was below normal and the driest for Los Angeles since 2006-2007 (Los Angeles Almanac 2021). Diverting water during a below normal rainfall year may significantly reduce water flow or result in complete loss of water flow.

Response 5-E

Annual rainfall amounts vary in the Los Angeles River watershed, with multi-year droughts likely becoming more common. The City's Stormwater Capture Master Plan states that "although the average annual precipitation in downtown Los Angeles is 15.3 inches, it ranges from a low of 4.69 inches (2007) to a high of 30.6 (1998). The mountains that surround the coastal plain, and are tributary to the City, experience considerably more rainfall than downtown Los Angeles. For example, in Big Tujunga Canyon, annual rainfall ranged from 9.62 inches in 1989 to 53.93 in 1998." (LADWP Stormwater Capture Master Plan, 2015; p. 3) The watershed represents only 1.7 percent of the total LA River watershed. The reduction would not significantly reduce dry season flows. The comment does not provide any additional information not already considered in the Draft IS/MND. See response to comment 5-I.

Comment 5-F

Beneficial Uses: The concrete lined portions of the Los Angeles River support wildlife. These portions of the Los Angeles River are regionally significant, especially in a dense urban environment with substantial loss or alteration of the natural hydrologic regime and river ecosystems. A reduction of flow, especially dry season flow, could directly or indirectly impact biological resources through habitat modifications. Where the Los Angeles River overtops the concrete-lined channel, the resulting sheet flows allow phytoplankton (algae and cyanobacteria), microorganisms, and herbaceous vegetation to establish. The algae provide habitat and a food source for benthic invertebrates, a vital food source for wading birds. The Los Angeles River provides habitat for hundreds of bird species, making these areas birding hotspots. The least Bell's vireo (*Vireo bellii pusillus*), an Endangered Species Act and CESA-listed endangered

species, has been documented within the Glendale Narrows area. Least Bell's vireo depends on willow (*Salix* genus) riparian habitat. The ARBOR reach examined in the USACE report contains soft-bottom channels that support herbaceous and woody vegetation. Dominant species include black willow (*Salix gooddingii*), Fremont cottonwood (*Populus fremontii*), and arroyo willow (*Salix laevigata*) (USACE 2015). The middle reach of the Los Angeles River, specifically Glendale Narrows, supports anadromous fish that includes the Pacific lamprey (*Entosphenus tridentatus*), a California Species of Special Concern.

The Draft IS/MND concludes that "no beneficial uses would be impacted." The Draft IS/MND does not offer a quantitative analysis as to how it determined no impacts would occur. Moreover, the Draft IS/MND does not define what it considered to be "beneficial uses." Diverting water during the dry season could reduce the availability and extent of shallow water sheet flow downstream. This could potentially impact algae, benthic invertebrates, and birds. Willow riparian habitat may be impacted if reduction in flow leads to receding shoreline or lower water depth. Preliminary work of the Los Angeles River Flows Project show that black willow (*Salix gooddingii*) seedling mortality increases as water depth decreases (SWRCB 2019). Loss of suitable habitat may impact sensitive species such as least Bell's vireo. Anadromous fish have specific habitat requirements including water depth, velocity, and vegetation.

Response 5-F

The Draft IS/MND on pages 74-78 describes the valuable biological resources existing in the Los Angeles River that are supported by consistent surface flow. The Draft IS/MND cites the One Water LA Program to substantiate the values found in the river, including all the species described in the comment. The 4 percent reduction of the current 100 cfs in the lower river channel would not reduce habitat from sheet flow in the lower reaches of the river since the flows would continue to be greater than the low flow channel and would continue to overflow and maintain the sheetflow condition. Phytoplankton and herbaceous vegetation would continue to provide a food source for benthic invertebrates, and for wading birds, as noted in the comment. The Draft IS/MND does provide a quantitative assessment of the potential effect of the proposed Program by estimating a 1.4 percent flow reduction. This small average flow reduction would not result in measurable effects to habitat values in the concrete-lined Los Angeles River either in the Arbor Reach or in the concrete-lined portion of the lower river. Furthermore, the Draft IS/MND cites the One Water LA Study that states that far more water exits the Arbor Reach under current conditions than is proposed to be diverted by the proposed Program. That is to say, since more water exits the system than is contributed by stormwater, there would be sufficient quantity of flow to meet the existing ecological demand. The Draft IS/MND concludes that the calculated flow reductions would not impact beneficial uses.

The comment cites information from a report published for the Los Angeles River Flows Project in January 2021 that provides a habitat suitability assessment for species known to occur in the Los Angeles River. The citation notes that black willow seedling mortality increases with water depth reduction. This information is extracted from a life stage suitability curve provided in the report. The Assessment Report does not provide a conclusion on the optimal water flow depth in

the Los Angeles River. Rather, the Habitat Assessment Report (SCCWRP 2021a) provides suitability curves that show a relationship with water depth and different life cycle stages for various species.

The figure below taken from that report shows that willow seedling mortality is more complex than stated in the comment: mortality is at a minimum at mean depths of around 5 cm and then increases with both reductions and increases in flow depth. In other words, germination occurs within a specific range of flow depth.

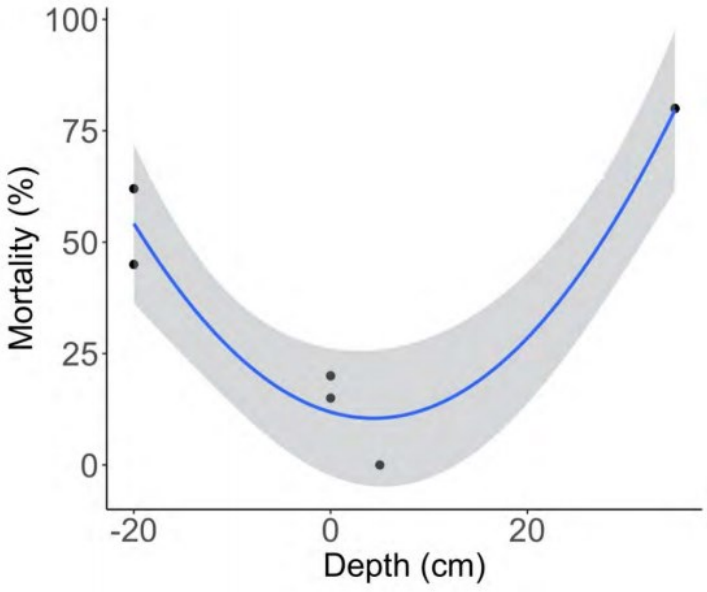

Figure 35. Habitat suitability curve of seedling mortality as a function of inundation/depth from water surface of Salix Gooddingii calculated through quadratic linear regression. Depth is defined as depth from surface i.e., -20 cm = 20 cm below surface, 20 cm = 20 cm above surface. Mean = 5 cm, p = 0.002, n=5.

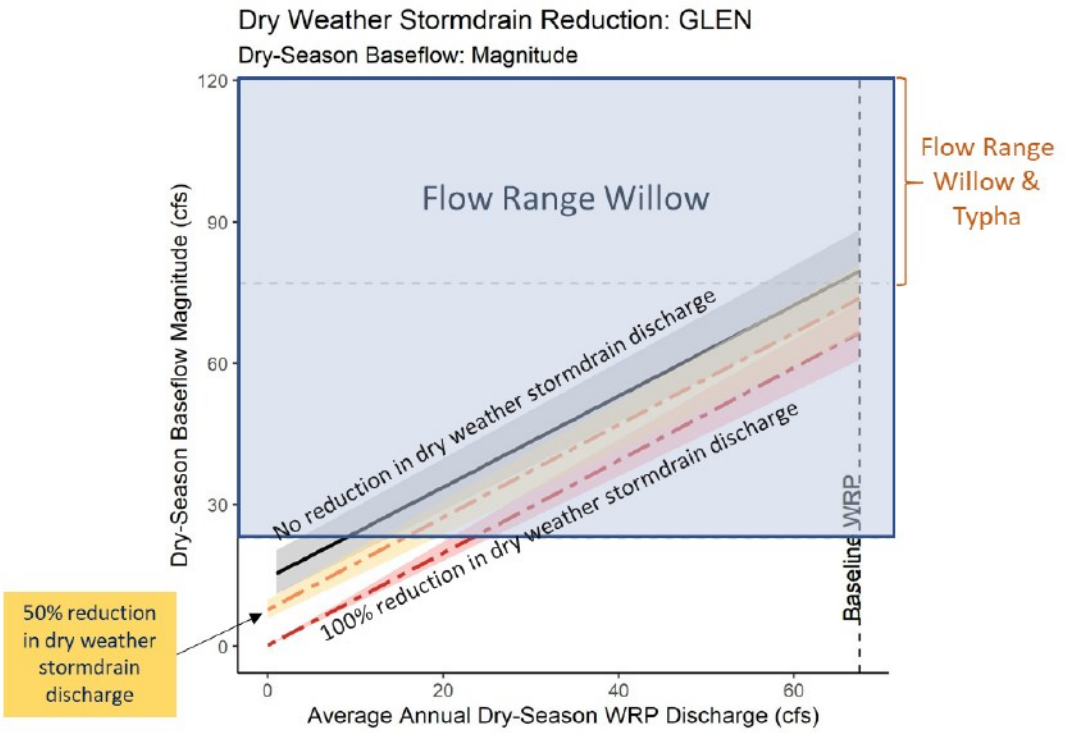
The second figure, taken from the recently published SCCWRP flow study (SCCWRP 2021b) shows that willow in the Glendale Narrows area of the Los Angeles River can sustain a wide range of flow conditions. The graph shown below from the study shows that WRP discharges could be reduced by 80 percent and still support the existing willow. The WRP flow reduction of 80 percent illustrated, from 75 cfs to 15 cfs, is an order of magnitude greater than the proposed flow reduction from the proposed Program. The graph also shows that if all urban baseflows were captured, WRP discharges could be reduced by up to 68 percent and the existing willow habitat would be maintained. That is to say, a 100 percent reduction in urban baseflow across the Los Angeles River watershed (of which the proposed Program watershed comprises 1.7 percent by area) would still allow for a 68 percent reduction in WRP flow and continue to support willow habitat. This substantiates the conclusion that the proposed Program dry weather flow reductions would not affect downstream beneficial uses significantly, and that it would be unreasonable to assume otherwise.



The effect of stormwater diversion would reduce Los Angeles River flows less than 4 cfs in the dry season, compared to the current dry season average of 75 cfs in the Arbor Reach and 100 cfs where the Los Angeles River confluences with the Pacific Ocean. The remaining flow would provide for the needs of willow and other riparian vegetation. The conclusions illustrated in the SCCWRP study for black willow show that surface water depth is not a driving factor in the suitability of black willow habitat in the Los Angeles River. The comment does not identify any other citation supporting water needs for the riparian habitats See response to comment 5-I.

Comment 5-G

Cumulative Flow Reductions: The Draft IS/MND does not analyze whether the Program would result in significant impacts when considered with other existing or proposed water diversion projects in the Los Angeles River watershed. The cities of Burbank, Glendale, and Los Angeles plan to recycle more wastewater and reduce their discharges to the Los Angeles River for this purpose (SWRCB 2019).

Response 5-G

The Draft IS/MND concludes on page 153 that the proposed Program would not result in cumulatively significant effects to the environment. This conclusion is based on the quantitative analysis that 4 percent of dry weather flow (1.4 percent of total annual flow) is too small an amount to result in an appreciable, or measurable change in the habitat values currently exhibited in the Los Angeles River. Furthermore, the City has acknowledged that cumulative flow reductions in the future may include potential reductions in WRP discharges to support regional

recycled water program objectives. To evaluate the effects of cumulative reductions in future flows that may include future diversions of WRP discharges, the SWRCB has conducted the Los Angeles River Flows Project. The study published by SCCWRP through the Los Angeles River Flows Project (SCCWRP 2021b) provides tools to all the river stakeholders to best manage the resource's beneficial uses. Future projects that may propose further diversions in dry weather flow may rely on this study to assess potential direct and cumulative effects of WRP discharge diversions. These future WRP diversions will be subject to Water Code Section 1211 Petitions, approved by the SWRCB.

In January 2021, SCCWRP published a report titled the Assessment of Aquatic Life Use Needs for the Los Angeles River Report (Assessment of Aquatic Life Report) (SCCWRP 2021a). This report characterizes habitat values in the river, and evaluates water demands of riparian and aquatic species known to occur in the river system. Habitat suitability curves have been developed for certain focal species based on the assessment. Habitat suitability curves were developed as part of a technical tool to assist the SWRCB in assessing potential WRP flow reductions in the Los Angeles River, but are not themselves flow recommendations.

The Assessment of Aquatic Life Report outlines habitat suitability criteria for three species: black willow, cattails (*Typha sp*.), and algae (*Cladophora sp*.). The study provides an overview of the cumulative effects of stormwater diversions to the overall flow in the Los Angeles River. The graphic provided in response to comment 5-F above summarizing the relationship between flow in the river and ecological water demands of willow substantiates the conclusion that the proposed Program dry weather flow reductions would not affect downstream beneficial uses significantly, and that it would be unreasonable to assume otherwise.

The City, including LADWP, is committed to maintaining a supportive role in the Los Angeles River Flows Project. See response to comment 5-I.

Comment 5-H

Diverting water from the Los Angeles River may impact biological resources downstream, especially during the dry season proceeding after a below-average water year. Impacts to any sensitive or special status species should be considered significant under CEQA unless they are clearly mitigated below a level of significance. Inadequate avoidance, minimization, and mitigation measures for impacts to sensitive or special status species will result in the Project continuing to have a substantial adverse direct, indirect, and cumulative effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species by CDFW or U.S. Fish and Wildlife Service.

Response 5-H

See responses to comments 5-G and 5-I.

Comment 5-I

Mitigation Measure #1: CDFW recommends LADWP provide additional analysis and evaluation of potential impacts on biological resources as part of the final environmental document. At a minimum, an additional analysis and report should provide the following:

Study Reach

1. CDFW recommends LADWP define the study area as a 15-mile reach of the Los Angeles River, bounded by the Los Angeles River's confluence with the Tujunga Wash tributary and proceeding downstream to the river's confluence with the Arroyo Seco tributary. LADWP should identify all sources of flow input within the study area to estimate the total annual and dry season flow. LADWP should assess potential Project related impacts on biological resources within this study reach.

Changes to Hydrology and Hydraulics

1. Under pre-Project (i.e., baseline) conditions, the volume of water flow from the Tujunga Central Branch channel into the 15-mile study reach during a) the wet (November through March); b) the dry season (April through October); and c) above-average and below-average water year (i.e., wet season/above-average water year, wet season/below-average water year, dry season/above-average water year, and dry season/below-average water year). LADWP should clearly define what it would consider to be above-average or below-average rainfall year.

2. Under proposed Project conditions, the percent reduction in flow from 1) the Tujunga Central Branch channel tributary and 2) 15-mile study reach for a wet season/above-average water year, wet season/below-average water year, dry season/above-average water year, and dry season/below-average water year.

3. An analysis of potential Project-related changes to river hydraulics in both concrete and soft-bottom reaches. This includes water depth (percent change), wetted perimeter (acres gained/lost), and velocity (percent change). CDFW requests a map modeling potential changes to channel hydraulics overlain on a map of plant communities and habitat for sensitive wildlife species and birds.

4. A quantitative analysis comparing the flow from the Tujunga Wash, Burbank Wastewater Reclamation Plant (WRP), Tillman WRP, Verdugo Wash, and Glendale WRP, and their relative contribution to the hydrograph of the 15-mile study reach.

Biological Resources Impact Assessment

5. A map of plant communities and important bird foraging and nesting habitat occurring in the 15-mile study reach. Plant communities should be mapped at the alliance/association level using the Manual of California Vegetation, second edition (Sawyer et al. 2009). Also, CDFW recommends an updated and thorough floristic-based assessment of plant communities, following CDFW's Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities (CDFW 2018).

6. A comprehensive list of sensitive and special status plant and wildlife species, and sensitive plant communities, occurring in the 15-mile study reach. CDFW recommends a nine-quad

search of the California Natural Diversity Database (CNDDB) for sensitive and special status biological resources that could occur downstream. For each biological resource, provide:

a. A summary of species-specific habitat requirements;

b. A discussion as to how the species or plant community may be significantly impacted directly or indirectly through habitat modification, as result of changes to hydrology (reduced flow) and hydraulics (water depth, wetted perimeter, velocity); and,

c. A quantitative analysis and/or adequate discussion to evaluate whether the Project would result in those significant impacts.

7. A discussion of whether diversion devices such as rubber dams would have direct and/or indirect impact on biological resources.

8. An adequate discussion to address how the Project may potentially affect on-going habitat recovery and restoration efforts.

9. An adequate discussion of Project-related impacts on biological resources in relation to cumulative flow reductions.

Response 5-I

The IS/MND concludes that based on the evidence provided in the existing literature, the proposed Program would not result in significant impacts to biological resources in the Los Angeles River considering the small contribution of flow provided by the Tujunga Central Branch channel, and that it would be unreasonable to assume otherwise. The IS/MND concludes that since the Program's effects would not result in a significant impact directly or cumulatively, no mitigation is required. However, in response to the comment and request for mitigation, the Los Angeles River Flows Project Final report (LA River Flows Project Final Report), published after the Draft IS/MND was published is incorporated by reference into this Final IS/MND. This robust hydrological, hydraulic, and ecological study of the Los Angeles River conducted by SCCWRP for SWRCB is designed to develop a set of tools and approaches to help evaluate future flow management scenarios. The Project applies the California Environmental Flow Framework (CEFF) approach to evaluating ecological flow relationships in California streams. The City is participating in the Los Angeles River Flows Project to assess how future flow diversions from WRPs may be best managed to support beneficial uses and management priorities in the river.

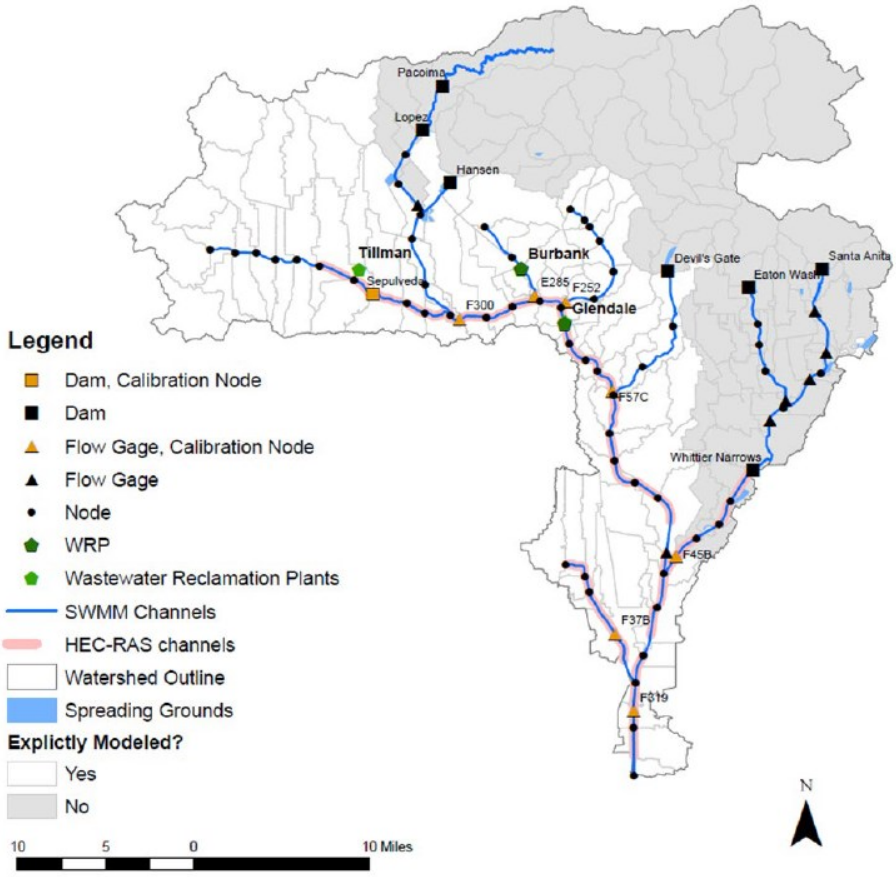
The LA River Flows Project Final Report is presented in this Final IS/MND to respond to this detailed comment. The Report was conducted over a two-year period, including input from numerous stakeholders including both LADWP and CDFW. The Report assists in evaluating the potential significance of the impacts of stormwater capture projects, such as the proposed Project, and includes all of the elements proposed in the comment and recommended mitigation measure. The following responses address each point in the comment:

Comment 5-Ia: Study Reach

1. CDFW recommends LADWP define the study area as a 15-mile reach of the Los Angeles River, bounded by the Los Angeles River's confluence with the Tujunga Wash tributary and proceeding downstream to the river's confluence with the Arroyo Seco tributary. LADWP should identify all sources of flow input within the study area to estimate the total annual and dry season flow. LADWP should assess potential Project related impacts on biological resources within this study reach.

Response to Comment 5-Ia

With respect to the Study Reach, the Los Angeles River Flows Project includes assessments of habitat values in the entire Los Angeles River from the Sepulveda Dam to the Pacific Ocean. This study area is larger than requested in the comment. The model domain included as Figure 5 in the study is included below. The Tujunga Central Branch channel confluences with the Los Angeles River at approximately node F300 shown in in the figure.

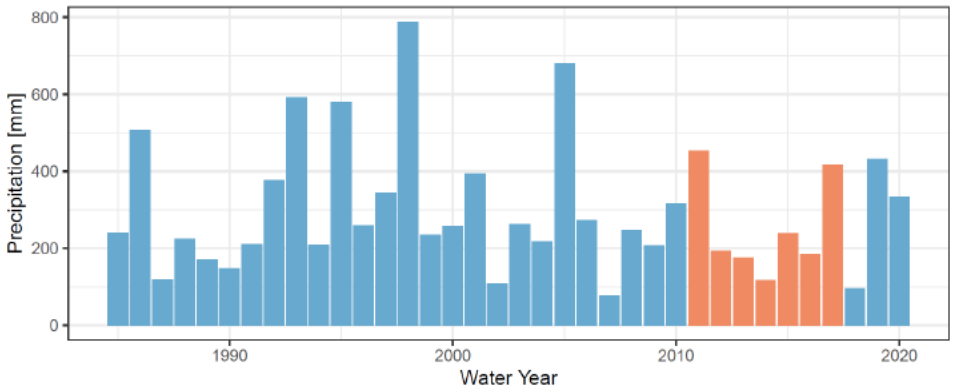


Comment 5-Ib: Hydrology and Hydraulics

2. Under pre-Project (i.e., baseline) conditions, the volume of water flow from the Tujunga Central Branch channel into the 15-mile study reach during a) the wet (November through March); b) the dry season (April through October); and c) above-average and below-average water year (i.e., wet season/above-average water year, wet season/below-average water year, dry season/above-average water year, and dry season/below-average water year). LADWP should clearly define what it would consider to be above-average or below-average rainfall year.

Response to Comment 5-Ib

With respect to Changes to Hydrology and Hydraulics, the Los Angeles River Flows Project includes results from a comprehensive modelling effort that meets all the parameters in the comment. As noted on pages 7 through 9 of the study, estimated flow conditions were modeled using a coupled hydrologic-hydraulic model created in EPA's Storm Water Management Model (SWMM) and the Hydrology Engineering Center's River Analysis System (HEC-RAS). The hydrologic model simulates discharge on the mainstem of the LA River, Compton Creek, and Rio Hondo at an hourly time step from WY 2011 through 2017. The model includes wet season and dry season discharges and uses a dry period to represent conservative flow estimates as shown in the figure below taken from Figure 3 of the study.



The one-dimensional hydraulic model was created by combining existing HEC-RAS models for the LA River and updating channel geometry and Manning's roughness based on field observations and calibration. The hydraulic model was run under steady-state conditions, which were used to develop rating curves to apply to the simulated hydrographs, producing time series hydraulic data for velocity, maximum channel depth, and shear stress.

Some excerpts from the SCCWRP 2021 report that describes the Flows Project are included here:

> *"We estimated current flow condition in the study area using a coupled hydrologic-hydraulic model created in EPA SWMM and HEC-RAS (ES-2). Current hydrologic conditions are defined as the flows and operations that occurred during water year (WY) 2011 to 2017." (SCCWRP, 2021; p ii)*

"Calculated ranges for the wet season and dry season baseflow metrics increase downstream of the three water reclamation plants, illustrating the contributions of discharges from the water reclamation plants…. The wet season metrics, baseflows from the start of the storm season to the start of the dry season, and dry season metrics, base flows from the start of the dry season to the start of the following wet season, are calculated on an annual basis. Typically, the start of the wet season is between November to January and the start of the dry season is between May to July depending on the climatic conditions for a given water year. The broader ranges and higher values of wet season baseflow metrics reflects the contribution of residual stormdrain discharge following storm events. Rio Hondo and Compton Creek both have the lowest wet season and dry season baseflow magnitudes compared to all other reporting nodes on the mainstem." (SCCWRP, 2021; p iv.)

Comment 5-Ic: Hydrology and Hydraulics

3. Under proposed Project conditions, the percent reduction in flow from 1) the Tujunga Central Branch channel tributary and 2) 15-mile study reach for a wet season/above-average water year, wet season/below-average water year, dry season/above-average water year, and dry season/below-average water year.

Response to Comment 5-Ic

As noted Figure ES-5 of the LA River Flows Project Final Report and excerpted below, dry weather storm flow contributions are a key consideration in the study. The graph illustrates average baseline flows with the black line accompanied by a grey band that indicates the 10 percent and 90 percent percentiles. This grey shading following the black line accounts for extremely dry years. In other words, the analysis represented by this graph takes dry year and wet year flows into consideration.

The graph compares potential future combined flow reductions of both dry weather runoff and WRP reductions with habitat value impacts. The large grey box represents habitat suitability for black willow habitat. The graph shows that a small percentage decline in dry weather storm channel flows (even in very dry years) would not reduce flows in the river below suitability thresholds for willow habitat, resulting in no reductions in habitat acreage or habitat quality. (The flow range for typha [cattails] is also included in the graph to show flow requirements for typha across the entire channel width. The flow rate is needed due to the wide channel width. Less flow could support typha within a narrower side channel such as shown in the HEC-RAS cross section provided in response to comment 5-!d below)As a result, the impact would be less than significant from a direct, indirect and cumulative perspective.

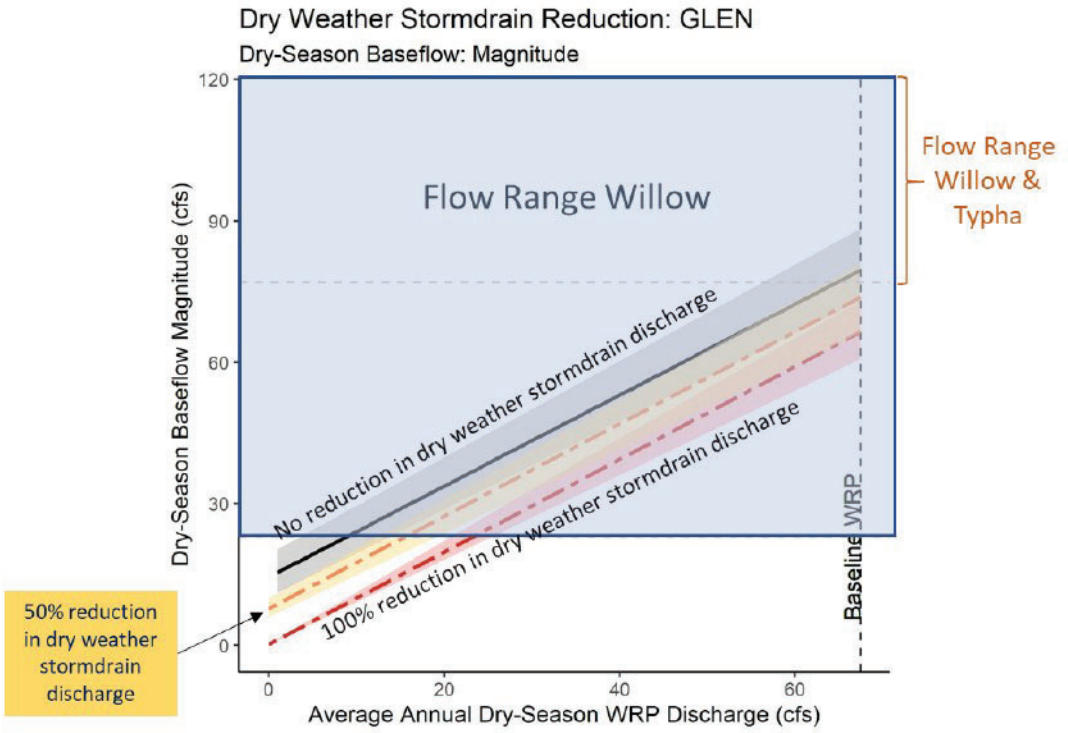


Figure ES-5. Flow-based sensitivity curves illustrating the combined effects of change in WRP discharge and 50% (yellow) and 100% reduction (red) in dry weather stormdrain discharge at GLEN reporting node. Solid and dashed lines represent median values; bounds of the gray and colored bands are the 10th and 90th percentile dry-season instream flows across the modeled period. Optimal flow range in this example is based on a 50% (medium) probability of occurrence of Willow and Typha.

Comment 5-Id: Hydrology and Hydraulics

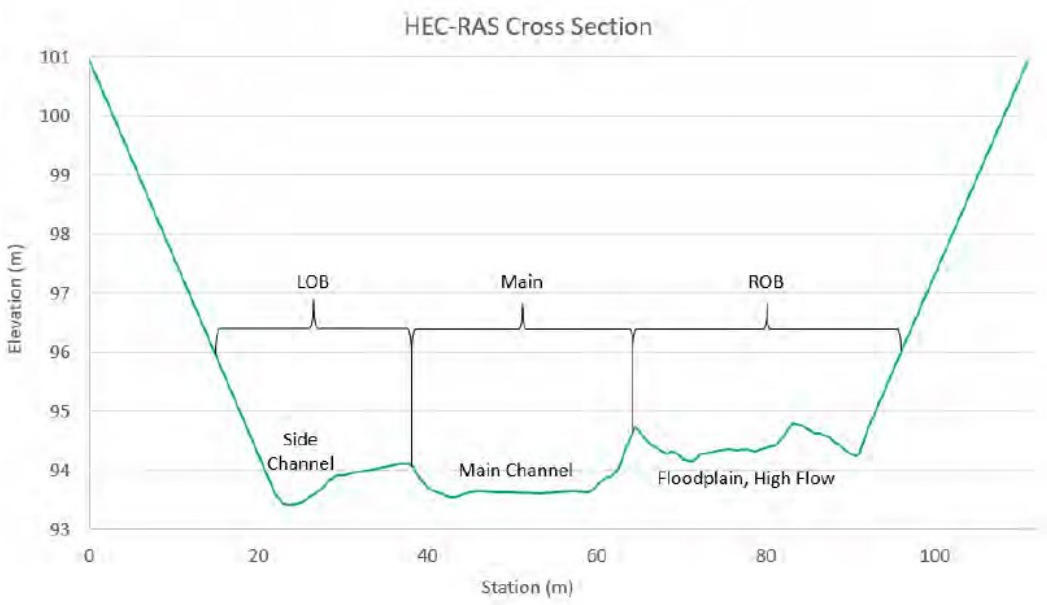
4. An analysis of potential Project-related changes to river hydraulics in both concrete and soft-bottom reaches. This includes water depth (percent change), wetted perimeter (acres gained/lost), and velocity (percent change). CDFW requests a map modeling potential changes to channel hydraulics overlain on a map of plant communities and habitat for sensitive wildlife species and birds.

Response to Comment 5-Id

The Los Angeles River Flows Project published the "Assessment of Aquatic Life Use Needs for the Los Angeles River" (Assessment of Aquatic Life Report) in February 2021 (Stein, 2021). This document provides a detailed summary of hydraulic HEC-RAS modeling done to support the overall program objectives. Over 1,000 cross sections were generated by the HEC-RAS model in the river that show impacts of flow reductions to depth and wetted perimeter (as requested in the comment). Since the roughness of the Los Angeles river changes over time and greatly influences depth and wetted perimeter in specific locations, the model characterized typical channel dimensions and roughnesses to provide meaningful ecological-flow relationships. An excerpt from page 15 of this study is included below:

"Channel hydraulics (i.e., maximum channel depth, velocity, and shear stress) can vastly differ across different sections of the channel at a single site. For every soft-bottom output node in the HEC-RAS model, three output locations were selected at the three most significant morphological zones to capture the variability in hydraulics for each node and were designated as left overbank (LOB), center channel (Main), and right overbank (ROB)"

The figure below provided on page 15 of the Assessment of Aquatic Life Report shows how channel characteristics were accommodated in the ecological-flow relationship analysis provided in the report. Habitat suitability curves were developed to reflect water depth and velocity requirements of existing habitat within these three different parts of the channel: side channel, main channel, and high floodplain. Although the Assessment of Aquatic Life Report does not provide a map of the habitat within the Los Angeles River associated with each of these cross sections, it does inventory the species and habitat values that occur within the soft-bottom portion of the river (the 15-mile segment highlighted in the comment) and presents a detailed HEC-RAS model that provides depth and width impacts associated with flow reductions at specific cross section locations that were also measured in the field for model calibration purposes. The evaluation of habitat suitability within this segment of the river (see graph provided in response to comment 5-F) is then expressed in cubic feet per second (cfs) impacts rather than depth and width in order to provide a meaningful model for the total 15 miles of the soft-bottom segment.



Comment 5-Ie: Hydrology and Hydraulics

5. A quantitative analysis comparing the flow from the Tujunga Wash, Burbank Wastewater Reclamation Plant (WRP), Tillman WRP, Verdugo Wash, and Glendale WRP, and their relative contribution to the hydrograph of the 15-mile study reach.

Response to Comment 5-Ie

As described in responses above, the Assessment of Aquatic Life Report as well as the LA River Flows Project Final Report provide a comprehensive assessment of flow in the Los Angeles River including each of the flow sources noted in the comment. The Assessment of Aquatic Life Report describes average dry season river flows in each segment of the river accounting for contributions from WRPs, groundwater, and storm drain channel inputs.

Comment 5-If: Biological Resources Impact Assessment

1. A map of plant communities and important bird foraging and nesting habitat occurring in the 15-mile study reach. Plant communities should be mapped at the alliance/association level using the Manual of California Vegetation, second edition (Sawyer et al. 2009). Also, CDFW recommends an updated and thorough floristic-based assessment of plant communities, following CDFW's Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities (CDFW 2018).

Response to Comment 5-If

The Assessment of Aquatic Life Report provides an inventory of habitat and species occurrences within the 15-mile segment mentioned in the comment. Figure 34 of the Assessment of Aquatic Life Report reproduced below illustrates which reaches exhibit aquatic and riparian habitat values. Habitat mapping was not conducted as part of the study. Rather, flow ranges supporting habitat suitability for all aquatic values were developed, assuming that the entire 15-mile river segment may exhibit habitat values.

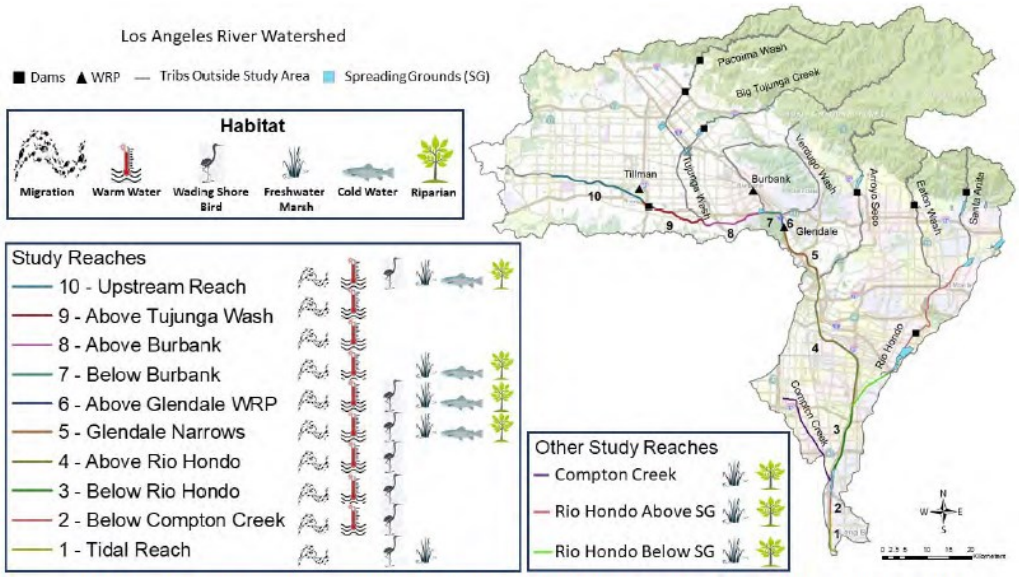


Figure 34. Map of study reaches with identified habitats that could potentially be supported in each reach.

Comment 5-Ig: Biological Resources Impact Assessment

2. A comprehensive list of sensitive and special status plant and wildlife species, and sensitive plant communities, occurring in the 15-mile study reach. CDFW recommends a nine-quad search of the California Natural Diversity Database (CNDDB) for sensitive and special status biological resources that could occur downstream. For each biological resource, provide:

    d. A summary of species-specific habitat requirements;

    e. A discussion as to how the species or plant community may be significantly impacted directly or indirectly through habitat modification, as result of changes to hydrology (reduced flow) and hydraulics (water depth, wetted perimeter, velocity); and,

    f. A quantitative analysis and/or adequate discussion to evaluate whether the Project would result in those significant impacts.

Response to Comment 5-Ig

The Los Angeles River Flows Project Final Report includes a comprehensive inventory and assessment of biological habitat values in the Los Angeles River:

> *"The overarching goal of this project is to consider potential effects of reduced WRP discharge and increased stormwater capture on existing and potential future beneficial uses. Therefore, our analysis included characterizing species and habitats that current occur and those that could reasonably occur in the future (based on a comparison to similar southern California watersheds). "(SCCWRP, 2021; p vii)*
>
> *"The aquatic life use assessment began with a compilation of observational data from the LA River and surrounding watersheds which was used to identify priority focal habitats and endmember species that represent a range of tolerances for each habitat. We then determined the flow conditions necessary to support the life history needs of each species and used those to create "flow-ecology" curves or models relating key hydrologic, hydraulic, and temperature conditions to the probability of occurrence for each focal species, or the probably of being able to complete specific life-history requirements." (SCCWRP, 2021; p vii)*

The Assessment of Aquatic Life Report provides the CNDDB listed species of concern in a concise map excerpted below. Beginning on page 38, the Assessment of Aquatic Life Report provides a summary of "life history needs" for key species within the habitat types. Habitat suitability curves are prepared based on the target vegetation's needs for water as measured by flow in the river (ie., cfs). This analysis defines future water flow reductions as the impact, and provides suitability curves to evaluate significance of the impact. The graph included in response to comment 5-F summarizes the relationship of flow in the river with habitat suitability for willow habitat. Since willow habitat (the key indicator species for riparian values in Southern California) is sustained with substantially less flow than currently exists or is projected to exist with future flow reductions, the contribution of 4 percent flow reduction resulting from the proposed project is considered cumulatively less than significant. That is to say, the scientific analysis contained in the LA Rivers Flows Project Final Report and companion study Assessment of Aquatic Life Report provide the information requested in this comment and support the conclusions of the IS/MND.

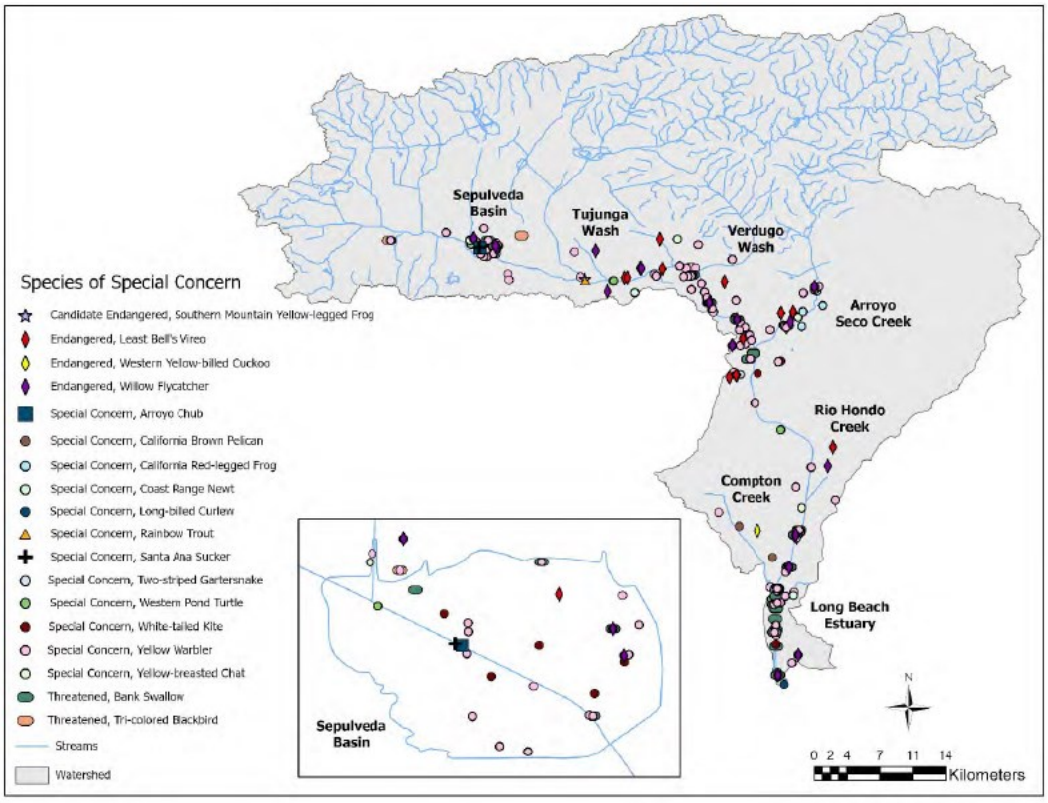

Figure 33. Species observations along the mainstem of the LA River and tributaries included in this study.

Comment 5-Ii: Biological Resources Impact Assessment

3. A discussion of whether diversion devices such as rubber dams would have direct and/or indirect impact on biological resources.

Response to Comment 5-Ii

As described on page 74 of the IS/MND, the proposed diversion structures would not impact any biological resources since they would be installed within either underground storm drain pipes or concrete box channels. The only effect to biological resources that could occur would result from reduced flow to downstream resources. No habitat would be removed as a result of the Project. As described in detail in this response to comment 5-I those effects are determined to be less than significant.

Comment 5-Ij: Biological Resources Impact Assessment

4. An adequate discussion to address how the Project may potentially affect on-going habitat recovery and restoration efforts.

Response to Comment 5-Ij

As described in this response to comment 5-I, the proposed Project would not significantly affect the habitat values within the Los Angeles River. No restoration projects are currently occurring within the river channel that would be adversely affected by the proposed Project.

Comment 5-Ik: Biological Resources Impact Assessment

5. An adequate discussion of Project-related impacts on biological resources in relation to cumulative flow reductions.

Response to Comment 5-Ik

As described in responses to comments 5-F and 5-I, the proposed Project would not significantly affect the habitat values within the Los Angeles River. The LA Flows Project Final Report provides ecology-flow relationship analysis for cumulative reductions including incremental storm flow and WRP reductions. The Project would not contribute to a cumulative reduction in habitat acreage or quality.

Comment 5-J

Mitigation Measure #2: CDFW recommends LADWP develop a discharge operation plan that would always allow sufficient water to pass downstream. CDFW also recommends LADWP develop an Adaptive Management Plan that would direct LADWP to reduce or suspend water diversion if at any point the Project may impact biological resources downstream exceeding a defined threshold/trigger.

Response 5-J

The IS/MND concludes that based on the evidence provided in the existing literature, the proposed Program would not result in significant impacts to biological resources in the Los Angeles River considering the small contribution of flow provided by the Tujunga Central Branch channel. Downstream ecological values would not be measurably affected by the Project. The IS/MND concludes that since the Program's effects would not result in a significant impact directly or cumulatively, no mitigation is required.

LADWP recognizes that the placement of diversion structures within streams and drainages must comply with Fish and Game Code Section 5901 which prohibits installing "any device or contrivance that prevents, impedes, or tends to prevent or impede, the passing of fish up and down stream." Fish and Game Code 5937 requires that operators of dams "allow sufficient water to pass over, around or through the dam, to keep in good condition any fish that may be planted or exist below the dam." Currently, no fish exist within the underground urban storm collection system or concrete box channel. The Tujunga Central Branch channel does not lead to natural stream resources at higher elevation. As a result, the channel would not provide a migratory route for steelhead spawning grounds now or in the future. The entire watershed area is urbanized, mostly within underground storm drain pipes with no ecological values. Future fish migration in the channel is highly unlikely. Furthermore, the instream diversion structures have been designed and operated to allow for storm flows to bypass the diversion mechanism. Each of the diversion structures would include a slide gate. If fish re-colonized the channel in the future these slide gates would be able to allow bypass flows. Therefore, based on the ability to allow for storm flows, the diversion structures would also be able to accommodate fish passage during periods of receding flow when migration opportunities exist, if fish were present. The project would not prevent future habitat restoration or fish occupation in the drainage. The proposed designs would

be compliant with California Fish and Game Code 5901 and 5937. Since no fish are currently in the concrete channel and dry weather flow depths do not accommodate ponding sufficient for fish to survive, there is no reason to prepare a discharge operation plan or adaptive management plan at this time.

See responses to comments 5-G and 5-I.

Comment 5-K

Mitigation Measure #3: CDFW recommends LADWP provide compensatory mitigation at no less than 3:1 for permanent impacts to the concrete-lined Tujunga Central Branch channel due to the installation of diversion structures including (but not limited to) rubber dams and channel drop inlets. CDFW also recommends LADWP provide compensatory mitigation commensurate with the permanent diversion of discharge from Los Angeles River.

Response 5-K

The IS/MND concludes that based on the evidence provided in the existing literature, the proposed Program would not result in significant impacts to biological resources in the Los Angeles River considering the small contribution of flow provided by the Tujunga Central Branch channel. The IS/MND concludes that since the Program's effects would not result in a significant impact directly or cumulatively, no mitigation is required.

The purpose of compensatory mitigation for impacts to waters of the State is to ensure that habitat values and hydrologic functions are maintained at least at the level of the system prior to the initiation of the project. The current concrete channel into which the diversion structures will be placed currently provides no habitat value. Six of the diversion structures will be placed in underground reinforced concrete pipe. The City does not believe that compensation is required for placing diversion structures in underground concrete pipes or concrete channels. As noted on page 74 of the Draft IS/MND, the City will be required to obtain a Lake and Streambed Alteration Agreement (LSAA) from CDFW for the three park projects that will place diversion structures within concrete channels. See response to comment 5-N.

Comment 5-L

Recommendation #1: CDFW recommends the following data and information sources:

- Stream gage data available from Los Angeles County Public Works (LADPW 2021);
- Los Angeles River Master Plan (Geosyntec et al. 2020); and,
- Los Angeles River Flows Project (SWRCB 2019).

Response 5-L

The IS/MND (on page 74) includes annual flow estimates for the Los Angeles River provided by USACE. The data provided in the Draft IS/MND regarding flows is consistent with the river flow data provided in the references cited in the comment. The City is participating in the Los

Angeles River Flows Project which has compiled hydrologic and hydraulic data for the river. The data mentioned in the comment from the County are continuously collected and are indicative of the flow data used by the USACE to ensure flood protection for the City of Los Angeles. The recently published Los Angeles River Master Plan compiles historic river flow data consistent with the USACE and County data. All of this data is consistent with the annual flow totals cited in the IS/MND that document the percentage of flow from the Tujunga Central Branch channel. See response to comments 5-C and 5-G.

Comment 5-M

Recommendation #2: Based on the inadequacy of the Draft IS/MND as elaborated in our preceding comments, CDFW recommends that LADWP revise and recirculate the Draft IS/MND so CDFW may provide more appropriate comments on avoidance, minimization, and mitigation measures (CEQA Guidelines, § 15073.5).

Response 5-M

The comment provides no new information supporting the inadequacy of the analysis in the Draft IS/MND. Re-circulation of the Draft IS/MND is not necessary since existing evidence supports a conclusion that impacts would be less than significant, and that it would be unreasonable to assume otherwise. Furthermore, the study recently published by SCCWRP (SCCWRP 2021b) provides all of the hydrology and hydraulics data and analysis requested in the comment. The study substantiates the conclusions made in the Draft IS/MND, and satisfies CDFW's request for additional information.

Comment 5-N

The Project would potentially alter streams. The Project would divert dry season flow and stormwater. In addition, the Project proposes to install devices within and adjacent to a stream to facilitate water diversion.

The Project would divert water from the Tujunga Central Branch channel and Los Angeles River. The Project proposes to install water diversion structures within or adjacent to the Tujunga Central Branch channel. This includes inflatable rubber dams. Accordingly, the Project may obstruct water flow and change the bed and channel of a stream (confinement).

Fish and Game Code section 1602 requires any person, state or local governmental agency, or public utility to notify CDFW prior to beginning any activity that may do one or more of the following:

- Divert or obstruct the natural flow of any river, stream, or lake;
- Change the bed, channel, or bank of any river, stream, or lake;
- Use material from any river, stream, or lake; or,
- Deposit or dispose of material into any river, stream, or lake.

Response 5-N

The Draft IS/MND states on page 74 that the City would be required to obtain a Streambed Alteration Agreement pursuant to the California Fish and Game Code section 1602. The City will consult with CDFW to obtain a 1602 LSAA for the Program sites that include construction of diversions structures at the Tujunga Central Branch channel. Installation of diversion structures into underground storm drain pipes may require notification, but would not likely result in the need for a full LSAA. The table below identifies LADWP's assumptions of which Program sites may require a LSAA LADWP understands that CDFW will ultimately determine which of these sites will require a LSAA based on information in the initial notification.

Infiltration Gallery Location	Diversion Structure Installation	LSAA Required?
David M. Gonzales Recreation Center	Underground Storm Drain Pipe	No
FernAngeles Park	Underground Storm Drain Pipe	No
Whitsett Fields Park North	Underground Storm Drain Pipe	No
Strathern Park North	Underground Storm Drain Pipe	No
Valley Plaza Park North	Underground Reinforced Concrete Box Culvert	No
Valley Plaza Park South	Concrete Channel	Yes
Alexandria Park	Concrete Channel	Yes
North Hollywood Park	Concrete Channel	Yes
Valley Village Park	Underground Storm Drain Pipe	No

Comment 5-O

Mitigation Measure #1: CDFW has concluded that the [Program] may result in the alteration of streams. As such, the applicant (or "entity") must provide notification to CDFW pursuant to Fish and Game Code, section 1600 *et seq*. Based on this notification and other information, CDFW determines whether an LSAA with the applicant is required prior to conducting the proposed activities. Please visit CDFW's Lake and Streambed Alteration Program webpage to for information about LSAA Notification and online submittal through the Environmental Permit Information Management System Permitting Portal (CDFW 2021a).

Response 5-O

The Draft IS/MND states on page 74 that the City would be required to obtain a LSAA pursuant to the California Fish and Game Code section 1602. A new mitigation measure requiring compliance with regulations is not needed. The City will consult with CDFW to obtain a 1602 LSAA for the Program sites that include construction of diversions structures at the Tujunga Central Branch channel (see table in response 5-N).

Comment 5-P

Mitigation Measure #2: CDFW recommends the LSAA Notification include a hydrological evaluation of the 200, 100, 50, 25, 10, 5, and 2-year frequency storm event for existing and proposed conditions.

Recommendation: CDFW's issuance of an LSAA for a Project that is subject to CEQA will require CEQA compliance actions by CDFW as a Responsible Agency. As a Responsible Agency, CDFW may consider the CEQA document from LADWP for the Project. To minimize additional requirements by CDFW pursuant to Fish and Game Code section 1600 *et seq*. and/or under CEQA, the CEQA document should fully identify the potential impacts to the stream or riparian resources and provide adequate avoidance, mitigation, monitoring, and reporting commitments for issuance of the LSAA. As such, CDFW recommends LADWP consider CDFW's comments and revise the Draft IS/MND. To compensate for any on- and off-site impacts to aquatic and riparian resources, additional mitigation conditioned in any LSAA may include the following: erosion and pollution control measures, avoidance of resources, protective measures for downstream resources, on and/or off-site habitat creation, enhancement or restoration, and/or protection, and management of mitigation lands in perpetuity.

Response 5-P

The Draft IS/MND states on page 74 that the City would be required to obtain a LSAA pursuant to the California Fish and Game Code section 1602(See response to comment 5-N). Hydrologic assessments have been conducted for each of these park projects to determine the capacity of the infiltration galleries and the quantity of feasible wet weather diversions. The rubber dam diversion structures would be lowered when flow rates exceeded the diversion capacity, allowing most of the storm flows in larger storms (including the 2, 5, 10, 25, 50, 100, and 200 year storms) to bypass the diversions. Additional modeling is not necessary to make this conclusion.

Comment 5-Q

CDFW is concerned that the Program may result in significant impacts to bats, including hoary bat (*Lasiurus cinereus*) and silver haired bat (*Lasionycteris Octavian's*).

The Program may result in direct and indirect impacts to bats. Direct impacts include removal of trees and that may provide roosting habitat. Indirect impacts to bats and roosts could result from increased human activity, noise disturbances, dust, vegetation clearing, ground-disturbing activities (e.g., staging, mobilizing, excavating, and grading), and vibrations caused by heavy equipment.

Native and non-native ornamental trees at each park could provide potential roosting habitat for bats. Bats can fit into very small seams, as small as a ¼ inch. Therefore, crevices in buildings and other man-made structures within and adjacent to each park could provide roosting habitat for bats. Despite the availability of potential roosting habitat, the Program concludes that there would not be significant impacts to bats.

Page 60 of Appendix B concludes that while bats "may use western sycamore trees to roost, special-status bat species including hoary bat and silver-haired bat have low potential to occur within all of the project locations, since they are situated in an urban environment with constant ambient nighttime lighting (e.g., street lights, baseball field lights)." The presence of constant ambient lighting may be insufficient to conclude that bats do not occur. Bat response to artificial lighting could vary between species and not all bat species are repelled by light (Longcore and Rich 2004; Opéra et al. 2009). Faster-flying species of bats are attracted to insects that congregate around light sources (Longcore and Rich 2004). Foraging is still possible in the presence of ambient lighting, although forging may be reduced. Also, based on Program site photos in Appendix B, it appears that not all areas within certain parks are illuminated, for instance Valley Plaza North and Valley Plaza South. Based on the above, the probability of bats occurring within each park could be higher than previously concluded.

Accordingly, if bats are present, extra noise, vibration, or the reconfiguration of large objects can lead to the disturbance of roosting bats. Human disturbance can also lead to a change in humidity, temperatures, or the approach to a roost that could force the animals to change their mode of egress and/or ingress to a roost. Modifications to roost sites can have significant impacts on the bats' usability of the roost and can impact the bats' fitness and survivability (Johnston et al. 2004). Although temporary, such disturbances can lead to the abandonment of a maternity roost (Johnston et al. 2004).

Response 5-Q

The Draft IS/MND identifies on page 73 that removal of trees may affect wildlife commonly found in the parks, including bat species, although the Draft IS/MND concludes that the potential for encountering bat roosts in the affected trees is low. Nonetheless, in response to this comment, Mitigation Measure BIO-1 has been modified to require that bat surveys be conducted at each of the Program sites to ascertain whether bats are utilizing the trees to be removed by the Program. With this modification to the BIO-1 mitigation measure, impacts to bats would remain less than significant.

The following text is added to Mitigation Measure BIO-1:

- Prior to removal of trees in any of the Program sites, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The surveys should encompass a minimum buffer area of 100 feet around the Program sites. The results of the surveys will be provided to CDFW. In the event that bat roosts are identified, an additional bat species survey will be conducted using acoustic survey techniques necessary to confirm the species of bat using the area. If the species survey concludes that sensitive bat species are present, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted without prior approval from CDFW.

Comment 5-R

Bats are considered non-game mammals and are afforded protection by State law from take and/or harassment (Fish & G. Code, § 4150; Cal. Code of Regs, § 251.1). Additionally, several bat species are considered Species of Special Concern and meet the CEQA definition of rare, threatened, or endangered species (CEQA Guidelines, § 15380). Take of SSC could require a mandatory finding of significance by the Lead Agency (CEQA Guidelines, § 15065).

Response 5-R

See response to comment 5-Q.

Comment 5-S

Mitigation Measure #1: Where Program-related implementation, construction, and activities would occur near potential roosting habitat for bats, CDFW recommends a qualified bat specialist conduct bat surveys within these areas (plus a 100-foot buffer as access allows) in order to identify potential habitat that could provide daytime and/or nighttime roost sites, and any maternity roosts. CDFW recommends using acoustic recognition technology to maximize detection of bats. A discussion of survey results, including negative findings should be provided to LADWP. Depending on the survey results, a qualified bat specialist should discuss potentially significant effects of the Project on bats and include species specific mitigation measures to reduce impacts to below a level of significance (CEQA Guidelines, § 15125). Surveys, reporting, and preparation of robust mitigation measures by a qualified bat specialist should be completed and submitted to the LADWP prior to any Project-related ground-disturbing activities or vegetation removal at or near locations of roosting habitat for bats.

Response 5-S

Mitigation Measure BIO-1 has been modified to accommodate CDFW suggested mitigation requirements. See response to comment 5-Q.

Comment 5-T

Mitigation Measure #2: If bats are not detected, but the bat specialist determines that roosting bats may be present at any time of year and could roost in trees at a given location, during tree removal, trees should be pushed down using heavy machinery rather than felling with a chainsaw. To ensure the optimum warning for any roosting bats that may still be present, trees should be pushed lightly two or three times, with a pause of approximately 30 seconds between each nudge to allow bats to become active. The tree should then be pushed to the ground slowly and remain in place until it is inspected by a bat specialist. Trees that are known to be bat roosts should not be bucked or mulched immediately. A period of at least 24 hours, and preferable 48 hours, should elapse prior to such operations to allow bats to escape.

Response 5-T

Mitigation Measure BIO-1 provides for bat surveys to confirm that bats are not using the trees. If bats are encountered the City will consult with CDFW to ensure an effective bat removal effort in compliance with the California Fish and Game Code. Bats will not be removed from the Program sites without prior CDFW approval. No additional tree removal techniques would be required. No new mitigation is required.

Comment 5-U

Mitigation Measure #3: If maternity roosts are found, to the extent feasible, work should be scheduled between October 1 and February 28, outside of the maternity roosting season when young bats are present but are yet ready to fly out of the roost (March 1 to September 30).

Response 5-U

Mitigation measure BIO-1 has been modified to require approval from CDFW if bats are found to be using the affected trees. As part of any bat removal effort that may be necessary, seasonality of the removal will be a consideration. No additional mitigation measure is required.

Comment 5-V

Mitigation Measure #4: If maternity roosts are found and LADWP determines that impacts are unavoidable, a qualified bat specialist should conduct a preconstruction survey to identify those trees proposed for disturbance that could provide hibernacula or nursery colony roosting habitat. Acoustic recognition technology should be used to maximize the detection of bats. Each tree identified as potentially supporting an active maternity roost should be closely inspected by the bat specialist no more than 7 days prior to tree disturbance to determine the presence or absence of roost bats more precisely. If maternity roosts are detected, trees determined to be maternity roosts should be left in place until the end of the maternity season. Work should not occur within 100 feet of or directly under or adjacent to an active roost. Work should also not occur between 30 minutes before subset and 30 minutes after sunrise.

Response 5-V

As noted in response to comment 5-Q, mitigation measure BIO-1 has been modified to include bat presence surveys. If bats are found, the mitigation measure would require that the City implement a bat removal program in consultation with CDFW.

Comment 5-W

Devices Impeding Fish. The Program includes installation of rubber dams in the stream channel. Per California Fish and Game Code section 5901, it is unlawful to construct or maintain in any stream any device or contrivance the prevents, impedes, or tends to prevent or impeded, the passing of fish up and downstream. Accordingly, LADWP should coordinate with CDFW prior to commencing the Program to ensure that the Program would comply with Fish and Game Code section 5901.

Response 5-W

The concrete pipeline and channel do not support fish species. The Program would not install any devices that would impede fish migration since fish do not occur in the concrete channel and underground pipeline associated with the Tujunga Central Branch channel. The primary impediment for migrating fish under existing conditions is the velocity of the fast-moving storm water in confined pipelines and channels and the lack of refugia habitat at the channel edges. Nonetheless, the in-channel devices for four of the Program sites will require an LSAA from CDFW. The City will consult with CDFW to ensure diversion structures are compliant with Fish and Game Code section 5901.

Comment 5-X

Southern California Black Walnut Tree (*Juglans californica*). According to page 73 in the Draft IS/MND, one Southern California black walnut tree may be removed at North Hollywood Park. Southern California black walnut is a California Rare Plant Rank 4.2 species. If removal of Southern California black walnut is required, CDFW recommends LADWP replace each tree at no less than 3:1 in consideration of the species rarity, temporal loss of black walnut tree canopy and structure while the tree grows, and potential attrition associated with transplanting. Southern California black walnut trees should be replaced with trees of the same species.

Response 5-X

As noted on pages 78-80 of the Draft IS/MND, any protected tree required to be removed would be replaced with 24-inch box size specimens of the same tree species at a ratio of 4:1 in accordance with the City's Tree Protection Ordinance (No.177404) and the RAP's Tree Preservation Policy.

Comment 5-Y

Tree Replacement. In the greater Los Angeles, urban forests and street trees, both native and some non-native species, provide habitat for a high diversity of birds (Wood and Esaian 2020). Some species of raptors have adapted to and exploited urban areas for breeding and nesting (Cooper et al. 2020). For example, raptors (Accipitridae, Falconidae) such as red-tailed hawks (*Buteo jamaicensis*) and Cooper's hawks (*Accipiter cooperii*) can nest successfully in urban sites. Red-tailed hawks commonly nest in ornamental vegetation such as eucalyptus (Cooper et al. 2020). CDFW recommends planting native tree species preferred by birds. This includes coast live oak (*Quercus agrifolia*) and California sycamore (*Platanus racemosa*) (Wood and Esaian 2020). CDFW recommends Audubon Society's Plants for Birds for more information (Audubon Society 2020).

Response 5-Y

The proposed Program would require the removal of existing trees; however, the removal of trees would be replaced on a trunk caliper size basis, 1-inch replaced to 1-inch removed. As noted on pages 78-80 of the Draft IS/MND, any protected tree required to be removed would be replaced

with 24-inch box size specimens at a ratio of 4:1 in accordance with the City's Tree Protection Ordinance (No.177404) and RAP's Tree Preservation Policy. The replacement trees would be planted near the original tree's location, but if there is not adequate space, the City would coordinate with RAP to identify the closest appropriate locations for new plantings. Mitigation Measure BIO-1 is included in the Draft IS/MND to ensure construction activities do not disturb nesting birds. The requirement to replace mature trees would encourage future nesting opportunities for raptors.

Comment 5-Z

Landscaping. CDFW strongly recommends avoiding non-native, invasive plants. CDFW recommends LADWP restrict use of any species, particularly 'Moderate' or 'High' listed by the California Invasive Plant Council (Cal-IPC 2020a). CDFW recommends LADWP use native species found in naturally occurring vegetation communities within or adjacent to the Program sites. Information on alternatives for invasive, non-native, or landscaping plants may be found on the California Invasive Plant Council's, Don't Plant a Pest webpage for southern California (CalIPC 2020b). The California Native Plant Society's Gardening and Xerces Society's PollinatorFriendly Native Plant Lists webpage has information on native plant species that invite insects and pollinators (CNPS 2020; Xerces Society 2020).

Response 5-Z

As noted in the project description, each of the Program sites will be re-landscaped following the installation of the stormwater capture infrastructure. The landscaping plans will use primarily native species to the extent feasible, per RAP landscaping guidelines.

Comment 5-AA

Move Out of Harm's Way. The proposed Program is anticipated to result in clearing of habitats that support wildlife species common in developed areas. CDFW recommends a qualified biological monitor be on site during initial ground disturbing activities and vegetation removal. The qualified biological monitor should move wildlife of low mobility out of harm's way to avoid wildlife injury or mortality.

Response 5-AA

Mitigation Measure BIO-1 would ensure that impacts to any avian species currently utilizing the Program sites would be avoided. As required in mitigation measure BIO-1, contractors will be encouraged to remove vegetation outside of the affected avian or bat nesting seasons. If nesting season cannot be avoided, the mitigation measure provides for measures to ensure impacts to nesting birds is avoided, including delaying activities if necessary. Since the Program sites do not support any native habitat values, a biological monitor is not recommended other than for nesting birds as required in mitigation measure BIO-1.

Comment 5-AB

Data. CEQA requires that information developed in environmental impact reports and negative declarations be incorporated into a database (i.e., California Natural Diversity Database) which may be used to make subsequent or supplemental environmental determinations [Pub. Resources Code, § 21003, subd. (e)]. Accordingly, please report any special status species detected by completing and submitting CNDDB Field Survey Forms (CDFW 2020b). LADWP should ensure the data has been properly submitted, with all data fields applicable filled out, prior to finalizing/adopting the environmental document. LADWP should provide CDFW with confirmation of data submittal.

Response 5-AB

The City acknowledges that survey data identifying special status species should be provided to the CDFW. Appendix B of the Draft IS/MND includes a Biological Technical Report prepared for the Program.

Comment 5-AC

Mitigation and Monitoring Reporting Plan. CDFW recommends LADWP update the Program's proposed Biological Resources Mitigation Measures and condition the environmental document to include mitigation measures recommended in this letter. CDFW provides comments to assist LADWP in developing mitigation measures that are specific, detailed (i.e., responsible party, timing, specific actions, location), and clear in order for a measure to be fully enforceable and implemented successfully via a mitigation monitoring and/or reporting program (CEQA Guidelines, § 15097; Pub. Resources Code, § 21081.6). LADWP is welcome to coordinate with CDFW to further review and refine the Program's mitigation measures. Per Public Resources Code section 21081.6(a)(1), CDFW has provided LADWP with a summary of our suggested mitigation measures and recommendations in the form of an attached Draft Mitigation and Monitoring Reporting Plan (MMRP; Attachment A).

Response 5-AC

The City will adopt the MMRP when approving the Final IS/MND that will include implementation of Mitigation Measure BIO-1.

Comment 5-AD

The Project, as proposed, would have an impact on fish and/or wildlife, and assessment of filing fees is necessary. Fees are payable upon filing of the Notice of Determination by LADWP and serve to help defray the cost of environmental review by CDFW. Payment of the fee is required for the underlying Project approval to be operative, vested, and final (Cal. Code Regs., tit. 14, § 753.5; Fish & G. Code, § 711.4; Pub. Resources Code, § 21089).

Response 5-AD

The City recognizes that the CDFW filing fee for this IS/MND is applicable and the appropriate funds will be included with the Notice of Determination (NOD) when filed with the County Clerk as required by the CEQA Guidelines Section 15094.

Comment 5-AE

The comment includes a table with all of the CDFW proposed Mitigation Measures outlined in the letter.

Response 5-AE

As discussed in the responses to comments 5-A through 5-AE, no new mitigation measures are needed to ensure less than significant effects to biological resources. The MMRP will include the modified Mitigation Measure BIO-1 that reflects CDFW's comments on bat species.

Letter 6: Diana Nicole (Sunshine Hills Residents Association)

Comment 6-A

The commenter expresses concern regarding the diversion of City plans, codes, and funds from parks and tree-oriented initiatives toward green infrastructure.

Response 6-A

The comment does not state a specific concern about the adequacy of the Draft IS/MND or otherwise comment on the contents of the Draft IS/MND analysis. The comment is noted and will be included in the Program record, but a response is not required pursuant to CEQA.

Comment 6-B

The commenter expresses concern regarding the depletion of existing trees/urban forest resources as a result of the Program.

Response 6-B

Once the stormwater capture infiltration galleries are installed, the Program sites will be returned to preconstruction condition with park improvements. The park improvements will include but are not limited to, the addition of green infrastructure elements such as landscape areas with California native drought-tolerant plant material, new irrigation system, shade trees, new lighting. The proposed Program would require the removal of existing trees; however, the removal of trees would be replaced on a trunk caliper size basis, 1-inch replaced to 1-inch removed. Any protected tree required to be removed would be replaced with 24-inch box trees at a ratio of 4:1 in accordance with the City's Tree Protection Ordinance (No.177404) and the RAP's Tree Preservation Policy. The replacement trees would be planted near the original tree's location, but if there is not adequate space, the City would coordinate with RAP to identify the closest appropriate locations for new plantings.

Comment 6-C

The commenter states that the City's protected trees, groves, and related habitat should be subject to higher conservation standards than those that are provided in the Draft IS/MND.

Response 6-C

The City would comply with the existing tree ordinance. See response to 6-B above.

Letter 7: County of Los Angeles Fire Department

Comment 7-A

The commenter provides introduction of the County of Los Angeles Fire Department.

Response 7-A

The comment is noted and will be included in the Program record.

Comment 7-B

The commenter states that since the Program is within the City, the Program would not impact the County of Los Angeles Fire Department.

Response 7-B

The comment is noted and will be included in the Program record.

Comment 7-C

The commenter states that the Program would not have an impact on the County Fire Department Land Development Unit.

Response 7-C

The comment is noted and will be included in the Program record.

Comment 7-D

The comment states that under the Los Angeles County Oak Tree Ordinance, a permit is required to cut, destroy, remove, relocate, inflict damage or encroach into the protected zone of any tree of the Oak genus which is 25 inches or more in circumference (eight inches in diameter), as measured 4 1/2 feet above mean natural grade.

Response 7-D

The Draft IS/MND describes the Oak Tree Ordinance in detail on pages 78-81. The Draft IS/MND concludes that compliance with the ordinance and RAP's Tree Preservation Policy would ensure that impacts to mature trees would not result in significant impacts.

Comment 7-E

The commenter states that the Program would not impact the Health Hazardous Materials Division.

Response 7-E

The comment is noted and will be included in the project record.

Letter 8: Joanne D'Antonio

Comment 8-A

The commenter raises objection to the proposed removal of any mature and healthy trees, most notably the eucalyptus grove at North Hollywood Park. The commenter states that this park has experienced great tree loss during the drought and that all parks are important for the physical and psychological health of residents. They provide much needed shade in the heat-island-effect-plagued San Fernando Valley. The commenters asks where the wildlife will go during construction and how disruptive construction noise may be.

Commenter would like to see the project redesigned to not remove any trees and references several reports on biodiversity and the loss of trees and tree canopy by the City of Los Angeles and Tree People.

Response 8-A

All nine project sites are currently located within developed City parks containing active recreational facilities or open disturbed areas. All nine park project sites will undergo some enhancements and improvements to the park aesthetic and recreational facilities after the installation of the projects. As stated in the IS/MND page 7, park enhancements and improvements are being designed with input from RAP and the community. The City has been coordinating the design effort with RAP and has engaged the local community through several community meetings to solicit input. Conceptual design drawings were included in the IS/MND as Figures 1-4 through 1-12 to depict the current preliminary design associated with each park project site. The stormwater capture facilities are mainly being placed beneath existing ball fields, where feasible, to minimize impacts to landscaped areas within the park. The designs for each park attempt to minimize tree removal where feasible, but as stated in section 2.4, Biological Resources, some trees will be removed in compliance with the City of Los Angeles Tree Protection Ordinance and the RAP Tree Preservation Policy for protection of native and non-native trees. The City has been in coordination with the RAP Forestry Division and none of the parks' mature or healthy trees will be removed without their approval. Revisions to the park designs are being made in coordination with RAP in order to preserve mature trees and any other trees deemed sacred by RAP. RAP has identified two eucalyptus trees at North Hollywood Park that have died and have requested these be removed as part of the project. Tree surveys will be conducted at each part project site prior to tree removal to determine which trees are protected and which trees would need replacement under the RAP Tree Preservation Policy. Further, Mitigation Measure BIO-1was included to protect wildlife species from impacts during

construction. This mitigation measure will require construction activities to occur outside of the nesting bird season or to avoid or minimize impacts to nesting birds and raptors by requiring preconstruction surveys and nest avoidance and/or monitoring during construction.

The City acknowledges that the City of Los Angeles is considered a biodiversity hotspot. As stated in the 2020 Biodiversity Report prepared by the City of Los Angeles and referenced by the commenter, the Program area would fall primarily within Ecotope 20: Los Angeles River Alluvial Plain. As shown in Appendix B, page 428 of the report, only 0.5 percent of the natural vegetation remains across the ecotope, mostly within the Sepulveda Basin. Riparian vegetation is the dominant remaining type of vegetation and provides nesting habitat for the federally endangered least Bell's vireo (*Vireo bellii pusillus*) and potentially the southwestern willow flycatcher (*Empidonax traillii extimus*). The Program site does not include riparian vegetation and is located in an area that is surrounded by a vegetation alliance characterized by urban/developed, and falls mostly within areas characterized by non-native alliances. In addition, the program site is not located within an area characterized as a natural area by the study, and it is located within areas with higher pollution and population percentiles and a lower habitat quality score due to the urban nature of its location. (City of Los Angeles 2020, pages 436 through 442) As such, although the City of Los Angeles is rich in biodiversity, construction within the Program area would not add to the decline of biodiversity in the area.

Comment 8-B

The commenter requests that all trees in the vicinity of construction be protected with orange fencing and no construction material placed under the drip line.

Response 8-B

The construction impact areas will be clearly delineated and trees to be retained will be clearly marked to avoid any impacts to them. As stated in Response 8-A, the City will comply with the City of Los Angeles Tree Protection Ordinance and the RAP Tree Preservation Policy for protection of native and non-native trees that are being retained onsite and/or are being removed.

The RAP Tree Preservation Policy is the primary regulatory tool that gives direction for orderly protection of specified trees, maintains their value, and avoids significant negative effects to the ecosystem. By assuring preservation and protection through regulation and standards of care, these resources will remain significant contributions to the environment and landscape, and continue to add to the unique character of Los Angeles City Parks. (RAP 2004).

As outlined in the Policies for the Installation and Preservation of Landscaping Trees on Public Property of Recreation and Parks Department, included as Appendix M of the City of Los Angeles RAP Urban Forest Program (RAP 2004), "whenever trees are removed, the existing trees' aggregate diameter, measured at breast height (DBH [diameter at breast height], or 4.5-feet above the ground; multi-trunk trees are to be measured immediately below the lowest trunk) shall be replaced at an equal or greater rate of caliper of new trees. Each one-inch DBH of existing tree shall be replaced with a minimum one-inch caliper new tree." For example, if an existing tree with a DBH of 24 inches is removed, the City would need to replace that tree with a newly

planted trees with a total DBH of 24 inches. The replacement tree can have a DBH of 24 inches or if smaller trees are planted, with a DBH of 2 inches, then 12 trees would be planted, or any combination that equates to the 24-inch DBH being replaced.

Comment 8-C

The commenter is concerned about imported soil and improper soil being substituted for naturally occurring soil which create the best environment for replanting. The commenter asks if there is a plan for replanting at the parks to be done with viable new trees. The commenter states that ideally construction projects such as these would not be happening in our parks.

Response 8-C

As stated on page 38 of the IS/MND, once installation of the stormwater system is complete, soils excavated from the site that are stockpiled on-site would be used to backfill the impact areas. Additional imported soils would be used to regrade as needed to return the project impact areas to pre-project conditions. The City will ensure that the soil to backfill the impacted areas would be suitable for the required design elements as shown on preliminary Figures 1-4 through 1-12 of the IS/MND including landscape planting. The City is coordinating with RAP to ensure compliance with park requirements.

Comment 8-D

The commenter states that a one-month comment period is too short to get input from neighborhood councils.

Response 8-D

The comment is noted and will be included in the project record. The CEQA Guidelines require that MNDs be circulated for a total of 30 days per Section 15105(b).

4.2 Changes Made to the Draft IS/MND

The City has made the following changes to the Draft IS/MND and has incorporated them into the Final IS/MND. These modifications clarify, amplify, or make minor changes to the Draft IS/MND. Revisions to the Draft IS/MND have not resulted in new significant impacts or increased the severity of an impact.

Where the responses indicate additions or deletions to the text of the Draft IS/MND, additions are included as <u>underlined text</u>, deletions as ~~stricken text~~. The changes are listed by section and page number.

4.2.1 Changes Made in Response to Comments

Clarification/Revision

The following modifications have been made to page 75 of the Draft IS/MND to augment Mitigation Measure BIO-1 for the inclusion of bat surveys.

Section 2.4, Biological Resources – Page 75

Mitigation Measure

BIO-1: Special-Status Wildlife Species. Construction activities at any of the nine park project sites could result in impacts to the Cooper's hawk (*Accipiter cooperii*), a California Species of Special Concern, where mature trees are present. Similarly, construction activities may also impact other nesting bird species that may nest in a variety of vegetation as well as man-made structures. Construction activities should occur outside of the avian nesting season. If the avian nesting season cannot be avoided and construction or vegetation removal occurs from February 1 to September 1, the City ~~project~~ shall implement the following to avoid and minimize impacts to nesting birds and raptors:

- During the avian breeding season, a qualified biologist shall conduct a preconstruction avian nesting survey no more than 7 days prior to vegetation disturbance or ground-disturbing activities. If construction begins in the non-breeding season and proceeds continuously into the avian nesting season, no surveys are required. However, if there is a break of 7 days or more in construction activities during the nesting season, a new nesting bird survey shall be conducted before construction begins again.
- The preconstruction survey shall cover all reasonably potential nesting locations on and within 100 feet of the construction areas. A 300-foot radius shall be surveyed in areas containing suitable habitat for nesting raptors, such as trees and utility poles.
- If an active nest is found during the preconstruction avian nesting survey, a qualified biologist shall designate a suitable buffer for all passerine birds and raptor species. The nest site area shall not be disturbed until the nest becomes inactive, the young have fledged, the young are no longer being fed by the parents, the young have left the area, and the young will no longer be impacted by the project. Buffer areas may be increased upon recommendation of a qualified biologist if any endangered, threatened, California Fully Protected, or California Species of Special Concern are identified during preconstruction surveys.
- If the nest(s) are found in an area where ground disturbance is scheduled to occur, the City or its contractor shall avoid the area by delaying ground disturbance in the area until a qualified biologist has determined that the birds have fledged and are no longer reliant upon the nest or parental care for survival.
- Prior to removal of trees in any of the Program sites, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The surveys should encompass a minimum buffer area of 100 feet around the Program sites. The results of the surveys will be provided to CDFW. In the event that bat roosts are identified, an additional bat species survey will be conducted using acoustic survey techniques necessary to confirm the species of bat using the area. If the species survey concludes that sensitive bat species are present, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted without prior approval from CDFW.

4.2.2 Changes Made by the Lead Agency

Clarification/Revision

The following modifications have been made to page 1 of the Draft IS/MND to include The Metropolitan Water District of Southern California (Metropolitan) as a Responsible Agency of the Program.

Section 1.0, Project Description – Page 1

1.1 Introduction

The City of Los Angeles Department of Water and Power (LADWP), Department of Public Works (Bureau of Engineering [BOE]), Los Angeles Sanitation and Environment (LASAN), and City of Los Angeles Department of Recreation and Parks (RAP), collectively referred to herein as the City, propose to implement the Stormwater Capture Parks Program (Program). The Program would include construction of stormwater capture facilities at nine City-owned parks to help capture surface flow and divert stormwater runoff from the Tujunga Wash Central Branch storm drain to recharge the San Fernando Groundwater Basin. All nine parks are located in the east San Fernando Valley along State Route (SR) 170 (**Figure 1-1**); these parks include: David M. Gonzales Recreation Center; Fernangeles Park; Strathern Park North; Whitsett Fields Park North; Valley Plaza Park North; Valley Plaza Park South; Alexandria Park; North Hollywood Park; and Valley Village Park (**Figure 1-2**).

The City is proposing to obtain financial assistance for the park projects through the Stormwater for Recharge Pilot Program (Recharge Pilot) that is administered by The Metropolitan Water District of Southern California (Metropolitan). The Recharge Pilot encourages development and monitoring of new and existing stormwater recharge projects by providing financial incentives for construction and/or monitoring equipment installation of project and supplemental reporting costs.

Metropolitan offers different incentive amounts for the Recharge Pilot based on project type (New Construction or Monitoring Equipment Installation):

<table>
<tr><td>PROJECT TYPE</td><td colspan="2">FUNDING COMPONENTS</td></tr>
<tr><td></td><td>Construction/Installation</td><td>Monitoring & Reporting</td></tr>
<tr><td rowspan="2">Monitoring Equipment Installation</td><td>Up to $350,000 reimbursement for eligible costs</td><td>$50,000/report</td></tr>
<tr><td colspan="2">Maximum of $500,000</td></tr>
<tr><td rowspan="2">New Construction</td><td>Up to 50% reimbursement of eligible costs, max of $850,000</td><td>$50,000/report</td></tr>
<tr><td colspan="2">Maximum of $1 million</td></tr>
</table>

The City has chosen the New Construction Project Type.

As a Responsible Agency, Metropolitan's Board of Directors will review and consider the proposal and environmental documentation prepared by the City in determining whether or not to approve financial assistance for the Program within the Recharge Pilot administrative process.

The Program would be consistent with Metropolitan's commitment to develop Recharge Pilot activities that would provide a better understanding of the connection between captured stormwater and water supply yield.

Clarification/Revision

The following modifications have been made to pages 82 and 83 of the Draft IS/MND to update the name of the library.

Section 2.5, Cultural Resources – Pages 82 and 83

Page 82

Less than Significant Impact with Mitigation. The cultural resources assessment identified three historic architectural resources within the Program area. These resources include: the David M. Gonzales Recreation Center featuring a clubhouse building dating to the park's period of significance of 1950 located approximately 65 feet from the Program construction footprint; North Hollywood Park featuring a maintenance building and pool house (65 feet and 100 feet from the Program construction footprint, respectively) and the North Hollywood Amelia Earhart Regional ~~Branch~~ Library (located 100 feet from the Program construction footprint) dating to the park's period of significance of 1928–1931; and the 170 Freeway Pedestrian Overpass connecting Valley Plaza Park North and Whitsett Fields Park North located approximately 90 feet from a proposed diversion structure in Valley Plaza Park North. The North Hollywood Amelia Earhart Regional ~~Branch~~ Library is National Register of Historic Places (NRHP)-listed and, therefore qualifies as a historical resource.

Page 83

Mitigation Measures

CUL-1: In the event Program designs are further refined and individual Program site components change to encroach more closely than 50 feet to the North Hollywood Amelia Earhart Regional ~~Branch~~ Library (P-19-167303), the pool house and maintenance building associated with North Hollywood Park, the clubhouse associated with the David M. Gonzales Recreation Center, and/or the 170 Freeway Pedestrian Overpass, the City shall retain a qualified architectural historian meeting the Secretary of the Interior's Standards for Architectural History to review design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, the qualified architectural historian shall also assess potential construction-related impacts resulting from ground-borne vibration. Should ground-borne vibrations have the potential to impact the historical resources, the City and the qualified architectural historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources.

SECTION 5
Mitigation Monitoring and Reporting Program

The Mitigation Monitoring and Reporting Program (MMRP) for the proposed Program has been prepared in accordance with Public Resources Code section 21081.6 and State CEQA Guidelines section 15091(d). The City will use this MMRP to track compliance with the Program mitigation measures. The City will consider the MMRP during the certification hearing for the Final IS/MND. The MMRP will incorporate all mitigation measures adopted for the proposed Program.

This MMRP summarizes potentially significant impacts and mitigation commitments identified in the Stormwater Capture Parks Program IS/MND. Table 5-1 provides the MMRP which includes all mitigation measures, monitoring/reporting action, monitoring timing, and responsible person(s) for implementation. Impacts and mitigation measures are presented in the same order as in the IS/MND. The columns in the table provide the following information:

- **Mitigation Measures:** The action(s) that will be taken to reduce the impact to a less-than-significant level.
- **Monitoring /Reporting Action:** This column outlines the appropriate steps to implement and verify compliance with the mitigation measures.
- **Monitoring Timing:** This column indicates the general schedule for conducting each monitoring task, either prior to construction, during construction, and/or after construction.
- **Responsible Person(s):** This column lists the agency responsible for ensuring implementation of the mitigation measure.

TABLE 5-1
MITIGATION MONITORING AND REPORTING PROGRAM - STORMWATER CAPTURE PARKS PROGRAM

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
Air Quality			
AQ-1: Construction of the Program shall incorporate the following conditions: a. For all Program sites: The Program shall use off-road diesel-powered construction equipment that meets or exceeds the CARB and USEPA Tier 4 off-road emissions standards for equipment rated at 50 horsepower or greater and not identified under b or c. below. Such equipment will be outfitted with Best Available Control Technology (BACT) devices, including a CARB-certified Level 3 Diesel Particulate Filter or equivalent. These requirements shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. b. All dumpers/tenders used on-site shall either be certified Tier 3 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent; certified Tier 4 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent, or alternatively fueled (e.g., gasoline, electric, CNG). c. At a minimum, the following equipment shall be electric: air compressors, cement and mortar mixers, concrete saws, forklifts, pumps. Diesel generators shall be replaced with electricity from the grid either permanent or temporary, or replaced with alternative (non-diesel) fuels. d. Equipment requirements identified under a, b, and c above shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment. e. During the site clearing and preparation, grading and excavation, and soil filling, revegetation, and park improvement phases, watering must be conducted a minimum of 4 times per day during dry weather. f. For Valley Plaza Park North only 2 dozers are allowed to operate on any portion of the site at one time. g. The City shall ensure: i. On-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits: 1. 185 trucks when 2 parks are concurrently under construction; 2. 180 trucks when 3 parks are currently under construction; 3. 170 trucks when 4 parks are concurrently under construction; 4. 160 trucks when 5 parks are concurrently under construction; 5. 150 trucks when 6 parks are concurrently under construction; 6. 140 trucks when 7 parks are concurrently under construction. Or;	Site Monitoring	Prior to Construction During Construction	The City Construction Contractor

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
ii. If the fleet is composed of a mix of 2014 or newer trucks, the City shall ensure that on-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits: 1. 240 trucks when 2 parks are concurrently under construction; 2. 230 trucks when 3 parks are concurrently under construction; 3. 220 trucks when 4 parks are concurrently under construction; 4. 210 trucks when 5 parks are concurrently under construction; 5. 200 trucks when 6 parks are concurrently under construction; 6. 190 trucks when 7 parks are concurrently under construction.			
Biological Resources			
BIO-1: Special-Status Wildlife Species. Construction activities at any of the nine park project sites could result in impacts to the Cooper's hawk (*Accipiter cooperii*), a California Species of Special Concern, where mature trees are present. Similarly, construction activities may also impact other nesting bird species that may nest in a variety of vegetation as well as man-made structures. Construction activities should occur outside of the avian nesting season. If the avian nesting season cannot be avoided and construction or vegetation removal occurs from February 1 to September 1, the City shall implement the following to avoid and minimize impacts to nesting birds and raptors: ● During the avian breeding season, a qualified biologist shall conduct a preconstruction avian nesting survey no more than 7 days prior to vegetation disturbance or ground-disturbing activities. If construction begins in the non-breeding season and proceeds continuously into the avian nesting season, no surveys are required. However, if there is a break of 7 days or more in construction activities during the nesting season, a new nesting bird survey shall be conducted before construction begins again. ● The preconstruction survey shall cover all reasonably potential nesting locations on and within 100 feet of the construction areas. A 300-foot radius shall be surveyed in areas containing suitable habitat for nesting raptors, such as trees and utility poles. ● If an active nest is found during the preconstruction avian nesting survey, a qualified biologist shall designate a suitable buffer for all passerine birds and raptor species. The nest site area shall not be disturbed until the nest becomes inactive, the young have fledged, the young are no longer being fed by the parents, the young have left the area, and the young will no longer be impacted by the Program. Buffer areas may be increased upon recommendation of a qualified biologist if any endangered, threatened, California Fully Protected, or California Species of Special Concern are identified during preconstruction surveys. ● If the nest(s) are found in an area where ground disturbance is scheduled to occur, the City or its contractor shall avoid the area by delaying ground disturbance in the area until a qualified biologist has determined that the birds have fledged and are no longer reliant upon the nest or parental care for survival. ● Prior to removal of trees in any of the parks, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The	Site Survey by a Qualified Biologist	Prior to Construction During Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
surveys should encompass a minimum buffer area of 100 feet around the parks. The results of the surveys will be provided to CDFW. In the event that bat roosts are identified, an additional bat species survey will be conducted using acoustic survey techniques necessary to confirm the species of bat using the area. If the species survey concludes that sensitive bat species are present, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted without prior approval from CDFW.			
Cultural Resources			
CUL-1: In the event Program designs are further refined and individual park project components change to encroach more closely than 50 feet to the North Hollywood Amelia Earhart Regional Library (P-19-167303), the pool house and maintenance building associated with North Hollywood Park, the clubhouse associated with the David M. Gonzales Recreation Center, and/or the 170 Freeway Pedestrian Overpass, the City shall retain a qualified architectural historian meeting the Secretary of the Interior's Standards for Architectural History to review design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, the qualified architectural historian shall also assess potential construction-related impacts resulting from ground-borne vibration. Should ground-borne vibrations have the potential to impact the historical resources, the City and the qualified architectural historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources.	Plan Preparation Site Monitoring by a Qualified Archeologist Historian	Prior to Construction During Construction	The City
CUL-2: Prior to the start of ground-disturbing activities, the City shall retain a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (U.S. Department of the Interior, 2008) to carry out the following cultural resources mitigation measures.	Site Monitoring by a Qualified Archeologist	Prior to Construction During Construction	The City
CUL-3: Prior to start of ground-disturbing activities, the qualified archaeologist shall prepare a cultural resources sensitivity training module to be used as part of the City's Worker Environmental Awareness Program (WEAP) training. All construction personnel shall receive sensitivity training prior to beginning work onsite. Construction personnel should be informed of the types of archaeological resources that may be encountered, and of the proper procedures to be enacted in the event of an inadvertent discovery of archaeological resources or human remains. The City should ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.	Personnel Training by a Qualified Archeologist	Prior to Construction During Construction	The City Construction Contractor
CUL-4: Prior to the start of any project-related ground-disturbing activities, the qualified archaeologist shall prepare a Cultural Resources Monitoring Plan (CRMP) in consultation with Tribes that requested consultation under AB52. The CRMP shall stipulate the location and timing of archaeological and Native American monitoring, which shall include all ground-disturbing activities in each of the nine parks that exceed the depths of undocumented fill as documented by geotechnical testing. The qualified archaeologist shall review engineering plans for each of the nine parks to determine where ground-disturbing activities will exceed the depths of undocumented fill at each park to determine the timing and locations of monitoring to be included in the CRMP. The CRMP shall include monitoring protocols to be carried out during Program-related construction. The CRMP shall stipulate that Native	Plan Preparation Site Monitoring by a Qualified Archeologist	Prior to Construction During Construction Post Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
American monitors associated with any of the Tribes that have been consulted with under AB52 be retained to monitor Program-related ground disturbance stipulated in the CRMP. The CRMP shall contain an allowance that the Qualified Archaeologist, based on observations of subsurface soil stratigraphy or other factors during initial grading, and in coordination with the Native American monitor(s) and the City, may reduce or discontinue monitoring as warranted if it is determined that the possibility of encountering archaeological deposits is low. The CRMP shall outline the appropriate measures to be followed in the event of unanticipated discovery of cultural resources during Program implementation, including that all ground disturbance within 100 feet of an unanticipated discovery shall cease until a treatment plan is developed by the qualified archaeologist in coordination with the City and the Native American monitor(s) and which will consider the resources archaeological and tribal value. The CRMP shall identify avoidance as the preferred manner of mitigating impacts to cultural resources. The CRMP shall establish the criteria utilized to evaluate the significance (per CEQA) of the discoveries, methods of avoidance consistent with CEQA Guidelines Section 15126.4(b)(3), as well as identify the appropriate treatment to mitigate the effect of the Program if avoidance of a significant resource is determined to be infeasible. The CRMP will also include provisions for the treatment of archaeological sites that qualify as unique archaeological resources pursuant to Public Resources Code Section 21083.2, which places limits on the costs of mitigation for unique archaeological resources. The plan shall also require the preparation of a monitoring report following the completion. The monitoring report will be submitted to the City for review and comment and a final copy will be filed at the SCCIC. The CRMP shall be submitted to the City and the appropriate Native American representatives who have been consulted with under AB52 for review prior to the start of Program-related ground disturbance.			
CUL-5: In the event of the unanticipated discovery of archaeological materials during Program implementation, all work shall immediately cease in the area (within approximately 100 feet) of the discovery until it can be evaluated by the qualified archaeologist. Construction shall not resume until the qualified archaeologist has conferred with the City and the Native American monitors on the significance of the resource. If it is determined that the discovered archaeological resource constitutes a significant resource, avoidance and preservation in place is the preferred manner of mitigation. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In the event that preservation in place is demonstrated to be infeasible and data recovery through excavation is the only feasible mitigation available, a Cultural Resources Treatment Plan shall be prepared and implemented by the qualified archaeologist in consultation with the City and Native American monitors that provides for the adequate recovery of the scientifically consequential information contained in the archaeological resource. The City shall consult the appropriate Native American representatives in determining treatment and disposition for prehistoric or Native American resources to ensure cultural values ascribed to the resource beyond those that are scientifically important are considered.	Site Monitoring by a Qualified Archeologist	During Construction	The City Construction Contractor
CUL-6: If human remains are encountered, all work shall halt in the vicinity (within 100 feet) of the find and the Los Angeles County Coroner shall be contacted in accordance with PRC Section 5097.98 and Health and Safety Code Section 7050.5. If the County Coroner determines that the remains are Native American, the NAHC will be notified in accordance with Health and Safety Code Section 7050.5, subdivision (c), and PRC Section 5097.98 (as amended by Assembly Bill 2641). The NAHC will designate a Most Likely Descendent (MLD) for the remains per PRC Section 5097.98. Until the landowner has conferred with the MLD, the City shall ensure that the immediate vicinity where the discovery occurred is not disturbed by further activity, is adequately protected according to generally	Site Inspection	During Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
accepted cultural or archaeological standards or practices, and that further activities take into account the possibility of multiple burials.			
Geology and Soils			
GEO-1: The City shall implement the recommendations provided in the geotechnical investigations for each of the park project sites. In the event that the depth to groundwater rises to less than 50 feet bgs as measured in nearby wells, the stormwater infiltration process shall be stopped and the stormwater routed to the surface storm drain system until groundwater depths decrease to below 50 bgs.	Site Monitoring	During Construction Post Construction	The City
GEO-2: Prior to the start of construction activities, the City shall retain a Qualified Paleontologist that meets the standards of the Society of Vertebrate Paleontology (2010) to carry out all mitigation measures related to paleontological resources.	Site Monitoring	Prior to Construction During Construction	The City
GEO-3: Prior to start of any ground-disturbing activities, the Qualified Paleontologist shall contribute to any construction worker cultural resources sensitivity WEAP training materials outlined in Mitigation Measure CUL-2, either in person or via a training module provided to the Qualified Archaeologist. This training shall include information on what types of paleontological resources could be encountered during excavations, what to do in case an unanticipated discovery is made by a worker, and laws protecting paleontological resources. All construction personnel shall be informed of the possibility of encountering fossils and instructed to immediately inform the construction foreman or supervisor if any fossils are unexpectedly unearthed in an area where a paleontological monitor is not present. The City shall ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.	Personnel Training by a Qualified Paleontologist	Prior to Construction During Construction	The City
GEO-4: The Qualified Paleontologist shall supervise a paleontological monitor meeting the Society for Vertebrate Paleontology standards (2010) who shall be present during all excavations exceeding 15 feet. Monitoring shall consist of visually inspecting fresh exposures of rock for larger fossil remains and, where appropriate, collecting wet or dry screened sediment samples of promising horizons for smaller fossil remains. Monitoring can be reduced to part-time inspections or ceased entirely if determined adequate by the Qualified Paleontologist in consultation with the City. Monitoring activities shall be documented in a Paleontological Resources Monitoring Report to be prepared by the Qualified Paleontologist at the completion of construction and shall be provided to the City and filed with the Natural History Museum of Los Angeles County within 6 months of Program completion.	Site Monitoring by a Qualified Paleontologist	During Construction	The City
GEO-5: If a unique geologic feature or paleontological resource is discovered during construction, the paleontological monitor shall be empowered to temporarily divert or redirect grading and excavation activities in the area of the exposed fossil to facilitate evaluation of the discovery. An appropriate buffer area shall be established by the Qualified Paleontologist around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. At the Qualified Paleontologist's discretion and to reduce any construction delay, the grading and excavation contractor shall assist in removing rock samples for initial processing and evaluation of the find. All significant fossils shall be collected by the paleontological monitor and/or the Qualified Paleontologist. Collected fossils shall be prepared to the point of identification and catalogued before they are submitted to their final repository. Any fossils collected shall be curated at a public, non-profit institution with a research interest in the materials, such as the Los Angeles County Natural History	Site Monitoring by a Qualified Paleontologist	During Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
Museum, if such an institution agrees to accept the fossils. If no institution accepts the fossil collection, they shall be donated to a local school in the area for educational purposes. Accompanying notes, maps, and photographs shall also be filed at the repository and/or school.			
Hazards and Hazardous Materials			
HAZ-1: The City or its construction contractor shall ensure that fueling of vehicles or storage of fuel or other chemicals would occur at the furthest extent possible from an existing school site.	Site Monitoring	During Construction	The City Construction Contractor
HAZ-2: For all schools located adjacent to a proposed work area, the City shall coordinate school safety routes, which should include, but not be limited to: ● Maintaining in place all crosswalks along the safe routes to and from the school (for Pacoima Charter School these would include Norris Avenue, Van Nuys Boulevard, Pierce Street, and Herrick Avenue). ● Designating a safe location for school buses and parents to drop off and pick up students. ● Designating a safe parking area for parents to wait for/pick up school children. ● Maintaining sidewalks open to pedestrian traffic during construction. ● Additional safety measures must be adopted during construction to protect the students and the public, including k-railing, secured fencing with screen, clear signing, temporary striping, and a flagger for trucks entering and existing the construction zone. Flaggers should also be considered at crosswalks while students are present. ● Close coordination with the impacted school and the Los Angeles Unified School District for input on the school safety route design and frequent communication during construction. ● Extensive outreach program for the school and the community describing safety measures and construction schedules. ● Restrict construction times to avoid before and after school timeframes while children may be walking to and from school, and while school is in session, as feasible.	Safety Planning Notification Site Monitoring	During Construction	The City Construction Contractor
HAZ-3: The City and its contractor shall conduct further investigation of the nature and extent of landfill materials and contaminated soil at the Strathern Park North site, under the oversight of the City of Los Angeles Local Enforcement Agency (LEA). Undocumented waste shall be delineated and sampled for chemicals of concern related to waste materials. The project shall avoid construction within the delineated waste mass, as feasible. If avoidance of the waste mass is not feasible, the City shall submit a work plan to the LEA that documents the results of the waste delineation, details the specifics of the construction project and how it relates to the onsite waste, describes the procedures for dealing with the waste, and outlines the environmental monitoring procedures that would be implemented during construction. Upon approval of the work plan, the City and its contractor shall remove the landfill materials and any soil with chemical concentrations above regulatory action levels to the satisfaction of the LEA and properly dispose of it at a permitted facility. An as-built report shall be submitted to the LEA after completion of the project.	Site Survey Plan Preparation	Prior to Construction During Construction Post Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
Noise			
NOI-1: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), the contractor shall ensure that all construction equipment, fixed or mobile, are equipped with properly operating and maintained noise shielding and muffling devices, consistent with manufacturers' standards. The contractor shall use muffler systems (e.g., absorptive mufflers) that provide a minimum reduction of 5 dBA compared to the same equipment without an installed muffler system, reducing maximum construction noise levels. The contractor shall keep documentation on-site demonstrating that the equipment has been maintained in accordance with the manufacturers' specifications. The contractor shall also keep documentation on-site verifying compliance with this measure.	Site Monitoring	During Construction	The City Construction Contractor
NOI-2: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), where physically and technically feasible, the contractor shall provide an 8-foot-tall to 20-foot-tall temporary fence or other barrier placed between the project construction area and the sensitive receptor with a performance standard of achieving a 15 dBA noise level reduction at the sensitive receptors. The temporary fence or barrier shall be used during peak noise-generating construction phases when the use of heavy equipment is prevalent. A noise barrier is not required if it would pose a safety risk or unreasonably prevent access to the construction area as deemed by the on-site construction manager, such as in areas that have limited equipment maneuvering space or access.	Temporary Fence/Barrier Site Monitoring	During Construction	The City Construction Contractor
NOI-3: Limit engine idling of construction equipment (e.g., haul trucks, loaders) to a minimum of 200 feet from any boundary of the nearest sensitive receptors.	Site Monitoring	During Construction	The City Construction Contractor
NOI-4: Prior to commencement of construction activities, the City shall notify in writing adjacent residents, schools and businesses near the various park project sites, of proposed construction activities and the tentative schedule. The notices shall also provide a contact person and hotline where local residents, schools, or business owners can call during active construction with questions or comments. The City shall respond to inquiries regarding construction noise and vibration. Notices and construction signs will include a website address which will be updated quarterly and will include Program-related information.	Notification	Prior to Construction	The City
NOI-5: The operation of construction equipment that generates high levels of vibration, such as large bulldozers and loaded trucks, shall be prohibited within 45 feet of the property lines of existing residential and school uses adjacent to the various park project sites. Instead, rubber-tired equipment not exceeding 247 horsepower shall be used in these areas during construction within 45 feet from the sensitive receptor locations.	Site Monitoring	During Construction	The City Construction Contractor
Transportation			
TR-1: For parks where construction would occur outside of park facilities or that may impact roadways surrounding park areas, a CTMP shall be developed by the City or its contractor and approved by LADOT prior to the start of construction. The CTMP may include, but is not limited to the following:	Plan Preparation Site Survey Notification	Prior to Construction During Construction	The City Construction Contractor

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
● Work area traffic control plans for all in-street construction sites to the satisfaction of LADOT, as appropriate prior to the start of any construction work. The plans shall include such elements as the location of any lane closures, restricted hours during which lane closures would not be allowed, local traffic detours, protective devices and traffic controls (such as pavement markings, barricades, cones, flagmen, lights, warning beacons, temporary traffic signals, turning movement restrictions, warning signs), access to abutting properties, and provisions to maintain emergency access through construction work areas. ● The dates and locations where in-street and off-street construction activities are planned. ● If any street segments will be limited to one-way traffic, prepare detour plans over parallel routes. ● Require signage indicated alternative routes where construction will occur. ● Identify and consolidate staging areas for equipment and materials, as feasible. ● Consolidate truck trips, such that multiple worksites can be served, as feasible. ● Promote carpooling among workers. ● Contact emergency service providers in the project vicinity to notify of the location, hours, and duration of in-street construction. Provide advance notice of any lane closures and changes to local access and identity alternative routes where appropriate.

INTERNAL ROLES AND RESPONSIBILITIES FOR THE MITIGATION MONITORING AND REPORTING PROGRAM

November 2024

Mitigation Measure	Name of the Site	Phase of Construction (Design, Construction, Operation)	Need Monitoring during Construction	Responsibility: DWP, DWP Contractor, BOE-Engineering, BOE-EMG, BOE-Contractor	Implementation Method (Monitoring, Specification and Plans) Report	Implementation Record (Report filed with DWP, BOE-EMG, and any responsible regulatory agencies, Specifications and Plans)	Enforcement Responsibility (BOE-PE, BOE-PM, CONTRACTOR, DWP-Mitigation Monitor, PW-CON-AD).
Air Quality							
AQ-1: Construction of the Program shall incorporate the following conditions:							
a. For all Program sites: The Program shall use off-road diesel-powered construction equipment that meets or exceeds the CARB and USEPA Tier 4 off-road emissions standards for equipment rated at 50 horsepower or greater and not identified under b or c. below. Such equipment will be outfitted with Best Available Control Technology (BACT) devices, including a CARB-certified Level 3 Diesel Particulate Filter or equivalent. These requirements shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment.	All Sites	Construction	Yes	BOE Contractor	Specifications Pre-construction verification submitted to BOE with annual recertification	BOE CARB AQMD USEPA	BOE Contractor
b. All dumpers/tenders used on-site shall either be certified Tier 3 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent; certified Tier 4 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent, or alternatively fueled (e.g., gasoline, electric, CNG).	All Sites	Construction	Yes	BOE Contractor	Specifications Pre-construction verification submitted to BOE with annual recertification	BOE CARB	BOE Contractor
c. At a minimum, the following equipment shall be electric: air compressors, cement and mortar mixers, concrete saws, forklifts, pumps. Diesel generators shall be replaced with electricity from the grid either permanent or temporary, or replaced with alternative (non-diesel) fuels.	All Sites	Construction	Yes	BOE Contractor	Specifications Pre-construction verification submitted to BOE with annual recertification	BOE CARB AQMD	BOE Contractor
d. Equipment requirements identified under a, b, and c above shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment.	All Sites	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
e. During the site clearing and preparation, grading and excavation, and soil filling, revegetation, and park improvement phases, watering must be conducted a minimum of 4 times per day during dry weather.	All Sites	Construction	Yes	BOE Contractor	Specifications Monitoring Reporting	AQMD, SWRCB, RWQCB	Contractor
f. For Valley Plaza Park North only 2 dozers are allowed to operate on any portion of the site at one time.	Valley Plaza Park North	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
g. The City shall ensure:							
i. On-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits:	All Sites	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
1. 185 trucks when 2 parks are concurrently under construction;							
2. 180 trucks when 3 parks are currently under construction;							
3. 170 trucks when 4 parks are concurrently under construction;							
4. 160 trucks when 5 parks are concurrently under construction;							
5. 150 trucks when 6 parks are concurrently under construction;							
6. 140 trucks when 7 parks are concurrently under construction. Or;							
ii. If the fleet is composed of a mix of 2014 or newer trucks, the City shall ensure that on-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits:	All Sites	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
1. 240 trucks when 2 parks are concurrently under construction;							
2. 230 trucks when 3 parks are concurrently under construction;							
3. 220 trucks when 4 parks are concurrently under construction;							
4. 210 trucks when 5 parks are concurrently under construction;							
5. 200 trucks when 6 parks are concurrently under construction;							
6. 190 trucks when 7 parks are concurrently under construction.							

Biological Resources							
BIO-1: Special-Status Wildlife Species. Construction activities at any of the nine park project sites could result in impacts to the Cooper's hawk (*Accipiter cooperii*), a California Species of Special Concern, where mature trees are present. Similarly, construction activities may also impact other nesting bird species that may nest in a variety of vegetation as well as man-made structures. Construction activities should occur outside of the avian nesting season. If the avian nesting season cannot be avoided and construction or vegetation removal occurs from February 1 to September 1, the City shall implement the following to avoid and minimize impacts to nesting birds and raptors: During the avian breeding season, a qualified biologist shall conduct a preconstruction avian nesting survey no more than 7 days prior to vegetation disturbance or ground-disturbing activities. If construction begins in the non-breeding season and proceeds continuously into the avian nesting season, no surveys are required. However, if there is a break of 7 days or more in construction activities during the nesting season, a new nesting bird survey shall be conducted before construction begins again. The preconstruction survey shall cover all reasonably potential nesting locations on and within 100 feet of the construction areas. A 300-foot radius shall be surveyed in areas containing suitable habitat for nesting raptors, such as trees and utility poles. If an active nest is found during the preconstruction avian nesting survey, a qualified biologist shall designate a suitable buffer for all passerine birds and raptor species. The nest site area shall not be disturbed until the nest becomes inactive, the young have fledged, the young are no longer being fed by the parents, the young have left the area, and the young will no longer be impacted by the Program. Buffer areas may be increased upon recommendation of a qualified biologist if any endangered, threatened, California Fully Protected, or California Species of Special Concern are identified during preconstruction surveys. If the nest(s) are found in an area where ground disturbance is scheduled to occur, the City or its contractor shall avoid the area by delaying ground disturbance in the area until a qualified biologist has determined that the birds have fledged and are no longer reliant upon the nest or parental care for survival. Prior to removal of trees in any of the parks, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The surveys should encompass a minimum buffer area of 100 feet around the parks. The results of the surveys will be provided to CDFW. In the event that bat roosts are identified, an additional bat species survey will be conducted using acoustic survey techniques necessary to confirm the species of bat using the area. If the species survey concludes that sensitive bat species are present, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted without prior approval from CDFW.	All Sites	Pre-construction and Construction	Yes	DWP/DWP Contractor	Specifications Surveys and Monitoring Report	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
Cultural Resources							
CUL-1: In the event Program designs are further refined and individual park project components change to encroach more closely than 50 feet to the North Hollywood Branch Library (P-19-167303), the pool house and maintenance building associated with North Hollywood Park, the clubhouse associated with the David M. Gonzales Recreation Center, and/or the 170 Freeway Pedestrian Overpass, the City shall retain a qualified architectural historian meeting the Secretary of the Interior's Standards for Architectural History to review design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, the qualified architectural historian shall also assess potential construction-related impacts resulting from ground-borne vibration. Should ground-borne vibrations have the potential to impact the historical resources, the City and the qualified architectural historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources.	North Hollywood Park David M. Gonzales, Valley Plaza Park North	Design/Pre-Construction	TBD	DWP/DWP Contractor	Design review by qualified architectural historian and monitoring, if required.	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
CUL-2: Prior to the start of ground-disturbing activities, the City shall retain a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (U.S. Department of the Interior, 2008) to carry out the following cultural resources mitigation measures.	All sites	Design/Pre-Construction	NA	DWP/DWP Contractor	Retention of qualified archaeologist	BOE	DWP – Environmental Planning and Assessment Group
CUL-3: Prior to start of ground-disturbing activities, the qualified archaeologist shall prepare a cultural resources sensitivity training module to be used as part of the City's Worker Environmental Awareness Program (WEAP) training. All construction personnel shall receive sensitivity training prior to beginning work onsite. Construction personnel should be informed of the types of archaeological resources that may be encountered, and of the proper procedures to be enacted in the event of an inadvertent discovery of archaeological resources or human remains. The City should ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.	All sites	Pre-construction	NA	DWP/DWP Contractor	Pre-construction WEAP training	Training materials/handouts Training records sent to BOE	DWP – Environmental Planning and Assessment Group

CUL-4: Prior to the start of any project-related ground-disturbing activities, the qualified archaeologist shall prepare a Cultural Resources Monitoring Plan (CRMP) in consultation with Tribes that requested consultation under AB52. The CRMP shall stipulate the location and timing of archaeological and Native American monitoring, which shall include all ground-disturbing activities in each of the nine parks that exceed the depths of undocumented fill as documented by geotechnical testing. The qualified archaeologist shall review engineering plans for each of the nine parks to determine where ground-disturbing activities will exceed the depths of undocumented fill at each park to determine the timing and locations of monitoring to be included in the CRMP. The CRMP shall include monitoring protocols to be carried out during Program-related construction. The CRMP shall stipulate that Native American monitors associated with any of the Tribes that have been consulted with under AB52 be retained to monitor Program-related ground disturbance stipulated in the CRMP.	All sites	Design/Pre-construction/ Construction	Yes	DWP/DWP Contractor	Cultural Resources Monitoring Plan/Monitoring	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
CUL-5: In the event of the unanticipated discovery of archaeological materials during Program implementation, all work shall immediately cease in the area (within approximately 100 feet) of the discovery until it can be evaluated by the qualified archaeologist. Construction shall not resume until the qualified archaeologist has conferred with the City and the Native American monitors on the significance of the resource. If it is determined that the discovered archaeological resource constitutes a significant resource, avoidance and preservation in place is the preferred manner of mitigation. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In the event that preservation in place is demonstrated to be infeasible and data recovery through excavation is the only feasible mitigation available, a Cultural Resources Treatment Plan shall be prepared and implemented by the qualified archaeologist in consultation with the City and Native American monitors that provides for the adequate recovery of the scientifically consequential information contained in the archaeological resource. The City shall consult the appropriate Native American representatives in determining treatment and disposition for prehistoric or Native American resources to ensure cultural values ascribed to the resource beyond those that are scientifically important are considered.	All Sites	Construction	Yes	DWP/DWP Contractor	Monitoring/Treatment Plan	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
CUL-6: If human remains are encountered, all work shall halt in the vicinity (within 100 feet) of the find and the Los Angeles County Coroner shall be contacted in accordance with PRC Section 5097.98 and Health and Safety Code Section 7050.5. If the County Coroner determines that the remains are Native American, the NAHC will be notified in accordance with Health and Safety Code Section 7050.5, subdivision ©, and PRC Section 5097.98 (as amended by Assembly Bill 2641). The NAHC will designate a Most Likely Descendent (MLD) for the remains per PRC Section 5097.98. Until the landowner has conferred with the MLD, the City shall ensure that the immediate vicinity where the discovery occurred is not disturbed by further activity, is adequately protected according to generally accepted cultural or archaeological standards or practices, and that further activities take into account the possibility of multiple burials.	All Sites	Construction	Yes	DWP/DWP Contractor	Monitoring/ Notification	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
Geology and Soils							
GEO-1: The City shall implement the recommendations provided in the geotechnical investigations for each of the park project sites. In the event that the depth to groundwater rises to less than 50 feet bgs as measured in nearby wells, the stormwater infiltration process shall be stopped and the stormwater routed to the surface storm drain system until groundwater depths decrease to below 50 bgs.	All Sites	Design, Construction, Operations	Yes	BOE Contractor (construction phase) DWP	DWP monitoring	DWP and shared with BOE and contractor	DWP shared with Contractor during construction and RAP during operations
GEO-2: Prior to the start of construction activities, the City shall retain a Qualified Paleontologist that meets the standards of the Society of Vertebrate Paleontology (2010) to carry out all mitigation measures related to paleontological resources.	All Sites	Design/Pre-Construction	Yes	DWP/DWP Contractor	Retention of qualified Paleontologist	DWP Contracted Archeologist BOE	DWP – Environmental Planning and Assessment Group Contractor
GEO-3: Prior to start of any ground-disturbing activities, the Qualified Paleontologist shall contribute to any construction worker cultural resources sensitivity WEAP training materials outlined in Mitigation Measure CUL-2, either in person or via a training module provided to the Qualified Archaeologist. This training shall include information on what types of paleontological resources could be encountered during excavations, what to do in case an unanticipated discovery is made by a worker, and laws protecting paleontological resources. All construction personnel shall be informed of the possibility of encountering fossils and instructed to immediately inform the construction foreman or supervisor if any fossils are unexpectedly unearthed in an area where a paleontological monitor is not present. The City shall ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.	All Sites	Pre-construction	Yes	DWP/DWP Contractor	Pre-construction WEAP Training	Training materials/handouts Records provided to BOE	DWP – Environmental Planning and Assessment Group

GEO-4: The Qualified Paleontologist shall supervise a paleontological monitor meeting the Society for Vertebrate Paleontology standards (2010) who shall be present during all excavations exceeding 15 feet. Monitoring shall consist of visually inspecting fresh exposures of rock for larger fossil remains and, where appropriate, collecting wet or dry screened sediment samples of promising horizons for smaller fossil remains. Monitoring can be reduced to part-time inspections or ceased entirely if determined adequate by the Qualified Paleontologist in consultation with the City. Monitoring activities shall be documented in a Paleontological Resources Monitoring Report to be prepared by the Qualified Paleontologist at the completion of construction and shall be provided to the City and filed with the Natural History Museum of Los Angeles County within 6 months of Program completion.	All Sites	Construction	Yes	DWP/DWP Contractor	Monitoring	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
GEO-5: If a unique geologic feature or paleontological resource is discovered during construction, the paleontological monitor shall be empowered to temporarily divert or redirect grading and excavation activities in the area of the exposed fossil to facilitate evaluation of the discovery. An appropriate buffer area shall be established by the Qualified Paleontologist around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. At the Qualified Paleontologist's discretion and to reduce any construction delay, the grading and excavation contractor shall assist in removing rock samples for initial processing and evaluation of the find. All significant fossils shall be collected by the paleontological monitor and/or the Qualified Paleontologist. Collected fossils shall be prepared to the point of identification and catalogued before they are submitted to their final repository. Any fossils collected shall be curated at a public, non-profit institution with a research interest in the materials, such as the Los Angeles County Natural History Museum, if such an institution agrees to accept the fossils. If no institution accepts the fossil collection, they shall be donated to a local school in the area for educational purposes. Accompanying notes, maps, and photographs shall also be filed at the repository and/or school.	All Sites	Construction	Yes	DWP/DWP Contractor	Monitoring/Treatment Plan	Report to be filed with DWP Environmental Planning and Assessment Group and shared with BOE	DWP – Environmental Planning and Assessment Group
Hazards and Hazardous Materials							
HAZ-1: The City or its construction contractor shall ensure that fueling of vehicles or storage of fuel or other chemicals would occur at the furthest extent possible from an existing school site.	David M. Gonzales	Construction	No	BOE Contractor	Specifications	BOE	Contractor
HAZ-2: For all schools located adjacent to a proposed work area, the City shall coordinate school safety routes, which should include, but not be limited to:	David M. Gonzales	Construction	Yes	BOE Contractor	Specifications	BOE	BOE Contractor
Maintaining in place all crosswalks along the safe routes to and from the school (for Pacoima Charter School these would include Norris Avenue, Van Nuys Boulevard, Pierce Street, and Herrick Avenue).							
Designating a safe location for school buses and parents to drop off and pick up students.							
Designating a safe parking area for parents to wait for/pick up school children.							
Maintaining sidewalks open to pedestrian traffic during construction.							
Additional safety measures must be adopted during construction to protect the students and the public, including k-railing, secured fencing with screen, clear signing, temporary striping, and a flagger for trucks entering and existing the construction zone. Flaggers should also be considered at crosswalks while students are present.							
Close coordination with the impacted school and the Los Angeles Unified School District for input on the school safety route design and frequent communication during construction.							
Extensive outreach program for the school and the community describing safety measures and construction schedules.							
Restrict construction times to avoid before and after school timeframes while children may be walking to and from school, and while school is in session, as feasible.							
HAZ-3: The City and its contractor shall conduct further investigation of the nature and extent of landfill materials and contaminated soil at the Strathern Park North site, under the oversight of the City of Los Angeles Local Enforcement Agency (LEA). Undocumented waste shall be delineated and sampled for chemicals of concern related to waste materials. The project shall avoid construction within the delineated waste mass, as feasible. If avoidance of the waste mass is not feasible, the City shall submit a work plan to the LEA that documents the results of the waste delineation, details the specifics of the construction project and how it relates to the onsite waste, describes the procedures for dealing with the waste, and outlines the environmental monitoring procedures that would be implemented during construction. Upon approval of the work plan, the City and its contractor shall remove the landfill materials and any soil with chemical concentrations above regulatory action levels to the satisfaction of the LEA and properly dispose of it at a permitted facility. An as-built report shall be submitted to the LEA after completion of the project.	Strathern Park North	Design and Construction Post construction closure report	Yes	BOE Contractor BOE Engineering	Specifications	LADBS LEA BOE	LADBS BOE Contractor

Noise							
NOI-1: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), the contractor shall ensure that all construction equipment, fixed or mobile, are equipped with properly operating and maintained noise shielding and muffling devices, consistent with manufacturers' standards. The contractor shall use muffler systems (e.g., absorptive mufflers) that provide a minimum reduction of 5 dBA compared to the same equipment without an installed muffler system, reducing maximum construction noise levels. The contractor shall keep documentation on-site demonstrating that the equipment has been maintained in accordance with the manufacturers' specifications. The contractor shall also keep documentation on-site verifying compliance with this measure.	All sites	Construction	Yes	BOE Contractor	Specifications	BOE Contractor	Contractor
NOI-2: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), where physically and technically feasible, the contractor shall provide an 8-foot-tall to 20-foot-tall temporary fence or other barrier placed between the project construction area and the sensitive receptor with a performance standard of achieving a 15 dBA noise level reduction at the sensitive receptors. The temporary fence or barrier shall be used during peak noise-generating construction phases when the use of heavy equipment is prevalent. A noise barrier is not required if it would pose a safety risk or unreasonably prevent access to the construction area as deemed by the on-site construction manager, such as in areas that have limited equipment maneuvering space or access.	Applies portions of Fernangeles, Strathern, Valley Plaza South, and Valley Village which may be within 25' of residences.	Construction	Yes	BOE Contractor	Specifications	BOE Contractor	Contractor
NOI-3: Limit engine idling of construction equipment (e.g., haul trucks, loaders) to a minimum of 200 feet from any boundary of the nearest sensitive receptors.	All sites	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
NOI-4: Prior to commencement of construction activities, the City shall notify in writing adjacent residents, schools and businesses near the various park project sites, of proposed construction activities and the tentative schedule. The notices shall also provide a contact person and hotline where local residents, schools, or business owners can call during active construction with questions or comments. The City shall respond to inquiries regarding construction noise and vibration. Notices and construction signs will include a website address which will be updated quarterly and will include Program-related information.	All sites	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
NOI-5: The operation of construction equipment that generates high levels of vibration, such as large bulldozers and loaded trucks, shall be prohibited within 45 feet of the property lines of existing residential and school uses adjacent to the various park project sites. Instead, rubber-tired equipment not exceeding 247 horsepower shall be used in these areas during construction within 45 feet from the sensitive receptor locations.	All sites, especially David M. Gonzalez and North Hollywood	Construction	Yes	BOE Contractor	Specifications	BOE	Contractor
Transportation							
TR-1: For parks where construction would occur outside of park facilities or that may impact roadways surrounding park areas, a CTMP shall be developed by the City or its contractor and approved by LADOT prior to the start of construction. The CTMP may include, but is not limited to the following:	All Sites	Design and Construction	Yes	BOE Contractor	Approved Traffic Control Plans or WATCH Manual	LADOT Contractor BOE-EMG	Contractor
Work area traffic control plans for all in-street construction sites to the satisfaction of LADOT, as appropriate prior to the start of any construction work. The plans shall include such elements as the location of any lane closures, restricted hours during which lane closures would not be allowed, local traffic detours, protective devices and traffic controls (such as pavement markings, barricades, cones, flagmen, lights, warning beacons, temporary traffic signals, turning movement restrictions, warning signs), access to abutting properties, and provisions to maintain emergency access through construction work areas.							
The dates and locations where in-street and off-street construction activities are planned.							
If any street segments will be limited to one-way traffic, prepare detour plans over parallel routes.							
Require signage indicated alternative routes where construction will occur.							
Identify and consolidate staging areas for equipment and materials, as feasible.							
Consolidate truck trips, such that multiple worksites can be served, as feasible.							
Promote carpooling among workers.							
Contact emergency service providers in the project vicinity to notify of the location, hours, and duration of in-street construction. Provide advance notice of any lane closures and changes to local access and identity alternative routes where appropriate.							

November 2024

California Environmental Quality Act (CEQA) Technical Memorandum

I. INTRODUCTION

This memo, prepared by Dr. Jan Green Rebstock, Environmental Affairs Officer with the City's Bureau of Engineering (BOE), analyzes whether additional environmental review is triggered under CEQA Guidelines Section 15162 prior to the BOE approving the Memorandum of Agreement (MOA) for the Stormwater Capture Parks Program (Program). The memo summarizes the changes to the Program, changed circumstances, and new information and determines that there have not been any substantial changes to the Program, substantial changed circumstances, or new information of substantial importance that would lead to the need for a subsequent CEQA document under Public Resources Code section 21151 and CEQA Guidelines section 15162.

II. BACKGROUND

On September 14, 2021, the LADWP Board of Water and Power Commissioners adopted an Initial Study/Mitigated Negative Declaration (IS/MND) and approved the Program. Originally, the Program consisted of nine project sites, all located at RAP facilities. However, due to the lack of funding secured for North Hollywood Park and Alexandria Park, these two projects are not part of this MOA. The remaining seven projects will capture approximately 1,800 acre-feet of stormwater and urban runoff per year from a 3,410-acre drainage area and divert the runoff into subterranean infiltration galleries located under parks for infiltration into the underlying groundwater basin. Overflow for the proposed infiltration system will drain into the existing downstream storm drains, flood control channels, or catch basins. The approved Program under the MOA consists of the following seven projects located in the San Fernando Valley in Council District Nos. 2, 6, and 7: David M. Gonzales Recreation Center, Valley Village Park, Fernangeles Park, Strathern Park, Valley Plaza Park North, Valley Plaza Park South, and Whitsett Fields Park North (Projects).

An electronic copy of the previously adopted MND can be downloaded from this link: https://www.ladwp.com/reports/environmental-reports/archived-environmental-reports.

LADWP, as the City's CEQA Lead Agency, prepared an MND that analyzed all nine original Program sites. The Draft IS/MND was released for public review in January 2021 and the Final IS/MND, prepared July 2021, was adopted by the LADWP Board of Water and Power Commissioners on September 14, 2021, along with the Mitigation Monitoring and Reporting Program (MMRP). A Notice of Determination was filed with the Los Angeles County Clerk on September 21, 2021.

The previously adopted IS/MND concluded that the Program required twenty-two (22) mitigation measures to reduce significant impacts from construction activities to the following resources to a less than significant level: air quality, biological resources, cultural resources, geology and soils, hazards and hazardous materials, noise and transportation. Specifically, the mitigation measures require the following:

- *Air Quality* – For all Program sites, off-road diesel-powered construction equipment rated at 50 horsepower or greater must meet or exceed CARB and USEPA Tier 4 off-road emissions standards; at a minimum, the following equipment shall be electric: air compressors, cement and mortar mixers, concrete saws, forklifts, and pumps. Diesel generators shall be replaced with electricity from the grid either permanent or temporary, or replaced with alternative (non-diesel) fuels. Bid documents must specify equipment requirements consistent with the MMRP and successful contractors must demonstrate the ability to supply such equipment. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit shall be available at the time of mobilization of each piece of equipment. During specified construction phases, watering must be conducted a minimum of four times per day during dry weather. For the Valley Plaza Park North site, only two dozers are allowed to operate on any portion of the site at one time. The City is required to ensure that on-road haul trucks, including delivery trucks and those conveying excavated material, do not exceed daily truck limits as specified in Mitigation Measure AQ-1.

- *Biological Resources* – Mitigation Measure Bio-1 addresses special-status wildlife. Cooper's hawk, a California Species of Special Concern, may be present in the Program area. Construction activities are advised to occur outside of the avian nesting season. However, if that cannot be avoided and construction or vegetation removal occurs from February 1 to September 1, a qualified biologist shall conduct preconstruction nesting surveys, enforce buffers and monitor active nests consistent with the requirements of Mitigation Measure BIO-1. In addition, prior to any tree removals, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The results of the surveys shall be provided to the California Department of Fish and Wildlife (CDFW). In the event that bat roosts are identified, additional bat surveys will be required using acoustic survey techniques. If sensitive bat species are identified, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted with prior approval from CDFW.

- *Cultural Resources* – There are six mitigation measures related to cultural resources. If Program designs encroach more closely than 50 feet to the clubhouse associated with David M. Gonzales Recreation Center, and/or the 170 Freeway Pedestrian Overpass, the City shall retain a qualified architectural historian meeting the Secretary of Interior's Standards for Architectural History to review design plans for conformance with the Secretary of Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, potential construction-related impacts resulting from ground-borne vibration shall be assessed and monitored to ensure damage to historic resources does not occur. See Mitigation Measure CUL-1 for specific details. Prior to the start of ground-disturbing activities, a qualified archeologist shall be retained by the City to prepare a cultural resources sensitivity training for all construction personnel and a Cultural Resources Monitoring Plan (CRMP), in consultation with Tribes that requested consultation under AB 52. The CRMP shall stipulate that Native American

monitors associated with any of the consulting Tribes be retained to monitor Program-related ground disturbance, as directed in the CRMP. See Mitigation Measures CUL-2, CUL-3, CUL-4, CUL-5 and CUL-6 for details.

- *Geology and Soils* – There are five mitigation measures related to geology and soils, requiring implementation of the recommendations provided in the geotechnical investigations for each of the Program sites, including the requirement that should be depth to groundwater rise to less than 50 feet bgs as measured by nearby wells, the stormwater filtration process shall be stopped and the stormwater routed to the surface storm drain system until groundwater depths decrease to below 50 feet bgs. Prior to the start of construction activities, the City shall retain a Qualified Paleontologist, who will contribute to construction worker training, supervise a paleontological monitor that will be present for all excavations exceeding 15 feet, and redirect construction activities and implement a buffer should a unique geologic feature or resource be found. See mitigation measures GEO-1, GEO-2, GEO-3, GEO-4 and GEO-5 for details.

- *Hazards and Hazardous Materials* – There are three mitigation measures (HAZ-1, HAZ-2, and HAZ-3) that require the fueling of vehicles and storage of fuel and other chemicals to occur the furthest extent possible from existing school sites, that the City coordinate school safety routes for all schools located adjacent to Program sites, including ensuring crosswalks are maintained and safe parking for school buses and parents is available, close coordination with LAUSD during construction, and that there is an extensive outreach program for the school and community describing safety measures and construction schedules. In addition, construction times are restricted to avoid before and after school timeframes while children are walking to and from school, and while school is in session, as feasible. Finally, the City and its contractor shall conduct further site investigations of the nature and extent of the landfill materials and contaminated soil at the Strathern Park North site, under the oversight of the City of LA Department of Building and Safety Local Enforcement Agency (LEA), which has authority over all regulated and unregulated landfills in the city. Undocumented waste shall be delineated and sampled for chemicals of concern. The Program shall avoid construction within the delineated waste mass, as feasible. If avoidance is not feasible, the City shall submit a work plan to the LEA that documents the results of the waste delineation, the procedures for addressing the waste, and monitoring during construction. Upon approval of the workplan, the City and its contractor shall remove the landfill materials and any soil with chemical concentrations above regulatory action levels to the satisfaction of the LEA and properly dispose of it at a permitted facility. An as-built report shall be submitted to the LEA after completion.

- *Noise and Vibration* – Five mitigation measures (NOI-1, NOI-2, NOI-3, NOI-4 and NOI-5) address construction activities near noise-sensitive receptors (residences and schools) and vibration impacts. These measures include requiring 8 feet tall to 20 feet tall noise barriers between the construction activities and noise receptors, with a performance standard of achieving 15 dBa noise level reductions and prohibiting large bulldozers and loaded trucks within 45 feet of the property lines of existing residences and schools adjacent to the Program sites. Instead, rubber-tired equipment not exceeding 247 horsepower shall be used in these areas during construction within 45 feet from the sensitive receptor locations.

- *Transportation*- A construction traffic management plan for the Program sites shall be prepared and approved by LADOT prior to the start of construction. See mitigation measure TR-1 for details.

When adopting the IS/MND on September 21, 2024, the LADWP Board of Water and Power Commissioners, made the following findings:

- Implementation of the mitigation measures would lessen the environmental impacts of the proposed Project to a level of less than significant.
- The MMRP was developed to ensure implementation of the mitigation measures in the IS/MND, and LADWP was identified as the responsible party to maintain oversight and act as the monitoring agent.
- The IS/MND was prepared in compliance with CEQA and constitutes a complete, accurate, adequate, and good faith effort at full disclosure under CEQA.
- The Board reviewed and considered the information contained in the IS/MND and that the IS/MND reflects the independent judgement and analysis of the Board.
- The Board finds on the basis of the whole of the record, including the IS/MND, that there is no substantial evidence that the proposed Project, with mitigation incorporated, will have a significant effect on the environment.
- The LADWP Board adopted the IS/MND, required incorporation of the mitigation measures, adopted the MMRP, approved the Project, authorized its construction, and approved the payment for permit, mitigation, and tribal support costs associated with the Project.

RAP approved the MOA with BOE and LADWP to implement the Program on RAP facilities on August 1, 2024. As noted in the MOA with RAP, as each Program site is brought to RAP for review and approval, RAP staff will provide appropriate CEQA recommendations to support actions by the RAP Board.

The Board of Public Works is now being requested to approve an MOA among BOE, LADWP and RAP to fund BOE to facilitate the implementation of the Program, including project management, construction management, CEQA compliance, and project inspection efforts.

III. ENVIRONMENTAL ANALYSIS

As the CEQA Lead Agency, the City has determined that on the basis of the substantial evidence, in light of the whole record, that no substantial changes have occurred to the Program, no substantial changes have occurred regarding the circumstances under which the Program is undertaken that would require major revisions of the adopted IS/MND, and no new information has come to light since adoption of the IS/MND that causes significant effects not discussed in the IS/MND.

Since September 2021 when the LADWP Board adopted the IS/MND and approved the Program, the following changes have occurred:

1. **Program Scope** - Two of the nine Program sites analyzed in the IS/MND, North Hollywood Park and Alexandria Park, are not included in the MOU for implementation at this time due to funding availability.

2. **City Department Responsibilities in the MMRP and Strathern Park North Post Closure Requirements**- There has been some reassignment of duties among City departments regarding which City department (LADWP, BOE, LASAN or RAP) would implement the various mitigation measures. Additionally, some post closure requirements and monitoring duties for the Strathern Park North site have occurred since adoption of the IS/MND in 2021. These changes are noted in the Revised MMRP dated November 2024 and the additional requirements are summarized further in item 5, Strathern Park North Site.
3. **Diversion System Design** - Changes to the diversion system from a rubber dam/side inlet design to a drop inlet structure were made for the Valley Plaza Park South, Alexandria Park, and North Hollywood Park projects. These modifications were made because LA County does not allow the installation of rubber dams within their open channels.
4. **CRMP** – As required by the MMRP, the CRMP was prepared by LADWP for the Program (November 2023). SurveyLA indicates the David M. Gonzalez Recreation Center and North Hollywood Park (currently not included in the MOA) appear eligible for listing in the National Register of Historic Places and the California Register of Historic Places. In addition, the 170 Freeway Pedestrian Overpass connecting Valley Plaza Park North and Whitsett Fields Park North located approximately 20 feet from a proposed diversion structure in Valley Plaza Park North is eligible for local listing. All of these historic architectural resources qualify as historical resources under CEQA. No archaeological resources were identified as a result of the records search or cultural assessment survey (ESA 2021). The CRMP provides further guidance on tribal monitoring, monitoring protocols, and LADWP's role in coordinating the Archeological and Native American monitors. Native American monitors from the consulting tribes, Fernandeño Tataviam Band of Mission Indians Fernandeño Tataviam Band of Mission Indian (FTBMI) and Gabrieleño Band of Mission Indians Kizh Nation (Kizh), will be assigned to monitor project-related ground-disturbing activities that have a reasonable likelihood of encountering tribal resources. All tribal monitoring and training shall be compensated.
5. **Strathern Park North Site** – The MMRP (Section HAZ-3) directed the City to conduct further investigation of the nature and extent of landfill materials and contaminated soil at the Strathern Park North site. An Additional Phase II Site Assessment (ESA) was performed. Based on the presence of waste found at the site, and the recommendations per the ESA, a Waste Management Plan, Community Health and Safety Plan and a Post Closure Land Use (PCLU) plan were prepared. A letter of approval from the LEA was obtained on October 13, 2022. A summary of the site requirements from the LEA follows.

Summary of Strathern Park North Site Requirements – Construction & Operations

Strathern Park North Waste Management Plan (Dated December 7, 2021 and Finalized October 13, 2022) - All soil and construction waste excavated from the site shall become the property and responsibility of the selected Contractor to dispose of properly. If excavated soil material on site is free of observable construction waste, it may be temporarily stockpiled in the vacant northern portion of the transmission line easement area on the west side of the site, if certain conditions are met in coordination with LADWP. All construction waste material excavated on the site by the Contractor from within the footprint of the infiltration gallery, per direction from the LEA, shall be

hauled offsite at the Contractor's expense to a City of LA LEA approved landfill. Since the waste material was mixed with mostly clean sandy soil, the Contractor will be required to sort the waste from the soil on site and thereby substantially reduce the volume of material that must be hauled to a licensed landfill. Sunshine Canyon and Landcaster Landfill are two LEA licensed landfills in the vicinity that will accept construction debris and burned waste material. By employing a reasonable level of care in setting the limits of the ground disturbing activities associated with excavation at the site, it is anticipated that the Contractor should be able to minimize the amount of burned waste material encountered during the excavation for the infiltration gallery. If the Contractor encounters any identifiable burned waste material within the footprint of the infiltration gallery, the material should be sorted separately from the general construction waste material and the LEA should be notified after the material has been removed from the site and disposed of in an LEA-regulated landfill site. The Contractor shall exercise proper care when handling burned waste material (gloves, face masks, eye protection, etc.) and follow Cal OSHA safety procedures for potentially hazardous waste. Burned waste material should be bagged and removed from the site to an LEA- licensed disposal facility. The Contractor shall remove all waste encountered within the excavated footprint of the infiltration gallery. If odiferous waste material becomes exposed during excavation, the Contractor will give priority to promptly removing it from the site. The Contractor shall coordinate his actions with the City-provided construction inspector, who shall be on-site during all excavation operations to verify that all construction waste material is removed from the site by the Contractor. The Contractor will not be required by the LEA to sample stockpiles of excavated material containing construction waste to characterize the material before hauling it off-site to an LEA-licensed landfill. Similarly, the LEA is not requiring the Contractor to stockpile, sample, and characterize any burned waste material that is excavated prior to bagging and hauling it to an LEA-licensed landfill.

Strathern Park North Community Health and Safety Plan (Dated December 7, 2021 and Finalized October 13, 2022) – The Contractor shall be responsible for the following:

- Provide continuous methane gas monitoring during the excavation phase of the Project. Occupants of the neighboring residential properties adjoining the project site shall be promptly notified by the Contractor should any large gas pockets become exposed.
- Any foul-smelling waste uncovered by the Contractor shall be promptly collected, covered, and hauled off site and properly disposed of as quickly as possible.
- The Contractor shall install and maintain adequate perimeter security fencing, motion sensor security lighting and alarms to deter unauthorized individuals from entering the work site during non-work hours for the duration of the project. Security lighting shall be arranged so as not to send furtive light into the residential area on the north side of the project site. The Contractor shall also implement a sign-in register so that only authorized visitors are allowed onto the Project site during working hours.
- The Contractor shall utilize sufficient dust control measures so that only minimal visible dust leaves the site during the excavation and waste sorting operations. Typical dust control measures include use of water spray, placing tarps over stockpiles when they are not being actively worked on, and suspension of earth moving activities when windy conditions develop.
- The Contractor shall be responsible for installing all erosion control measures outlined in the approved project Stormwater Pollution Prevention Plan (SWPPP). The condition of all erosion control measures shall be inspected by the Contractor on a weekly basis, and

after any precipitation event that exceed 0.25 inches of rainfall, and promptly repaired as necessary to maintain its effectiveness.

- Training - The Contractor shall always provide a project Safety Monitor onsite during the excavation phase of the project. The Safety Monitor shall have an up to date 40-hour HAZWOPER training certificate and will be responsible for determining appropriate personal protective equipment (PPE) and clothing for all personnel working on the project and for maintaining gas monitoring equipment.

Strathern Park North Closure Land Use Plan (Revised June 23, 2022) - To reduce the quantity of material that needed to be hauled to a landfill, the selected contractor for the Project will first be required to sort the material on site to separate the construction waste from the soil that it is mixed with. The LEA will also require that three gas monitoring wells be installed around three sides of the infiltration gallery as part of the project. Since construction waste, including burned waste, which is considered to be hazardous by the State of California, was found on the site, a California Solid Waste Information System number (SWIS #) was assigned to the site and it was entered into the statewide data base. The assigned SWIS number for Strathern Park is 19-CR-0835.

Construction of the facility will require excavation of a large pit approximately 26 feet in depth below the ground surface. The Contractor will be responsible for monitoring for methane gas on a daily basis during the excavation phase of the project, and maintain a log of those samplings. If the contractor detects any readings above the Lower Explosive Limit (LEL) for methane, work will be suspended until the readings return to below the LEL.

It is therefore anticipated that within the approximately 1.5 acre footprint of the facility that all construction waste material will be removed from the site and hauled offsite to an LEA-approved landfill, thereby allowing for what the LEA terms a “clean closure” to be achieved for all buried construction wastes found at the site within the footprint of the infiltration gallery.

An additional LEA requirement for the Strathern Park infiltration gallery area calls for the installation of a series of three gas monitoring wells around the perimeter of the infiltration gallery once it has been constructed. The proposed locations for each of these gas monitoring wells are indicated on Figure 1 of the Post Closure Land Use Plan. The intent of placing gas monitoring wells at the three proposed locations is to provide the ability to detect the presence of methane gas accumulation around the perimeter of the infiltration gallery. Once project construction is completed and the project is turned over to the operating City department for maintenance, this City department will also assume primary long-term responsibility for sampling the three gas monitoring wells on a quarterly basis using a gas sniffer probe or other appropriate technology. The results of all sampling performed by this City department will be reported to LEA within 30 days of the sampling run. The LEA will also conduct quarterly sampling of the monitoring wells on their own schedule.

Currently the Closure Land Use Plan identifies LASAN has having these responsibilities. However, it is BOE staff’s understanding that these responsibilities will be transferred to LADWP, as LASAN is no longer involved in the implementation of the Program.

Further, the Post Closure Plan requires that if readings at any of the monitoring wells are determined to exceed the Lower Explosive Limit (LEL) for methane gas, LASAN (to be changed to LADWP) will promptly notify the LEA and RAP, and additional supplemental gas sampling of the interior of the infiltration gallery will then be conducted by opening the access hatches and

inserting gas probes monitoring probes into the structure. If dangerous levels of methane are detected from within the infiltration gallery, an appropriate plan of action for mitigation will be jointly developed by LEA and LASAN (LADWP) and implemented by LASAN (LADWP) as the lead response agency.

Copies of the results from all sampling runs of the gas monitoring wells will be retained in the files of the LEA and RAP for a period of ten (10) years, then discarded. LASAN (LADWP) will be responsible for promptly notifying the LEA and RAP directly if sampling shows methane gas levels in any of the monitoring wells exceeds the LEL for methane and shall have responsibility for coordinating with those agencies in the development of an appropriate corrective action plan. The LEA may, at its discretion, require RAP to extend the gas monitoring program outlined in this document to include additional areas beyond the limits of the infiltration gallery project beneath the surface of the already developed portion of Strathern Park to the east of the proposed infiltration gallery site.

When comparing the previously approved Program and the changes that have occurred since adoption of the IS/MND by LADWP, none of the changes are found to be substantial or outside of the scope of the previously approved Program. The reduction in the scope of the Program implementation, the shifting of the responsibilities among City departments regarding implementation of mitigation measures or site closure requirements, change in diversion system design, and development of the CHMP and Strathern Park North waste management and site closure requirements do not result in any new significant environmental impacts.

As previously discussed, twenty-two (22) mitigation measures are required to reduce impacts from the following resource areas: air quality, biological resources, cultural resources, geology and soils, hazards and hazardous materials, noise and vibration, and transportation. No new significant environmental impacts will occur due to the Program changes. Additionally, there is no substantial increase in the severity of the significant effects identified and mitigated in the previously adopted IS/MND due to the project changes. All environmental impacts continue to be mitigated to less than significant. No new mitigation measures are required. Site closure requirements identified by the LEA for the Strathern Park North site will be added to the project bid specifications and plans as regulatory requirements.

Regarding changed circumstances, since adoption of the IS/MND by the LADWP Board in 2021, there have been several new designations of special status species under the California Endangered Species Act (CESA), including the western burrowing owl, as a candidate species, longfin smelt, and white sturgeon. To address this, BOE has added the following best management practice:

"A biologist shall evaluate the site to assess the vegetation and substrate for potential habitat that may support a protected species. Should potential habitat exist to support a protected or candidate species, the City shall retain a qualified biologist to conduct a habitat assessment and survey and monitoring protocols for the species in accordance with the California Department of Fish and Wildlife (CDFW) and/or U.S. Fish and Wildlife Service (USFWS). If a protected species is confirmed on the project site, the qualified biologist, BOE and LADWP will develop avoidance measures in collaboration with CDFW and/or USFWS to ensure avoidance of impacts to the protected species."

BOE staff biologists will perform this first look at the sites and determine the presence of supporting habitat. City staff will document the results and submit a memo to file. If there is a potential habitat present, DWP can then get a "qualified" biologist to further assess the habitat according to the protocol. This BMP shall be added to the project bid specs administered by BOE as applicable.

Construction activities within the nine project sites are not anticipated to have an impact on special-status species due to the highly disturbed nature of the areas, which include manicured turf grass, playgrounds and baseball fields, and are regularly used by people for recreation. Common species adapted to urban environments are expected to occur, such as raccoon, opossum, squirrel, and various resident and migratory bird species. As previously discussed, a biological mitigation measure for Cooper's Hawk, a special-status species with potential to occur within the proposed project area, is already included. Longfin smelt and white sturgeon habitat are not present at the Program sites.

No new information, present at the time of the original approval by LADWP in September 2021, has come to light that needs to be considered in this analysis.

IV. CONCLUSION

Based on the analysis above, while project changes have occurred since adoption of the IS/MND by LADWP in 2021 and new plans and site closure requirements have been identified for the Strathern Park North site, none of the changes and requirements summarized above require subsequent CEQA documentation, a change in CEQA findings, or new mitigation measures. No new significant environmental impacts will occur due to the Program changes. There is no substantial increase in the severity of the significant effects identified and mitigated in the previously adopted IS/MND due to the project changes and site closure requirements or changed circumstances. All environmental impacts continue to be mitigated to less than significant.

Section 1. Introduction

This Cultural Resource Monitoring Plan (CRMP) describes the approach for cultural resources monitoring for the Stormwater Capture Parks Program Project (Project) located within the City of Los Angeles, California. This CRMP includes the methods of implementation for archeological and Native American monitoring as well as treatment protocol for the inadvertent discovery of cultural resources and human remains pursuant to state and local requirements and regulations where applicable and consistent with the mitigation measures for archaeological resources and Native American resources as outlined in the *LADWP Stormwater Capture Parks Program, City of Los Angeles, California Final Initial Study/Mitigated Negative Declaration (*ESA 2021*)* and the *Comprehensive Cultural Resource Monitoring Plan* (Dudek 2023).

Section 2. Project Description

The Project includes the capture of stormwater surface flows in the Program area within the City of Los Angeles, diverting the runoff from the Tujunga Wash Central Branch storm drain to recharge the San Fernando Groundwater Basin. Underground infiltration galleries will be constructed within open space portions of each of the nine parks and other appurtenances will be installed to connect to and manage flow from existing storm drains. The project areas within each park will be fully restored to maintain their recreational uses following installation. No existing park buildings or structures will be impacted or otherwise modified during construction. The Program has a tributary area of 5,690 acres with an estimated yield of 2,900-acre feet per year (AFY) and will improve water quality by reducing pollutants such as trash, bacteria, and metals from entering the Los Angeles River. The Project is designed to help meet the goals of LADWP's Stormwater Capture Master Plan, 2015 Urban Water Management Plan and the Mayor's 2015 Sustainable City Plan with the following objectives: recharge the groundwater basin, alleviate localized flooding in the area, improve water quality of stormwater runoff, and peak flow attenuation at downstream water bodies (i.e. Los Angeles River). Other ancillary benefits include park improvements, improved recreation opportunities, and Environmental educational opportunities to local residents and students.

Section 3. Project Conditions

Based on the Final Mitigated Negative Declaration, engineering and design plans as well as geotechnical reports were carefully reviewed to determine the existence and depth of fill and native soils in relation to the estimated depths of disturbances incurred as a result of Project implementation. The following table includes a summary of the findings:

TABLE 1. PROJECT CONDITIONS BASED ON ENGINEERING PLANS AND GEOTECHNICAL REPORTS

PARK	APN	DEPTH OF FILL	DEPTH OF NATIVE SOILS	PREVIOUS DEPTH OF DISTURBANCE	ESTIMATED DEPTH OF DISTURBANCE
David M. Gonzalez Recreation Center	2534-024-905	0-6 ft	alluvium at 1 - 50.7 ft	unknown	29 ft
Fernangeles Park	2634-011-900	0-2 ft	alluvium at 1.5 - 58 ft	unknown	18 ft
Strathern Park North	2308-010-901	0-13 ft	alluvium at 1.5 - 70.5 ft	construction debris found 0-10.25 ft.	23 ft
Whitsett Fields Park North	2324-035-900	0-4 ft	alluvium at 0 - 70.9 ft	unknown	23 ft
Valley Plaza Park North	2321-006-902	~5 ft	alluvium at ~5 - 52 ft	unknown	26 ft
Valley Plaza Park South	2322-001-902	~5 ft	~5 - 48.98 ft	unknown	24 ft
Alexandria Park	2334-002-900	~5 ft	~5 - 81.5 ft	unknown	24 ft
North Hollywood Park	2350-011-901 and -903	5 ft	alluvium at 5 - 81.5	5 ft	27 ft
Valley Village Park	2353-001-902	1 ft	alluvium at 1 - 76.5 ft	1 ft	25 ft

Section 4. Cultural Resources

4.1 Archeological and Historic Resource Sensitivity

Results of the California Historic Resources Information System (CHRIS) records search indicate that twenty-six (26) previously recorded resources exist within 0.5-mile radius of the nine parks including two (2) historic-period sites, one (1) historic-period linear resource, and twenty-three (23) historic built environment resources consisting of residential, commercial, and governmental buildings (Strauss et al. 2020). Of these twenty-six (26) resources, only one is located within the Project site, specifically, North Hollywood Park. This resource is a historic built environment architectural resource consisting of a one-story red brick building designed by architects Weston and Weston and constructed in 1930 and is listed in the National Register of Historic Places (NRHP) and qualifies as a historical resource under CEQA. This structure currently serves as the North Hollywood Branch of the Los Angeles Library System and is located on the northwest corner of the Tujunga Avenue and Magnolia Boulevard intersection approximately 100 feet from one of the seven proposed infiltration galleries. A review of SurveyLA identified three additional resources located within or very near the Project site including David M. Gonzalez Recreation Center consisting of a clubhouse building located approximately 65 feet from the project area; the North Hollywood Park maintenance building and pool house located 65 feet and 100 feet from the Project site respectively; and the 170 Freeway Pedestrian Overpass connecting Valley Plaza Park North and Whitsett Fields Park North located approximately 20 feet from a proposed diversion structure in Valley Plaza Park North. SurveyLA indicates the David M. Gonzalez Recreation

Center and North Hollywood Park appear eligible for listing in the NRHP and the California Register of Historic Resources (CRHR) under Criteria A/1 and C/1 (NRHP Status Codes 3S and 3S2) and are eligible for local listing under Criteria 1 and 3 (NRHP Status Code 5S3) and that the 170 Freeway Pedestrian Overpass is eligible for local listing under Criteria 1 and 3 (NRHP Status Code 5S3). All four historic architectural resources mentioned qualify as historical resources under CEQA. No archaeological resources were identified as a result of the records search or cultural assessment survey (ESA 2021).

4.2 Project Mitigation Measures

MM - CUL - 1	In the event Program designs are further refined and individual park project components change to encroach more closely than 50 feet to the North Hollywood Amelia Earhart Regional Library (P-19-167303), the pool house and maintenance building associated with North Hollywood Park, the clubhouse associated with the David M. Gonzales Recreation Center, and/or the 170 Freeway Pedestrian Overpass, the City shall retain a qualified architectural historian meeting the Secretary of the Interior's Standards for Architectural History to review design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, the qualified architectural historian shall also assess potential construction-related impacts resulting from ground-borne vibration. Should ground-borne vibrations have the potential to impact the historical resources, the City and the qualified architectural historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources.
MM - CUL - 2	Prior to the start of ground-disturbing activities, the City shall retain a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (U.S. Department of the Interior, 2008) to carry out the following cultural resources mitigation measures.
MM - CUL - 3	Prior to start of ground-disturbing activities, the qualified archaeologist shall prepare a cultural resources sensitivity training module to be used as part of the City's Worker Environmental Awareness Program (WEAP) training. All construction personnel shall receive sensitivity training prior to beginning work onsite. Construction personnel should be informed of the types of archaeological resources that may be encountered, and of the proper procedures to be enacted in the event of an inadvertent discovery of archaeological resources or human remains. The City should ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.
MM - CUL - 4	Prior to the start of any project-related ground-disturbing activities, the qualified archaeologist shall prepare a Cultural Resources Monitoring Plan (CRMP) in consultation with Tribes that requested consultation under AB52. The CRMP shall stipulate the location and timing of archaeological and Native American monitoring, which shall include all ground-disturbing activities in each of the nine parks that exceed the depths of undocumented fill as documented by geotechnical testing. The qualified archaeologist shall review engineering plans for each of the nine parks to determine where ground-disturbing activities will exceed the depths of undocumented fill at each park to determine the timing and locations of monitoring to be included in the CRMP. The CRMP shall include

	monitoring protocols to be carried out during Program-related construction. The CRMP shall stipulate that Native American monitors associated with any of the Tribes that have been consulted with under AB52 be retained to monitor Program-related ground disturbance stipulated in the CRMP. The CRMP shall contain an allowance that the Qualified Archaeologist, based on observations of subsurface soil stratigraphy or other factors during initial grading, and in coordination with the Native American monitor(s) and the City, may reduce or discontinue monitoring as warranted if it is determined that the possibility of encountering archaeological deposits is low. The CRMP shall outline the appropriate measures to be followed in the event of unanticipated discovery of cultural resources during Program implementation, including that all ground disturbance within 100 feet of an unanticipated discovery shall cease until a treatment plan is developed by the qualified archaeologist in coordination with the City and the Native American monitor(s) and which will consider the resources archaeological and tribal value. The CRMP shall identify avoidance as the preferred manner of mitigating impacts to cultural resources. The CRMP shall establish the criteria utilized to evaluate the significance (per CEQA) of the discoveries, methods of avoidance consistent with CEQA Guidelines Section 15126.4(b)(3), as well as identify the appropriate treatment to mitigate the effect of the Program if avoidance of a significant resource is determined to be infeasible. The CRMP will also include provisions for the treatment of archaeological sites that qualify as unique archaeological resources pursuant to Public Resources Code Section 21083.2, which places limits on the costs of mitigation for unique archaeological resources. The plan shall also require the preparation of a monitoring report following the completion. The monitoring report will be submitted to the City for review and comment and a final copy will be filed at the SCCIC. The CRMP shall be submitted to the City and the appropriate Native American representatives who have been consulted with under AB52 for review prior to the start of Program-related ground disturbance.
MM - CUL - 5	In the event of the unanticipated discovery of archaeological materials during Program implementation, all work shall immediately cease in the area (within approximately 100 feet) of the discovery until it can be evaluated by the qualified archaeologist. Construction shall not resume until the qualified archaeologist has conferred with the City and the Native American monitors on the significance of the resource. If it is determined that the discovered archaeological resource constitutes a significant resource, avoidance and preservation in place is the preferred manner of mitigation. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In the event that preservation in place is demonstrated to be infeasible and data recovery through excavation is the only feasible mitigation available, a Cultural Resources Treatment Plan shall be prepared and implemented by the qualified archaeologist in consultation with the City and Native American monitors that provides for the adequate recovery of the scientifically consequential information contained in the archaeological resource. The City shall consult the appropriate Native American representatives in determining treatment and disposition for prehistoric or Native American resources to ensure cultural values ascribed to the resource beyond those that are scientifically important are considered.
MM - CUL - 6	If human remains are encountered, all work shall halt in the vicinity (within 100 feet) of the find and the Los Angeles County Coroner shall be contacted in accordance with PRC

	Section 5097.98 and Health and Safety Code Section 7050.5. If the County Coroner determines that the remains are Native American, the NAHC will be notified in accordance with Health and Safety Code Section 7050.5, subdivision (c), and PRC Section 5097.98 (as amended by Assembly Bill 2641). The NAHC will designate a Most Likely Descendent (MLD) for the remains per PRC Section 5097.98. Until the landowner has conferred with the MLD, the City shall ensure that the immediate vicinity where the discovery occurred is not disturbed by further activity, is adequately protected according to generally accepted cultural or archaeological standards or practices, and that further activities take into account the possibility of multiple burials.

Section 5. Archaeological and Native American Monitoring

5.1 Personnel and Organization

As lead agency, LADWP coordinates monitoring operations and is ultimately responsible for ensuring compliance with the project CRMP. The LADWP Environmental Project Manager will represent LADWP and oversee monitoring. In support of MM-CUL-4, the qualification and organization of monitoring efforts are as follows:

Monitoring Oversight - All monitoring activities shall be managed and overseen by a Project's Senior Archaeologist/Principal Investigator, who has significant experience in both historic and prehistoric archaeological resources within California and specifically within the southern California region. Response and treatment of resources determined to be built environment in nature shall be addressed by Project's Architectural Historian. The Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian, or their representative, shall perform regular communication with the onsite monitor/s to ensure adherence to the protocols and treatment plans outlined in the CRMP; coordinate monitoring needs and shall be available to respond to inadvertent discoveries or suspected discoveries of archaeological material. The Project's Senior Archaeologist/Principal Investigator shall communicate regularly with the monitoring staff, Tribal representatives and LADWP staff and if necessary, with construction staff, to ensure that appropriate monitors are present for all ground disturbing activities that require monitoring in accordance with the requirements outlined herein.

Archaeologist monitors shall be equipped with technology capable of appropriate data collection and will record the location of all areas monitored, discoveries of archaeological resources and sufficient notes for documentation of monitoring efforts. These forms shall be kept confidential and only available to LADWP staff and tribal representatives upon request. The Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian will communicate with LADWP, as appropriate, to manage monitoring activities and to respond quickly and appropriately to discoveries in the field. All transmittals of monitoring forms and data shall be conducted either by a secure and encrypted electronic delivery system or by delivery of a hard copy to the requesting and eligible entity.

Archaeological Monitor – The role of the archaeological monitor is to:

- Observe all ground disturbance activities as instructed by the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Senior Architectural Historian;

- Instruct construction personnel to suspend ground disturbance activities upon discovery or suspected discovery of cultural material;
- Immediately perform initial assessment of potential cultural material;
- Notify the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Senior Architectural Historian immediately if assessment results in a determination that the potential cultural material requires further examination or evaluation;
- Delineate and maintain 100-foot buffer boundary around cultural discoveries to ensure its clear visibility until boundary in no longer considered necessary;
- Completion of daily monitoring logs and transmittal of logs to Project's Senior Archaeologist/Principal Investigator and if applicable, the Project's Senior Architectural Historian; and
- Confer with construction foreman at beginning and end of each day to determine monitoring needs and report to Project's Senior Archaeologist/Principal Investigator and if applicable, the Project's Senior Architectural Historian any changes in the construction schedule resulting in monitoring needs.

The Archaeological and Native American monitors shall have the authority to temporarily divert construction in order to inspect exposures and possible discoveries. As instructed by the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Senior Architectural Historian, the monitors shall be present at morning tailboard meetings and other necessary meetings with the construction foreman to determine what activities are taking place, and transmit this information to the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Senior Architectural Historian for development of a weekly schedule for monitoring. The archaeological monitor shall be overseen and report directly to the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Senior Architectural Historian. The archaeological monitor present during ground disturbing activities shall have experience with both historic and prehistoric cultural sites located within the general Los Angeles area (at the very least Southern California) and preferably a minimum of two years of experience with Native American archaeological sites within the local area.

Native American Monitor - The Native American monitor(s) from the tribe(s) which consulted on this project shall be qualified by their tribe to monitor tribal cultural resources. Native American monitors from the consulting tribes, Fernandeño Tataviam Band of Mission Indians Fernandeño Tataviam Band of Mission Indian (FTBMI) and Gabrieleño Band of Mission Indians Kizh Nation (Kizh), will be assigned to monitor project-related ground-disturbing activities that have a reasonable likelihood of encountering tribal resources. All monitoring and training will be compensated.

The LADWP Environmental Project Manager will identify ground-disturbing activities that may have the potential to impact tribal cultural resources. Native American monitoring will be conducted during ground-disturbing activities, including grading and trenching, at the discretion of the LADWP Environmental Project Manager with the input of each tribe. LADWP will communicate schedules and other information to each Tribe's designated monitoring coordinator or monitor.

Native American monitoring will be conducted by a qualified individual as identified by their tribe and confirmed by LADWP. The Native American monitor should have some archaeological knowledge and

the ability to represent the interests of the Tribe during construction activities. The monitor will be responsible for conducting Native American monitoring and for making initial discoveries, making initial notifications in the event of finds, requesting equipment diversions and preparing daily monitoring notes and logs.

Human Osteologist – The Project's Senior Archaeologist/Principal Investigator overseeing archaeological services for this project shall be on call throughout the duration of the ground disturbing activities to address any potential discovery of human remains. Initial determination of the nature of suspect bones shall be made by a human osteologist trained in such analysis and selected by the Project's Senior Archaeologist/Principal Investigator and accomplished through the examination of pictures and through phone discussion. If the identification of "non-human" is not absolutely certain, the human osteologist and if appropriate Project's Senior Archaeologist/Principal Investigator will travel to the project site within 24 hours of discovery, if possible, to make a determination on site. A 100-foot buffer around the discovery shall be allocated, marked and enforced until a full determination of the discovery can be completed and appropriately treated. Please refer to Treatment Protocol of Human Burials and Burial-Associated Artifacts for further details regarding required treatments and protocols in the event of an inadvertent discovery of human remains.

The responsibilities of key personnel are outlined in Table 2.

TABLE 2 MONITORING PERSONNEL

Role/ Responsibility	Name and Contact Information	Organization
Environmental Project Manager Oversees monitoring program	Amanda Jimenez **Office:** 213-367-0873 Amanda.Jimenez@ladwp.com	LADWP
Qualified Archaeologist	TBD	
Construction Manager	TBD	
Tribal Chairperson	Rudy Ortega	Fernandeño Tataviam Band of Mission Indians Fernandeño Tataviam Band of Mission Indian
Tribal Representative		Fernandeño Tataviam Band of Mission Indians Fernandeño Tataviam Band of Mission Indian
Tribal Chairperson	Andy Salas	Gabrieleño Band of Mission Indians Kizh Nation
Tribal Representative		Gabrieleño Band of Mission Indians Kizh Nation

5.2 Pre-Construction

Pursuant to MM-CUL-3 before the start of any ground disturbing activities at each Project location, a Worker Environmental Awareness Training will be provided for all field personnel. The preconstruction meeting shall include an explanation of types of cultural materials that may be encountered during ground disturbing activities, potential indicators for the presence of cultural materials, examples of cultural materials commonly found in the region and the procedures and communication protocols that must be followed upon the inadvertent discovery of cultural resources and human remains or suspect human remains. The training shall also establish procedures for temporary halting and redirecting work to permit sampling, identification, and evaluation of possible cultural resources, as appropriate. All personnel attending the Pre-Construction Worker Environmental Awareness Training shall be provided a pamphlet outlining the details discussed in the meeting along with important contact information. Both hard and electronic copies of the Pre-Construction Worker Environmental Awareness Presentation pamphlet will be available for any personnel that begin work on the Project after the commencement of ground disturbing activities. Additional Construction Worker Environmental Awareness Trainings will be provided upon request. A sign in sheet shall be distributed for signature of all attendees and submitted to LADWP.

5.3 Monitoring Protocols

All initial ground disturbing activities occurring within soil depths from surface (0 ft) until ground disturbance activities have reached a depth or condition that cultural deposits are not likely to exist at each Project location, shall be monitored by a Native American monitor. Determination to cease Native American monitoring will be made by the Project's Senior Archaeologist/Principal Investigator, defined from hereafter as an archaeologist who meets the Secretary of the Interior's Standards for archaeology, in consultation with Tribal Representatives and LADWP.

An archaeological monitor overseen by the Project's Senior Archaeologist/Principal Investigator, and if applicable, the Project's qualified Architectural Historian, defined from hereafter as an architectural historian meeting the Secretary of the Interior's Standards for architectural history, shall monitor all initial ground disturbing activities occurring within soil depths from between surface (0 ft) and 5 ft below current grade, depending on the Project site location, until ground disturbing activities have reached a depth or condition that cultural deposits are not likely to exist. Determination to cease archaeological monitoring will be made by the Project's Senior Archaeologist/Principal Investigator. Initial ground disturbance is defined as initial construction-related earthmoving of sediments from their place of deposition. As it pertains to cultural resource monitoring (archaeological, architectural history, or Native American), this definition excludes movement of sediments after they have been initially disturbed or displaced by current Project-related construction. Table 3 below summarizes all locations to be monitored and the starting depths and estimated maximum depths to be monitored during Project implementation.

TABLE 3 MONITORING ACTIONS

PARK	APN	MONITORING OVERSEEN BY AN ARCHITECTURAL HISTORIAN REQUIRED	DEPTH AT WHICH NATIVE AMERICAN (NA) AND ARCHAEOLOGICAL (ARCH) MONITORING IS REQUIRED	ESTIMATED DEPTH OF DISTURBANCE
David M. Gonzalez Recreation Center	2534-024-905	If construction occurs closer than 50 ft from the clubhouse building **	**NA and Arch: 0 ft** until determined no longer necessary * and if construction occurs closer than 50 ft from the clubhouse building **	29 ft
Fernangeles Park	2634-011-900	Not necessary	**NA and Arch: 0 ft** until determined no longer necessary *	16 ft
Strathern Park North	2308-010-901	Not necessary	**NA and Arch: 0 ft** until determined no longer necessary *	15-20 ft
Whitsett Fields Park North	2324-035-900	If construction occurs closer than 50 ft from the 170 Freeway Pedestrian Overpass**	**NA and Arch: 0 ft** until determined no longer necessary * and if construction occurs closer than 50 ft from the 170 Freeway Pedestrian Overpass**	16 ft
Valley Plaza Park North	2321-006-902	if construction occurs closer than 50 ft from the 170 Freeway Pedestrian Overpass**	**NA: 0 ft** until determined no longer necessary * **Arch: 4.5 ft**. until determined no longer necessary * and if construction occurs closer than 50 ft from the 170 Freeway Pedestrian Overpass**	16-20 ft
Valley Plaza Park South	2322-001-902	Not necessary	**NA: 0 ft** until determined no longer necessary * **Arch: 4.5 ft.** until determined no longer necessary *	16-20 ft
Alexandria Park	2334-002-900	Not necessary	**NA: 0 ft** until determined no longer necessary * **Arch: 4.5 ft.** until determined no longer necessary *	+23 ft
North Hollywood Park	2350-011-901 and -903	If construction occurs closer than 50 ft from the North Hollywood Branch Library building, cultural resource P-19-167303, pool house or maintenance building **	**NA: 0 ft** until determined no longer necessary * **Arch: 5 ft** until determined no longer necessary * and if construction occurs closer than 50 ft from the North Hollywood Branch Library building, cultural resource P-19-167303, pool house or maintenance building **	16-20+ ft
Valley Village Park	2353-001-902	Not necessary	**NA: 0 ft** until determined no longer necessary * **Arch: 1 ft** until determined no longer necessary *	22 to 31 ft

5.3.1 Monitoring

The archaeological and Native American monitors shall be authorized to halt construction immediately upon discovery or suspected discovery of cultural resources. Pursuant to MM-CUL-4, determination to reduce or discontinue monitoring shall be made by the Project's Senior Archaeologist/Principal

Investigator and if applicable, the Project's Architectural Historian, in coordination with the Tribal representatives and LADWP, based on observations of subsurface soil stratigraphy or other factors observed during initial grading demonstrating that the potential for encountering archaeological deposits is low.

If ground disturbing activities occur simultaneously at multiple locations resulting in appropriate observation by monitors infeasible, upon the judgment of the Project's Senior Archaeologist/Principal Investigator and if applicable, the Project's Architectural Historian, in coordination with the Tribal representatives and LADWP, additional monitors may be required.

Pursuant to MM-CUL-1, in the event Project designs are further refined and individual Project components change to encroach more closely than 50 feet to the North Hollywood Branch Library (P-19-167303), the pool house and maintenance building associated with North Hollywood Park, the clubhouse associated with the David M. Gonzalez Recreation Center, and/or the 170 Freeway Pedestrian Overpass, LADWP shall retain a qualified architectural historian, as previously defined, to review design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should Project re-design not conform to the Standards, LADWP shall work with the Project's Architectural Historian to mitigate impacts to these resources. Should Program re-design place Program components within 50 feet of these resources, the Project's Architectural Historian shall also assess potential construction-related impacts resulting from ground-borne vibration. Should ground-borne vibrations have the potential to impact the historical resources, LADWP and the Project's Architectural Historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources. All monitoring personnel shall wear Personal Protective Equipment (PPE) on the job site including, but not limited to, hard hat, safety vest, long pants, and steel-toed or composite-toed boots. Monitors will report each morning to the designated on-site project representative and, if requested, will sign in at the construction trailer. Monitors will also participate in project tailgate safety meetings.

Archaeological and Native American monitoring will include direct observation of all ground-disturbing activities and ground disturbance, inspection of exposed surfaces for evidence of cultural resources, and recordation of all activities and findings.

If considered prudent by the Native American monitor, small soil samples (for example, approximately the size of a 5-gallon bucket) may be taken and sieved on site to prospect for the presence of small artifacts that may be missed during typical monitoring.

Evidence of a potential discovery may include the following:

- Prehistoric artifacts such as flaked tools or debitage (e.g., obsidian, chert, or basalt debitage) and groundstone implements, or ceramics;
- Historic artifacts such as cans, farm implements, bottles, glass, and ceramic fragments that appear to be 50 years or older;
- Bone or shell;

- Charred materials;
- Midden soil, which often contains heat-affected rock, ash and charcoal, faunal remains, and other cultural materials;
- Potential human-made features, such as hearths; and

The monitor may at their discretion request that equipment be temporarily redirected while potential discoveries are investigated.

5.3.2 Halt of Construction

If construction personnel, the archaeological monitor, or the Native American monitor observes any of the above-mentioned materials during construction, a potential discovery situation will exist. The archaeological and Native American monitors shall be authorized to halt construction immediately upon discovery or suspected discovery of cultural resources. Pursuant to MM-CUL-4, determination to reduce or discontinue monitoring shall be made by the Project's Senior Archaeologist/Principal Investigator and if applicable, the Project's Architectural Historian, in coordination with the Tribal representatives and LADWP, based on observations of subsurface soil stratigraphy or other factors observed during initial grading demonstrating that the potential for encountering archaeological deposits is low.

If resources are encountered, the monitors will notify the on-site LADWP Construction Manager, the contractor's foreman, and any construction workers operating in the vicinity of the find. The monitors will then notify the LADWP Environmental Project Manager.

5.3.3 Discovered Cultural Materials

Pursuant to state and local requirements and MM-CUL-5, if previously unidentified cultural resources are encountered or suspected as a result of ground disturbing activities, the following protocols shall be adhered to:

1. All ground disturbing activities shall be diverted away from the area of discovery and the Project's Senior Archaeologist/Principal Investigator and if applicable the Project's Architectural Historian shall be contacted to assess the nature, extent and potential significance of any discoveries. If the find is considered a potentially significant cultural resource, LADWP shall be notified immediately and if the cultural resource is Native American in nature, the Tribal representatives shall be contacted immediately.

2. Work within 100 feet of the find (physically delineated by easily visible marking such as temporary plastic fencing or flagging tape) shall cease until the discovery is addressed appropriately and consistent with state and local requirements and guidelines. Once temporary avoidance measures are in place, the Project's Senior Archaeologist/Principal Investigator or qualified representative including if applicable, the Project's Architectural Historian shall formally record and delineate the resource boundaries and evaluate the significance of the

resource in accordance with CEQA criteria outlined in Section 21083.2. Depending on the resource, effort to evaluate the resource may require subsurface testing and laboratory analysis.

3. If the resource meets the criteria set forth in Section 21083.2, the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian shall develop management recommendations for cultural resource treatment of the discovery in accordance with the provisions outlined in Section 21083.2 of CEQA with an avoidance of the resource taking precedence.

4. If avoidance of the resources is determined feasible by the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian, in consultation with LADWP and if the resource is of Native American origin, Tribal representatives and the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian shall develop a plan of avoidance consistent with Section 21083.1(a) in CEQA which include incorporating the resource into open space, deeding the site into a permanent conservation easement, or capping the resource. The avoidance treatment plan shall include specific details with enough specificity to ensure successful avoidance of the resource.

5. If avoidance of the resources is determined infeasible by the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian, in consultation with LADWP and if the resource is of Native American origin, Tribal representatives and the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian shall develop a treatment plan to mitigate the impact of the Project on the resource consistent with Section 15126.4(b)(3). The treatment plan shall be designed in a customized manner taking into account the unique traits of the resource and the Project conditions in order to minimize as much as possible the impact of the Project on the resource. These mitigation measures may include but are not limited to data recovery (excavation, analysis and report preparation), continued or additional cultural and Native American monitoring, partial preservation and curation.

6. Preservation of recovered artifacts by means of curation, either onsite or at a curation facility, shall be carried out per state and local requirements and guidelines and, if the resource is Native American in origin, in consultation with the Tribal representatives.

If the resource is determined neither an archeological resource nor a tribal cultural resource, then the resource will be appropriately documented by the project archaeologist. Documentation will at a minimum consist of the completion of appropriate forms and preparation of a map. With this documentation and evaluation, treatment will be complete. The resource may be repatriated to the Tribal Chairperson if so requested.

If sufficient data cannot immediately be gathered to determine the significance of the find, then an archaeological testing plan will be developed by the Qualified Archaeologist for approval by LADWP in consultation with the involved tribe(s).

5.3.4 Discovered Human Remains

Pursuant to federal, state and local requirements, if human remains are discovered, Health and Safety Code §7050.5 requires that any further disturbances and activities must cease in any area or nearby area suspected to overlie remains, and the County of Los Angeles Coroner must be contacted. As such, the following protocols shall be followed upon discovery of human remains or suspected discovery of human remains:

1. All ground disturbing activities shall be diverted away from the area of discovery and the County of Los Angeles Coroner shall be contacted immediately. If it is unknown if the bones are human, the Project's Senior Archaeologist/Principal Investigator and Human Osteologist shall be contacted to assess the nature of the remains and shall contact the County of Los Angeles Coroner if the remains are determined human. Once the coroner has been contacted, LADWP staff shall be contacted.
2. Work within 100 feet of the cease in any area or nearby area suspected to overlie remains (physically delineated by easily visible marking such as temporary plastic fencing or flagging tape) until the discovery is addressed appropriately and consistent with state and local requirements and guidelines.
3. Pursuant to PRC §5097.98, if the remains are thought to be Native American, the coroner shall notify the Native American Heritage Commission (NAHC), who shall then notify the Most Likely Descendant (MLD).
4. Pursuant to Health and Safety Code Section 7050.5, subdivision (c), and PRC Section 5097.98 (as amended by Assembly Bill 2641) consultation shall be limited to between the MLD and the landowner with respect to treatment of the remains by preservation in place if feasible or reinternment.
5. LADWP and the Project's Senior Archaeologist/Principal Investigator shall support consultation regarding the discovery and shall communicate all germane information to ensure that all procedures set forth in federal and state requirements and regulations pertaining to the appropriate treatment and disposition of human remains and items directly associated with Native American burials are followed correctly.

5.3.5 Non-Compliance and Disputes

Any incident of non-compliance with monitoring procedures by construction personnel, such as a refusal to halt work when requested, encroachment on a flagged environmentally sensitive area, or carrying out ground-disturbing work without a monitor present, will be reported immediately upon discovery to the LADWP Environmental Project Manager. LADWP will determine if any further actions regarding non-compliance are required.

In the event of disputes between the monitor and designated LADWP contractors, the LADWP Environmental Project Manager will be notified. LADWP will make the final determination in the event of such disputes.

5.4 Documentation

5.4.1 Daily Monitoring Logs

Monitors will complete daily monitoring logs documenting the date and time of work; area of work; type of work and equipment present; construction activities performed; monitoring activities performed (e.g., protection of sites, temporary halt of work, etc.); cultural resources present and any incidents of non-compliance.

Monitors will provide the daily monitoring logs to the LADWP Environmental Project Manager by end of each week monitored. In addition, if requested by LADWP, the tribal monitor or monitoring coordinator will prepare a final summary report for the proposed project.

To ensure Project compliance the following communication protocols shall be implemented: Archaeological and Native American monitors shall report to the Project's Senior Archaeologist/Principal Investigator or if applicable, the Project's Architectural Historian regarding the following: occurrence of inadvertent discovery of cultural material, human remains or suspicion of human remains; lack of availability to monitor no less than 48 hours in advance; the need to leave the Project site prior to the completion of daily construction activities; any change to scheduled construction activities; lack of presence of any scheduled monitor when one is required.

Any inadvertent discovery of cultural material, human remains, or suspicion of human remains by construction personnel shall be reported immediately to the archaeological and Native American monitors upon discovery. If the archaeological or Native American monitor is not present, construction personnel are responsible for contacting the LADWP Environmental Project Manager and Senior Archaeologist/Principal Investigator immediately upon discovery.

5.4.2 Site Records

Cultural resources discovered during monitoring will be documented, at a minimum, using California DPR Form 523A ("Primary Record"). Additional forms within the DPR 523 series will be completed as necessary. The cultural resources discovered, as well as their context, will also be photographed. The location of the find will also be mapped.

Upon completion of all monitoring efforts, a monitoring report shall be prepared, commensurate with City of Los Angeles requirements and guidelines. The Monitoring Report shall be presented to LADWP electronically, in pdf format, within no more than 20 working days of the completion of monitoring services. The revised report shall be submitted to LADWP staff, the South Central Coastal Information Center (SCCIC), and Native American tribes who have consulted on the project under AB52 within 40 working days of the completion of all monitoring efforts.

5.4.3 Additional Documentation

If significant resources are identified during the course of monitoring and they cannot be avoided, then additional documentation may be required. The nature of this documentation will be specified in the testing and/or treatment plan.

Subject: **Strathern Park North Waste Management Plan (SWIS #19-CR-0832) and Community Health and Safety Plan During Project Construction**

Applicability

This Waste Management Plan (WMP) is applicable to the entirety of the presently undeveloped portion of Strathern Park North, which is owned and operated by the City of Los Angeles Department of Recreation and Parks (RAP) and is located in the San Fernando Valley region of the City of Los Angeles. If, at some future date, RAP seeks to expand or redevelop any portion of the park, a new Waste Management Plan must be created and approved for that activity by the City of Los Angeles Department of Building and Safety Local Enforcement Agency (LEA). The park consists of the area on the north side of Strathern Street, east of an LADWP powerline easement, west of Whitsett Avenue, and south of a residential neighborhood immediately north of the park. This area is depicted in Figure 1 and is further subdivided into two zones. Zone 1 contains the entirety of the Strathern Park infiltration gallery construction site, and Zone 2, which comprises the previously developed portion of the park east of the construction site.

Introduction and Background

While conducting a standard geotechnical field investigation for the Strathern Park North stormwater capture infiltration gallery site, as part of CDM Smith's design effort for the City of Los Angeles Bureau of Engineering (LABOE) TOS No. 25 Stormwater Capture Parks Program, our geotechnical subconsultant, Ninyo & Moore, encountered previously undocumented construction waste material at the site. This finding was communicated to both the client, LABOE, and to the City of Los Angeles Department of Building and Safety Local Enforcement Agency (LEA) which has authority over all regulated and unregulated landfills in the city. LABOE subsequently authorized Ninyo & Moore to conduct an LEA-approved Additional Phase II Environmental Site Assessment to quantify the type and amount of waste material at the site.

The site is a public park owned by the City of Los Angeles Department of Recreation and Parks located in North Hollywood, east of California State Highway 170 (SR-170) approximately one mile south of Interstate 5 (I-5). The Park consists of an eastern developed portion containing four baseball fields and an undeveloped western portion. The LEA only required that the roughly 2+ acre undeveloped western portion of the site where the future stormwater infiltration gallery will be located needed to be further investigated. The follow-up investigation of the western portion of the park was conducted by Ninyo & Moore with field work conducted on March 27-28, 2021. The results of this additional investigation are described in Ninyo & Moore's report: *"Additional Phase II Environmental Site Assessment, LABOE TOS 25 Stormwater Capture Parks Program, Portion of Strathern Park North, 8041 Whitsett Avenue, North Hollywood, California, SWIS# 19-CR-0835"*, dated July 30, 2021. A copy of the Ninyo & Moore report is included with the construction documents for the Strathern Park North Stormwater Capture Project for reference.

Ninyo & Moore's Phase II investigation confirmed the presence of previously undocumented construction-related waste materials and debris on nearly half of the project site. Based on a review of historic aerial photographs of the site, the materials were most likely deposited between the early 1950s and the mid-to-late 1960s, as major development occurred in the surrounding area. What is generally referred to as "construction wastes" that were encountered on the site consisted of a variety of construction demolition-related materials, such as chunks of concrete and asphalt, rebar, miscellaneous metal debris, and lesser amounts of other waste debris such as floor tile, bricks, old tires, pieces of ceramics, glass bottles, broken glass, and plastic interspersed with fill soils. In addition, a minor amount (estimated to be less than 100 cubic yards in volume) of burned waste was also encountered on the site, which is further described below.

A total of 22 exploratory test pits were excavated during the field work conducted on March 27-28, 2021, by Ninyo & Moore. The locations of all test pits are shown on Figure 2 for this Waste Management Plan. At most of the test pits, the amount of construction-related debris encountered was a minor constituent of the material excavated from the test pit and was generally inter-mixed with both native and imported alluvial fill soil. Samples were collected by a Ninyo & Moore representative from each test pit and sent to an independent testing laboratory for analysis. Full analytical results for the collected samples are contained in the above-referenced Ninyo & Moore report.

The Ninyo & Moore report noted that "*Waste depths were relatively consistent at the site, typically extending to maximum depths of 5 to 7.5 feet bgs (most commonly 6 to 6.5 feet bgs), based on the locations explored. At locations where wastes mixed with fill soils are present, it appears that for the most part, the wastes are adequately covered, typically with approximately 1.5 to 3 feet of cover soils. Some occasional or minor wastes were observed at/near the surface."* It should be noted that no construction waste was encountered on approximately 40% of the site, as is shown on Figure 2.

Disposal of Construction Waste Materials Encountered During Excavation for the Strathern Park Infiltration Gallery

All soil and construction waste excavated from the site shall become the property and responsibility of the selected Contractor to dispose of properly. If excavated soil material on site is free of observable construction waste, it may be temporarily stockpiled in the vacant northern portion of the transmission line easement area on the west side of the site as shown on Figure 2, if temporary storage there does not interfere with the operations of the LADWP tree trimming contractor's composting operation located on the southern portion of the transmission line easement. The contractor shall coordinate any temporary stockpiling in this area with the following individuals:

- Juan Carlos Pelayo **(**Juan.Pelayo@ladwp.com**, 818-771-**3711), ***Superintendent, Tree Trimming Group***
- Edgar Perez **(**edgar.perez@ladwp.com**, 213-367-0084),** point of contact for the ***PS TLRW Group***

The maximum height of stockpiled material beneath the overhead power transmission lines must be approved in advance by LADWP. It shall be the Contractor's responsibility to stockpile additional material offsite at the Contractor's expense. It is anticipated that this available adjacent stockpiling area will not have sufficient capacity to hold all the material excavated from the site for the infiltration gallery, and the Contractor will need to make arrangements for storing it elsewhere off-site. Uncontaminated stockpiled soil excavated from the site may be reused for compacted backfill and cover material on the site. Surplus uncontaminated soil that is excess to the project requirements becomes the property of the Contractor.

All construction waste material excavated on the site by the Contractor from within the footprint of the infiltration gallery, per direction from the LEA, shall be hauled offsite at the Contractor's expense to a City of Los Angeles LEA approved landfill. Figure 3 shows the location of two landfills licensed by the LEA in the vicinity of the project site. Both landfills have been contacted by CDM Smith and have reviewed the laboratory results from the test pit program and have confirmed that they will accept both construction waste and burned waste from the Strathern Park infiltration gallery site. Current tipping fees associated with each of the landfills shown on Figure 3 appear in Table 1.

Based on the conclusions developed by Ninyo & Moore, CDM Smith has performed a preliminary neat line calculation of the volume of soil on the Strathern Park site that may contain an unknown quantity of construction waste material contained within the red shaded areas on Figure 2 between 1.5 feet bgs and 6.5 feet bgs and has arrived at a figure of approximately 14,000 cubic yards. This is approximately 25% of the estimated 60,386 cubic yards of total excavation required for emplacing the infiltration gallery at this site. Since the waste material was mixed with mostly clean sandy soil,

the Contractor will be required to sort the waste from the soil on site and thereby substantially reduce the volume of material that must be hauled to a licensed landfill.

The site area explored by Ninyo & Moore for this project is the undeveloped western portion of the Strathern Park North site. The adjacent eastern portion of Strathern Park North (see Figure 1) was previously developed by the City of Los Angeles Department of Recreation and Parks (RAP)as a youth baseball facility with four separate turf baseball fields, including an irrigation system, parking lot, concessions, field lights and restroom facilities and is not part of the infiltration gallery project.

While most of the construction-related debris found on the currently undeveloped portion of the site is as described above, two test pits (TP-7 and TP-21) were excavated in an area that contained some burned wastes and evidence of a former burn pit in that area, along with the miscellaneous construction-related debris and sandy cover soil previously noted. It should be noted that both Test Pits 7 and 21 lie ***outside*** of the footprint of the proposed infiltration gallery as shown on Figure 2. The Contractor shall be responsible for exercising care to avoid disturbing any burned or unburned construction waste material from areas that are outside of the infiltration gallery footprint. The Ninyo & Moore report notes that where encountered, the burned wastes "*typically consist of darkly colored ashy soils with abundant broken glass, fused and melted glass, metal debris and other wastes typical of sites where wastes were burned*." Where burned waste was encountered, it was generally overlain by some of the construction waste as previously described.

Table 1 – LEA-Licensed Landfills Near Strathern Park that Will Accept Construction Debris and Burned Waste Material

Site	Cost	Address	Link
Sunshine Canyon	$88.97/ton	Sunshine Canyon Rd, Sylmar, CA 91342	https://sunshinecanyonlandfill.com/drop-off-information/disposal-costs/)
Lancaster Landfill	$74.00/ton	600 E Ave F, Lancaster, CA 93535	https://www.wm.com/location/california/antelope-valley/_documents/LLF-LandfillFlyer01-01-2020.pdf

The unit prices shown in Table 1 apply to both construction debris and burned waste.

By employing a reasonable level of care in setting the limits of the ground disturbing activities associated with excavation at the site, the Contractor should be able to minimize the amount of burned waste material encountered during the excavation for the infiltration gallery. A minor additional amount of apparently burned waste material was also encountered during the excavation of Test Pit 10 (see Figure 2), which was found intermixed with the construction waste material previously described, but no evidence of a burn pit was found at that location. This burned waste material may have originated from the suspected former burn pit location in the vicinity of TP-7 and TP-10 and inadvertently been re-transported to the vicinity of TP-10 during the initial period of waste disposal activity many years ago. The Ninyo & Moore report notes that the buried construction waste and burned waste material apparently continues easterly offsite for an unknown distance where it likely underlies the developed baseball fields in the park. During the backfilling of TP-10, the minor amount of burned waste encountered there may have become intermingled with non-burned construction waste material and may no longer be clearly identifiable as burned waste.

If the Contractor encounters any identifiable burned waste material within the footprint of the infiltration gallery, the material should be sorted separately from the general construction waste material and Mr. David Thompson, Environmental Affairs Officer, City of Los Angeles Department of Building and Safety, Local Enforcement Agency (LEA) at (213) 252-3932 should be notified after the material has been removed from the site and disposed of in an LEA-regulated landfill. site. The Contractor shall exercise proper care when handling burned waste material (gloves, face masks, eye protection, etc.) and follow Cal OSHA safety procedures for potentially hazardous waste. Burned waste material should be bagged and removed from the site to an LEA- licensed disposal facility.

Contractor Responsibilities for this Waste Management Plan

- The Contractor shall sort construction waste material on site to reduce the volume of material to be transported to the selected landfill.
- Contractor shall remove all waste encountered within the excavated footprint of the infiltration gallery. If odiferous waste material becomes exposed during excavation, the Contractor will give priority to promptly removing it from the site.
- The Contractor shall coordinate his actions with the City-provided construction inspector, who shall be on-site during all excavation operations to verify that all construction waste material is removed from the site by the contractor.
- The Contractor shall be responsible for the erection and maintenance of security fencing around the perimeter of the construction site and provide warning signage excluding the public from within the security perimeter.

- The Contractor will not be required by the LEA to sample stockpiles of excavated material containing construction waste to characterize the material before hauling it off-site to an LEA-licensed landfill.
- Similarly, the LEA is not requiring the Contractor to stockpile, sample, and characterize any burned waste material that is excavated prior to bagging and hauling it to an LEA-licensed landfill.

Subject: Strathern Park North (SWIS No. 19-CR-0835)
Comments on Additional Phase II Environmental Site Assessment

Dear Ms. Abramson-Beck,

The City of Los Angeles Local Enforcement Agency (LEA) received the ***Additional Phase II Environmental Site Assessment,*** dated July 30, 2021, for the Stormwater Capture Parks Program at a portion of Strathern Park North. The Phase II was conducted to characterize and delineate the lateral and vertical extent of wastes at the site, evaluate the presence of cover overlying wastes and to conduct sampling and analytical testing to characterize the wastes. The LEA has shared the current Phase II report with our partnering state agency, California Department of Resources Recycling and Recovery (CalRecycle) for their review and comment.

After discussion with CalRecycle, the LEA has the following comments regarding the site:

- Pursuant to 27 CCR 21190, a Post Closure Land-use plan will be required for the upcoming infiltration basin project and any future development at the site. The plan should reflect the findings from this Phase II study. As part of this plan, a landfill gas monitoring plan should be included that demonstrates the protection of the adjacent residential property, discusses the long-term maintenance of the site and how it will meet the State Minimum Standards for a closed disposal site.

- A community Health and Safety Plan and workers health and safety plan should be developed to ensure the health and safety of any individual working on the proposed Stormwater Capture Parks project.

- A Waste Management Plan (WMP) should be developed to be used any time subsurface activities are conducted at Strathern Park North due to the site being

located on top of the waste disposal area. The WMP is required to include the entire park. This is critical due to the sampling results collected from TP7, TP10 and TP 21 that show elevated levels of lead and zinc.

- If any future development is to be conducted at this facility, it will require additional exploratory work to define the lateral and vertical extents of the waste on that side of the park, especially in the Eastern side of the park.

If you have any questions regarding this approval, please feel free to contact me at 213-252-3932.

Sincerely,

David Thompson
LEA Program Manager

Cc: Dawn Liang, CalRecycle

Appendix B

Community Health and Safety Plan During Project Construction

Strathern Park North Stormwater Capture Parks Program
Community Health and Safety Plan During Project Construction

Purpose

The purpose of this community Health and Safety Plan is to protect the general public and the residents of housing that is in the immediate vicinity of the Strathern Park North City of Los Angeles Stormwater Capture Parks program infiltration gallery construction site from any potentially deleterious effects associated with the project.

Scope

The Contractor selected for construction of this project shall be required to follow the actions outlined below in this plan. Failure to do so can represent a violation of the terms and conditions of this construction contract. These requirements are in addition to those contained in the Contractor-provided health and safety plan which shall govern the actions of all of the Contractor's workers on the project site.

Contractor's Responsibilities

- The contractor shall provide continuous methane gas monitoring during the excavation phase of the project. Occupants of the neighboring residential properties adjoining the project site shall be promptly notified by the Contractor should any large gas pockets become exposed.

- Any foul-smelling waste uncovered by the Contractor shall be promptly collected, covered, and hauled off site and properly disposed of as quickly as possible.

- The Contractor shall install and maintain adequate perimeter security fencing, motion sensor security lighting and alarms to deter unauthorized individuals from entering the work site during non-work hours for the duration of the project. Security lighting shall be arranged so as not to send furtive light into the residential area on the north side of the project site.

- The Contractor shall also implement a sign-in register so that only authorized visitors are allowed onto the project site during working hours.

- The Contractor shall utilize sufficient dust control measures so that only minimal visible dust leaves the site during the excavation and waste sorting operations. Typical dust control measures include use of water spray, placing tarps over stockpiles when they are not being actively worked on, and suspension of earth moving activities when windy conditions develop.

- The contractor shall be responsible for installing all erosion control measures outlined in the approved project Stormwater Pollution Prevention Plan (SWPPP). The condition of all erosion control measures shall be inspected by the Contractor on a weekly basis, and after

any precipitation event that exceed 0.25 inches of rainfall, and promptly repaired as necessary to maintain its effectiveness.

- Training. The Contractor shall always provide a project Safety Monitor onsite during the excavation phase of the project. The Safety Monitor shall have an up to date 40-hour HAZWOPER training certificate and will be responsible for determining appropriate personal protective equipment (PPE) and clothing for all personnel working on the project and for maintaining gas monitoring equipment.

END OF STRATHERN PARK NORTH STORMWATER CAPTURE PROGRAM
COMMUNITY HEALTH AND SAFETY PLAN DURING PROJECT CONSTRUCTION

STRATHERN PARK NORTH POST CLOSURE LAND USE PLAN

FOR

STORMWATER CAPTURE PROJECT

Submitted: April 19, 2022
Revised: June 23, 2022

1. Introduction

CDM Smith, under the provisions of LABOE Task Order Supplement No. 25 (TOS-25), was retained by the City of Los Angeles Bureau of Engineering to provide design services for the Strathern Park North Stormwater Capture Project. As part of the project design effort, a standard pre-design geotechnical investigation of the site was conducted by the design team's geotechnical engineering subconsultant, Ninyo & Moore. The Ninyo & Moore investigation discovered evidence that the proposed site had previously been used for the undocumented disposal of construction-related debris. The Bureau of Engineering subsequently authorized Ninyo & Moore to conduct a more detailed environmental site assessment for Strathern Park North and a report of findings was prepared *(Additional Phase II Environmental Site Assessment, LABOE TOS No. 25, Stormwater Capture Parks Program, Portion of Strathern Park North, 8041 Whitsett Avenue, North Hollywood, California SWIS #19-CR-0835, Ninyo & Moore, July 30, 2021)* for the site. Copies of the report are on file at the City of Los Angeles Bureau of Engineering (LABOE), and the City of Los Angeles Department of Building and Safety, Local Enforcement Agency (LEA).

Ninyo & Moore's Phase II investigation determined that the project site did in fact contain undocumented buried construction waste material over approximately half of the site for the infiltration gallery, and that the site had never been registered with the State of California as a solid waste landfill site. The Phase II investigation included historic aerial photograph research, a review of historic topographic maps of the area, and document research. The Phase II investigation also included the excavation of 22 additional test pits across the site and the collection of samples for laboratory analysis. A geophysical survey of the site was also conducted as part of the investigation.

Based on the research conducted for the investigation, the site apparently was an active disposal site for construction waste from the early 1950s into the late 1960s as the Hollywood Freeway and residential development took place in the area. The use of the site as a waste dump for this construction-related debris was never registered with either the State of California or either the city or county of Los Angeles.

The construction waste discovered in the test pits consisted of miscellaneous debris commonly associated with construction demolition activities (chunks of broken concrete, broken roof and floor tiles, pieces of wood and scrap structural steel, broken glass, bottles, tires, plastic, and miscellaneous ceramic debris. A small amount of burned waste was also encountered at a couple of locations within the footprint of the proposed infiltration gallery.

The construction waste was typically covered with from 1.5 to 3 feet of imported clean soil and was generally confined to within 7 – 8 feet below the ground surface. A total of 101 samples from the test

pits were taken to an analytical laboratory for testing for an array of potential contaminants. Full laboratory results are contained in the Ninyo & Moore July 30, 2021, report for the Additional Phase II Environmental Site Assessment. The report showed the presence of arsenic, lead, copper, and zinc in many of the samples tested. However, only a small percentage of the heavy metals tests produced results that exceeded human health screening levels. Low levels of hydrocarbons, polychlorinated biphenyls (PCBs), organochlorine pesticides, volatile organic compounds and semi-volatile organic compounds were also tested for but were generally found to not be present.

When the results of the Additional Phase II Environmental Site Assessment were presented to the City of Los Angeles Department of Building and Safety, Local Enforcement Agency (LEA), the LEA determined that the construction waste could be safely disposed of at one of the LEA-approved landfills in the area, and no special treatment or processing of the construction waste material was required. Additionally, the LEA required that ALL construction waste material should be removed from within the footprint of the proposed infiltration gallery to achieve a clean closure of the portion of the park that will be impacted by project construction activity.

To reduce the quantity of material that needed to be hauled to a landfill, the selected contractor for the project will first be required to sort the material on site to separate the construction waste from the soil that it is mixed with. The LEA will also require that three gas monitoring wells be installed around three sides of the infiltration gallery as part of the project. Since construction waste, including burned waste, which is considered to be hazardous by the State of California, was found on the site, a California Solid Waste Information System number (SWIS #) was assigned to the site and it was entered into the statewide data base. The assigned SWIS number for Strathern Park is 19-CR-0835.

The Ninyo & Moore report also concluded that an unknown additional quantity of construction waste and burned waste is likely to extend some distance to the east away from the infiltration gallery project site, presumably under the existing baseball fields that have been developed on the eastern portion of the park. Further investigation to establish the limits of the construction waste deposit would be required by the LEA as part of any plan for redevelopment or expansion of the eastern portion of the park beyond the limits of the current infiltration galley site.

Preparation of a Waste Management Plan (WMP) for Strathern Park North, which will govern how the selected contractor will remove the identified construction waste material and properly dispose of it in an LEA-approved landfill was prepared and submitted to the LEA for their approval on March 21, 2022.

2. Strathern Park North Stormwater Capture Project

Strathern Park North is a public park owned and operated by the City of Los Angeles Department of Recreation and Parks (LARAP). The park is located in North Hollywood, east of California highway SR-170, approximately one-mile south of the Interstate 5 (I-5) freeway. The park consists of a relatively level, roughly triangular-shaped parcel of land totaling approximately 9 acres in extent. The western one-third of the park is currently undeveloped and is the selected location for the proposed stormwater infiltration gallery, which will be constructed utilizing precast reinforced concrete components with a footprint of approximately 1.5 acres. Ground surface elevations at the site range from about 810 to 805

feet above mean sea level, NGVD. The entire infiltration gallery facility will be constructed below ground surface level and then covered with 10 – 12 feet of compacted clean soil to restore the pre-project lines and grades. The project also includes the construction of two new baseball fields over the top of the infiltration gallery.

Construction of the facility will require excavation of a large pit approximately 26 feet in depth below the ground surface. The contractor will be responsible for monitoring for methane gas on a daily basis during the excavation phase of the project, and maintain a log of those samplings. If the contractor detects any readings above the Lower Explosive Limit (LEL) for methane, work will be suspended until the readings return to below the LEL.

Since the buried construction waste was determined during the Additional Phase II site assessment for the site to generally be confined to the first 8 – 10 feet below ground surface, and excavation for the infiltration gallery facility will require excavating down to some 26 feet below ground surface, it is therefore anticipated that within the approximately 1.5 acre footprint of the facility that all construction waste material will be removed from the site and hauled offsite to an LEA-approved landfill, thereby allowing for what the LEA terms a "clean closure" to be achieved for all buried construction wastes found at the site within the footprint of the infiltration gallery.

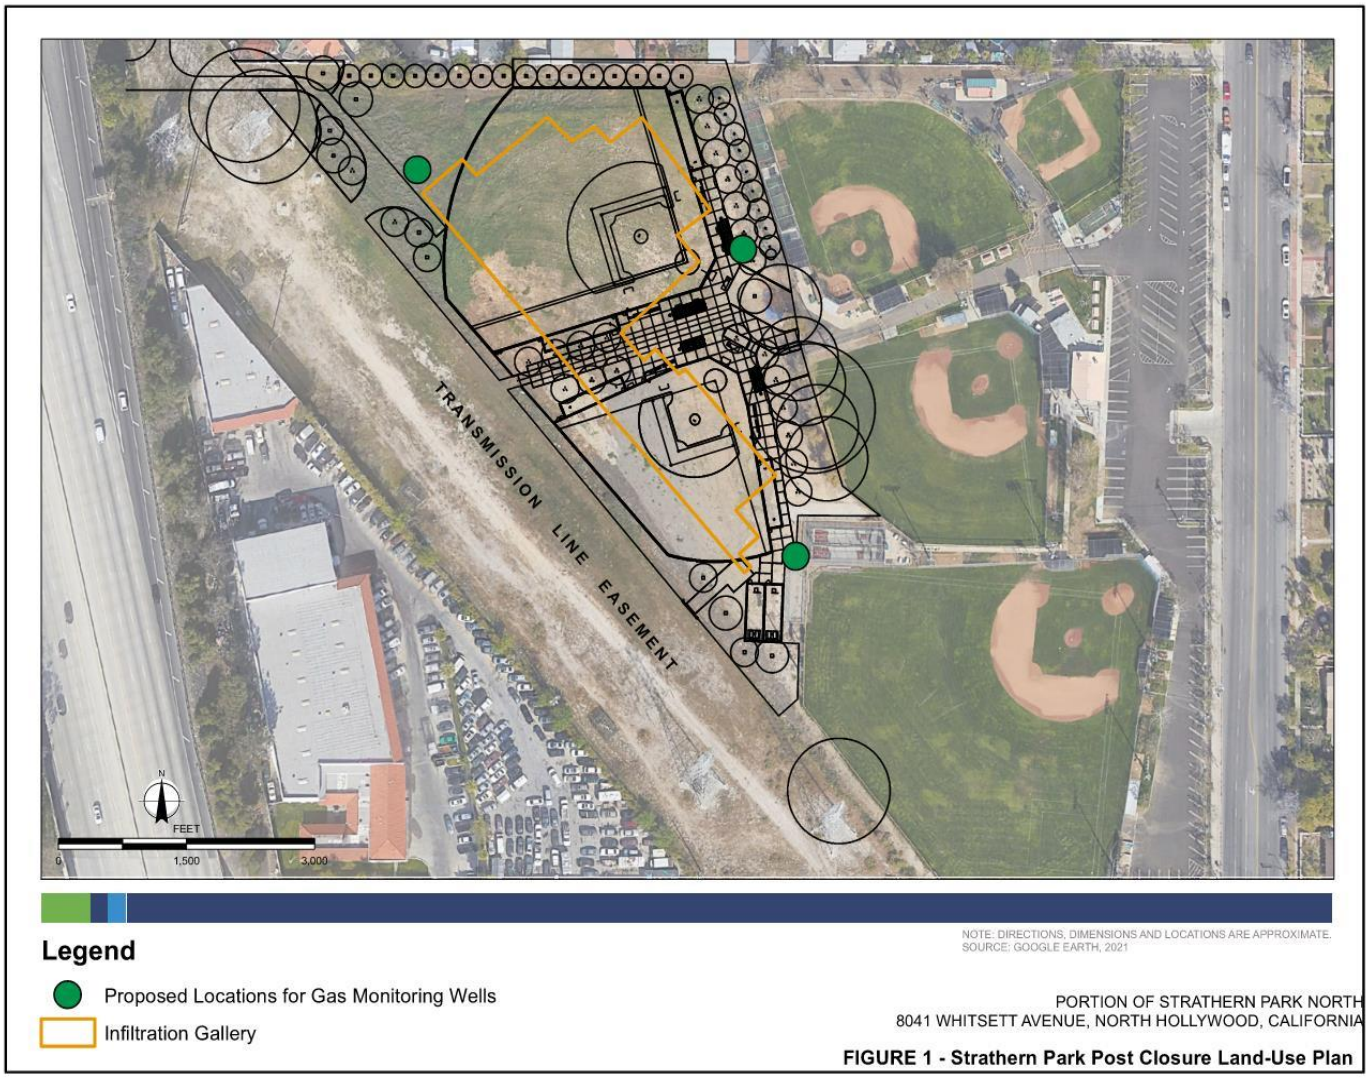
3. Responsibility for Long-Term Gas Well Monitoring at the Strathern Park Infiltration Gallery Site

An additional LEA requirement for the Strathern Park Infiltration Gallery project calls for the installation of a series of three gas monitoring wells around the perimeter of the infiltration gallery once it has been constructed. The proposed locations for each of these gas monitoring wells are indicated on Figure 1 for this Post Closure Land Use Plan. The intent of placing gas monitoring wells at the three proposed locations is to provide the ability to detect the presence of methane gas accumulation around the perimeter of the infiltration gallery. Once project construction is completed and the project is turned over to the City of Los Angeles Bureau of Sanitation (LASAN) for operation and maintenance, LASAN will also assume primary long-term responsibility for sampling the three gas monitoring wells on a quarterly basis using a gas sniffer probe or other appropriate technology. The results of all sampling performed by LASAN will be reported to LEA within 30 days of the sampling run. The LEA will also conduct quarterly sampling of the monitoring wells on their own schedule.

If readings at any of the monitoring wells are determined to exceed the Lower Explosive Limit (LEL) for methane gas, LASAN will promptly notify the LEA and LARAP, and additional supplemental gas sampling of the interior of the infiltration gallery will then be conducted by opening the access hatches and inserting gas probes monitoring probes into the structure. If dangerous levels of methane are detected from within the infiltration gallery, an appropriate plan of action for mitigation will be jointly developed by LEA and LASAN and implemented by LASAN as lead response agency.

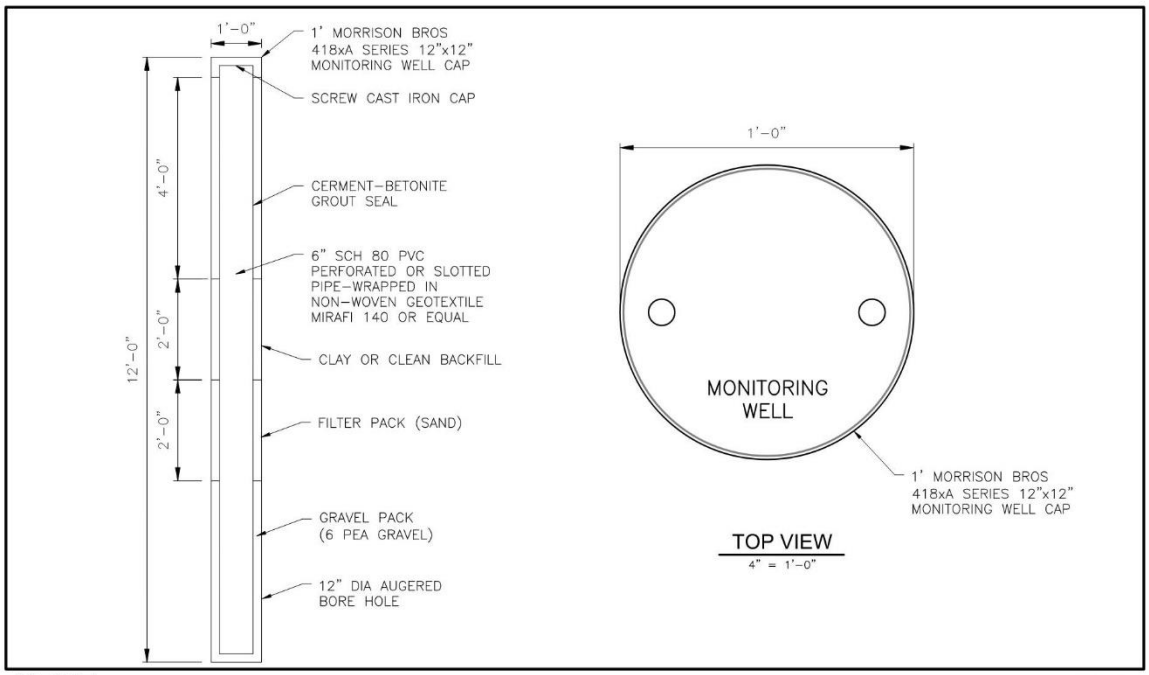
Figure 2 shows the detail for a typical gas monitoring well such as is proposed for the Strathern Park North infiltration gallery project. Each monitoring well will be developed down to a depth of 12 feet, which is below the maximum depth of the construction waste material (the potential source of methane

gas generation) and a couple of feet below that depth into the undisturbed sandy native alluvial soil. Each well will consist of a 12-foot-long section of perforated or slotted Schedule 80 PVC pipe with a cap



at the bottom end. The pipe will be wrapped in non-woven geotextile material (Mirafi 140N or equal) and placed into a 12-inch diameter augured bore hole. The lowered section of the monitoring well will be encased in a gravel pack. The middle section of the monitoring well will be encased in clay or clean native backfill or cuttings from the boring. The top 12-18 inches of the monitoring well will be encased in a cement-bentonite grout. The top of the monitoring well will be protected with a cast iron cap, as shown in Figure 2.

Copies of the results from all sampling runs of the gas monitoring wells will be retained in the files of the LEA and LARAP for a period of ten (10) years, then discarded. LASAN will be responsible for promptly notifying LEA and LARAP directly if sampling shows methane gas levels in any of the monitoring wells exceeds the LEL for methane and shall have responsibility for coordinating with those agencies in the development of an appropriate corrective



CDM Smith

Figure No. 2
Proposed Gas Monitoring Probe Detail
MARCH 2022

action plan. The LEA may, at its discretion, require LARAP to extend the gas monitoring program outlined in this document to include additional areas beyond the limits of the infiltration gallery project beneath the surface of the already developed portion of Strathern Park to the east of the proposed infiltration gallery site.

4. Post Closure Responsibilities of City of Los Angeles Department of Recreation and Parks (LARAP) for the Strathern Park Stormwater Infiltration Project

Once the construction phase of the Strathern Park infiltration gallery has been completed, the project will be turned over to the City of Los Angeles Bureau of Sanitation (LASAN) for long-term operation and maintenance. At that time the following specific post closure land use responsibilities will remain permanently with the City of Los Angeles Department of Recreation and Parks (LARAP):

- In the event that additional construction waste material is encountered by LARAP or their contractors during any subsequent ground-disturbing activity in the developed portion of the park, LARAP will be responsible for collection of the waste material and properly disposing of it at an LEA-licensed landfill. Once the additional waste material has been discovered, LARAP must

promptly notify LEA of this discovery prior to initiating any action to collect and remove it from the site.

- LARAP is cautioned to avoid any future excavations in the park that are more than 24 inches in depth below the ground surface for irrigation system upgrades, field lighting improvements or any other improvements

- LARAP will be responsible for discussing any proposed future major improvement projects for Strathern Park North that will require ground surface excavation greater than 12 inches below the ground surface with LEA prior to commencing any work.

5. Strathern Park North Post Closure Land Use Plan (PCLUP) Periodic Update and Revision

This plan shall be reviewed and updated as needed by LASAN at least once every 5 years. It shall be the responsibility of LASAN to initiate and coordinate any updates or revisions to this plan with LEA.

LEA Approval of Stormwater Capture Project

Dear Mr. Magura,

The City of Los Angeles Local Enforcement Agency (LEA) received the Strathern Park North Post Closure Land Use Plan, dated April 19, 2022 and revised June 23, 2022 and Waste Management Plan, dated December 7, 2021 and finalized on October 13, 2022. These plans were submitted as part of the Stormwater Capture Parks Program at the undeveloped western portion of Strathern Park North. This project will require the excavation and removal of waste material, consisting of mostly construction and demolition debris, in a section of the undeveloped old dump site. The section of the dump site beneath the baseball fields will not be disturbed during this project. The plans were submitted to the LEA, along with the Los Angeles Regional Water Quality Control Board and the Department of Toxic Substances Control for review and approval.

After reviewing the plans and having several discussions with CalRecycle, the LEA is approving the project with the following conditions:

- This approval is only for the construction of the stormwater capture parks project. Any other work at Strathern Park North site will require consultation with the LEA and the approval of a new postclosure land use plan and waste management plan prior to the start of construction. Additional exploratory work to define the lateral and vertical extents of the waste at the park would be required.

- All solid waste excavated from the project site is to be properly disposed of at a permitted landfill.

- Soil and debris from the project site shall be managed according to the guidance and regulations of the Los Angeles Regional Water Quality Control Board and/or the California Department of Toxic Substances Control depending upon the nature of the material excavated.

- The property owner is responsible to ensure that the project is constructed and maintained pursuant to State solid waste regulations found in Title 27 of the California Code of Regulations.

- The LEA shall be notified 30 days prior to the start of the project so as to arrange for the scheduling of an LEA inspector to periodically monitor the work.

The LEA reserves the right to modify or suspend this approval, if problems arise during the construction activities. The LEA shall be notified within 24 hours of any special occurrence that may occur at the site.

This approval is specifically for regulations under our authority and does not relieve the owner or operator from complying with all other local, state, and federal requirements.

If you have any questions regarding the LEA approval, please feel free to contact me at 213-252-3932.

Sincerely

David Thompson
LEA Program Manager

GEOLOGY AND SOILS REPORT APPROVAL LETTER

March 3, 2023

LOG # 123508
SOILS/GEOLOGY FILE - 2

City of Los Angeles
P.O. Box 51111
Los Angeles, CA 90051

TRACT: PACOIMA (MP 29-79/83)
BLOCK: 58
LOT: 1462 (Arb 2)
LOCATION: 10943 N. Herrick Avenue

CURRENT REFERENCE REPORT/LETTER(S)	REPORT No.	DATE OF DOCUMENT	PREPARED BY
Geology/Soils Report	211294003	08/31/2020	Ninyo & Moore

PREVIOUS REFERENCE REPORT/LETTER(S)	REPORT No.	DATE OF DOCUMENT	PREPARED BY
Dept. Approval Letter	34999	11/16/2001	LADBS – Grading
Soils Report	17988-S	10/12/2001	Geotechnologies

The Grading Division of the Department of Building and Safety has reviewed the referenced report dated August 31, 2020, that provides recommendations for the proposed stormwater capture facility at the parks program located at David Gonzales Recreation Center as depicted on Figure 2: Boring, Percolation Test, and CPT Locations. The subject site is roughly level with no pronounced changes in elevations.

Previously, the Grading Division of the Department of Building & Safety had reviewed and approved (Log # 34999, dated November 16, 2001) the referenced report dated October 12, 2001 for the proposed expansion of the Boxing Facility at the Gonzalez/ Pacoima Recreation Center

The consultants excavated The earth materials at the subsurface exploration locations consist of uncertified fill from 0.5 to 6 feet thick underlain by alluvium to the total depth explored of 50.7 feet below the ground surface. No groundwater was encountered to the maximum depth explored of 50.7 feet below the ground surface. State of California Groundwater Records indicated that Historic High Groundwater elevations in the subject area was approximately 100 feet below the ground surface.

The consultants recommend to support the proposed structure(s) on conventional foundations or a mat-type foundation bearing on competent alluvium or new certified fill.

The referenced report August 31, 2020, is acceptable, provided the following conditions are complied with during site development:

14. Any recommendations prepared by the geologist and/or the soils engineer for correction of geological hazards found during grading shall be submitted to the Grading Division of the Department for approval prior to use in the field (7008.2, 7008.3).

15. The geologist and soils engineer shall inspect all excavations to determine that conditions anticipated in the report have been encountered and to provide recommendations for the correction of hazards found during grading (7008, 1705.6 & 1705.8).

16. Prior to pouring concrete, a representative of the consulting soils engineer shall inspect and approve the footing excavations. The representative shall post a notice on the job site for the LADBS Inspector and the Contractor stating that the work inspected meets the conditions of the report. No concrete shall be poured until the LADBS Inspector has also inspected and approved the footing excavations. A written certification to this effect shall be filed with the Grading Division of the Department upon completion of the work. (108.9 & 7008.2)

17. Prior to excavation an initial inspection shall be called with the LADBS Inspector. During the initial inspection, the sequence of construction; shoring; ABC slot cuts; protection fences; and, dust and traffic control will be scheduled (108.9.1).

18. Installation of shoring and slot cutting shall be performed under the inspection and approval of the soils engineer and deputy grading inspector (1705.6, 1705.8).

19. Prior to the placing of compacted fill, a representative of the soils engineer shall inspect and approve the bottom excavations. The representative shall post a notice on the job site for the LADBS Inspector and the Contractor stating that the soil inspected meets the conditions of the report. No fill shall be placed until the LADBS Inspector has also inspected and approved the bottom excavations. A written certification to this effect shall be included in the final compaction report filed with the Grading Division of the Department. All fill shall be placed under the inspection and approval of the soils engineer. A compaction report together with the approved soil report and Department approval letter shall be submitted to the Grading Division of the Department upon completion of the compaction. In addition, an Engineer's Certificate of Compliance with the legal description as indicated in the grading permit and the permit number shall be included (7011.3).

20. No footing (if founded in certified fill) or slab-on-grade, shall be poured until the compaction report is submitted and approved by the Grading Division of the Department.

VN District Office

(Note: Numbers in parenthesis ( ) refer to applicable sections of the 2023 City of LA Building Code. P/BC numbers refer the applicable Information Bulletin. Information Bulletins can be accessed on the internet at LADBS.ORG.)

1. Conformance with the Zoning Code Section 12.21 C8, which limits the heights and number of retaining walls, will be determined during structural plan check.

2. For design purposes, a percolation rate of 2 inches per hour for both shallow (gallery) and deep (dry well) infiltration systems following adjustments by the BMP designer for RF_S, shall be utilized as recommended on page 23 of the August 31, 2020, referenced report.

3. Based on preliminary plans by CDM Smith, 2020, excavations for the proposed BMP improvements are anticipated to be on the order of 12 to 24 feet in depth, as recommended on page 18 of the August 31, 2020, referenced report.

4. If shoring systems are required for the proposed excavations, then Figure 8: Lateral Earth Pressure for Braced Excavation, Figure 9: Lateral Earth Pressures for Temporary Cantilevered Shoring, and Figure 10: Lateral Earth Pressures for Underground Structures, shall be utilized in the design, as recommended in the August 31, 2020, referenced report.

5. The infiltration facility design and construction shall comply with the minimum requirements specified in the Information Bulletin P/BC 2020-118. Except permeable pavements may be located closer, less than 10 feet, to existing foundations provided concentrated drainage is not allowed to be released on the pavement (e.g., downspouts, gutters, etc., and the pavement subgrade and pavement surface is graded away from the foundations.

6. The infiltration system shall be constructed at the location shown on the drawing attached to the current report.

7. The construction of the infiltration system shall be provided under the inspection and approval of the soils engineer.

8. An overflow outlet shall be provided to conduct water to the street in the event that the infiltration system capacity is exceeded. (P/BC 2020-118)

9. A minimum distance of 10 feet in any direction shall be provided from adjacent proposed/existing footings to the discharge of the proposed infiltration system. A minimum distance of 10 feet horizontally shall be provided from private property lines to the proposed infiltration system.

10. The dry well area between the blank casing and the surround soils shall be sealed to a minimum depth of 10 feet below the bottom of any adjacent foundation with bentonite slurry (or equivalent) to prevent unintended leakage or horizontal infiltration.

11. The seismic design shall be based on a Site Class D, as recommended. All other seismic design parameters shall be reviewed by LADBS building plan check. According to ASCE 7-16 Section 11.4.8, for structures on Site Class D sites with S1 greater than or equal to 0.2, the parameter SM1 determined by EQ. (11.4-2) shall be increased by 50%. Alternatively, a supplemental report containing a site-specific ground motion hazard analysis in accordance with ASCE 7-16 Section 21.2 shall be submitted for review and approval.

12. Mat foundations shall be utilized as recommended on pages 20 and 21 of the August 31, 2020, referenced report.

13. All concentrated drainage shall be conducted in an approved device and disposed of in a manner approved by the LADBS (7013.10).

STORMWATER OBSERVATION REPORT FORM
(Residential ≥ 5 units & All other Development)

LOW IMPACT DEVELOPMENT

IN THE EVENT THAT THE APPROVED STORMWATER BMP CANNOT BE BUILT PER PLANS (OR ANY MODIFICATION), CONSULT WITH BUREAU OF SANITATION STAFF PRIOR TO ANY PLAN MODIFICATIONS. FAILURE TO DO SO MAY DELAY OBTAINING A FINAL APPROVAL AND CERTIFICATE OF OCCUPANCY (C OF O).

STORMWATER OBSERVATION *means the visual observation of the stormwater related Best Management Practices (BMPs) for conformance with the approved LID Plan at significant construction stages and at completion of the project. Stormwater observation does not include or waive the responsibility for the inspections required by Section 108 or other sections of the City of Los Angeles Building Code.*

STORMWATER OBSERVATION *must be performed by the engineer or architect responsible for the approved LID Plan or designated staff in their employment.* ***As part of the observation, provide photos of the BMPs taken during various construction phases.***

STORMWATER OBSERVATION REPORT *must be signed and stamped (see below) by the engineer or architect responsible for the approved LID Plan and submitted to the city prior to the issuance to the certificate of occupancy.* ***PRIOR TO CERTIFICATE OF OCCUPANCY (C of O), SOR FORM, PRINTED PHOTOS OF THE BMPS TAKEN DURING VARIOUS CONSTRUCTION PHASES AND APPROVED STAMPED PLANS BY THE BUREAU OF SANITATION MUST BE SUBMITTED TO THE PUBLIC COUNTER FOR STAFF APPROVAL.***

Project Address:	Building Permit No.:
10943 Herrick Ave, Pacoima, CA 91331	22030-10000-04536
Name of Engineer/Architect responsible for the approved LID Plan: Anthony S. Dellinger	Phone Number: (213) 212-457-2134

List all BMPs installed as part of the project: Coordinates of the most significant (or typical) BMPs:

BMP Type: Underground Infiltration Gallery (50,244 SF and 79,216 SF) # of units: 2 Lat: 34.268578 ; Long: -118.413465 ***Ex: Lat: 34.04152; Long: -118.25962 (5 sig digits)***	BMP Type: Hydrodynamic Separators (20'x10'15') # of units: 2 Lat: 34.268898 34.268518 ; Long: -118.414424 -118.412216

Attn: Linda Woolridge

Re: Support for the David M. Gonzales Recreation Center Stormwater Capture Project

The undersigned, as the Court-appointed Watermaster for the adjudicated region known as the Upper Los Angeles River Area (ULARA), wishes to express his direct support for the Los Angeles Department of Water and Power (LADWP) grant funding application for the David M. Gonzales Recreation Center Stormwater Capture Project (Project). The Project, which is located at 10943 Herrick Ave in Pacoima, CA, overlies the San Fernando Basin (Basin), the largest of the four groundwater basins in ULARA.

The viability and resiliency of the Basin are very important to the Watermaster. Any and all groundwater recharge methods by LADWP are clearly supported by the Watermaster. This LADWP proposed Project will capture, treat, and infiltrate stormwater runoff from a 759-acre tributary area that has an estimated average annual yield of 448 acre-feet per year (AFY). This estimated annual yield is equivalent to the water used by approximately 1,792 households per year. Infiltration into the Basin will help to maintain local groundwater supplies, and therefore will help to reduce the region's dependence on imported water. Infiltration projects like the subject proposed Project are key to restoring and maintaining the health of the San Fernando Groundwater Basin. As Watermaster, I strongly recommend that this grant application be approved for grant funding for which this Project may qualify.

Respectfully Submitted,

Richard C. Slade
ULARA Watermaster

cc: Members of the ULARA Administrative Committee

WORK ORDER EW40078F

SHEET NAME GI02B
SHEET 2B OF 129 SHEETS

GENERAL NOTES

1. THESE IMPROVEMENTS CONSIST OF WORK CALLED FOR ONLY ON THIS PLAN. THE PLAN REFERS TO THE CONTRACT DRAWINGS, SPECIFICATIONS, AND SCHEDULE OF WORK INCLUDED HEREIN.
2. THE CONTRACTOR SHALL CONFORM TO THE GENERAL CONDITIONS AND GENERAL REQUIREMENTS, THE LATEST EDITION AND SUPPLEMENTS OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, SSPWC PARTS 2-6, HEREINAFTER ADOPTED BY THE BOARD OF PUBLIC WORKS AND THE CITY OF LOS ANGELES INCLUDING THE CITY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS SSPWC ADDITIONS AND AMENDMENTS (BROWN BOOK), LATEST EDITION.
3. THE CONTRACTOR IS REQUIRED TO PARTICIPATE AT ALL PUBLIC RELATIONS AND COMMUNITY MEETINGS UNLESS EXCUSED BY THE CITY.
4. ALL CONSTRUCTION SHALL CONFORM TO THE 2020 CITY OF LOS ANGELES BUILDING CODE.
5. THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE ADA REQUIREMENTS.
6. ALIGNMENT AND LOCATION OF EXISTING STRUCTURES AND UTILITIES HAVE BEEN COMPILED WITH THE MOST ACCURATE INFORMATION AVAILABLE. ACTUAL DIMENSIONS, LOCATIONS, ELEVATIONS, ETC. MAY VARY. THE CONTRACTOR SHALL VERIFY EXISTING FIELD CONDITIONS AND BASE WORK ON ACTUAL ON-SITE CONDITIONS AND MEASUREMENTS. ANY DISCREPANCIES, OMISSIONS OR ERRORS ON THE DRAWINGS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER. THE CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY OF ALL REVISIONS DUE TO FAILURE TO GIVE SUCH NOTICE.
7. THE CONTRACTOR IS REQUIRED TO TAKE DUE PRECAUTIONARY MEASURES TO PROTECT THE UTILITY LINES SHOWN AND OTHER STRUCTURES NOT ON RECORD OR NOT SHOWN ON THESE PLANS. WHERE CONSTRUCTION, INCLUDING UTILITY LINES, CROSSES OR IS ADJACENT TO EXISTING UTILITY LINES (FUEL, WATER, SEWER, TELECOMMUNICATION, GAS, OR ELECTRIC), THE CONTRACTOR SHALL DIG TEST PITS AND CAREFULLY HAND EXCAVATE SO AS TO LOCATE, MARK, AND PROTECT THE UTILITY LINES AGAINST DISTURBANCE OR DAMAGE.
8. THE CONTRACTOR IS REQUIRED TO CONTACT UNDERGROUND SERVICE ALERT (USA) FOR UTILITY MARKINGS. CONTACTING USA AT 8-1-1 DOES NOT RELIEVE THE CONTRACTOR OF CONTACTING OWNERS OF NON-PRESSURE CONDUITS, WHO MAY NOT BE REQUIRED TO BE MEMBERS OF USA. THEREFORE, INDIVIDUAL CONTACTS TO SUCH OWNERS ARE REQUIRED.
9. THE CONTRACTOR SHALL GIVE REASONABLE NOTICE TO PROPERTY OWNERS OR OCCUPANTS OF THE PROPOSED IMPROVEMENTS FRONTING THEIR PROPERTY. THE CONTRACTOR SHALL OBTAIN A CITY-APPROVED "NOTICE OF PROPOSED UTILITY WORK" FROM THE ENGINEER AND DISTRIBUTE COPIES NO LATER THAN 10 CALENDAR DAYS PRIOR TO COMMENCEMENT OF CONSTRUCTION IN ACCORDANCE WITH THE REQUIREMENTS OF THE PROJECT MANUAL. NOTICES ARE NOT TO BE PLACED IN OR ATTACHED TO MAIL BOXES.
10. FOR DESCRIPTION OF SUBSURFACE CONDITIONS, REFER TO THE FOLLOWING NINYO AND MOORE REPORTS:
    - 10.1 GEOTECHNICAL EVALUATION LABOE TOS NO. 25 STORMWATER CAPTURE PARKS PROGRAM DAVID M. GONZALES RECREATION CENTER, DATED AUGUST 31, 2020;
    - 10.2 METHANE SURVEY FOR DAVID M. GONZALES PARK, DATED JUNE 8, 2020.
11. THE CONTRACTOR SHALL CONTACT NINYO AND MOORE (949) 753-7070 AT LEAST TWO WORKING DAYS IN ADVANCE OF REQUIRED OBSERVATIONS OR INSPECTIONS BY THE GEOTECHNICAL ENGINEER.
12. GEOTECHNICAL OBSERVATION AND TESTING OF MATERIALS SHALL BE DONE IN ACCORDANCE WITH SPECIFICATIONS SECTION 01453 SAMPLING, TESTING, AND FABRICATION AND SECTION 01712 SUBSURFACE CONDITIONS.
13. REFER TO GENERAL REQUIREMENTS SECTION 01452 OF THE SPECIFICATIONS FOR INSPECTION REQUIREMENTS.
14. IT IS EXPECTED THAT THE CONTRACTOR MUST PROVIDE SPECIAL PRECAUTIONS FOR WORKER PROTECTION. THESE DEVICES MAY INCLUDE BUT ARE NOT LIMITED TO PROTECTIVE CANOPIES AND SHORING.
15. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ADEQUATELY BRACING AND PROTECTING ALL WORK DURING CONSTRUCTION AGAINST DAMAGE, BREAKAGE, COLLAPSE, DISTORTIONS AND OFF ALIGNMENTS ACCORDING TO CODES AND STANDARDS OF GOOD PRACTICE.
16. AT LEAST THIRTY (30) DAYS BEFORE THE START OF CONSTRUCTION, THE CONTRACTOR/ENGINEER SHALL CONTACT THE BUREAU OF STREET SERVICES, COORDINATING SECTION AT (213) 485-5691 TO VERIFY THAT THERE IS NO PROPOSED PROJECT IN THIS AREA.
17. SURVEY MONUMENT PRESERVATION IS REQUIRED AND SHALL INCLUDE SUBMITTAL OF PRE AND POST CONSTRUCTION SURVEY MONUMENT TIES TO THE ENGINEER AS SPECIFIED IN SPECIFICATION SECTION 01722.
18. THE CONTRACTOR MUST MAINTAIN FLOOD CAPACITY AT ALL TIMES DURING CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE ACCEPTANCE AND CONTROL OF ALL SURFACE AND SUBSURFACE DRAINAGE AND GROUNDWATER ENTERING THE PROJECT AREA. REFER TO SECTION 02235 OF THE SPECIFICATIONS FOR DEWATERING REQUIREMENTS; AND GENERAL REQUIREMENTS SECTION 01112 FOR STORM DRAIN AND DRY WEATHER FLOWS.
19. THE CONTRACTOR SHALL CONDUCT ALL GRADING AND PLANTING OPERATIONS IN ACCORDANCE WITH ALL REQUIRED PERMITS. FOR A LIST OF THE PERMITS, REFER TO SPECIFICATIONS SECTION 01112.
20. CONTRACTOR IS RESPONSIBLE FOR STAKING THE LINE AND GRADE SHOWN ON THE DRAWINGS, PRIOR TO PROCEEDING WITH CONSTRUCTION. THIS WORK INCLUDES, BUT IS NOT LIMITED TO, LOCATION OF ALL PLANTING TYPES. ANY ERRORS OR OMISSIONS ON THE CONSTRUCTION DRAWINGS SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE ENGINEER. FAILURE TO DO SO DOES NOT RELIEVE THE CONTRACTOR FROM COMPLETING THE WORK AS REQUIRED. ENGINEER WILL REVIEW AND APPROVE IN WRITING PLANTING LAYOUT IN THE FIELD.
21. THE PHYSICAL FEATURES WITHIN THE LIMITS OF THE MAPPING HAVE BEEN SHOWN BASED ON PHOTOGRAMMETRIC MAPPING PROCEDURES AND NATIONAL STANDARDS. DISCONTINUITIES IN CONTOURS ARE THE RESULT OF MAPPING PRODUCED AT DIFFERENT DATES AND USING ALTERNATIVE METHODS (FOR EXAMPLE, AERIAL PHOTOGRAPHY, GROUND SURVEYS, AND ONE (1) FOOT VERSUS FIVE (5) FOOT CONTOUR MAPPING ACCURACIES.)
22. THE CONTRACTOR SHALL BE RESPONSIBLE FOR RESETTING SURVEY CONTROL MONUMENTS DISTURBED BY CONSTRUCTION AS NECESSARY.
23. THE CONTRACTOR SHALL LIMIT CONSTRUCTION AND ANCILLARY ACTIVITIES TO THOSE AREAS WITHIN THE LIMITS OF GRADING AS INDICATED BY THE DAYLIGHT LINE SHOWN ON THE PLANS AND CROSS SECTIONS WITH THE EXCEPTION OF LANDSCAPE AND RESTORATION ACTIVITIES OUTSIDE LIMITS OF GRADING. ANY DISTURBANCE BEYOND THESE LIMITS SHALL BE RESTORED TO ORIGINAL CONDITION BY THE CONTRACTOR AT HIS EXPENSE.
24. PRIOR TO STARTING ANY CONSTRUCTION ACTIVITY, THE CONTRACTOR SHALL COORDINATE AND ATTEND A PRE-CONSTRUCTION MEETING. REFER TO SECTION 01312 IN THE SPECIFICATIONS FOR MEETING REQUIREMENTS.
25. THE TOP ELEVATION OF ALL EXISTING HANDHOLES, MANHOLES, CATCH BASINS, VALVE BOXES, AND FILL CAPS COVERS LOCATED WITHIN THE CONSTRUCTION AREA SHALL BE FLUSH WITH THE PROPOSED GRADE. IF ANY STRUCTURE IS TO BE RESET, CONTRACTOR TO NOTIFY THE ENGINEER IMMEDIATELY PRIOR TO RESETTING.
26. UNSUITABLE MATERIAL, REMOVED VEGETATION, CONSTRUCTION DEBRIS, ETC. SHALL BE PROPERLY REMOVED AND DISPOSED OF OFF-SITE IN ACCORDANCE WITH APPLICABLE FEDERAL, STATE AND LOCAL CODES, ORDINANCES, AND LAWS.
27. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DETERMINING ADEQUATE METHODS AND MEANS OF COMPLETION OF THE WORK PRIOR TO THE COMMENCEMENT OF CONSTRUCTION AND NOTIFY THE ENGINEER IF A CONFLICT IS IDENTIFIED.
28. THE CONTRACTOR SHALL REPLACE ALL PAVING, STABILIZING EARTH, DRIVEWAYS, SIDEWALKS, CONCRETE CURB, ETC. WITH THE SAME TYPE OF MATERIAL THAT WAS DAMAGED DURING CONSTRUCTION OR AS DIRECTED BY THE ENGINEER.
29. UNLESS OTHERWISE SPECIFIED IN CONTRACT DOCUMENTS, ALL WORK SHALL CONFORM TO REQUIREMENTS OF THE SSPWC PARTS 2-6, THE BROWN BOOK (THE CITY'S SUPPLEMENT TO THE SSPWC), AND CITY STANDARD PLANS.
30. ANY POTENTIAL PERMITS FOR DEWATERING ARE THE RESPONSIBILITY OF THE CONTRACTOR, INCLUDING THE PROPER USE AND DISCHARGE OF DEWATERING FLOWS TO MEET ALL WATER QUALITY REQUIREMENTS. THE CONTRACTOR MAY NOT DRAW DOWN GROUNDWATER LEVELS OFFSITE UNLESS PERMITTED BY THE APPLICABLE AGENCIES AND WITH PERMISSION OF THE AFFECTED LANDOWNERS. IF DEWATERING IS NEEDED, A DEWATERING PLAN SIGNED AND STAMPED BY A CALIFORNIA CERTIFIED HYDROGEOLOGIST SHALL BE REVIEWED BY THE BOE-GEOLOGIST. REFER TO SPECIFICATION SECTION 02235 FOR DEWATERING REQUIREMENTS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONTROLLING, TREATMENT, AND DISPOSAL OF ALL GROUNDWATER ENCOUNTERED DURING CONSTRUCTION.
31. REFER TO SPECIFICATION SECTION 01562 FOR REQUIRED ENVIRONMENTAL MITIGATION MEASURES AND CONSTRUCTION CONSTRAINTS. MITIGATION MEASURES INCLUDE MEASURES TO REDUCE CONSTRUCTION IMPACT ON AIR QUALITY, BIOLOGICAL RESOURCES, CULTURAL RESOURCES; POTENTIAL HAZARDOUS MATERIAL IMPACTS; IMPACT OF DAYTIME CONSTRUCTION NOISE, AND TRAFFIC.
32. THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE RULES AND REGULATIONS. SAFETY IS THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
33. ALL STRUCTURES SHALL COMPLY WITH FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) TECHNICAL BULLETIN 2-08 FOR FLOOD PROOFING.
34. STANDARD SPECIFICATIONS: ALL WORK SHALL CONFORM TO THE LATEST EDITION AND SUPPLEMENTS OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (SSPWC) ADOPTED BY THE BOARD PUBLIC WORKS OF THE CITY OF LOS ANGELES AS MODIFIED BY THE CORRESPONDING ISSUE OF THE LATEST STANDARD PLAN S-610, AND SPECIAL PROVISIONS, AND THE CURRENT LOS ANGELES BUILDING CODE (L.A.B.C.)
35. THE CONTRACTOR IS RESPONSIBLE FOR DESIGN, IMPLEMENTATION, MAINTENANCE, AND COST OF THE SHORING INCLUDING ITS PERMIT AND PERMIT PROCESS. CONTRACTOR SHALL SUBMIT THE SHORING DESIGN TO BOE FOR REVIEW AND APPROVAL.
36. THE CONTRACTOR IS RESPONSIBLE TO OBTAIN A HAULING PERMIT AS THE EXPORT AND IMPORT IS GREATER THAN 1,000 CY.
37. THE CONTRACTOR IS REQUIRED TO VIDEO TAPE AND PHOTOGRAPH EXISTING CONDITIONS THROUGHOUT THE NEIGHBORHOOD AND PARK PRIOR TO THE START OF WORK.
38. THE CONTRACTOR SHALL IMPLEMENT THE TREE PROTECTION AND OTHER REQUIREMENTS ON SHEETS LP03 AND LP04 FOR EVERY TREE WITHIN THE CONSTRUCTION SITE PRIOR TO STARTING WORK AT THE PARK.
39. THE CONTRACTOR IS RESPONSIBLE FOR POTHOLING ALONG THE AREAS OF WORK/ALIGNMENTS TO CLEAR ANY OBSTRUCTIONS AND VERIFY EXISTING CONDITIONS INCLUDING INVERT ELEVATIONS. THE CONTRACTOR SHALL PERFORM A MINIMUM OF 1 POTHOLE EVERY 20 FEET ALONG THE ALIGNMENT AND AT ALL CATCH BASINS.
40. ALL AREAS USED BY THE CONTRACTOR AS LAYDOWN AREAS SHALL BE RESTORED WITH NEW SOD AND/OR RESEEDED.
41. THE CONTRACTOR IS RESPONSIBLE FOR DETOURING FOOT TRAFFIC AROUND THE CONSTRUCTION AND CAPTURE THIS IS THE TRAFFIC CONTROL PLANS.
42. AS A MINIMUM THE CONTRACTOR SHALL SUBMIT THE FOLLOWING DEFERRED SUBMITTALS: TEMPORARY SHORING (CONTRACTOR TO DESIGN AND BUILD), MODULAR BURIED STORMWATER INFILTRATION SYSTEM (CONTRACTOR SHALL DESIGN AND BUILD), SEDIMENTATION BASIN, HYDRODYNAMIC SEPARATORS, VENT STRUCTURES, AND INFILTRATION FILTER SYSTEMS.
43. STORMWATER MANAGEMENT DURING CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE STORMWATER POLLUTION PREVENTION PLAN.
44. TOTAL ESTIMATED EXCAVATION AREA FOR THE PROJECT IS 3.8 ACRES. THIS QUANTITY IS FOR PERMITTING PURPOSES AND SHALL NOT BE USED FOR THE CONTRACTOR'S BID.
45. THE CONTRACTOR IS RESPONSIBLE FOR STAKING ALL PROPERTY LINES BY A LICENSED SURVEYOR.
46. OVERHEAD POWER LINES LOCATION SHOWN ON PLAN IS APPROXIMATED, CONTRACTOR TO FIELD VERITY ACTURAL LOCATION AND HEIGHT.
47. THE CONTRACTOR SHALL BE RESPONSIBLE FOR BARRICADING ITS WORK AREA TO PREVENT VEHICLES FROM PARKING IN THE PROPOSED LINE OF OPERATIONS. ANY DAMAGE TO PARKED VEHICLES CAUSED BY THE CONSTRUCTION OPERATIONS SHALL BE THE CONTRACTORS LIABILITY.ALL TRAFFIC CONTROLS IN THE WORK AREA SHALL CONFORM TO THE "WORK ARE TRAFFIC CONTROL HANDBOOK" (W.A.T.C.H) LATEST EDITION AND THE CALIFORNIA MUTCP.
48. BEFORE CONSTRUCTION IS STARTED, CONTRACTOR SHALL COORDINATE WITH THE OWNER OF EACH UTILITY AND DEFINE THE REQUIREMENTS AND METHODS TO ACCOMMODATE THE PROTECTION, TEMPORARY SUPPORT, ADJUSTMENT, OR RELOCATION OF ANY UTILITIES AFFECTED BY THE PROPOSED NEW WORK.
49. CONTRACTOR SHALL PERFORM DUST CONTROL PROTOCOLS FOR CONSTRUCTION WORK ALONG MOREHART STREET. DUE TO THE LIMITED AVAILABLE STREET SPACE ALONG MOREHART, CONTRACTOR SHALL COORDINATE THE CONSTRUCTION WORK ACCORDINGLY WITH INSTALLATION OF TEMPORARY TRENCH PLATE TO PROVIDE VEHICLE ACCESS AND PARKING FOR THE RESIDENTIAL DRIVEWAYS AND STREET PARKING AT CLOSURE OF DAILY CONSTRUCTION WORKS.
50. CONTRACTOR TO PROVIDE TEMPORARY COVER FOR TRENCH, MANHOLES, VAULTS ETC WITH TRENCH PLATES INSTALLATION PER GREENBOOK REQUIREMENTS AND USE THE APPROVED PRODUCTS BY THE CITY WITH COMPLIANCE TO THE CITY STANDARD PLAN S-601-3.
51. CONTRACTOR TO PROVIDE TREE PROTECTION FOR EVERY TREE WITHIN THE CONSTRUCTION SITE (EXCEPT THOSE BEING REMOVED) PRIOR TO THE START OF WORK AND FOLLOW THE RECREATION AND PARK REQUIREMENTS INCLUDED IN THE LANDSCAPE ARCHITECTURE DRAWINGS AND SPECIFICATIONS.
52. CONTRACTOR SHALL PROTECT EXISTING IMPROVEMENTS WITHIN PROJECT WORK AREA PER GREENBOOK SECTION 400 - PROTECTION AND RESTORATION. CONTRACTOR SHALL RESTORE EXISTING IMPROVEMENTS WITHIN PUBLIC RIGHT-OF-WAY NOT MARKED FOR REMOVAL WHICH ARE DAMAGED OR REMOVED AT CONTRACTOR'S OWN COST.
53. ALL STRUCTURES AND HATCHES SHALL BE AASHTO AND ACI HS-20 RATED.
54. CONTRACTOR SHALL PREPARE A CONSTRUCTION MANAGEMENT PLAN FOR ACCEPTANCE BY THE ENGINEER PRIOR TO THE START OF CONSTRUCTION ACTIVITIES ON THE SITE. THIS PLAN IS TO INCLUDE THE FOLLOWING ITEMS RELATED TO THE CONSTRUCTION ACTIVITIES:
    - A. MITIGATION MEASURES AND CONSTRUCTION CONTROLS
    - B. PUBLIC FEEDBACK MECHANISMS IN ACCORDANCE WITH CITY POLICIES
    - C. TREE PROTECTION
    - D. SOIL MANAGEMENT AND REUSE PLAN FOR TOP SOIL AND NATIVE SOILS THAT ARE EXCAVATED
    - E. PUBLIC ACCESS AND SIGNAGE TO ADDRESS CLOSURE OF PARK AND MAINTAIN THE RECREATION CENTER OPEN WITH SAFE PUBLIC ACCESS
    - F. SITE SECURITY FOR CONSTRUCTION WORKS
    - G. TRAFFIC MANAGEMENT PLAN FOR THE RECREATION CENTER SITE
55. CONTRACTOR SHALL PREPARE A CULTURAL RESOURCES MANAGEMENT PLAN FOR ACCEPTANCE BY THE ENGINEER PRIOR TO THE START OF CONSTRUCTION ACTIVITIES ON THE SITE. THIS PLAN IS TO INCLUDE A DESCRIPTION OF HISTORICAL RESOURCES PRESENT WITHIN THE PROJECT AREA, AND DEFINED OPERATIONAL AND PRESERVATION GOALS AND PRIORITIES PLANNED DURING THE CONSTRUCTION.
56. CONTRACTOR SHALL DOCUMENT CONTROL, CONTAINMENT OR SUPPRESSION ACTIVITIES DURING CONSTRUCTION OF MAJOR INVASIVE PLANT INFESTATIONS.
57. HOURS OF CONSTRUCTION ACTIVITIES SHALL BE WITHIN THE ALLOWED HOURS OF 7:00 AM TO 6:00 PM MONDAY THROUGH FRIDAYS. SPECIFIC HOUR RESTRICTIONS FOR CONSTRUCTION ACTIVITIES REQUIRING TEMPORARY TRAFFIC CONTROL ARE INCLUDED IN THE TRAFFIC CONTROL DRAWINGS.
58. DRAINS FROM ALL ACCESS HATCHES TO BE DIRECTED TO A 3 FTx3FTx3FT SUBSURFACE VOLUME OF 3/4" CRUSHED STONE PROVIDED AND INSTALLED BY THE CONTRACTOR.
59. THE ENGINEER DOES NOT WARRANT THE ACCURACY OF THE SCALED DIMENSIONS. ALL DIMENSIONS SHALL BE AS DESIGNATED ON THE PLANS.
60. THE CONTRACTOR SHALL BRING TO THE ENGINEER'S ATTENTION ANY OMISSIONS OR CONFLICTS BETWEEN VARIOUS ELEMENTS OF THE DRAWINGS, NOTES AND DETAILS PRIOR TO PROCEEDING WITH THE WORK.
61. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND CONDITIONS IN THE FIELD BEFORE STARTING WORK. NOTIFY THE ENGINEER IMMEDIATELY OF AND DISCREPANCIES.
62. THE CONTRACTOR SHALL PROTECT ALL PUBLIC AND PRIVATE PROPERTY INSOFAR AS IT MAY BE ENDANGERED BY HIS/HER OPERATIONS FOR THE PROJECT. THE CONTRACTOR SHALL TAKE EVERY NECESSARY PRECAUTION TO AVOID DAMAGE TO EXISTING STRUCTURES AND ENSURE THE SAFETY OF PEDESTRIANS IN THE PROXIMITY OF THE WORK. THE CONTRACTOR SHALL FURNISH AND INSTALL APPROPRIATE SIGNS AND ADEQUATE WARNING DEVICES TO ADVISE THE PUBLIC OF CONSTRUCTION HAZARDS, AND UPON COMPLETION OF THE WORK SHALL PROMPTLY REMOVE THEM. ANY DAMAGE TO THE EXISTING STRUCTURES CAUSED BY THE CONTRACTOR'S OPERATIONS SHALL BE REPAIRED TO THE SATISFACTION OF THE ENGINEER AT NO COST TO THE CITY.
63. THE CONTRACTOR SHALL EXERCISE CARE THAT NO EXCAVATED MATERIAL OR DEBRIS RESULTING FROM HIS OPERATION SHALL RUN DOWN THE EXISTING SLOPE AND STREET OR OTHER PROPERTIES. EXISTING TREES AND SHRUBBERY, WHEN NOT IN DIRECT CONFLICT WITH CONSTRUCTION ACTIVITIES, SHALL BE PROTECTED.
64. EXISTING ABANDONED IMPROVEMENTS AS INDICATED BY THE ENGINEER THAT INTERFERE WITH THE PROPOSED CONSTRUCTION SHALL BE REMOVED AND DISPOSED OF BY THE CONTRACTOR UNLESS OTHERWISE NOTED. ALL MATERIAL SUCH AS VEGETATION, TIMBER, ROCKS, CONCRETE AND ASPHALT.
65. ANY TRENCHING FOR SUBDRAIN SHALL BE PLACED PROGRESSIVELY IN 20 FOOT LENGTHS. TRENCH SHALL BE EXCAVATED IN 20 FOOT LENGTHS AND SHALL BE BACKFILLED PRIOR TO EXCAVATION OF NEXT 20 FOOT SECTION.
66. CONTRACTOR SHALL SUBMIT SITE SPECIFIC PLANS FOR PROPOSED LAYOUT OF TEMPORARY EROSION CONTROL. OBTAIN GRADING INSPECTORS AND DEPARTMENT OF PUBLIC WORKS APPROVAL OF PROPOSED PROCEDURES. (L.A.B.C. SECTION 91.7007.1).
67. THE CONTRACTOR SHALL MAINTAIN ROADWAY ACCESS TO NEIGHBORHOOD PRIVATE PROPERTIES DURING THE NORMAL WORKING HOURS FROM 7:00 AM TO 4:00 PM AND SHALL REMOVE ALL WORKING EQUIPMENT FROM ROADWAY ACCESS BETWEEN HOUR OF 4:00 PM TO 7:00 AM OF THE FOLLOWING MORNING.
68. AT LEAST 10 DAYS BEFORE START OF CONSTRUCTION, THE CONTRACTOR SHALL GIVE THE NOTICE TO THE OCCUPANTS OF ADJACENT PROPERTIES OF THE PROPOSED CONSTRUCTION DATE PER SECTION 7-10 IN BROWNBOOK 7TH EDITION (LATEST).
69. THE CONTRACTOR SHALL NOTIFY HOMEOWNERS, TENANTS, PACOIMA CHARTER ELEMENTARY SCHOOL, AND PUBLIC EMERGENCY SERVICES (FIRE DEPARTMENT, RECREATION AND PARKS, AND POLICE DEPARTMENT) AFFECTED BY THIS WORK AT LEAST ONE WEEK PRIOR TO MOBILIZATION.
70. THE STAMPED SET OF PLANS APPROVED BY BUILDING AND SAFETY SHALL BE ON THE JOB SITE AT ALL TIMES.
71. FILL SLOPES SHALL BE OVER BUILT AT LEAST 2 TO TO 3 FEET AND TRIMMED BACK TO EXPOSE A FIRM COMPACTED SURFACE ON THE SLOPE FACE.
72. NO FILL TO BE PLACED UNTIL STRIPPING OF VEGETATION, REMOVAL OF UNSUITABLE SOILS AND INSTALLATION OF SUBDRAINS (IF ANY) HAS BEEN INSPECTED AND APPROVED BY THE GEO SOILS ENGINEER.
73. NO ROCK OR SIMILAR MATERIAL GREATER THAN 6" IN DIAMETER SHALL BE PLACED IN THE FILL UNLESS RECOMMENDATION FOR SUCH PLACEMENT HAVE BEEN SUBMITTED BY THE SOIL ENGINEER IN ADVANCE AND APPROVED.
74. UNDERGROUND SERVICE ALERT: BEFORE COMMENCING ANY EXCAVATION , THE CONTRACTOR SHALL OBTAIN AN UNDERGROUND SERVICE ALERT (USA) INQUIRY I.D. NUMBER BY CALLING (800) 227-2600. TWO WORKING DAYS SHALL BE ALLOWED AFTER THE I.D. NUMBER IS OBTAINED AND BEFORE THE CONTRACTOR STARTS THE EXCAVATION WORK SO THAT UTILITY OWNERS CAN BE NOTIFIED. IF THE UTILITY OWNER IS THE CITY OF LOS ANGELES, A CONFIRMATION NUMBER INDICATION THE CITY HAS BEEN NOTIFIES SHALL BE OBTAINED BY USA AND/OR THE CONTRACTOR FROM THE APPROPRIATE CITY DEPARTMENT. THE I.D. NUMBER TOGETHER WITH THE DATE ACQUIRED SHALL BE REPORTED TO THE BUREAU OF CONTRACT ADMINISTRATION WHEN CALLING FOR INSPECTION. I.D. NUMBERS WILL NOT BE GIVEN MORE THAT 10 DAYS BEFORE STARTING EXCAVATION WORK.
75. THE CONTRACTOR SHALL COMPLY WITH THE SAFE CLEAN WATER PROGRAM GRANT REQUIREMENTS.
76. WITHIN THREE WEEKS OF THE BID AWARD CONTRACTOR TO SURVEY AND CONFIRM INVERT ELEVATIONS OF EXISTING 84" RCP STORM DRAIN AT DIVERSION STRUCTURE NO. 1 AND 63" RCP STORM DRAIN AT DIVERSION STRUCTURE NO. 2 AND PROVIDE THESE ELEVATIONS TO THE ENGINEER.

WORK ORDER EW40078F

SHEET NAME GI03

SHEET 3 OF 129 SHEETS

SUBGRADE PREPARATION FOR DESILTING BASIN WITH INLET STRUCTURE AND INFILTRATION GALLERY

ALLUVIUM IS ANTICIPATED AT THE BOTTOM OF THE PLANNED INFILTRATION GALLERY, DESILTING BASIN INLET STRUCTURES AND DESILTING BASINS THAT SHOULD BE SUITABLE FOR SUPPORT OF THE STRUCTURES AND OVERLYING COMPACTED FILL. THE EXCAVATION BOTTOM SHOULD BE EVALUATED BY THE ENGINEER DURING THE EXCAVATION WORK. IN THE EVENT THAT UNSUITABLE MATERIAL IS ENCOUNTERED ALONG THE BOTTOM OF THE EXCAVATION, INCLUDING UNDOCUMENTED FILL AND/OR WASTE, THE UNSUITABLE MATERIAL ENCOUNTERED AT THE BOTTOM OF THE STRUCTURE EXCAVATION SHALL BE REMOVED AND REPLACED WITH LOOSELY-PACKED CLEAN SAND OR GRAVEL, SUCH AS ADDITIONAL CRUSHED STONE. THE DECISION FOR REMOVAL AND REPLACEMENT SHALL BE BASED ON THE ENGINEER FIELD OBSERVATIONS. UNLESS DIRECTED BY THE ENGINEER, NO COMPACTION IS TO BE PERFORMED ON THE EXPOSED SUBGRADE, MATERIALS USED TO REPLACE UNSUITABLE MATERIALS (IF NEEDED), AND AND/OR CRUSHED STONE PLACED BENEATH THE STRUCTURES. THE CRUSHED STONE BLANKET SHALL CONSIST OF OPEN-GRADED GRAVEL OF 3/4-INCH TO 1 1/2-INCH DIAMETER ROCK. THE CRUSHED STONE LAYERS SHALL BE FREE OF FINES, DEBRIS, TRASH, ETC. FOR ADDITIONAL INFORMATION SEE GEOTECHNICAL EVALUATION LABOE TOS NO.25 STORMWATER CAPTURE PARKS PROGRAM FERNANGELES PARK BY NINYO & MOORE DATED AUGUST 31,2020.

SUBGRADE PREPARATION FOR ALL OTHER STRUCTURES

IN ORDER TO PROVIDE SUITABLE SUPPORT FOR PROPOSED BURIED AND/OR AT-GRADE STRUCTURES, OTHER THAN INFILTRATION GALLERY AND DESILTING BASINS WITH INLET STRUCTURES, THE EXISTING UNDOCUMENTED FILL AND UPPER LOOSE ALLUVIAL DEPOSITS SHALL BE REMOVED FROM BENEATH THE STRUCTURES. IN ADDITION, THE STRUCTURE FOUNDATIONS SHOULD BE FOUNDED ON 2 FEET OF NEWLY COMPACTED STRUCTURAL FILL MATERIAL. THE OVER EXCAVATION SHALL REMOVE UNDOCUMENTED FULL AND EXPOSE RELATIVELY DENSE ALLUVIAL DEPOSITS. ADDITIONAL OVER-EXCAVATION OF LOOSE, SOFT, AND/OR WET AREAS MAY BE APPROPRIATE. THE EXCAVATION BOTTOM SHALL BE EVALUATED BY THE ENGINEER DURING THE EXCAVATION WORK AND ADDITIONAL RECOMMENDATIONS, IF NEEDED, BE BASED ON FIELD OBSERVATIONS. THE LIMITS OF REMOVAL SHALL EXTEND APPROXIMATELY 2 FEET BEYOND THE FOOTPRINT OF THE FOUNDATIONS. PRIOR TO PLACING COMPACTED STRUCTURAL FILL AND/OR DRAINAGE ROCK, THE UPPER APPROXIMATELY 8 INCHES OF THE EXPOSED BOTTOM SHALL BE SCARIFIED, MOISTURE-CONDITIONED TO NEW OPTIMUM MOISTURE CONTENT, AND RECOMPACTED TO A RELATIVE COMPACTION OF 90 PERCENT AS EVALUATED BY ASTM D 1557. FOR ADDITIONAL INFORMATION SEE GEOTECHNICAL EVALUATION LABOE TOS NO.25 STORMWATER CAPTURE PARKS PROGRAM DAVID M. GONZALES RECREATION CENTER BY NINYO & MOORE DATED AUGUST 31,2020.

FILL MATERIAL, FILL PLACEMENT AND COMPACTION

IN GENERAL, THE ON-SITE SOILS SHALL BE SUITABLE FOR REUSE AS STRUCTURAL FILL AND FILL MATERIALS, PROVIDED THEY ARE FREE OF TRASH, DEBRIS, OVERSIZE MATERIAL, OR OTHER DELETERIOUS MATERIALS. FILL SHALL BE FREE OF ROCKS OR LUMPS OF MATERIAL IN EXCESS OF 4 INCHES IN DIAMETER. ROCKS OR HARD LUMPS LARGER THAN APPROXIMATELY 4 INCHES IN DIAMETER SHALL BE BROKEN INTO SMALLER PIECES OR SHALL BE REMOVED FROM THE SITE.

IMPORTED FILL MATERIAL, AS NEEDED AND DIRECTED BY THE ENGINEER, SHALL ALSO CONSIST OF CLEAN, GRANULAR MATERIAL WITH A LOW EXPANSION POTENTIAL, CORRESPONDING TO AN EXPANSION INDEX OF 50 OR LESS. THE SOIL SHALL ALSO BE TESTED FOR CORROSIVE PROPERTIES PRIOR TO IMPORTING. THE IMPORTED MATERIALS SHALL SATISFY THE CALTRANS (2018) CRITERIA FOR NON-CORROSIVE SOILS (i.e., SOILS HAVING A CHLORIDE CONCENTRATION OF 500 PARTS PER MILLION [ppm] OR LESS, A SOLUBLE SULFATE CONTENT OF APPROXIMATELY 0.15 PERCENT (1,500 ppm) OR LESS, A pH VALUE OF 5.5 OR HIGHER, OR AN ELECTRICAL RESISTIVITY OF 1,100 OHM-CENTIMETERS OR MORE). MATERIALS FOR USE AS STRUCTURAL FILL AND FILL WILL BE EVALUATED BY THE ENGINEER PRIOR TO IMPORTING. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE UNIFORMITY OF IMPORT MATERIAL BROUGHT TO THE SITE.

FILL MATERIAL, INCLUDING STRUCTURAL FILL BENEATH STRUCTURES, BACKFILL AROUND THE PERIMETER AND ABOVE STRUCTURES, AND OTHER, SHALL BE MOISTURE-CONDITIONED AND COMPACTED IN HORIZONTAL LIFTS TO A RELATIVE COMPACTION OF 9 0 PERCENT OR MORE AS EVALUATED BY ASTM D 1557. FILL MATERIAL WITH LESS THAN 5 PERCENT FINES (PASSING NO.200 SIEVE) SHALL BE COMPACTED TO 95 PERCENT RELATIVE COMPACTION IN ACCORDANCE WITH CITY OF LOS ANGELES GUIDELINES AS EVALUATED BY ASTM D 1557. FILL MATERIAL SHALL BE MOISTURE-CONDITIONED TO SLIGHTLY ABOVE THE LABORATORY OPTIMUM MOISTURE CONTENT. THE LIFT THICKNESS SHALL NOT EXCEED 8 INCHES IN LOOSE THICKNESS. PLACEMENT AND COMPACTION OF THE FILL SOILS SHALL BE IN GENERAL ACCORDANCE WITH LOCAL GRADING ORDINANCES AND GOOD CONSTRUCTION PRACTICE.

CONTRACTOR SHALL FOLLOW THE REQUIREMENTS OF THE DESILTING BASIN AND INFILTRATION GALLERY SUPPLIERS FOR SOIL COMPACTION OPERATIONS REGARDING ANY MACHINERY LIMITATIONS, PROTECTIONS AND MONITORING, ETC. NEEDED TO PROPERLY PROTECT THE IN PLACE STRUCTURES. FOR ADDITIONAL INFORMATION SEE GEOTECHNICAL EVALUATION LABOE TOS NO.25 STORMWATER CAPTURE PARKS PROGRAM FERNANGELES PARK BY NINYO & MOORE DATED AUGUST 31,2020.

STREET LIGHTING

(P) INDICATES PROTECT EXISTING STREET LIGHTING FACILITIES. THE CONTRACTOR SHALL PROTECT AND MAINTAIN ALL STREET LIGHTING FACILITIES WITHIN THE WORK AREA. SHOULD ANY DAMAGE TO THE EXISTING STREET LIGHTING SYSTEM OCCUR, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE BUREAU OF STREET LIGHTING, FIELD OPERATION DIVISION, BY TELEPHONING (323) 913-4743; OR AFTER 4:30 PM (3:30 PM ON FRIDAYS), CONTACT THE ELECTRIC TROUBLE BOARD OF DWP AT (800) 821-5278 WITHIN THE (213) AND (310) AREA CODES OF LOS ANGELES. THE CONTRACTOR SHALL ARRANGE FOR IMMEDIATE REPAIR AND RESTORATION TO SERVICE OF THE DAMAGED LIGHTING SYSTEM AT NO COST TO THE CITY. A LICENSED ELECTRICAL CONTRACTOR IS REQUIRED TO MAKE ALL REPAIRS. ALL STREET LIGHTING WORK SHOULD BE MADE IN ACCORDANCE WITH THE LATEST EDITION AND SUPPLEMENTS OF THE "STANDARD SPECIFICATION FOR PUBLIC WORKS CONSTRUCTION," ADOPTED BY THE CORRESPONDING ISSUE OF THE BROWN BOOK AND THE BUREAU OF STREET LIGHTING "SPECIAL SPECIFICATIONS" INCLUDING LATEST REVISIONS.

SIGNS AND MARKINGS MAINTENANCE

1. THE CONTRACTOR SHALL FOLLOW THE GREEN BOOK SECTION 400 PROTECTION AND RESTORATION AND MAKE ARRANGEMENTS FOR THE RESTORATION OF ALL OBLITERATED PAVEMENT MARKINGS AND FOR THE REINSTALLATION OF ALL MISSING OR DAMAGED SIGNS, CURB MARKINGS, STAMPED CROSSWALKS, PARKING METERS, ETC. IN SOME CASES, THE CONTRACTOR MAY BE REQUIRED TO INSTALL OBLITERATED AND RELATED PAVEMENT MARKINGS AS WELL AS MISSING, DAMAGED AND/OR RELATED SIGNS, TO THE SATISFACTION OF LADOT.
2. ALL STRIPING AND PAVEMENT MARKINGS SHALL BE INSTALLED UTILIZING THERMOPLASTIC MATERIALS PER LADOT SPECIFICATIONS. THE CONTRACTOR SHALL CONTACT LADOT'S WESTERN DISTRICT OFFICE AT (310) 575-8138 PRIOR TO COMMENCING ANY WORK THAT REQUIRES SIGN AND/OR MARKING MAINTENANCE.
3. IN ADDITION TO SIGNS REQUIRED BY THE REVISIONS OF THE "WORK AREA TRAFFIC CONTROL HANDBOOK" (WATCH), LATEST EDITION, FURNISH AND PLACE SIGNS FOR GIVING ADVANCE NOTICE TO MOTORISTS OF TRAFFIC DISRUPTION AS PART OF THIS PROJECT IN ACCORDANCE WITH SECTION 01581 OF THE SPECIFICATIONS. THE CONTRACTOR IS RESPONSIBLE TO DESIGN, OBTAIN, PAY AND IMPLEMENT A WORK SITE TRAFFIC CONTROL PLAN AND THE CONTRACTOR SHALL MAINTAIN/ADJUST THE PLAN AS IT IS NEEDED FOR THE WORK.
4. TRAFFIC CONTROL SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF THE WORK AREA TRAFFIC CONTROL HANDBOOK (WATCH) ADOPTED BY THE BOARD OF PUBLIC WORKS OF THE CITY OF LOS ANGELES AND REQUIREMENTS OF THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD) PUBLISHED BY THE CALIFORNIA DEPARTMENT OF TRANSPORTATION.
5. FOR TRAFFIC RELATED NOTES PLEASE REFER TO TRAFFIC CONTROL PLANS TR01 THROUGH TR13.
6. CONTRACTOR SHALL DESIGN TEMPORARY TRAFFIC CONTROL PLAN FOR EXECUTION OF THE WORK IN PUBLIC STREET ROW. CONTRACTOR IS RESPONSIBLE TO CONTACT LADOT AT (213) 972-8470 FOR REQUIREMENTS, PAY & OBTAIN AS NEEDED PERMITS. TRAFFIC CONTROL SHALL BE IMPLEMENTED AT WORK SITE DURING-CONSTRUCTION.

CUT AND FILL ESTIMATES
TOTAL CUT VOLUME OF 155,000 CY
TOTAL FILL VOLUME OF 65,000 CY

NOTE: THESE QUANTITIES ARE ROUGH ESTIMATES FOR PERMITTING PURPOSES AND SHALL NOT BE USED FOR THE CONTRACTOR'S BID

BUREAU OF ENGINEERING

CITY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS BUREAU OF ENGINEERING

WORK ORDER
EW40079F

SHEET NAME
VF01

SHEET 7 OF 129 SHEETS

EW40078D

WORKSITE TRAFFIC CONTROL GENERAL NOTES:

1. ALL STREET, LANE, AND SIDEWALK CLOSURES MUST BE APPROVED BY THE BOARD OF PUBLIC WORKS (OR THEIR DESIGNEE). AN EXEMPTION TO THE L.A.M.C. 62.61(B) (RUSH HOUR CONSTRUCTION ON CITY STREETS) MUST BE APPROVED BY THE LOS ANGELES BUREAU OF ENGINEERING FOR ANY AND ALL PEAK HOUR LANE CLOSURES ON ARTERIAL, SECONDARY, AND COLLECTOR STREETS.

2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LABOR AND MATERIAL INVOLVED IN THE REMOVAL, INSTALLATION, AND MAINTENANCE OF ALL STRIPING, PAVEMENT MARKINGS, SIGNING, BARRICADING, K-RAILS, DELINEATORS, ETC., SHOWN ON THESE WORKSITE TRAFFIC CONTROL PLANS (WTCP) AND AS CONSTRUCTION STAGING NECESSITATES.

3. THE CONTRACTOR SHALL PROVIDE WRITTEN NOTIFICATION TO THE LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION AT GHASSAN.CHOUEIRY@LACITY.ORG (E-MAIL) AT LEAST FIVE (5) WORKING DAYS PRIOR TO CONSTRUCTION WITH THE DATE(S) OF IMPLEMENTATION AND TYPE OF TEMPORARY TRAFFIC CONTROL IMPLEMENTATION (INCLUDE ACCEPTANCE DATE ON PLAN AND SHEET NUMBER) INCLUDING A BRIEF DESCRIPTION OF WORK. LADOT RESERVES THE RIGHT TO OBSERVE THESE WORKSITE TRAFFIC CONTROL PLANS IN USE AND TO MAKE NECESSARY CHANGES AS FIELD CONDITIONS WARRANT. ANY CHANGES SHALL SUPERSEDE THESE PLANS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PLACEMENT OF ANY ADDITIONAL TRAFFIC CONTROL DEVICES NECESSARY TO ASSURE PUBLIC SAFETY AT ALL TIMES DURING CONSTRUCTION.

4. THE CONTRACTOR SHALL PERFORM WORK IN ONLY ONE STAGE AT A TIME. THE CONTRACTOR SHALL ONLY UTILIZE THAT PORTION OF THE DESIGNATED "WORK AREA" WHICH IS NEEDED FOR CONSTRUCTION AT ANY GIVEN TIME.

5. ALL CONSTRUCTION RELATED WARNING SIGNS SHALL BE IN BLACK LEGEND WITH ORANGE BACKGROUND AND IN CONFORMANCE WITH THE CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CAMUTCD) (LATEST EDITION).

6. THE SIGNING AND STRIPING SHOWN FOR REMOVAL ON THESE PLANS MAY BE DIFFERENT THAN WHAT EXISTS AT THE TIME OF INSTALLATION OF A CONSTRUCTION STAGE. THE CONTRACTOR SHALL REMOVE ALL CONFLICTING SIGNING AND STRIPING, WHETHER OR NOT IT IS DEPICTED ACCURATELY ON THESE PLANS. EXISTING SIGNS THAT ARE IN CONFLICT WITH THESE PLANS SHALL BE REMOVED OR COVERED BY THE CONTRACTOR AND RESTORED UPON REMOVAL OF THE WTCP.

7. FOR OTHER REQUIREMENTS RELATED TO TRAFFIC CONTROL PLANS AND WORK AREA MAINTENANCE, THE CONTRACTOR SHALL FOLLOW THE CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CAMUTCD) (LATEST EDITION), THE "WORK AREA TRAFFIC CONTROL HANDBOOK" (WATCH MANUAL) (2019 EDITION), AND ALL RELATED SECTIONS OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, INCLUDING SECTION 7-10 "PUBLIC CONVENIENCE AND SAFETY." AND 302-4.4 "PUBLIC CONVENIENCE AND TRAFFIC CONTROL."

8. THE CROSSWALKS ACROSS THREE LEGS (IF EXISTING) OF ANY SIGNALIZED INTERSECTION SHALL BE MAINTAINED AT ALL TIMES. "NO PED CROSSING" (R9-3, R9-3bP) SIGNS SHALL BE INSTALLED WHEN A PAINTED CROSSWALK IS UNAVAILABLE FOR USE DUE TO CONSTRUCTION, PEDESTRIAN SIGNAL INDICATIONS FOR THE CLOSED CROSSWALK SHALL BE COVERED AS INDICATED ON THE TEMPORARY TRAFFIC SIGNAL PLAN (IF AVAILABLE) OR PER THE WATCH MANUAL (SECTION 6-5).

9. THE CONTRACTOR SHALL INSTALL R3-18 (NO LEFT AND NO U-TURN) SIGNS AT INTERSECTIONS WHERE THE LEFT TURN LANE HAS BEEN CLOSED FOR CONSTRUCTION. SIGNS SHOULD BE INSTALLED ON TRAFFIC SIGNAL MAST ARMS AND FAR LEFT OF THE INTERSECTION OR AT LOCATIONS WHERE THEY WILL BE CLEARLY VISIBLE BY THE THRU TRAFFIC.

10. THE CONTRACTOR SHALL NOTIFY LACMTA AT (213) 922-4632 AND ANY OTHER AFFECTED TRANSIT SERVICES AT LEAST FIVE (5) WORKING DAYS PRIOR TO CONSTRUCTION.

11. ALL TRAFFIC CONTROL DEVICES SHALL BE KEPT IN THEIR PROPER POSITION AT ALL TIMES, AND SHALL BE REPAIRED, REPLACED, OR CLEANED AS NECESSARY TO PRESERVE THEIR APPEARANCE AND CONTINUITY.

12. THE CONTRACTOR SHALL PROVIDE FLAGGERS AS DEEMED NECESSARY BY LADOT. A FLAGGER SHALL USE ONLY THE APPROVED OCTAGONAL STOP/SLOW PADDLE, SHALL WEAR AN ORANGE CLASS 3 SAFETY VEST (PADDLE AND VEST MUST BE REFLECTORIZED FOR NIGHT WORK), AND HARD HAT, AS REQUIRED BY THE WATCH MANUAL. FLAGGERS MUST BE PROPERLY TRAINED BY THE CONTRACTOR IN PERFORMING THE WORK SAFELY. APPROPRIATE ADVANCE SIGNS MUST BE INSTALLED, PER THE WATCH MANUAL.

13. ALL TEMPORARY TRAFFIC CONTROL DEVICES SHALL BE REMOVED FOLLOWING COMPLETION OF EACH CONSTRUCTION STAGE AND THE PERMANENT TRAFFIC CONTROL DEVICES SHALL BE RESTORED BY THE CONTRACTOR UPON REMOVAL OF WTCP SIGNING AND STRIPING.

14. ALL SIGNS, DELINEATORS, BARRICADES, ETC., SHALL CONFORM TO THE STATE OF CALIFORNIA STANDARD SPECIFICATIONS, THE STATE OF CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CAMUTCD) (LATEST EDITION), THE "WORK AREA TRAFFIC CONTROL HANDBOOK" (2019 EDITION), THE CITY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS STANDARD PLAN S-610 (LATEST EDITION), AND THE NOTICE TO CONTRACTORS - COMPREHENSIVE.

15. THE CONTRACTOR SHALL CONTACT THE LADOT SPECIAL TRAFFIC CONTROLS OFFICE AT (213) 485-2298 AT LEAST FIVE (5) WORKING DAYS IN ADVANCE OF EACH NEW CONSTRUCTION STAGE FOR THE INSTALLATION OF TEMPORARY "TOW AWAY NO STOPPING ANY TIME" SIGNS. INSTALLATION OF THE TEMPORARY "TOW AWAY NO STOPPING ANY TIME" SIGNS AT PARKING METER ZONES SHALL ALSO INCLUDE COVERING METER HEADS AND THE ASSOCIATED PARKING RESTRICTION.

16. THE CONTRACTOR SHALL NOTIFY THE LADOT PARKING METER DIVISION AT (213) 473-8270 AT LEAST TEN (10) WORKING DAYS PRIOR TO STARTING CONSTRUCTION WHENEVER PARKING METERS WILL BE AFFECTED.

17. THERE SHALL BE NO STORAGE OF CONSTRUCTION MATERIALS AND EQUIPMENT OUTSIDE THE DESIGNATED WORK AREA AS INDICATED ON THE WTCP. STORAGE OF CONSTRUCTION MATERIALS AND EQUIPMENT WITHIN THE DESIGNATED WORK AREA SHALL BE DONE IN A MANNER NOT TO CREATE VISIBILITY OBSTRUCTIONS TO THE MOTORING PUBLIC.

18. THE CONTRACTOR SHALL MAINTAIN ACCESS TO ALL FUNCTIONAL DRIVEWAYS AT ALL TIMES AND SHALL COORDINATE WITH RESIDENTS AND BUSINESSES FOR ANY CLOSURE OR LIMITED ACCESS RESTRICTION TO THEIR DRIVEWAYS. IF CONSTRUCTION NECESSITATES, THE CONTRACTOR SHALL REVISE THE WORKSITE TRAFFIC CONTROL PLANS TO CHANGE THE SETUP AND ALLOW ACCESS TO A DRIVEWAY THAT IS SHOWN TO BE BLOCKED ON THE APPROVED WTCP. REVISED WORKSITE TRAFFIC CONTROL PLANS SHALL BE PREPARED PER LADOT STANDARDS, SIGNED AND SEALED BY A REGISTERED TRAFFIC AND CIVIL ENGINEER, AND SUBMITTED TO LADOT FOR APPROVAL. FOR ANY DRIVEWAY CLOSURE, CONTRACTOR SHALL COORDINATE AND OBTAIN APPROVAL FROM THE LOS ANGELES BUREAU OF ENGINEERING.

19. THE CONTRACTOR SHALL PROVIDE CHANGEABLE MESSAGE SIGNS AS FIELD CONDITIONS/DETOURS WARRANT, AND AS DEEMED NECESSARY BY LADOT, EVEN IF THEY ARE NOT SHOWN ON THESE PLANS.

20. LOCATION AND SPACING OF TEMPORARY SIGNS AND DELINEATORS SHALL CONFORM TO THE CAMUTCD (LATEST EDITION) AND AS DIRECTED BY THE LADOT ENGINEER.

21. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACEMENT OF ANY MISSING OR DAMAGED SIGNS (DUE TO CONSTRUCTION) ACCORDING TO THE LATEST LADOT SPECIFICATIONS.

22. THE CONTRACTOR SHALL ADHERE TO THE L.A.M.C. 62.61(B) FOR PEAK HOUR EXEMPTIONS.

23. FOR ANY REVISION OR DEVIATION FROM THE APPROVED WORKSITE TRAFFIC CONTROL PLAN AND SIGNAL PLAN, INCLUDING WORK AREAS AND WORK HOURS, THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR ALL PLAN PREPARATION AND APPROVAL OF SUCH PLAN PER LADOT MANUAL OF POLICY AND PROCEDURES, SECTION 531.

24. ANY CHANGES TO WORK AREAS, WORK HOURS, AND/OR APPROVED PLANS SHALL BE SUBMITTED TO LABOE/LADOT FOR REVIEW AND APPROVAL.

25. A COPY OF THIS APPROVED WTCP SHALL BE ON THE WORKSITE AT ALL TIMES DURING WORK HOURS AND BE AVAILABLE TO LADOT AND CON-AD UPON REQUEST.

26. THE CONTRACTOR SHALL NOTIFY ALL AFFECTED RESIDENTS, LOS ANGELES POLICE DEPARTMENT, LOS ANGELES FIRE DEPARTMENT, SCHOOLS, COUNCIL OFFICES, AND BUSINESSES AT LEAST FIVE (5) WORKING DAYS PRIOR TO START OF CONSTRUCTION.

27. THE CONTRACTOR SHALL PROVIDE REFLECTORIZED CONES AT TYPE III BARRICADE SUPPORTS TO ALERT PEDESTRIANS TO THE BARRICADE SUPPORTS.

28. ALL TEMPORARY SIGNAGE AND TRAFFIC CONTROL DEVICES INSTALLED ADJACENT TO PEDESTRIAN TRAVEL WAY MUST ALLOW FOR ADA-COMPLIANT PASSAGEWAYS.

G20-2 | M4-4 | R3-1 | R3-2 | R3-5(Rt) | R4-7 | R5-1 | R9-3

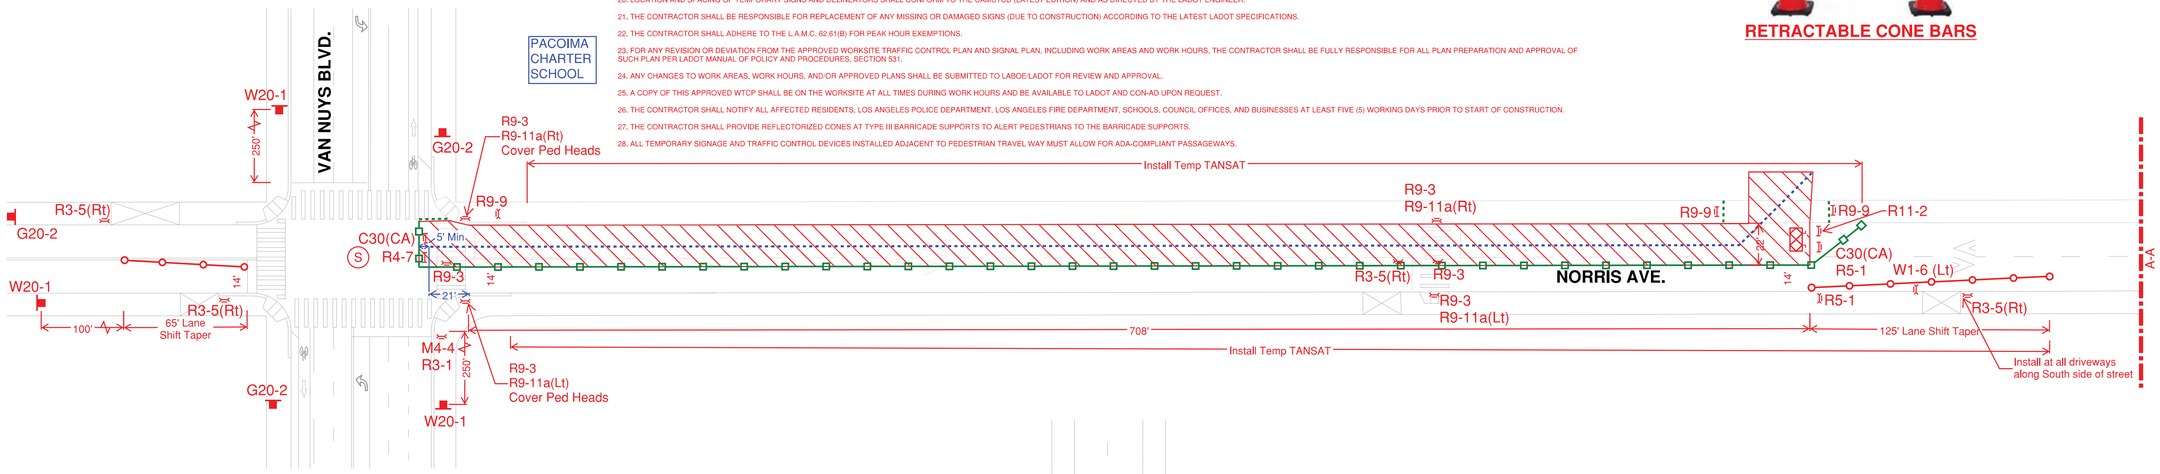
R9-11(Lt) | R9-9 | R9-11a(Lt) | R9-11a(Rt) | R11-2 | R11-4 | W1-6 (Lt) | W20-1

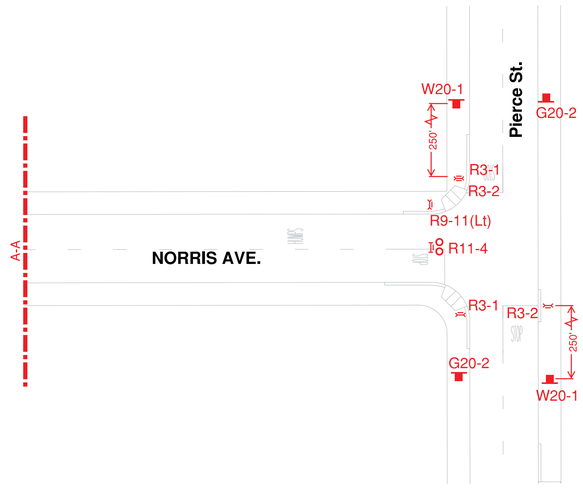
LOCAL COUNCIL OFFICE SHALL BE NOTIFIED PRIOR TO IMPLEMENTING THIS CLOSURE

IF PACOIMA CHARTER SCHOOL IS IN SESSION WHEN CONTRACTOR WANTS TO IMPLEMENT THIS CLOSURE, THEN CONTRACTOR NEEDS TO COORDINATE WITH THE SCHOOL ADMIINISTRATION TO ENSURE THE CLOSURE WILL NOT IMPACT THE SCHOOL OPERATION.

CONTRACTOR SHALL MAINTAIN 5 FT PEDESTRIAN WALKWAY AT ALL TIMES OR PROVIDE FLAGGER TO ASSIST PEDESTRIANS THROUGH WORK AREA DURING ALL WORK HOURS.

RETRACTABLE CONE BARS





NOTES:
1. THE CONTRACTOR SHALL MAKE ARRANGEMENTS WITH M.T.A. AT (213) 922-4632 OR THE APPROPRIATE TRANSIT SERVICES AT LEAST FIVE (5) DAYS PRIOR TO CONSTRUCTION TO COORDINATE RELOCATION OF THE BUS STOP/ZONE. COORDINATE RELOCATION WITH LADOT FOR INSTALLATION OF "TEMPORARY TOW AWAY NO STOPPING - BUS ZONE" SIGNS.

2. MAINTAIN THREE PEDESTRIAN CROSSWALK ACCESS AT ALL TIMES OR PROVIDE FLAGGERS TO ASSIST PEDESTRIANS THROUGH WORK AREA (ALL CROSSWALKS) DURING ALL WORK HOURS.

3. THE CONTRACTOR SHALL MAINTAIN DRIVEWAY AND MIN. 4-FOOT PEDESTRIAN ACCESS AT ALL TIMES.

4. CONTRUCTION ALONG NORRIS AVENUE IS TO OCCUR BETWEEN JUNE 10 AND AUGUST 20 UNLESS APPROVED OTHERWISE BY THE CITY. CONTRACTOR TO COORDINATE WITH NEIGHBORING SCHOOLS TO MINIMIZE STUDENT PICK-UP AND DROP-OFF DISRUPTIONS AS PART OF NORRIS AVENUE CONSTRUCTION. THIS COORDINATION MAY FURTHER RESTRICT CONSTRUCTION BETWEEN THE HOURS OF 10AM AND 2PM ALONG NORRIS AVENUE.

5. CONTRACTOR SHALL COVER PEDESTRIAN SIGNAL HEADS AND PUSH BUTTONS WITH LADOT APPROVED COVERS AT ALL TIMES DURING WORK HOURS PER WATCH MANUAL (SECTION 6-5).

NOTICE TO CONTRACTOR
THIS EXHIBIT DEPICTS TYPICAL TRAFFIC CONTROL IMPLEMENTATION FOR TRENCHING WORK. TRAFFIC CONTROL SHOWN ON THIS EXHIBIT ARE FOR NORRIS AVE. AND ARE SHOWN FOR REFERENCE ONLY. TRENCHING WORK DETAILS ARE SHOWN ON THE LABOE-APPROVED "STREET IMPROVEMENT PLANS".

CLOSURE IMPACTS:

Metro Transit Impacts? NO
LADOT Signal Impacts? NO
Special Traffic Control (Parking)? YES

(DAILY SETUP AND TAKE-DOWN)

NOTES:
1. THE CONTRACTOR SHALL MAKE ARRANGEMENTS WITH M.T.A. AT (213) 922-4632 OR THE APPROPRIATE TRANSIT SERVICES AT LEAST FIVE (5) DAYS PRIOR TO CONSTRUCTION TO COORDINATE RELOCATION OF THE BUS STOP/ZONE. COORDINATE RELOCATION WITH LADOT FOR INSTALLATION OF "TEMPORARY TOW AWAY NO STOPPING - BUS ZONE" SIGNS.

2. MAINTAIN PEDESTRIAN CROSSWALK ACCESS AT ALL TIMES OR PROVIDE FLAGGERS TO ASSIST PEDESTRIANS THROUGH WORK AREA DURING ALL WORK HOURS.

3. THE CONTRACTOR SHALL MAINTAIN DRIVEWAY AND MIN. 4-FOOT PEDESTRIAN ACCESS AT ALL TIMES.

TASK ORDER 25 STORMWATER CAPTURE PARKS PROGRAM
(DAVID M. GONZALES RECREATION CENTER)

Updated: 3/18/2021

WORKSITE TRAFFIC CONTROL PLAN GENERAL NOTES:

1. THIS STAGE OF WORK IS FOR THE CONSTRUCTION OF A NEW STORMWATER DIVERSION STRUCTURE.
2. THE PROPOSED START DATE FOR THIS WTCP IS OCTOBER 2024, WITH AN ESTIMATED CONSTRUCTION DURATION OF 2 MONTHS.
3. CONTACT EDUARDO HERNANDEZ AT (213) 485-1637 FOR CONSTRUCTION PERSONNEL RESPONSIBLE FOR WTCP IMPLEMENTATION/MAINTENANCE.

NOTIFICATIONS AND APPROVALS:

1. CONTRACTOR SHALL CONTACT THE LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION'S ENGINEER AT EDGAR.RODRIGUEZ@LACITY.ORG AT LEAST FIVE (5) WORKING DAYS (TO INSPECT MARK OUT) PRIOR TO THE INSTALLATION OF ANY TEMPORARY STRIPING FOR ALL CONSTRUCTION STAGES. DEPARTMENT OF TRANSPORTATION RESERVES THE RIGHT TO OBSERVE THESE TRAFFIC CONTROL PLANS IN USE AND TO MAKE NECESSARY CHANGES AS FIELD CONDITIONS WARRANT. ANY CHANGES SHALL SUPERSEDE THESE PLANS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PLACEMENT OF ANY ADDITIONAL TRAFFIC CONTROL DEVICES NECESSARY TO ENSURE PUBLIC SAFETY AT ALL TIMES DURING CONSTRUCTION.
2. PERMITTEE SHALL COORDINATE WITH THE IMPACTED TRANSIT OPERATOR(S) PRIOR TO PLAN SUBMISSION WHEN ANY EXISTING BUS STOP WILL BE AFFECTED BY CONSTRUCTION ACTIVITIES OR THE PROPOSED IMPROVEMENTS. PROVIDE TWO-WEEK ADVANCE NOTICE FOR POSSIBLE RELOCATION/ABANDONMENTS OF A BUS STOP. FOR METRO BUS STOPS, CONTACT DAVID DANIELS OF METRO STOPS AND ZONES DEPARTMENT AT DANIELSD@METRO.NET.
3. WHENEVER ANY ACTUAL OR PROPOSED CONSTRUCTION ACTIVITY OCCURS WITHIN 5' OF ANY EXISTING CITY TRANSIT FURNITURE, INCLUDING BUT NOT LIMITED TO TRANSIT SHELTERS, PUBLIC AMENITY KIOSKS, NEWSSTAND VENDING KIOSK, AUTOMATED PUBLIC TOILET, BUS BENCH OR ASSOCIATED TRASH RECEPTACLES, PERMITTEE/CONTRACTOR SHALL ARRANGE AND PAY FOR THE REMOVAL, STORAGE, RELOCATION, REPLACEMENT, AND/OR RE-INSTALLATION OF ALL TRANSIT FURNITURE AND THEIR RELATED APPURTENANCES WHETHER SHOWN AND INDICATED ON THE PLANS OR NOT. TRANSIT FURNITURE ARE THE PROPERTY OF THE CITY OF LOS ANGELES AND MAY ONLY BE REMOVED BY THE CITY'S AUTHORIZED VENDORS. CONTACT GLENN FLUTIE OF INSITE STREET MEDIA AT (310)559-1600 FOR BUS BENCHES AND ASSOCIATED TRASH RECEPTACLES. FOR ALL OTHER TRANSIT FURNITURE, CONTACT GUILLERMO GONZALEZ OF OUTFRONT MEDIA JC DECAUX AT (213) 608-0872. ADVANCE ARRANGEMENT SHALL BE MADE 6 WEEKS IN ADVANCE OF THE REQUIRED WORK.
4. CONTRACTOR SHALL NOTIFY LADOT'S SIGNAL MAINTENANCE SUPERVISOR AT (818) 779-7437 FIVE (5) WORKING DAYS PRIOR TO ANY EXCAVATION OR CONSTRUCTION WITHIN 10-FEET OF EXISTING TRAFFIC SIGNAL DETECTOR LOOPS, CONDUIT, INTERCONNECTS, OR ATSAC FIBER OPTIC CABLE.
5. ANY DAMAGE TO TRAFFIC SIGNAL DETECTOR LOOPS, CONDUITS, INTERCONNECTS, OR FIBER OPTIC CABLE SHALL BE REPAIRED IMMEDIATELY BY THE CONTRACTOR AT THEIR OWN EXPENSE. DELAYS IN REPAIR OF INTERCONNECT OR ATSAC FIBER OPTIC CABLE WILL REQUIRE THE PAYMENT OF LIQUIDATION DAMAGES TO THE CITY OF LOS ANGELES DEPARTMENT OF TRANSPORTATION. IMMEDIATELY NOTIFY LADOT SIGNAL REPAIR PERSONNEL AT (213) 485-7721 OF ANY DAMAGES.
6. FOR WTCP IMPLEMENTATION DURATION OF LESS THAN ONE (1) MONTH, THE CONTRACTOR SHALL CONTACT THE LADOT SPECIAL TRAFFIC CONTROLS OFFICE AT (213) 485-2298 AT LEAST TEN (10) WORKING DAYS IN ADVANCE OF EACH NEW CONSTRUCTION STAGE FOR THE INSTALLATION OF TEMPORARY "TOW AWAY NO STOPPING ANY TIME" SIGNS. FOR WTCP IMPLEMENTATION DURATION OF MORE THAN ONE (1) MONTH, THE CONTRACTOR SHALL FURNISH AND INSTALL "TOW AWAY NO STOPPING ANY TIME" SIGNS PER CITY SPECIFICATION (METAL AND RELECTORIZED). CONTACT LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION'S ENGINEER FOR SAMPLES.
7. CONTRACTOR SHALL CONTACT THE LADOT PARKING METERS DIVISION AT (213) 473-8270, TEN (10) WORKING DAYS PRIOR TO START OF AND END OF CONSTRUCTION TO ARRANGE AND COORDINATE FOR ANY PARKING METER OR PAY STATION RELATED WORK. THIS WORK INCLUDES, BUT IS NOT LIMITED TO, THE TEMPORARY OR PERMANENT REMOVAL, INSTALLATION, OR RELOCATION OF ANY PARKING METER, PAY STATION, METER POSTS, PARKING SENSORS, PARKING SIGNS, SIGN POSTS, PARKING SPACE NUMBERS, CURB PAINTING, PAVEMENT MARKINGS, AND ANY OTHER RELATED ITEMS DEEMED NECESSARY BY LADOT. CONTRACTOR SHALL PAY THE LADOT PARKING METERS DIVISION FOR INSTALLATION AND REMOVAL COSTS UPON RECEIVING AN INVOICE FOR WORK AS DESCRIBED ABOVE. OCCASIONALLY, PAYMENT MAY BE DEDUCTED FROM THE DEVELOPER'S OR CONTRACTOR'S B-PERMIT DEPOSIT FOR THE PROJECT. FAILURE TO NOTIFY LADOT WILL CAUSE THE CONTRACTOR TO BE LIABLE FOR ANY MISSING OR DAMAGED PARKING METER, PAY STATION, SENSORS, POSTS, SIGNS, ETC., THAT LADOT RECORDS INDICATE ARE PRESENT. UPON APPROVAL BY THE LADOT PARKING METERS DIVISION, CONTRACTOR MAY REMOVE AND DISPOSE OF AFFECTED PARKING METER POSTS IN CONJUNCTION WITH THEIR SIDEWALK DEMOLITION WORK, BUT ONLY AFTER LADOT HAS REMOVED THE PARKING METER HEADS AND ALL METER POST MOUNTED SIGNS, WHERE APPLICABLE.

   PERMANENT REMOVAL OF EACH ON-STREET METERED PARKING SPACE WILL REQUIRE PAYMENT TO LADOT'S PARKING METER DIVISION FOR THE CALCULATED ANNUAL REVENUE AMOUNT PROJECTED OVER A TEN-YEAR PERIOD. IN ADDITION, TEMPORARY REMOVAL OF ANY PARKING METERS LASTING OVER 30 DAYS WILL ALSO REQUIRE PAYMENT OF A CALCULATED REVENUE FOR THE LENGTH OF TIME THE METERS ARE OUT OF SERVICE BEYOND THE INITIAL 30 DAYS. FULL PAYMENT IS REQUIRED AS A CONDITION OF THE PERMIT AND IS REQUIRED OF THE APPLICANT BEFORE LADOT WILL PROVIDE ITS FINAL APPROVAL.
8. NOTIFY FILM LA IN WRITING TO EVENTINFO@FILMLA.COM AT LEAST FIVE (5) WORKING DAYS PRIOR TO CONSTRUCTION TO COORDINATE WITH FILMING ACTIVITIES.
9. LADOT HAS JURISDICTION FOR STRIPING/TRAFFIC CONTROL DEVICES WITHIN CITY RIGHT OF WAY. CONTRACTOR SHALL OBTAIN APPROVAL FROM OTHER GOVERNMENT AGENCIES FOR STRIPING/TRAFFIC CONTROL DEVICES WITHIN OTHER CITIES, COUNTY, AND/OR STATE RIGHT OF WAY, AND FROM PROPERTY OWNERS FOR STRIPING/TRAFFIC CONTROL DEVICES WITHIN ANY PRIVATE PROPERTY.
10. BOARD OF PUBLIC WORKS OR THEIR DESIGNEE (BUREAU OF STREET SERVICES) SHALL APPROVE ALL STREET AND ALLEY CLOSURES. AN EXEMPTION OF THE L.A.M.C. 62.61(B) (RUSH HOUR CONSTRUCTION ON ANY CITY STREETS) MUST BE APPROVED BY BUREAU OF ENGINEERING FOR ALL PEAK HOUR LANE CLOSURES ON ARTERIAL, SECONDARY, OR COLLECTOR STREETS.
11. FOR ALL CONSTRUCTION INVOLVING STREET CLOSURES, DIRECTIONAL STREET CLOSURES, AND ALLEY CLOSURES, CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL AFFECTED AGENCIES INCLUDING LAFD, LAPD, COUNCIL DISTRICT OFFICE, METRO, BSS, USPS, AND PROPERTY OWNERS AT LEAST TEN (10) BUSINESS DAYS PRIOR TO PLAN ACCEPTANCE.

TYPICAL CONTRACTOR RESPONSIBILITIES:

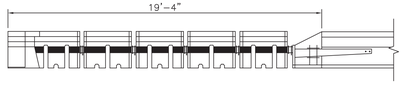
1. THE STRIPING AND SIGNAGE SHOWN FOR REMOVAL ON THESE PLANS MAY BE DIFFERENT THAN WHAT EXISTS AT TIME OF IMPLEMENTATION OF A CONSTRUCTION STAGE. THE CONTRACTOR SHALL REMOVE ALL CONFLICTING SIGNAGE AND STRIPING, WHETHER OR NOT IT IS DEPICTED ACCURATELY ON THESE PLANS.
2. ALL TRAFFIC CONTROL DEVICES SHALL BE KEPT IN THEIR PROPER POSITION AT ALL TIMES, AND SHALL BE REPAIRED, REPLACED OR CLEANED AS NECESSARY TO PRESERVE THEIR APPEARANCE AND CONTINUITY.
3. CONSTRUCTION MATERIALS SHALL NOT BE STORED IN STREETS, ROADS, OR HIGHWAYS FOR MORE THAN FIVE (5) DAYS AFTER UNLOADING. ALL MATERIALS OR EQUIPMENT NOT INSTALLED OR USED IN CONSTRUCTION WITHIN FIVE (5) DAYS AFTER UNLOADING SHALL BE STORED ELSEWHERE BY THE CONTRACTOR AT THEIR EXPENSE UNLESS AUTHORIZED ADDITIONAL STORAGE TIME. CONSTRUCTION EQUIPMENT SHALL NOT BE STORED AT THE WORK SITE BEFORE ITS ACTUAL USE OR THE WORK NOR FOR MORE THAN FIVE (5) DAYS AFTER IT IS NO LONGER NEEDED. TIME NECESSARY FOR REPAIR OR ASSEMBLY OF EQUIPMENT MAY BE AUTHORIZED BY THE ENGINEER. EXCAVATED MATERIAL, EXCEPT THAT WHICH IS TO BE USED AS BACKFILL IN THE ADJACENT TRENCH, SHALL NOT BE STORED IN PUBLIC STREETS UNLESS OTHERWISE PERMITTED. AFTER PLACING BACKFILL, ALL EXCESS MATERIAL SHALL BE REMOVED IMMEDIATELY FROM THE SITE.
4. CONTRACTOR SHALL MAINTAIN ACCESS TO ALL FUNCTIONAL DRIVEWAYS AT ALL TIMES AND SHALL COORDINATE WITH ALL AFFECTED RESIDENTS AND BUSINESSES.
5. CONTRACTOR SHALL PERFORM WORK IN ONLY ONE STAGE AT A TIME. THE CONTRACTOR SHALL ONLY UTILIZE THAT PORTION OF THE DESIGNATED "WORK AREA" WHICH IS NEEDED FOR CONSTRUCTION AT ANY GIVEN TIME.
6. THE IMPLEMENTATION OF WORKSITE TRAFFIC CONTROL PLANS, INCLUDING PAINT REMOVAL/GRINDING, MARK-OUT, LAYOUT AND INSTALLATION OF ALL TRAFFIC CONTROLS, INCLUDING SIGNAL WORK AND STRIPING SHALL ONLY TAKE PLACE DURING OFF-PEAK HOURS; 9:00 AM-3:30 PM. CONTRACTOR SHALL REQUEST APPROVAL FROM LADOT FOR ANY ADDITIONAL TEMPORARY LANE CLOSURES THAT IS NOT INDICATED OR SPECIFIED ON THESE PLANS, REGARDLESS OF DURATION OR TIME PERIOD.
7. ANY CHANGES TO WORK AREAS, WORK HOURS, AND/OR ACCEPTED PLANS SHALL BE SUBMITTED TO LADOT FOR REVIEW AND ACCEPTANCE.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR STRIPING (PROPOSED AND EXISTING) SHOWN ON THIS WTCP TO BE IN GOOD CONDITION AND VISIBLE. THE CONTRACTOR SHALL REPAINT ANY FADED EXISTING STRIPING AS DIRECTED BY THE LADOT ENGINEER.
9. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACING ANY MISSING OR DAMAGED SIGNS (DUE TO CONSTRUCTION) ACCORDING TO THE LATEST LADOT SPECIFICATIONS.
10. FIELD CONDITIONS MAY VARY FROM THOSE SHOWN ON THE WTCP. IN THE EVENT FIELD CONDITIONS ARE DIFFERENT, THE CONTRACTOR SHALL COORDINATE WITH LADOT BEFORE IMPLEMENTING THE WTCP. THE CONTRACTOR MAY BE REQUIRED TO SUBMIT A REVISED WTCP TO LADOT AND THE AUTHORITY FOR ACCEPTANCE PRIOR TO WTCP IMPLEMENTATION.

TEMPORARY CRASH CUSHION INSTALLATION NOTES:

1. Ⓧ INDICATES SAND FILLED MODULE LOCATION AND WEIGHT OF SAND IN POUNDS FOR EACH MODULE. MODULE SPACING IS BASED ON THE GREATER DIAMETER OF THE MODULE.
2. ALL SAND WEIGHTS ARE NOMINAL.
3. THE TEMPORARY CRASH CUSHION ARRAYS SHOWN ON THE PLANS SHALL BE USED ONLY IN LOCATIONS WHERE THERE WILL BE TRAFFIC ON ONE SIDE OF THE TEMPORARY CRASH CUSHION ARRAY.
4. IF THE FIXED OBJECT OR APPROACH END OF THE TEMPORARY RAILING IS LESS THAN 15'-0" FROM THE EDGE OF THE TRAVELED WAY, A TEMPORARY CRASH CUSHION ARRAY IS REQUIRED IN A CONSTRUCTION WORK ZONE.
5. TEMPORARY CRASH CUSHION ARRAYS SHALL NOT ENCROACH ON THE TRAVELED WAY.
6. ARRAYS FOR MEDIAN SHOULDERS SHALL CONFORM TO DETAILS SHOWN ON THIS PLAN FOR OUTSIDE SHOULDERS.
7. PLACE THE TYPE P MARKER PANEL SO THAT THE BOTTOM OF THE PANEL RESTS UPON THE PALLET AND FACES TRAFFIC.

TYPICAL IMPLEMENTATION REQUIREMENTS:

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LABOR AND MATERIAL INVOLVED IN THE REMOVAL, INSTALLATION, AND MAINTENANCE OF ALL STRIPING, PAVEMENT MARKINGS, SIGNS, BARRICADES, DELINEATORS, ETC., SHOWN ON THESE WTCP PLANS AND AS CONSTRUCTION STAGING NECESSITATES. STRIPING AND PAVEMENT MARKINGS SHALL BE REMOVED BY WET SANDBLASTING/GRINDING IN ACCORDANCE WITH THE CITY OF LOS ANGELES DEPARTMENT OF TRANSPORTATION (LADOT) SPECIFICATION NO. 76-016-10. PAINTING THE EXISTING STRIPING OVER WITH BLACK PAINT IS NOT PERMITTED. TEMPORARY REFLECTIVE PAVEMENT MARKERS SHALL BE MAINTAINED BY THE CONTRACTOR ADJACENT TO THE SCAR OF THE SANDBLASTED CENTERLINE OR TAPED-OVER CENTERLINE. THERMOPLASTIC SHALL BE USED FOR ALL ROUGH OR UNEVEN SURFACES, INSTALLATIONS LONGER THAN 6 MONTHS, AND/OR AS REQUIRED BY LADOT ENGINEER. PAINT MAY BE USED ON SMOOTH SURFACES FOR INSTALLATION LESS THAN 6 MONTHS. DETOUR TAPE IS NOT PERMITTED.
2. ALL CONSTRUCTION RELATED WARNING SIGNS SHALL BE IN BLACK LEGEND WITH ORANGE BACKGROUND AND IN CONFORMANCE WITH THE CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CA M.U.T.C.D.) LATEST EDITION.
3. CONTRACTORS SHALL PROVIDE FLAGGERS AS DEEMED NECESSARY BY CITY. A FLAGGER SHALL USE ONLY THE APPROVED OCTAGONAL STOP/ SLOW PADDLE, SHALL WEAR AN ORANGE SAFETY VEST (PADDLE AND VEST MUST BE RELECTORIZED FOR NIGHT WORK) AND HARD HAT, AS REQUIRED BY THE WATCH MANUAL, AND MUST BE PROPERLY TRAINED BY THE CONTRACTOR IN PERFORMING THE WORK SAFELY. APPROPRIATE ADVANCE SIGNS MUST ALSO BE INSTALLED, PER THE WATCH MANUAL.
4. ALL SIGNS, DELINEATORS, BARRICADES, ETC., SHALL CONFORM TO THE CALIFORNIA MUTCD (LATEST EDITION), AND THE CITY OF LOS ANGELES BROWN BOOK (LATEST EDITION).
5. FOR OTHER REQUIREMENTS RELATED TO TRAFFIC CONTROL PLANS AND WORK AREA MAINTENANCE, THE CONTRACTOR SHALL FOLLOW THE CALIFORNIA MUTCD (LATEST EDITION) AND WATCH MANUAL (LATEST EDITION) ADOPTED BY THE CITY, AND ALL RELATED SECTIONS OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, INCLUDING SECTION 7-10 "PUBLIC CONVENIENCE AND SAFETY," AND 302-4.5 "PUBLIC CONVENIENCE AND TRAFFIC CONTROL."
6. LOCATION AND SPACING OF TEMPORARY SIGNS AND DELINEATORS SHALL CONFORM TO THE CALIFORNIA MUTCD (LATEST EDITION) AND AS DIRECTED BY THE LADOT ENGINEER.
7. CONTRACTOR SHALL PROVIDE CHANGEABLE MESSAGE SIGNS/FLASHING ARROW BOARDS AND CONES/BARRICADES AS FIELD CONDITIONS/DETOURS WARRANT AND AS DEEMED NECESSARY BY LADOT, EVEN IF THEY ARE NOT SHOWN ON THESE PLANS.
8. UNLESS K-RAILS AND CRASH CUSHIONS ARE INSTALLED, CONTRACTOR SHALL PROVIDE MIN. 5' SHOULDER FROM ANY OPEN EXCAVATION.
9. ALL K-RAIL ENDS, PLATFORMS AND FIXED OBJECTS SHALL BE PROTECTED BY CRASH CUSHIONS OR BY A QUADGUARD SYSTEM, UNLESS THEY ARE PLACED 15' AWAY FROM EDGE OF TRAVEL WAY. FOR A 20' K-RAIL MAX. VERTICAL DISTANCE DISPLACED CAN NOT EXCEED 5'/K-RAIL, OR A TAPER RATE SHALL NOT EXCEED 1/4.
10. ALL TEMPORARY SIGNAGE INSTALLED ADJACENT TO PEDESTRIAN TRAVEL WAY MUST ALLOW FOR ADA-COMPLIANT PASSAGEWAYS.
11. CONCRETE K-RAIL SECTIONS SHALL BE CONTINUOUSLY CONNECTED. IN AREAS WITH LESS THAN 3 CONCRETE K-RAILS, SECURE K-RAIL TO PAVEMENT PER CALTRANS SPECIFICATIONS T3B.
12. THE CONTRACTOR SHALL INSTALL SIDE REFLECTORS WITH CUBE-CORNER LENSES OR TOP MOUNTED REFLECTORS (FACING THE DRIVER) ON ALL K-RAIL BARRIERS.
13. WHEN REMOVAL IS REQUIRED BY CONSTRUCTION, CROSSWALK MARKINGS AND PEDESTRIAN SIGNAL HEADS SHALL BE COVERED SIMULTANEOUSLY.
14. CONTRACTOR SHALL PROVIDE REFLECTORIZED CONES AT TYPE III BARRICADE SUPPORTS TO ALERT PEDESTRIANS OF THE BARRICADE SUPPORT.
15. CONTRACTOR SHALL PROVIDE ACCESS TO ALL FIRE HYDRANTS WITHIN AND ADJACENT TO THE WORK AREA AT ALL TIMES.
16. CONTRACTOR SHALL PROVIDE ADA COMPLIANT AND MINIMUM 5FT WIDE CONTINUOUS ACCESS FOR PEDESTRIAN PASSAGEWAYS.



ABSORB 350 CRASH CUSHION SYSTEM DETAIL

RESTORATION STRIPING NOTES:

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LABOR AND MATERIAL INVOLVED IN THE MARKOUT, AND INSTALLATION OF ALL RESTORATION STRIPING/PAVEMENT MARKINGS. THE CONTRACTOR SHALL ALSO BE RESPONSIBLE FOR REMOVAL OF ALL CONFLICTING WTCP STRIPING, SIGNING, AND OTHER WTCP-RELATED TRAFFIC CONTROL DEVICES PRIOR TO THE INSTALLATION OF THE FINAL STRIPING. IF THERE IS NO RESTORATION PLAN IN THIS PACKAGE, CONTRACTOR SHALL CONTACT TEMPORARY TRAFFIC MANAGEMENT SECTION FOR THE LATEST STRIPING PLANS SEVEN (7) DAYS PRIOR TO PROJECT COMPLETION.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REPAINTING OF ALL EXISTING STRIPING THAT HAS BEEN DAMAGED DURING THE CONSTRUCTION PROCESS.
3. MARKOUT SHALL BE BY HEAVY PAINT BRUSH MARKINGS OVER A PULLED ROPE IN THE RESPECTIVE WHITE AND YELLOW COLORS OF THE PROPOSED STRIPING. STRIPING AND PAVEMENT MARKINGS SHALL BE IN HOT APPLIED ALKYD THERMOPLASTIC IN ACCORDANCE WITH LADOT SPECIFICATION NOS. 51-005-10 AND 76-012-16. PRIMER AND SEALERS ARE REQUIRED AND SHALL CONFORM TO LADOT SPECIFICATION NO. 76-012-16.
4. THE CONTRACTOR SHALL CONTACT LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION'S ENGINEER AT EDGAR.RODRIGUEZ@LACITY.ORG AT LEAST TEN (10) WORKING DAYS BEFORE BEGINNING MARKOUT. THE CONTRACTOR SHALL CORRECT ALL ERRORS IN MARKOUT REQUESTED BY LADOT. THE INSTALLATION OF THERMOPLASTIC STRIPING MAY PROCEED ONLY AFTER APPROVAL OF MARKOUT BY THE LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION.
5. TEMPORARY REFLECTIVE RAISED PAVEMENT MARKERS SHALL BE MAINTAINED ADJACENT TO ANY TEMPORARY CENTERLINE, MARKOUT CENTERLINE OR SCAR OF A SANDBLASTED CENTERLINE, AS APPLICABLE.

SIGNS AND MARKINGS MAINTENANCE:

THE CONTRACTOR SHALL PAY FOR THE RESTORATION OF ALL OBLITERATED PAVEMENT MARKINGS AND FOR THE REINSTALLATION OF ALL MISSING OR DAMAGED SIGNS, CURB MARKINGS, STAMPED CROSSWALKS, PARKING METERS, ETC. IN SOME CASES THE CONTRACTOR MAY BE REQUIRED TO INSTALL OBLITERATED AND RELATED PAVEMENT MARKINGS AS WELL AS MISSING, DAMAGED, AND/OR RELATED SIGNS, TO THE SATISFACTION OF LADOT. ALL STRIPING AND PAVEMENT MARKINGS SHALL BE INSTALLED UTILIZING THERMOPLASTIC MATERIALS PER LADOT SPECIFICATIONS. THE CONTRACTOR SHALL CONTACT LADOT TEMPORARY TRAFFIC MANAGEMENT AT (213) 972-5968 PRIOR TO COMMENCING ANY WORK THAT REQUIRES SIGN AND/OR MARKING MAINTENANCE.

BUREAU OF ENGINEERING
OFFICIAL RECORD

THE CONTRACTOR SHALL COMPLY WITH ALL PROVISIONS OF SECTION 7-10 (PUBLIC CONVENIENCE AND SAFETY) OF THE "GREENBOOK" (STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, 2015 EDITION). THIS INCLUDES, BUT NOT LIMITED TO, THAT THE CONTRACTOR SHALL PROVIDE SAFE AND ADEQUATE PEDESTRIAN AND VEHICULAR ACCESS TO PROPERTIES ADJACENT TO OR WITHIN THE WORK ZONE, EXCEPT WHEN NECESSARY CONSTRUCTION PRECLUDES SUCH ACCESS FOR REASONABLE PERIODS OF TIME. THE CONTRACTOR SHALL COOPERATE WITH THE VARIOUS PARTIES INVOLVED IN THE DELIVERY OF MAIL AND THE COLLECTION AND REMOVAL OF TRASH AND GARBAGE TO MAINTAIN EXISTING SCHEDULES FOR THESE SERVICES.

CONSTRUCTION NOTES:

1. CONTRACTOR SHALL PROVIDE REFLECTORIZED CONES AT TYPE III BARRICADE SUPPORTS TO ALERT PEDESTRIANS OF THE BARRICADE SUPPORT.

2. CONTRACTOR SHALL MAINTAIN 5' WIDE PEDESTRIAN WALKWAY AT ALL TIMES.

3. CONTRACTOR SHALL PROVIDE FLAGGER TO MAINTAIN SAFE PEDESTRIAN ACCESS THROUGH CROSSWALKS.

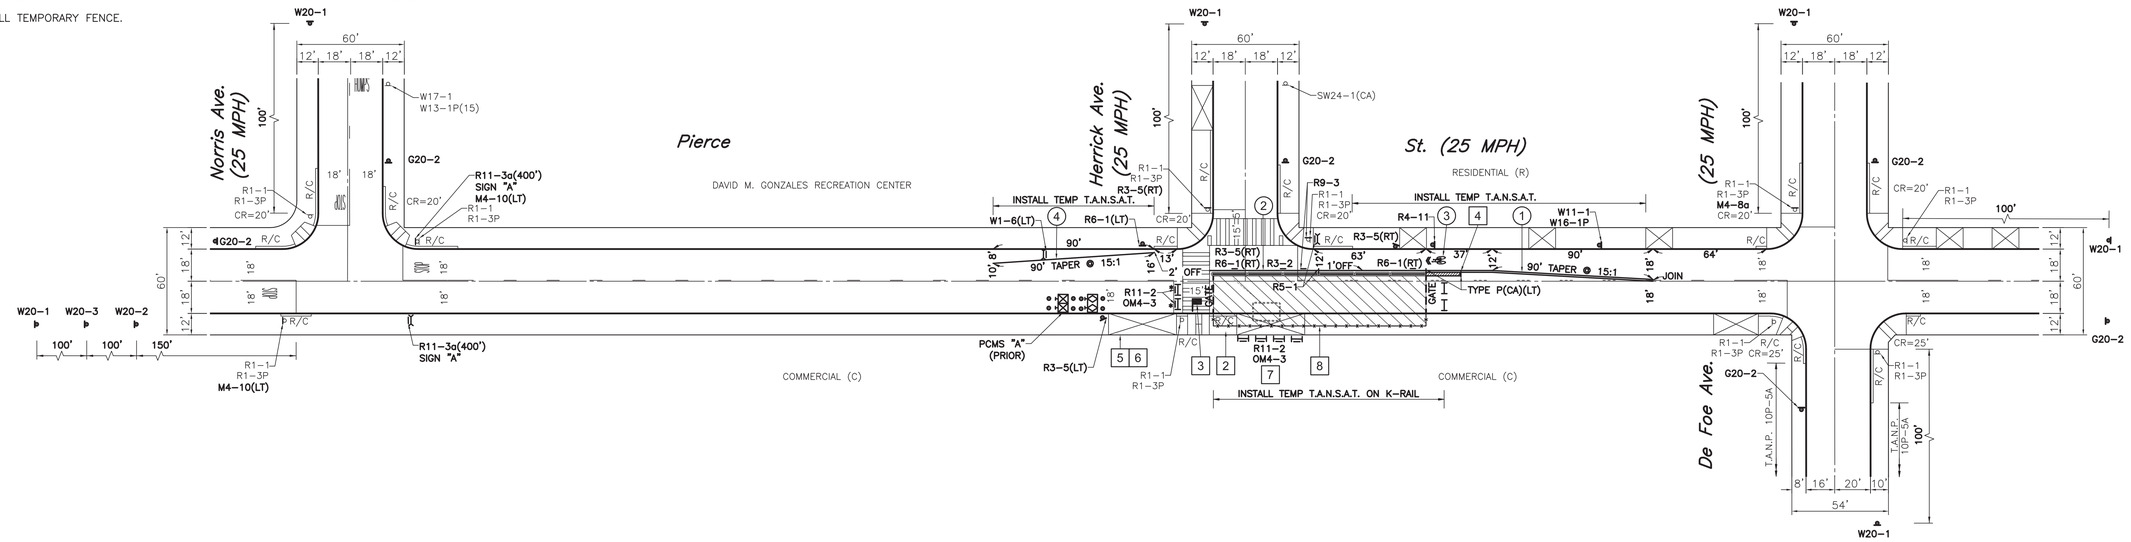
4. INSTALL ABSORB 350 (TL-2) CRASH CUSHION.

5. MAINTAIN ACCESS TO DRIVEWAYS AT ALL TIMES UNLESS ARRANGEMENTS HAVE BEEN MADE WITH PROPERTY OWNER.

6. CONTRACTOR SHALL NOTIFY ALL AFFECTED RESIDENTS, LAPD, LAFD, SCHOOLS, COUNCIL OFFICES AND BUSINESSES FIVE (5) WORKING DAYS PRIOR TO START OF WORK.

7. CONTRACTOR TO COORDINATE WITH PROPERTY OWNER FOR CLOSURE OF DRIVEWAYS DURING CONSTRUCTION. CONTRACTOR SHALL ALLOW ALTERNATE ACCESS TO PROPERTY DURING THIS PHASE AS NEEDED.

8. INSTALL TEMPORARY FENCE.



TEMPORARY STRIPING NOTES

ALL STRIPING SHALL CONFORM TO THE 2014 CA MUTCD (LATEST VERSION) AND SHALL BE INSTALLED USING PAINT PER LADOT SPECIFICATIONS.

1. REMOVE ALL CONFLICTING STRIPING PRIOR TO INSTALLATION OF WTCP/TCP.

2. WHEN REMOVAL IS REQUIRED BY CONSTRUCTION, CROSSWALK MARKINGS AND PEDESTRIAN SIGNAL HEADS SHALL BE REMOVED SIMULTANEOUSLY.

3. BUBBLE NOTES ARE:

   (1) 4" DOUBLE YELLOW CENTERLINE STRIPING (WITH TYPE D TWO-WAY RETROREFLECTIVE RAISED PAVEMENT MARKERS) PER CA MUTCD FIG. 3A-104(CA), DETAIL 22.

   (2) 4" YELLOW SOLID LEFT EDGE LINE PER CA MUTCD FIG. 3A-105(CA), DETAIL 25.

   (3) INSTALL SHARED LANE BICYCLE MARKING PER CA MUTCD FIG. 9C-9.

   (4) 8" WHITE CHANNELIZING LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 38A.

WORKSITE TRAFFIC CONTROL PLAN GENERAL NOTES:

1. THIS STAGE OF WORK IS FOR THE CONSTRUCTION OF A NEW STORMWATER DIVERSION STRUCTURE.
2. THE PROPOSED START DATE FOR THIS WTCP IS OCTOBER 2024, WITH AN ESTIMATED CONSTRUCTION DURATION OF 5 MONTHS.
3. CONTACT EDUARDO HERNANDEZ AT (213) 485-1637 FOR CONSTRUCTION PERSONNEL RESPONSIBLE FOR WTCP IMPLEMENTATION/MAINTENANCE.

NOTIFICATIONS AND APPROVALS:

1. CONTRACTOR SHALL CONTACT THE LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION'S ENGINEER AT EDGAR.RODRIGUEZ@LACITY.ORG AT LEAST FIVE (5) WORKING DAYS (TO INSPECT MARK OUT) PRIOR TO THE INSTALLATION OF ANY TEMPORARY STRIPING FOR ALL CONSTRUCTION STAGES. DEPARTMENT OF TRANSPORTATION RESERVES THE RIGHT TO OBSERVE THESE TRAFFIC CONTROL PLANS IN USE AND TO MAKE NECESSARY CHANGES AS FIELD CONDITIONS WARRANT. ANY CHANGES SHALL SUPERSEDE THESE PLANS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PLACEMENT OF ANY ADDITIONAL TRAFFIC CONTROL DEVICES NECESSARY TO ENSURE PUBLIC SAFETY AT ALL TIMES DURING CONSTRUCTION.
2. PERMITTEE SHALL COORDINATE WITH THE IMPACTED TRANSIT OPERATOR(S) PRIOR TO PLAN SUBMISSION WHEN ANY EXISTING BUS STOP WILL BE AFFECTED BY CONSTRUCTION ACTIVITIES OR THE PROPOSED IMPROVEMENTS. PROVIDE TWO-WEEK ADVANCE NOTICE FOR POSSIBLE RELOCATION/ABANDONMENTS OF A BUS STOP. FOR METRO BUS STOPS, CONTACT DAVID DANIELS OF METRO STOPS AND ZONES DEPARTMENT AT DANIELSD@METRO.NET.
3. WHENEVER ANY ACTUAL OR PROPOSED CONSTRUCTION ACTIVITY OCCURS WITHIN 5' OF ANY EXISTING CITY TRANSIT FURNITURE, INCLUDING BUT NOT LIMITED TO TRANSIT SHELTERS, PUBLIC AMENITY KIOSKS, NEWSSTAND VENDING KIOSK, AUTOMATED PUBLIC TOILET, BUS BENCH OR ASSOCIATED TRASH RECEPTACLES, PERMITTEE/CONTRACTOR SHALL ARRANGE AND PAY FOR THE REMOVAL, STORAGE, RELOCATION, REPLACEMENT, AND/OR RE-INSTALLATION OF ALL TRANSIT FURNITURE AND THEIR RELATED APPURTENANCES WHETHER SHOWN AND INDICATED ON THE PLANS OR NOT. TRANSIT FURNITURE ARE THE PROPERTY OF THE CITY OF LOS ANGELES AND MAY ONLY BE REMOVED BY THE CITY'S AUTHORIZED VENDORS. CONTACT GLENN FLUTIE OF INSITE STREET MEDIA AT (310)559-1600 FOR BUS BENCHES AND ASSOCIATED TRASH RECEPTACLES. FOR ALL OTHER TRANSIT FURNITURE, CONTACT GUILLERMO GONZALEZ OF OUTFRONT MEDIA JC DECAUX AT (213) 608-0872. ADVANCE ARRANGEMENT SHALL BE MADE 6 WEEKS IN ADVANCE OF THE REQUIRED WORK.
4. CONTRACTOR SHALL NOTIFY LADOT'S SIGNAL MAINTENANCE SUPERVISOR AT (818) 779-7437 FIVE (5) WORKING DAYS PRIOR TO ANY EXCAVATION OR CONSTRUCTION WITHIN 10-FEET OF EXISTING TRAFFIC SIGNAL DETECTOR LOOPS, CONDUIT, INTERCONNECTS, OR ATSAC FIBER OPTIC CABLE.
5. ANY DAMAGE TO TRAFFIC SIGNAL DETECTOR LOOPS, CONDUITS, INTERCONNECTS, OR FIBER OPTIC CABLE SHALL BE REPAIRED IMMEDIATELY BY THE CONTRACTOR AT THEIR OWN EXPENSE. DELAYS IN REPAIR OF INTERCONNECT OR ATSAC FIBER OPTIC CABLE WILL REQUIRE THE PAYMENT OF LIQUIDATION DAMAGES TO THE CITY OF LOS ANGELES DEPARTMENT OF TRANSPORTATION. IMMEDIATELY NOTIFY LADOT SIGNAL REPAIR PERSONNEL AT (213) 485-7721 OF ANY DAMAGES.
6. FOR WTCP IMPLEMENTATION DURATION OF LESS THAN ONE (1) MONTH, THE CONTRACTOR SHALL CONTACT THE LADOT SPECIAL TRAFFIC CONTROLS OFFICE AT (213) 485-2298 AT LEAST TEN (10) WORKING DAYS IN ADVANCE OF EACH NEW CONSTRUCTION STAGE FOR THE INSTALLATION OF TEMPORARY "TOW AWAY NO STOPPING ANY TIME" SIGNS. FOR WTCP IMPLEMENTATION DURATION OF MORE THAN ONE (1) MONTH, THE CONTRACTOR SHALL FURNISH AND INSTALL "TOW AWAY NO STOPPING ANY TIME" SIGNS PER CITY SPECIFICATION (METAL AND RELECTORIZED). CONTACT LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION'S ENGINEER FOR SAMPLES.
7. CONTRACTOR SHALL CONTACT THE LADOT PARKING METERS DIVISION AT (213) 473-8270, TEN (10) WORKING DAYS PRIOR TO START OF AND END OF CONSTRUCTION TO ARRANGE AND COORDINATE FOR ANY PARKING METER OR PAY STATION RELATED WORK. THIS WORK INCLUDES, BUT IS NOT LIMITED TO, THE TEMPORARY OR PERMANENT REMOVAL, INSTALLATION, OR RELOCATION OF ANY PARKING METER, PAY STATION, METER POSTS, PARKING SENSORS, PARKING SIGNS, SIGN POSTS, PARKING SPACE NUMBERS, CURB PAINTING, PAVEMENT MARKINGS, AND ANY OTHER RELATED ITEMS DEEMED NECESSARY BY LADOT. CONTRACTOR SHALL PAY THE LADOT PARKING METERS DIVISION FOR INSTALLATION AND REMOVAL COSTS UPON RECEIVING AN INVOICE FOR WORK AS DESCRIBED ABOVE. OCCASIONALLY, PAYMENT MAY BE DEDUCTED FROM THE DEVELOPER'S OR CONTRACTOR'S B-PERMIT DEPOSIT FOR THE PROJECT. FAILURE TO NOTIFY LADOT WILL CAUSE THE CONTRACTOR TO BE LIABLE FOR ANY MISSING OR DAMAGED PARKING METER, PAY STATION, SENSORS, POSTS, SIGNS, ETC., THAT LADOT RECORDS INDICATE ARE PRESENT. UPON APPROVAL BY THE LADOT PARKING METERS DIVISION, CONTRACTOR MAY REMOVE AND DISPOSE OF AFFECTED PARKING METER POSTS IN CONJUNCTION WITH THEIR SIDEWALK DEMOLITION WORK, BUT ONLY AFTER LADOT HAS REMOVED THE PARKING METER HEADS AND ALL METER POST MOUNTED SIGNS, WHERE APPLICABLE.

   PERMANENT REMOVAL OF EACH ON-STREET METERED PARKING SPACE WILL REQUIRE PAYMENT TO LADOT'S PARKING METER DIVISION FOR THE CALCULATED ANNUAL REVENUE AMOUNT PROJECTED OVER A TEN-YEAR PERIOD. IN ADDITION, TEMPORARY REMOVAL OF ANY PARKING METERS LASTING OVER 30 DAYS WILL ALSO REQUIRE PAYMENT OF A CALCULATED REVENUE FOR THE LENGTH OF TIME THE METERS ARE OUT OF SERVICE BEYOND THE INITIAL 30 DAYS. FULL PAYMENT IS REQUIRED AS A CONDITION OF THE PERMIT AND IS REQUIRED OF THE APPLICANT BEFORE LADOT WILL PROVIDE ITS FINAL APPROVAL.
8. NOTIFY FILM LA IN WRITING TO EVENTINFO@FILMLA.COM AT LEAST FIVE (5) WORKING DAYS PRIOR TO CONSTRUCTION TO COORDINATE WITH FILMING ACTIVITIES.
9. LADOT HAS JURISDICTION FOR STRIPING/TRAFFIC CONTROL DEVICES WITHIN CITY RIGHT OF WAY. CONTRACTOR SHALL OBTAIN APPROVAL FROM OTHER GOVERNMENT AGENCIES FOR STRIPING/TRAFFIC CONTROL DEVICES WITHIN OTHER CITIES, COUNTY, AND/OR STATE RIGHT OF WAY, AND FROM PROPERTY OWNERS FOR STRIPING/TRAFFIC CONTROL DEVICES WITHIN ANY PRIVATE PROPERTY.
10. BOARD OF PUBLIC WORKS OR THEIR DESIGNEE (BUREAU OF STREET SERVICES) SHALL APPROVE ALL STREET AND ALLEY CLOSURES. AN EXEMPTION OF THE L.A.M.C. 62.61(B) (RUSH HOUR CONSTRUCTION ON ANY CITY STREETS) MUST BE APPROVED BY BUREAU OF ENGINEERING FOR ALL PEAK HOUR LANE CLOSURES ON ARTERIAL, SECONDARY, OR COLLECTOR STREETS.
11. FOR ALL CONSTRUCTION INVOLVING STREET CLOSURES, DIRECTIONAL STREET CLOSURES, AND ALLEY CLOSURES, CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL AFFECTED AGENCIES INCLUDING LAFD, LAPD, COUNCIL DISTRICT OFFICE, METRO, BSS, USPS, AND PROPERTY OWNERS AT LEAST TEN (10) BUSINESS DAYS PRIOR TO PLAN ACCEPTANCE.

TYPICAL CONTRACTOR RESPONSIBILITIES:

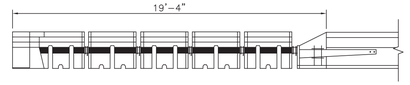
1. THE STRIPING AND SIGNAGE SHOWN FOR REMOVAL ON THESE PLANS MAY BE DIFFERENT THAN WHAT EXISTS AT TIME OF IMPLEMENTATION OF A CONSTRUCTION STAGE. THE CONTRACTOR SHALL REMOVE ALL CONFLICTING SIGNAGE AND STRIPING, WHETHER OR NOT IT IS DEPICTED ACCURATELY ON THESE PLANS.
2. ALL TRAFFIC CONTROL DEVICES SHALL BE KEPT IN THEIR PROPER POSITION AT ALL TIMES, AND SHALL BE REPAIRED, REPLACED OR CLEANED AS NECESSARY TO PRESERVE THEIR APPEARANCE AND CONTINUITY.
3. CONSTRUCTION MATERIALS SHALL NOT BE STORED IN STREETS, ROADS, OR HIGHWAYS FOR MORE THAN FIVE (5) DAYS AFTER UNLOADING. ALL MATERIALS OR EQUIPMENT NOT INSTALLED OR USED IN CONSTRUCTION WITHIN FIVE (5) DAYS AFTER UNLOADING SHALL BE STORED ELSEWHERE BY THE CONTRACTOR AT THEIR EXPENSE UNLESS AUTHORIZED ADDITIONAL STORAGE TIME. CONSTRUCTION EQUIPMENT SHALL NOT BE STORED AT THE WORK SITE BEFORE ITS ACTUAL USE ON THE WORK NOR FOR MORE THAN FIVE (5) DAYS AFTER IT IS NO LONGER NEEDED. TIME NECESSARY FOR REPAIR OR ASSEMBLY OF EQUIPMENT MAY BE AUTHORIZED BY THE ENGINEER. EXCAVATED MATERIAL, EXCEPT THAT WHICH IS TO BE USED AS BACKFILL IN THE ADJACENT TRENCH, SHALL NOT BE STORED IN PUBLIC STREETS UNLESS OTHERWISE PERMITTED. AFTER PLACING BACKFILL, ALL EXCESS MATERIAL SHALL BE REMOVED IMMEDIATELY FROM THE SITE.
4. CONTRACTOR SHALL MAINTAIN ACCESS TO ALL FUNCTIONAL DRIVEWAYS AT ALL TIMES AND SHALL COORDINATE WITH ALL AFFECTED RESIDENTS AND BUSINESSES.
5. CONTRACTOR SHALL PERFORM WORK IN ONLY ONE STAGE AT A TIME. THE CONTRACTOR SHALL ONLY UTILIZE THAT PORTION OF THE DESIGNATED "WORK AREA" WHICH IS NEEDED FOR CONSTRUCTION AT ANY GIVEN TIME.
6. THE IMPLEMENTATION OF WORKSITE TRAFFIC CONTROL PLANS, INCLUDING PAINT REMOVAL/GRINDING, MARK-OUT, LAYOUT AND INSTALLATION OF ALL TRAFFIC CONTROLS, INCLUDING SIGNAL WORK AND STRIPING SHALL ONLY TAKE PLACE DURING OFF-PEAK HOURS; 9:00 AM-3:30 PM. CONTRACTOR SHALL REQUEST APPROVAL FROM LADOT FOR ANY ADDITIONAL TEMPORARY LANE CLOSURES THAT IS NOT INDICATED OR SPECIFIED ON THESE PLANS, REGARDLESS OF DURATION OR TIME PERIOD.
7. ANY CHANGES TO WORK AREAS, WORK HOURS, AND/OR ACCEPTED PLANS SHALL BE SUBMITTED TO LADOT FOR REVIEW AND ACCEPTANCE.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR STRIPING (PROPOSED AND EXISTING) SHOWN ON THIS WTCP TO BE IN GOOD CONDITION AND VISIBLE. THE CONTRACTOR SHALL REPAINT ANY FADED EXISTING STRIPING AS DIRECTED BY THE LADOT ENGINEER.
9. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACING ANY MISSING OR DAMAGED SIGNS (DUE TO CONSTRUCTION) ACCORDING TO THE LATEST LADOT SPECIFICATIONS.
10. FIELD CONDITIONS MAY VARY FROM THOSE SHOWN ON THE WTCP. IN THE EVENT FIELD CONDITIONS ARE DIFFERENT, THE CONTRACTOR SHALL COORDINATE WITH LADOT BEFORE IMPLEMENTING THE WTCP. THE CONTRACTOR MAY BE REQUIRED TO SUBMIT A REVISED WTCP TO LADOT AND THE AUTHORITY FOR ACCEPTANCE PRIOR TO WTCP IMPLEMENTATION.

TEMPORARY CRASH CUSHION INSTALLATION NOTES:

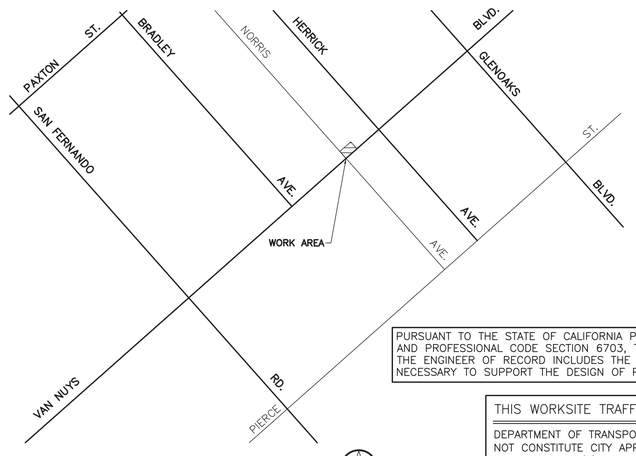
1. Ⓧ INDICATES SAND FILLED MODULE LOCATION AND WEIGHT OF SAND IN POUNDS FOR EACH MODULE. MODULE SPACING IS BASED ON THE GREATER DIAMETER OF THE MODULE.
2. ALL SAND WEIGHTS ARE NOMINAL.
3. THE TEMPORARY CRASH CUSHION ARRAYS SHOWN ON THE PLANS SHALL BE USED ONLY IN LOCATIONS WHERE THERE WILL BE TRAFFIC ON ONE SIDE OF THE TEMPORARY CRASH CUSHION ARRAY.
4. IF THE FIXED OBJECT OR APPROACH END OF THE TEMPORARY RAILING IS LESS THAN 15'-0" FROM THE EDGE OF THE TRAVELED WAY, A TEMPORARY CRASH CUSHION ARRAY IS REQUIRED IN A CONSTRUCTION WORK ZONE.
5. TEMPORARY CRASH CUSHION ARRAYS SHALL NOT ENCROACH ON THE TRAVELED WAY.
6. ARRAYS FOR MEDIAN SHOULDERS SHALL CONFORM TO DETAILS SHOWN ON THIS PLAN FOR OUTSIDE SHOULDERS.
7. PLACE THE TYPE P MARKER PANEL SO THAT THE BOTTOM OF THE PANEL RESTS UPON THE PALLET AND FACES TRAFFIC.

TYPICAL IMPLEMENTATION REQUIREMENTS:

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LABOR AND MATERIAL INVOLVED IN THE REMOVAL, INSTALLATION, AND MAINTENANCE OF ALL STRIPING, PAVEMENT MARKINGS, SIGNS, BARRICADES, DELINEATORS, ETC., SHOWN ON THESE WTCP PLANS AND AS CONSTRUCTION STAGING NECESSITATES. STRIPING AND PAVEMENT MARKINGS SHALL BE REMOVED BY WET SANDBLASTING/GRINDING IN ACCORDANCE WITH THE CITY OF LOS ANGELES DEPARTMENT OF TRANSPORTATION (LADOT) SPECIFICATION NO. 76-016-10. PAINTING THE EXISTING STRIPING OVER WITH BLACK PAINT IS NOT PERMITTED. TEMPORARY REFLECTIVE PAVEMENT MARKERS SHALL BE MAINTAINED BY THE CONTRACTOR ADJACENT TO THE SCAR OF THE SANDBLASTED CENTERLINE OR TAPED-OVER CENTERLINE. THERMOPLASTIC SHALL BE USED FOR ALL ROUGH OR UNEVEN SURFACES, INSTALLATIONS LONGER THAN 6 MONTHS, AND/OR AS REQUIRED BY LADOT ENGINEER. PAINT MAY BE USED ON SMOOTH SURFACES FOR INSTALLATION LESS THAN 6 MONTHS. DETOUR TAPE IS NOT PERMITTED.
2. ALL CONSTRUCTION RELATED WARNING SIGNS SHALL BE IN BLACK LEGEND WITH ORANGE BACKGROUND AND IN CONFORMANCE WITH THE CALIFORNIA MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (CA M.U.T.C.D.) LATEST EDITION.
3. CONTRACTORS SHALL PROVIDE FLAGGERS AS DEEMED NECESSARY BY CITY. A FLAGGER SHALL USE ONLY THE APPROVED OCTAGONAL STOP/ SLOW PADDLE, SHALL WEAR AN ORANGE SAFETY VEST (PADDLE AND VEST MUST BE RELECTORIZED FOR NIGHT WORK) AND HARD HAT, AS REQUIRED BY THE WATCH MANUAL, AND MUST BE PROPERLY TRAINED BY THE CONTRACTOR IN PERFORMING THE WORK SAFELY. APPROPRIATE ADVANCE SIGNS MUST ALSO BE INSTALLED, PER THE WATCH MANUAL.
4. ALL SIGNS, DELINEATORS, BARRICADES, ETC., SHALL CONFORM TO THE CALIFORNIA MUTCD (LATEST EDITION), AND THE CITY OF LOS ANGELES BROWN BOOK (LATEST EDITION).
5. FOR OTHER REQUIREMENTS RELATED TO TRAFFIC CONTROL PLANS AND WORK AREA MAINTENANCE, THE CONTRACTOR SHALL FOLLOW THE CALIFORNIA MUTCD (LATEST EDITION) AND WATCH MANUAL (LATEST EDITION) ADOPTED BY THE CITY, AND ALL RELATED SECTIONS OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, INCLUDING SECTION 7-10 "PUBLIC CONVENIENCE AND SAFETY," AND 302-4.5 "PUBLIC CONVENIENCE AND TRAFFIC CONTROL."
6. LOCATION AND SPACING OF TEMPORARY SIGNS AND DELINEATORS SHALL CONFORM TO THE CALIFORNIA MUTCD (LATEST EDITION) AND AS DIRECTED BY THE LADOT ENGINEER.
7. CONTRACTOR SHALL PROVIDE CHANGEABLE MESSAGE SIGNS/FLASHING ARROW BOARDS AND CONES/BARRICADES AS FIELD CONDITIONS/DETOURS WARRANT AND AS DEEMED NECESSARY BY LADOT, EVEN IF THEY ARE NOT SHOWN ON THESE PLANS.
8. UNLESS K-RAILS AND CRASH CUSHIONS ARE INSTALLED, CONTRACTOR SHALL PROVIDE MIN. 5' SHOULDER FROM ANY OPEN EXCAVATION.
9. ALL K-RAIL ENDS, PLATFORMS AND FIXED OBJECTS SHALL BE PROTECTED BY CRASH CUSHIONS OR BY A QUADGUARD SYSTEM, UNLESS THEY ARE PLACED 15' AWAY FROM EDGE OF TRAVEL WAY. FOR A 20' K-RAIL MAX. VERTICAL DISTANCE DISPLACED CAN NOT EXCEED 5'/K-RAIL, OR A TAPER RATE SHALL NOT EXCEED 1/4.
10. ALL TEMPORARY SIGNAGE INSTALLED ADJACENT TO PEDESTRIAN TRAVEL WAY MUST ALLOW FOR ADA-COMPLIANT PASSAGEWAYS.
11. CONCRETE K-RAIL SECTIONS SHALL BE CONTINUOUSLY CONNECTED. IN AREAS WITH LESS THAN 3 CONCRETE K-RAILS, SECURE K-RAIL TO PAVEMENT PER CALTRANS SPECIFICATIONS T3B.
12. THE CONTRACTOR SHALL INSTALL SIDE REFLECTORS WITH CUBE-CORNER LENSES OR TOP MOUNTED REFLECTORS (FACING THE DRIVER) ON ALL K-RAIL BARRIERS.
13. WHEN REMOVAL IS REQUIRED BY CONSTRUCTION, CROSSWALK MARKINGS AND PEDESTRIAN SIGNAL HEADS SHALL BE COVERED SIMULTANEOUSLY.
14. CONTRACTOR SHALL PROVIDE REFLECTORIZED CONES AT TYPE III BARRICADE SUPPORTS TO ALERT PEDESTRIANS OF THE BARRICADE SUPPORT.
15. CONTRACTOR SHALL PROVIDE ACCESS TO ALL FIRE HYDRANTS WITHIN AND ADJACENT TO THE WORK AREA AT ALL TIMES.
16. CONTRACTOR SHALL PROVIDE ADA COMPLIANT AND MINIMUM 5FT WIDE CONTINUOUS ACCESS FOR PEDESTRIAN PASSAGEWAYS.



ABSORB 350 CRASH CUSHION SYSTEM DETAIL
FIVE ELEMENT SYSTEM, TL-2 (45 MPH)



VICINITY MAP
NOT TO SCALE

RESTORATION STRIPING NOTES:

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LABOR AND MATERIAL INVOLVED IN THE MARKOUT, AND INSTALLATION OF ALL RESTORATION STRIPING/PAVEMENT MARKINGS. THE CONTRACTOR SHALL ALSO BE RESPONSIBLE FOR REMOVAL OF ALL CONFLICTING WTCP STRIPING, SIGNING, AND OTHER WTCP-RELATED TRAFFIC CONTROL DEVICES PRIOR TO THE INSTALLATION OF THE FINAL STRIPING. IF THERE IS NO RESTORATION PLAN IN THIS PACKAGE, CONTRACTOR SHALL CONTACT TEMPORARY TRAFFIC MANAGEMENT SECTION FOR THE LATEST STRIPING PLANS SEVEN (7) DAYS PRIOR TO PROJECT COMPLETION.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REPAINTING OF ALL EXISTING STRIPING THAT HAS BEEN DAMAGED DURING THE CONSTRUCTION PROCESS.
3. MARKOUT SHALL BE BY HEAVY PAINT BRUSH MARKINGS OVER A PULLED ROPE IN THE RESPECTIVE WHITE AND YELLOW COLORS OF THE PROPOSED STRIPING. STRIPING AND PAVEMENT MARKINGS SHALL BE IN HOT APPLIED ALKYD THERMOPLASTIC IN ACCORDANCE WITH LADOT SPECIFICATION NOS. 51-005-10 AND 76-012-16. PRIMER AND SEALERS ARE REQUIRED AND SHALL CONFORM TO LADOT SPECIFICATION NO. 76-012-16.
4. THE CONTRACTOR SHALL CONTACT LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION'S ENGINEER AT EDGAR.RODRIGUEZ@LACITY.ORG AT LEAST TEN (10) WORKING DAYS BEFORE BEGINNING MARKOUT. THE CONTRACTOR SHALL CORRECT ALL ERRORS IN MARKOUT REQUESTED BY LADOT. THE INSTALLATION OF THERMOPLASTIC STRIPING MAY PROCEED ONLY AFTER APPROVAL OF MARKOUT BY THE LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION.
5. TEMPORARY REFLECTIVE RAISED PAVEMENT MARKERS SHALL BE MAINTAINED ADJACENT TO ANY TEMPORARY CENTERLINE, MARKOUT CENTERLINE OR SCAR OF A SANDBLASTED CENTERLINE, AS APPLICABLE.

SIGNS AND MARKINGS MAINTENANCE:

THE CONTRACTOR SHALL PAY FOR THE RESTORATION OF ALL OBLITERATED PAVEMENT MARKINGS AND FOR THE REINSTALLATION OF ALL MISSING OR DAMAGED SIGNS, CURB MARKINGS, STAMPED CROSSWALKS, PARKING METERS, ETC. IN SOME CASES THE CONTRACTOR MAY BE REQUIRED TO INSTALL OBLITERATED AND RELATED PAVEMENT MARKINGS AS WELL AS MISSING, DAMAGED, AND/OR RELATED SIGNS, TO THE SATISFACTION OF LADOT. ALL STRIPING AND PAVEMENT MARKINGS SHALL BE INSTALLED UTILIZING THERMOPLASTIC MATERIALS PER LADOT SPECIFICATIONS. THE CONTRACTOR SHALL CONTACT LADOT TEMPORARY TRAFFIC MANAGEMENT AT (213) 972-5968 PRIOR TO COMMENCING ANY WORK THAT REQUIRES SIGN AND/OR MARKING MAINTENANCE.

BUREAU OF ENGINEERING
OFFICIAL RECORD

THE CONTRACTOR SHALL COMPLY WITH ALL PROVISIONS OF SECTION 7-10 (PUBLIC CONVENIENCE AND SAFETY) OF THE "GREENBOOK" (STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, 2015 EDITION). THIS INCLUDES, BUT NOT LIMITED TO, THAT THE CONTRACTOR SHALL PROVIDE SAFE AND ADEQUATE PEDESTRIAN AND VEHICULAR ACCESS TO PROPERTIES ADJACENT TO OR WITHIN THE WORK ZONE, EXCEPT WHEN NECESSARY CONSTRUCTION PRECLUDES SUCH ACCESS FOR REASONABLE PERIODS OF TIME. THE CONTRACTOR SHALL COOPERATE WITH THE VARIOUS PARTIES INVOLVED IN THE DELIVERY OF MAIL AND THE COLLECTION AND REMOVAL OF TRASH AND GARBAGE TO MAINTAIN EXISTING SCHEDULES FOR THESE SERVICES.

WORKSITE TRAFFIC CONTROL PLAN
24/7 K-RAIL SET UP FOR A DURATION OF 5 MONTHS
19843 HERRICK AVENUE, PACOIMA, CA 91331
DAVID M. GONZALES RECREATION CENTER STORMWATER CAPTURE PROJECT

PURSUANT TO THE STATE OF CALIFORNIA PROFESSIONAL ENGINEERS ACT, BUSINESS AND PROFESSIONAL CODE SECTION 6703, THE RESPONSIBLE CHARGE OF WORK FOR THE ENGINEER OF RECORD INCLUDES THE INVESTIGATION OF SITE CONDITIONS NECESSARY TO SUPPORT THE DESIGN OF PROFESSIONAL ENGINEERING RELATED WORK.

THIS WORKSITE TRAFFIC CONTROL PLAN IS NOT A PERMIT

DEPARTMENT OF TRANSPORTATION ACCEPTANCE OF THIS PLAN DOES NOT CONSTITUTE CITY APPROVAL OF THE STREET, LANE, AND/OR ALLEY CLOSURE(S) DEPICTED ON THIS PLAN. THE CONTRACTOR SHALL OBTAIN THE APPROPRIATE PERMIT FROM EITHER THE BUREAU OF STREET SERVICES OR THE BUREAU OF ENGINEERING PRIOR TO THE IMPLEMENTATION OF THIS PLAN.

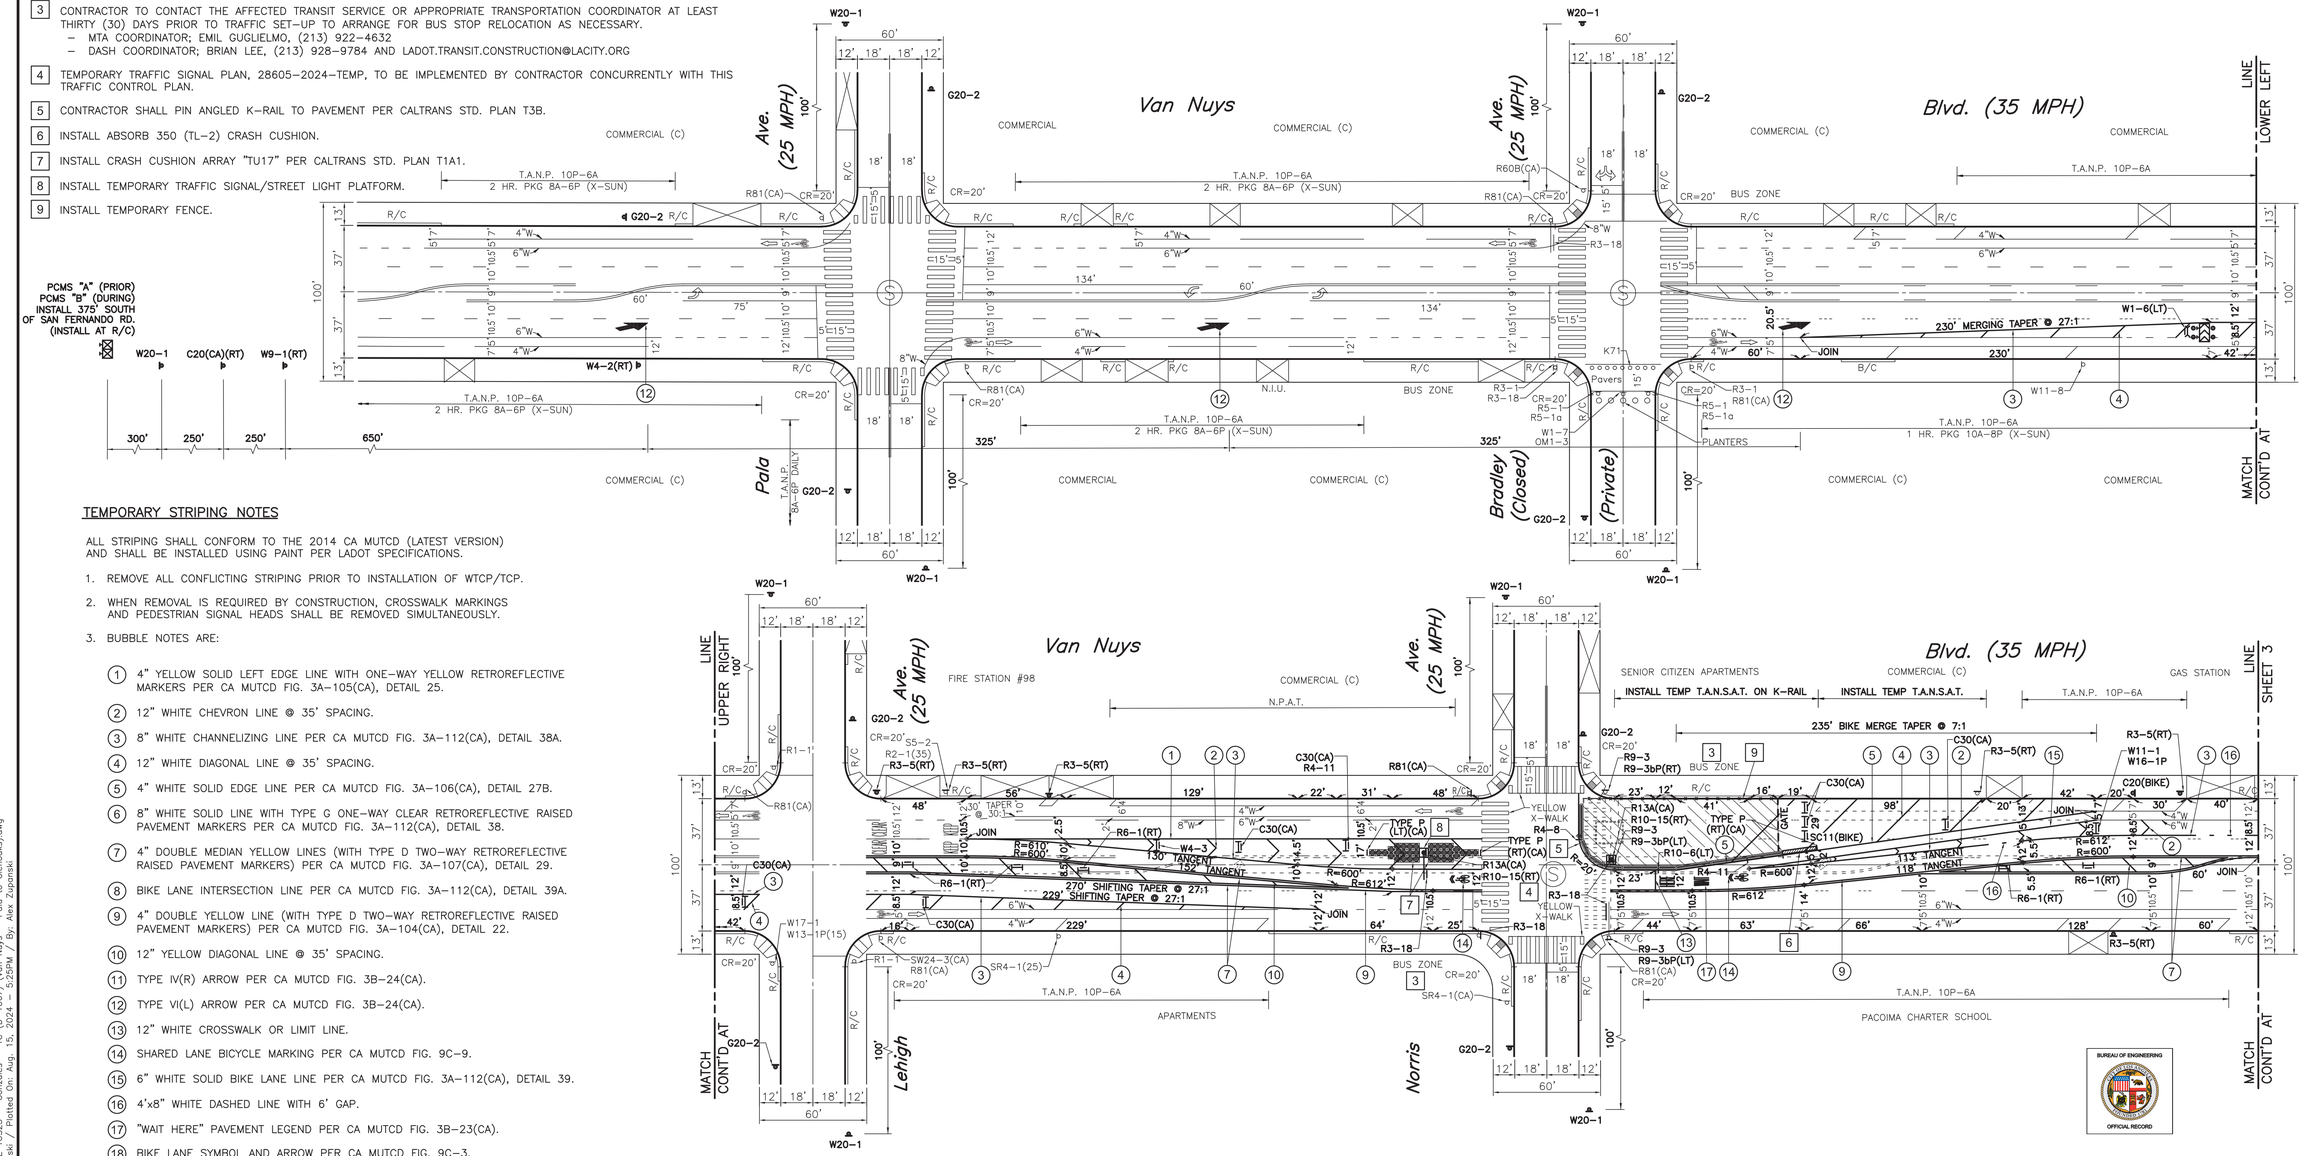
CONSTRUCTION NOTES:

1. CONTRACTOR SHALL NOTIFY ALL AFFECTED RESIDENTS, LAPD, LAFD, SCHOOLS, COUNCIL OFFCES, AND BUSINESSES FIVE (5) WORKING DAYS PRIOR TO START OF WORK.
2. CONTRACTOR SHALL PROVIDE REFLECTORIZED CONES AT TYPE III BARRICADE SUPPORTS TO ALERT PEDESTRIANS OF THE BARRICADE SUPPORT.
3. CONTRACTOR TO CONTACT THE AFFECTED TRANSIT SERVICE OR APPROPRIATE TRANSPORTATION COORDINATOR AT LEAST THIRTY (30) DAYS PRIOR TO TRAFFIC SET-UP TO ARRANGE FOR BUS STOP RELOCATION AS NECESSARY.
   - MTA COORDINATOR; EMIL GUGLIELMO, (213) 922-4632
   - DASH COORDINATOR; BRIAN LEE, (213) 928-9784 AND LADOT.TRANSIT.CONSTRUCTION@LACITY.ORG
4. TEMPORARY TRAFFIC SIGNAL PLAN, 28605-2024-TEMP, TO BE IMPLEMENTED BY CONTRACTOR CONCURRENTLY WITH THIS TRAFFIC CONTROL PLAN.
5. CONTRACTOR SHALL PIN ANGLED K-RAIL TO PAVEMENT PER CALTRANS STD. PLAN T3B.
6. INSTALL ABSORB 350 (TL-2) CRASH CUSHION.
7. INSTALL CRASH CUSHION ARRAY "TU17" PER CALTRANS STD. PLAN T1A1.
8. INSTALL TEMPORARY TRAFFIC SIGNAL/STREET LIGHT PLATFORM.
9. INSTALL TEMPORARY FENCE.



TEMPORARY STRIPING NOTES

ALL STRIPING SHALL CONFORM TO THE 2014 CA MUTCD (LATEST VERSION) AND SHALL BE INSTALLED USING PAINT PER LADOT SPECIFICATIONS.

1. REMOVE ALL CONFLICTING STRIPING PRIOR TO INSTALLATION OF WTCP/TCP.
2. WHEN REMOVAL IS REQUIRED BY CONSTRUCTION, CROSSWALK MARKINGS AND PEDESTRIAN SIGNAL HEADS SHALL BE REMOVED SIMULTANEOUSLY.
3. BUBBLE NOTES ARE:

(1) 4" YELLOW SOLID LEFT EDGE LINE WITH ONE-WAY YELLOW RETROREFLECTIVE MARKERS PER CA MUTCD FIG. 3A-105(CA), DETAIL 25.
(2) 12" WHITE CHEVRON LINE @ 35' SPACING.
(3) 8" WHITE CHANNELIZING LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 38A.
(4) 12" WHITE DIAGONAL LINE @ 35' SPACING.
(5) 4" WHITE SOLID EDGE LINE PER CA MUTCD FIG. 3A-106(CA), DETAIL 27B.
(6) 8" WHITE SOLID LINE WITH TYPE G ONE-WAY CLEAR RETROREFLECTIVE RAISED PAVEMENT MARKERS PER CA MUTCD FIG. 3A-112(CA), DETAIL 38.
(7) 4" DOUBLE MEDIAN YELLOW LINES (WITH TYPE D TWO-WAY RETROREFLECTIVE RAISED PAVEMENT MARKERS) PER CA MUTCD FIG. 3A-107(CA), DETAIL 29.
(8) BIKE LANE INTERSECTION LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 39A.
(9) 4" DOUBLE YELLOW LINE (WITH TYPE D TWO-WAY RETROREFLECTIVE RAISED PAVEMENT MARKERS) PER CA MUTCD FIG. 3A-104(CA), DETAIL 22.
(10) 12" YELLOW DIAGONAL LINE @ 35' SPACING.
(11) TYPE IV(R) ARROW PER CA MUTCD FIG. 3B-24(CA).
(12) TYPE VI(L) ARROW PER CA MUTCD FIG. 3B-24(CA).
(13) 12" WHITE CROSSWALK OR LIMIT LINE.
(14) SHARED LANE BICYCLE MARKING PER CA MUTCD FIG. 9C-9.
(15) 6" WHITE SOLID BIKE LANE LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 39.
(16) 4'x8" WHITE DASHED LINE WITH 6' GAP.
(17) "WAIT HERE" PAVEMENT LEGEND PER CA MUTCD FIG. 3B-23(CA).

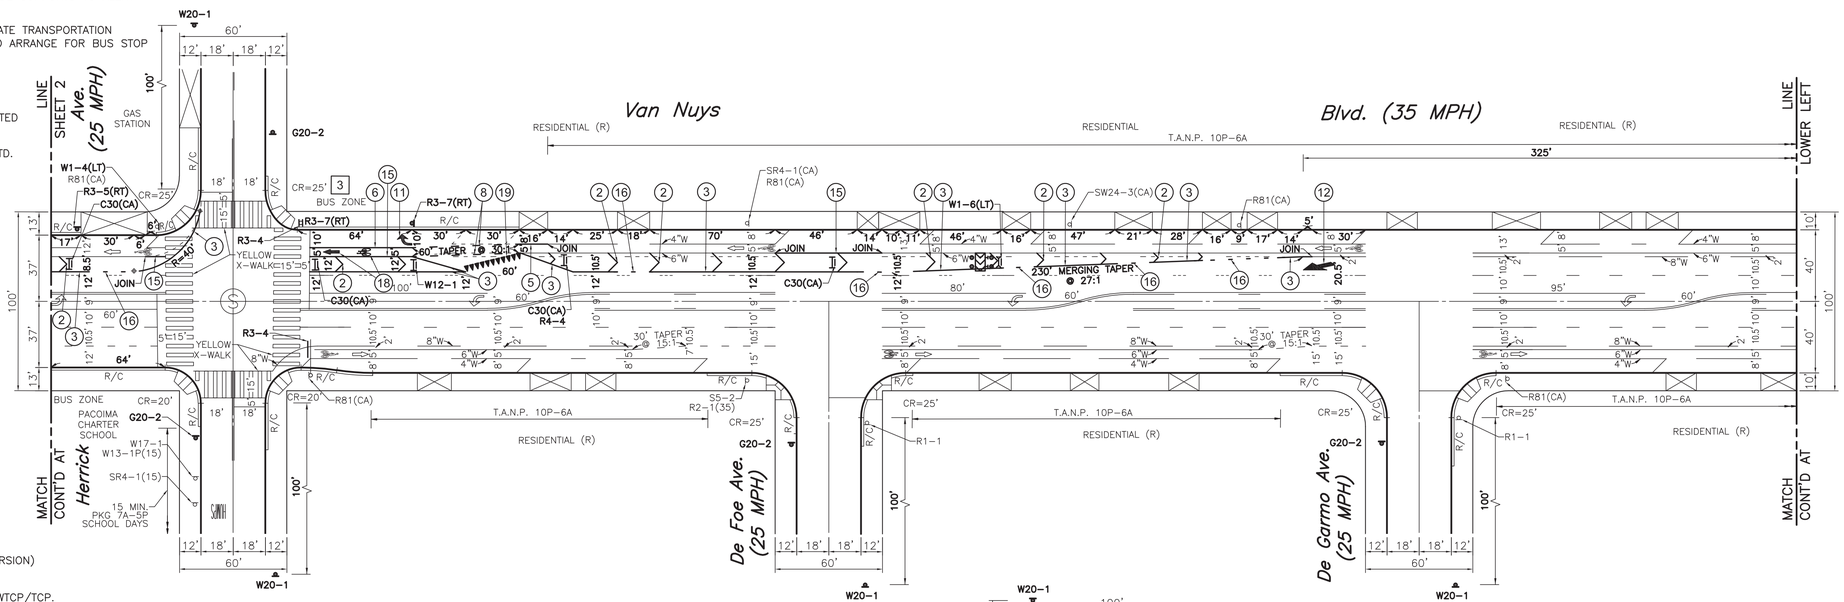
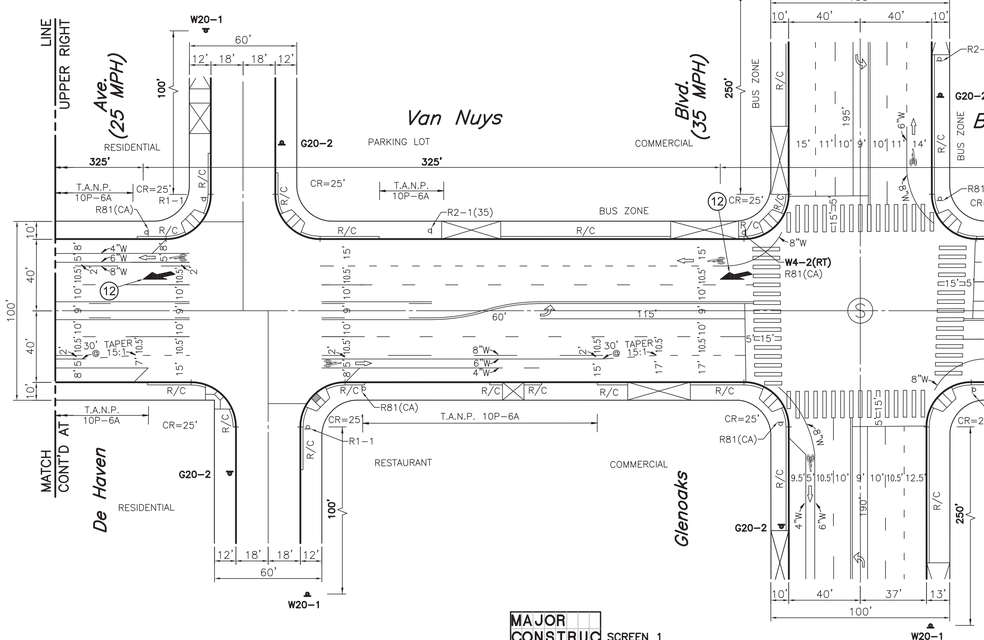
CONSTRUCTION NOTES:

1. CONTRACTOR SHALL NOTIFY ALL AFFECTED RESIDENTS, LAPD, LAFD, SCHOOLS, COUNCIL OFFCES, AND BUSINESSES FIVE (5) WORKING DAYS PRIOR TO START OF WORK.
2. CONTRACTOR SHALL PROVIDE REFLECTORIZED CONES AT TYPE III BARRICADE SUPPORTS TO ALERT PEDESTRIANS OF THE BARRICADE SUPPORT.
3. CONTRACTOR TO CONTACT THE AFFECTED TRANSIT SERVICE OR APPROPRIATE TRANSPORTATION COORDINATOR AT LEAST THIRTY (30) DAYS PRIOR TO TRAFFIC SET-UP TO ARRANGE FOR BUS STOP RELOCATION AS NECESSARY.
   - MTA COORDINATOR; EMIL GUGLIELMO, (213) 922-4632
   - DASH COORDINATOR; BRIAN LEE, (213) 928-9784 AND LADOT.TRANSIT.CONSTRUCTION@LACITY.ORG
4. TEMPORARY TRAFFIC SIGNAL PLAN, 28605-2024-TEMP, TO BE IMPLEMENTED BY CONTRACTOR CONCURRENTLY WITH THIS TRAFFIC CONTROL PLAN.
5. CONTRACTOR SHALL PIN ANGLED K-RAIL TO PAVEMENT PER CALTRANS STD. PLAN T3B.
6. INSTALL ABSORB 350 (TL-2) CRASH CUSHION.
7. INSTALL CRASH CUSHION ARRAY "TU17" PER CALTRANS STD. PLAN T1A1.
8. INSTALL TEMPORARY TRAFFIC SIGNAL/STREET LIGHT PLATFORM.
9. INSTALL TEMPORARY FENCE.





TEMPORARY STRIPING NOTES

ALL STRIPING SHALL CONFORM TO THE 2014 CA MUTCD (LATEST VERSION) AND SHALL BE INSTALLED USING PAINT PER LADOT SPECIFICATIONS.

1. REMOVE ALL CONFLICTING STRIPING PRIOR TO INSTALLATION OF WTCP/TCP.
2. WHEN REMOVAL IS REQUIRED BY CONSTRUCTION, CROSSWALK MARKINGS AND PEDESTRIAN SIGNAL HEADS SHALL BE REMOVED SIMULTANEOUSLY.
3. BUBBLE NOTES ARE:

(1) 4" YELLOW SOLID LEFT EDGE LINE WITH ONE-WAY YELLOW RETROREFLECTIVE MARKERS PER CA MUTCD FIG. 3A-105(CA), DETAIL 25.
(2) 12" WHITE CHEVRON LINE @ 35' SPACING.
(3) 8" WHITE CHANNELIZING LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 38A.
(4) 12" WHITE DIAGONAL LINE @ 35' SPACING.
(5) 4" WHITE SOLID EDGE LINE PER CA MUTCD FIG. 3A-106(CA), DETAIL 27B.
(6) 8" WHITE SOLID LINE WITH TYPE G ONE-WAY CLEAR RETROREFLECTIVE RAISED PAVEMENT MARKERS PER CA MUTCD FIG. 3A-112(CA), DETAIL 38.
(7) 4" DOUBLE MEDIAN YELLOW LINES (WITH TYPE D TWO-WAY RETROREFLECTIVE RAISED PAVEMENT MARKERS) PER CA MUTCD FIG. 3A-107(CA), DETAIL 29.
(8) BIKE LANE INTERSECTION LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 39A.
(9) 4" DOUBLE YELLOW LINE (WITH TYPE D TWO-WAY RETROREFLECTIVE RAISED PAVEMENT MARKERS) PER CA MUTCD FIG. 3A-104(CA), DETAIL 22.
(10) 12" YELLOW DIAGONAL LINE @ 35' SPACING.
(11) TYPE IV(R) ARROW PER CA MUTCD FIG. 3B-24(CA).
(12) TYPE VI(L) ARROW PER CA MUTCD FIG. 3B-24(CA).
(13) 12" WHITE CROSSWALK OR LIMIT LINE.
(14) SHARED LANE BICYCLE MARKING PER CA MUTCD FIG. 9C-9.
(15) 6" WHITE SOLID BIKE LANE LINE PER CA MUTCD FIG. 3A-112(CA), DETAIL 39.
(16) 4'x8" WHITE DASHED LINE WITH 6' GAP.
(17) "WAIT HERE" PAVEMENT LEGEND PER CA MUTCD FIG. 3B-23(CA).
(18) BIKE LANE SYMBOL AND ARROW PER CA MUTCD FIG. 9C-3.
(19) YIELD LINE.

SAN DIEGO FREEWAY ATSAC SYSTEM
ATSAC CABLE INTERCONNECT

2 DISCONNECT IN PULL BOX AND PROTECT EXISTING LOOP(S) FOR THE DURATION OF THIS CONSTRUCTION STAGE. IF LOOP(S) ARE DAMAGED, CONTRACTOR SHALL REPLACE WITH NEW LOOP(S) AT THE CONTRACTOR'S EXPENSE.

3 COVER PEDESTRIAN HEAD WITH DETACHABLE COVER (PER LADOT SPEC. 92-086-03) AND DE-ENERGIZE AS DIRECTED BY TRAFFIC SIGNAL INSPECTOR.

4 COVER PEDESTRIAN PUSH BUTTON AND DISCONNECT AS DIRECTED BY TRAFFIC SIGNAL INSPECTOR.

5 CONTRACTOR SHALL CONTACT THE LADOT VALLEY YARD TRAFFIC SIGNAL INSPECTOR AT (213) 216-9322 THIRTY (30) WORKING DAYS PRIOR TO START OF CONSTRUCTION FOR FIELD MODIFICATION OF CONTROLLER, TIMING CHANGES SHALL BE IMPLEMENTED PRIOR TO START OF CONSTRUCTION.

6 COVER VEHICLE HEAD WITH DETACHABLE COVER (PER LADOT SPEC. 92-086-03) AND DE-ENERGIZE AS DIRECTED BY TRAFFIC SIGNAL INSPECTOR.

7 STRAP 2" CONDUIT TO POLE FOR ROUTING OF TEMPORARY CABLES/WIRES.

8 TEMPORARY SIGNAL PLATFORM SHALL BE PLACED AS SHOWN WITH A MINIMUM OF 2' CLEARANCE FROM THE FACE OF THE PLATFORM TO THE EDGE OF THE TRAVELED ROADWAY (15' CLEARANCE IF NOT PROTECTED BY CRASH CUSHION OR BEHIND K-RAIL OR CURB/BERM). OVERHEAD CABLES SHALL MAINTAIN A 20' VERTICAL CLEARANCE ABOVE THE TRAVELED ROADWAY AND 12' CLEARANCE OVER THE SIDEWALK. COIL AN ADDITIONAL 25' LENGTH OF OVERHEAD CABLE AT THE TEMPORARY PLATFORM SIGNAL TO FACILITATE CHANGE IN POSITION. ALTERNATE LOCATION OF THE TEMPORARY SIGNAL EQUIPMENT, BASED ON CONSTRUCTION CONDITIONS, REQUIRES APPROVAL OF THE LADOT TRAFFIC SIGNAL INSPECTOR.

9 CONTRACTOR SHALL KEEP TRAFFIC SIGNAL INDICATION(S) FREE OF VISUAL OBSTRUCTIONS AT ALL TIMES. PROVIDE ACCESS TO LADOT MAINTENANCE AT ALL TIMES.

10 CONTRACTOR SHALL NOTIFY MTA BUS STOPS AND ZONES DEPARTMENT AT DANIELSD@METRO.NET, LADOT DASH & COMMUTER EXPRESS AT LADOT.TRANSIT.CONSTRUCTION@LACITY.ORG AND/OR OTHER IMPACTED TRANSIT OPERATOR TWO (2) WEEKS PRIOR TO CONSTRUCTION TO COORDINATE THE RELOCATION OF BUS STOP.

11 INSTALL VEHICLE DETECTOR LOOP(S) PER LADOT STD. DWG. NO. S-70.2.

12 PROTECT EXISTING PULL BOX AND CONDUIT(S). IF PULL BOX AND/OR CONDUIT(S) ARE DAMAGED, CONTRACTOR SHALL REPLACE WITH NEW EQUIPMENT AT THE CONTRACTOR'S EXPENSE.

13 CONTRACTOR MAY REUSE EXISTING STUB-OUT. IF STUB-OUT IS DAMAGED, THE CONTRACTOR SHALL INSTALL NEW STUB-OUT PER LADOT STD. DWG. NO. S-70.1A.

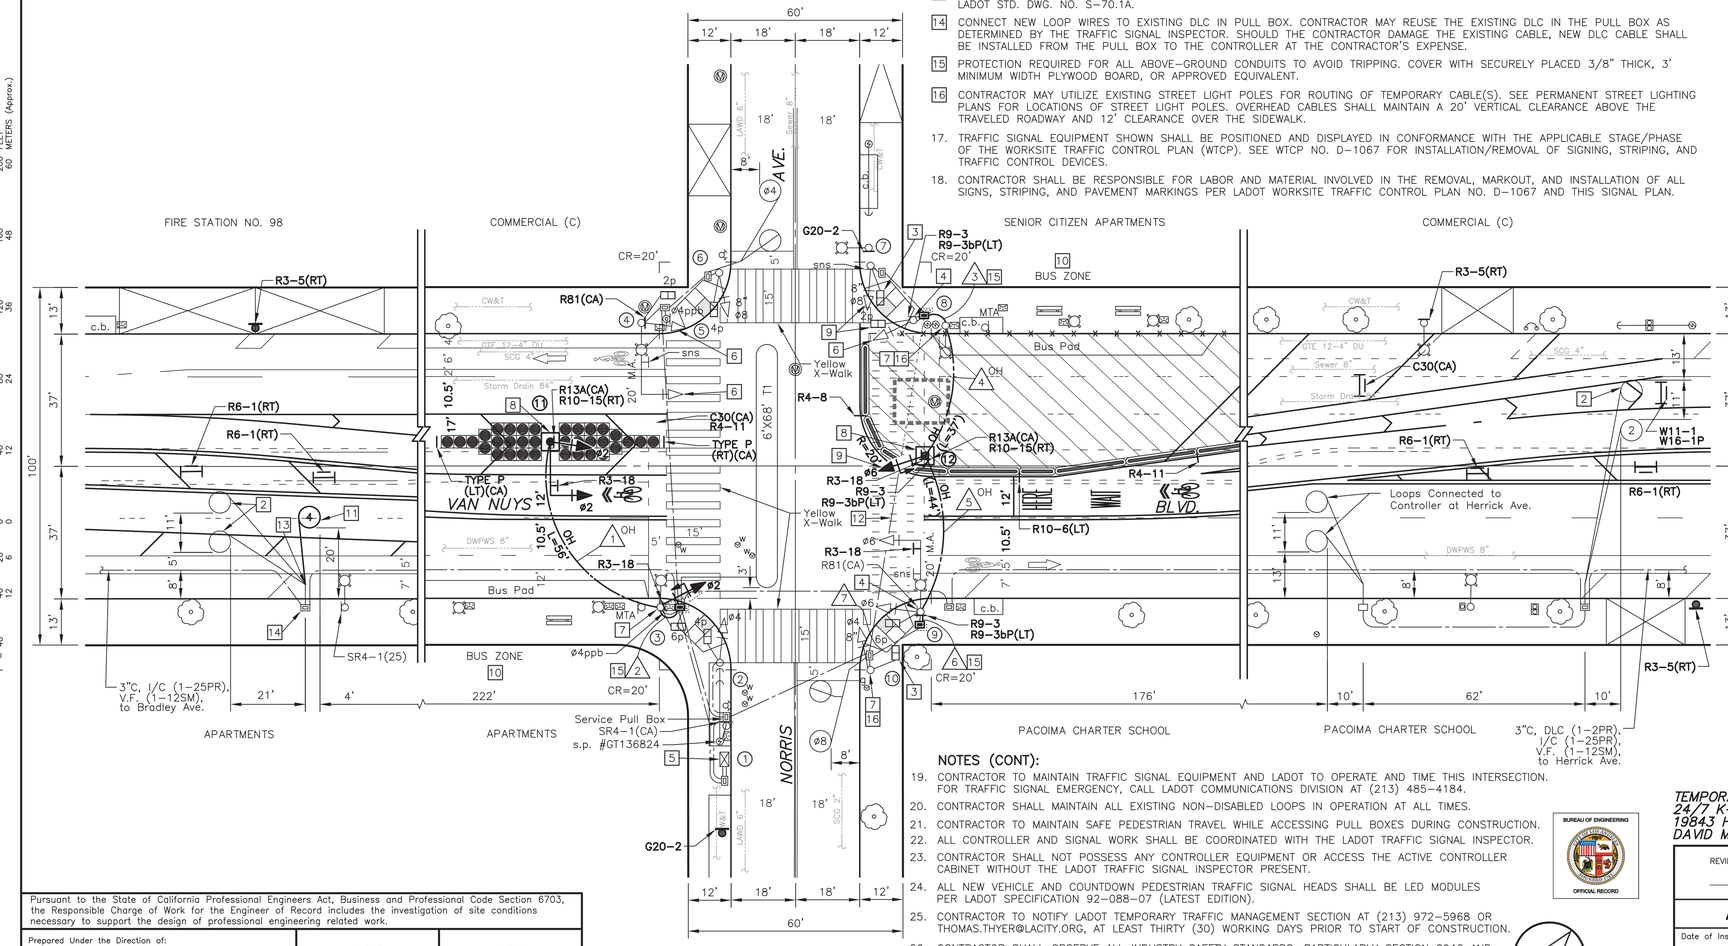
14 CONNECT NEW LOOP WIRES TO EXISTING DLC IN PULL BOX. CONTRACTOR MAY REUSE THE EXISTING DLC IN THE PULL BOX AS DETERMINED BY THE TRAFFIC SIGNAL INSPECTOR. SHOULD THE CONTRACTOR DAMAGE THE EXISTING CABLE, NEW DLC CABLE SHALL BE INSTALLED FROM THE PULL BOX TO THE CONTROLLER AT THE CONTRACTOR'S EXPENSE.

15 PROTECTION REQUIRED FOR ALL ABOVE-GROUND CONDUITS TO AVOID TRIPPING. COVER WITH SECURELY PLACED 3/8" THICK, 3' MINIMUM WIDTH PLYWOOD BOARD, OR APPROVED EQUIVALENT.

16 CONTRACTOR MAY UTILIZE EXISTING STREET LIGHT POLES FOR ROUTING OF TEMPORARY CABLE(S). SEE PERMANENT STREET LIGHTING PLANS FOR LOCATIONS OF STREET LIGHT POLES. OVERHEAD CABLES SHALL MAINTAIN A 20' VERTICAL CLEARANCE ABOVE THE TRAVELED ROADWAY AND 12' CLEARANCE OVER THE SIDEWALK.

17. TRAFFIC SIGNAL EQUIPMENT SHOWN SHALL BE POSITIONED AND DISPLAYED IN CONFORMANCE WITH THE APPLICABLE STAGE/PHASE OF THE WORKSITE TRAFFIC CONTROL PLAN (WTCP). SEE WTCP NO. D-1067 FOR INSTALLATION/REMOVAL OF SIGNING, STRIPING, AND TRAFFIC CONTROL DEVICES.

18. CONTRACTOR SHALL BE RESPONSIBLE FOR LABOR AND MATERIAL INVOLVED IN THE REMOVAL, MARKOUT, AND INSTALLATION OF ALL SIGNS, STRIPING, AND PAVEMENT MARKINGS PER LADOT WORKSITE TRAFFIC CONTROL PLAN NO. D-1067 AND THIS SIGNAL PLAN.



NOTES (CONT):

19. CONTRACTOR TO MAINTAIN TRAFFIC SIGNAL EQUIPMENT AND LADOT TO OPERATE AND TIME THIS INTERSECTION. FOR TRAFFIC SIGNAL EMERGENCY, CALL LADOT COMMUNICATIONS DIVISION AT (213) 485-4184.
20. CONTRACTOR SHALL MAINTAIN ALL EXISTING NON-DISABLED LOOPS IN OPERATION AT ALL TIMES.
21. CONTRACTOR TO MAINTAIN SAFE PEDESTRIAN TRAVEL WHILE ACCESSING PULL BOXES DURING CONSTRUCTION.
22. ALL CONTROLLER AND SIGNAL WORK SHALL BE COORDINATED WITH THE LADOT TRAFFIC SIGNAL INSPECTOR.
23. CONTRACTOR SHALL NOT POSSESS ANY CONTROLLER EQUIPMENT OR ACCESS THE ACTIVE CONTROLLER CABINET WITHOUT THE LADOT TRAFFIC SIGNAL INSPECTOR PRESENT.
24. ALL NEW VEHICLE AND COUNTDOWN PEDESTRIAN TRAFFIC SIGNAL HEADS SHALL BE LED MODULES PER LADOT SPECIFICATION 92-088-07 (LATEST EDITION).
25. CONTRACTOR TO NOTIFY LADOT TEMPORARY TRAFFIC MANAGEMENT SECTION AT (213) 972-5968 OR THOMAS.THYER@LACITY.ORG, AT LEAST THIRTY (30) WORKING DAYS PRIOR TO START OF CONSTRUCTION.
26. CONTRACTOR SHALL OBSERVE ALL INDUSTRY SAFETY STANDARDS, PARTICULARLY SECTION 2946 AND 2948 OF TITLE 8 OF CAL-OSHA REGARDING WORK NEAR OVERHEAD LINES.
27. CONTRACTOR SHALL CONTACT THE TRAFFIC CONSULTANT FOR ANY PROBLEMS ENCOUNTERED DURING CONSTRUCTION. THE TRAFFIC CONSULTANT SHALL CONTACT THE LADOT PLAN REVIEW SECTION FOR RESOLUTION OF SIGNAL RELATED CONSTRUCTION PROBLEMS.
28. AT THE CONCLUSION OF CONSTRUCTION, THE CONTRACTOR SHALL RESTORE THE TRAFFIC SIGNAL AND STRIPING TO THE ORIGINAL CONDITIONS THAT WERE EXISTING PRIOR TO START OF CONSTRUCTION.

Scale: 1" = 20'
North/South: NORRIS AVE.

NOTICE TO CONTRACTOR

1. EXCEPT WHERE OTHERWISE INDICATED, MATERIALS AND INSTALLATION METHODS SHALL CONFORM TO THE LATEST EDITION, WITH SUPPLEMENTS, OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, ADOPTED BY THE CITY OF LOS ANGELES BOARD OF PUBLIC WORKS (LABPW), INCLUDING THE LATEST VERSION OF THE "BROWN BOOK" ISSUED BY THE LABPW, AND THE LATEST EDITION, WITH AMENDMENTS, OF THE SPECIAL PROVISIONS AND STANDARD DRAWINGS FOR THE INSTALLATION AND MODIFICATION OF TRAFFIC SIGNALS, ISSUED BY THE CITY OF LOS ANGELES DEPARTMENT OF TRANSPORTATION (LADOT).

2. ALL TRAFFIC SIGNAL AND/OR RELATED ELECTRICAL WORK SHALL BE PERFORMED AND INSPECTED UNDER THE CONDITIONS OF THE MOST CURRENT AMENDED BOARD OF PUBLIC WORKS "ENHANCED ELECTRICAL SAFETY POLICY" AS REQUIRED IN LADOT'S SPECIAL PROVISIONS AND STANDARD DRAWINGS FOR THE INSTALLATION AND MODIFICATION OF TRAFFIC SIGNALS (RED BOOK), REGARDLESS OF CONTRACT COST.

3. THE LADOT TRAFFIC SIGNAL INSPECTOR AT (213) 216-9322 SHALL BE NOTIFIED THREE (3) WORKING DAYS PRIOR TO THE BEGINNING OF CONSTRUCTION. FOR WORK IN THE ADVANCED TRANSPORTATION SYSTEM AND COORDINATION (ATSAC) PROJECT AREA, A FIELD MEETING SHALL BE SCHEDULED WITH THE SIGNAL SYSTEMS SUPERVISOR AT (213) 473-8286 AND THE SIGNAL MAINTENANCE SUPERVISOR AT (213) 332-1650 THREE (3) WORKING DAYS PRIOR TO THE BEGINNING OF CONSTRUCTION. FULL RESTORATION OF THE ATSAC SYSTEM MUST OCCUR WITHIN FIVE (5) WORKING DAYS AFTER SHUT DOWN.

4. REGULAR TRAFFIC SIGNAL CONTROL SHALL BE MAINTAINED FROM 6:00 A.M. TO 9:00 A.M. AND 3:00 P.M. TO 7:00 P.M. ON WEEKDAYS, EXCEPT NATIONAL HOLIDAYS. FLASHING, DEACTIVATION, AND ACTIVATION OF SIGNALS SHALL BE ACCOMPLISHED ONLY BY A LADOT TRAFFIC SIGNAL ELECTRICIAN. ALL ARRANGEMENTS TO DEACTIVATE SIGNAL SHALL BE MADE 24 HOURS IN ADVANCE BY CONTACTING THE LADOT TRAFFIC SIGNAL DEDICATED LINE AT (213) 473-8478 BEFORE 9:00 AM ON NON-HOLIDAY WEEKDAYS. THE LADOT PROJECT NUMBER MUST BE GIVEN AT THIS TIME. THE CONTRACTOR WILL BE CHARGED FOR ALL ELECTRICAL AND TRAFFIC CONTROL SERVICE PROVIDED BY LADOT.

5. ARRANGEMENTS FOR OBTAINING ANY MATERIALS IDENTIFIED TO BE SUPPLIED BY LADOT SHALL BE MADE TEN (10) WORKING DAYS IN ADVANCE BY CONTACTING THE LADOT FIELD OPERATIONS DIVISION AT (213) 928-9603. HOWEVER, TRAFFIC SIGNAL CONTROLLERS REQUIRE SIXTY (60) WORKING DAYS ADVANCE NOTICE AND MUST BE PICKED UP WITHIN FIFTEEN (15) WORKING DAYS AFTER NOTIFICATION. CONTACT LADOT SIGNAL SHOP AT (213) 473-8468 TO COORDINATE CONTROLLER DELIVERY AND/OR PICKUP.

6. ALL IDENTIFIED TRAFFIC SIGNAL EQUIPMENT SHALL BE RETURNED TO LADOT. ARRANGEMENTS FOR RETURNING IDENTIFIED EQUIPMENT TO LADOT SHALL BE MADE FIVE (5) WORKING DAYS IN ADVANCE BY CONTACTING THE LADOT MATERIAL SERVICES DIVISION AT (213) 928-9636.

7. ALL EXISTING TRAFFIC CONTROL SIGNING SHALL BE MAINTAINED WITH STANDARD SIGN BRACKETS BY THE CONTRACTOR. EXCEPT WHERE OTHERWISE INDICATED, EXISTING LARGE STREET NAME SIGNS ON MAST ARM TYPE STANDARDS SHALL BE RELOCATED FROM THE VERTICAL POLE TO THE MAST ARM PER LADOT STANDARD DRAWING NO. S-457.0 AND S-486.0. THE CONTRACTOR SHALL COORDINATE WITH LADOT SIGN SHOP AT (213) 473-7954 FOR ANY REQUIRED LARGE STREET NAME SIGNS. ANY TRAFFIC CONTROL SIGNING DAMAGED OR LOST BY THE CONTRACTOR SHALL BE REPLACED AT THE CONTRACTOR'S EXPENSE. SIGNAL CONTRACTOR SHALL INSTALL MAST ARM MOUNTED SIGNS. FOR INSTALLATION OF A STREET NAME SIGN ON A TYPE 1 POLE, THE CONTRACTOR SHALL FURNISH AND INSTALL A POLE EXTENSION AS NEEDED.

8. THE CONTRACTOR SHALL FURNISH AND INSTALL, AS SHOWN ON THE PLANS, ALL TRAFFIC SIGNAL EQUIPMENT SUCH AS STANDARDS, MAST ARMS, SIGNAL HEADS, AND OTHER EQUIPMENT AS REQUIRED. ALL SUCH EQUIPMENT SHALL BE NEW. ALL VEHICLE HEAD EQUIPMENT SUPPLIED BY THE CONTRACTOR SHALL HAVE 1-1/2 INCH DIAMETER PIPE FIT MOUNTING HARDWARE, INCLUDING ALL TOP POST MOUNT HEADS. PEDESTRIAN HEAD MODULE REPLACEMENTS SHOWN ON THE PLAN SHALL REQUIRE A COMPLETE INSTALLATION, INCLUDING NEW PEDESTRIAN HEAD AND TERMINAL COMPARTMENT.

NOTES:

1. SEMI–ACTUATED OPERATION WITH TRANSIT PRIORITY (ATSAC 2070 CONTROLLER IN 332 CABINET)
   - ø2 – VAN NUYS BLVD. WB & N/S PED. XING
   - ø4 – NORRIS AVE. SB & W/S PED. XING
   - ø6 – VAN NUYS BLVD. EB & S/S PED. XING
   - ø8 – NORRIS AVE. NB & E/S PED. XING **(REACTIVATE)**

   SAN DIEGO FREEWAY ATSAC SYSTEM
   ATSAC CABLE INTERCONNECT

2. RECONNECT LOOP DETECTOR WIRES IN PULL BOX.
3. UNCOVER PEDESTRIAN HEAD AND ENERGIZE AS DIRECTED BY TRAFFIC SIGNAL INSPECTOR.
4. REMOVE EXISTING PEDESTRIAN PUSH BUTTON. INSTALL ACCESSIBLE PEDESTRIAN SIGNAL (APS) PER LADOT STD. DWG. NO. S–73.2.
5. THE CONTRACTOR SHALL CONTACT THE LADOT VALLEY YARD TRAFFIC SIGNAL INSPECTOR AT (213) 216–9322 THIRTY (30) WORKING DAYS PRIOR TO START OF CONSTRUCTION FOR FIELD MODIFICATION OF CONTROLLER. TIMING CHANGES SHALL BE IMPLEMENTED PRIOR TO START OF CONSTRUCTION.
6. UNCOVER VEHICLE HEAD AND ENERGIZE AS DIRECTED BY TRAFFIC SIGNAL INSPECTOR.
7. INSTALL YELLOW CONTINENTAL CROSSWALK PER LADOT STD. DWG. NO. S–481.1. REMOVE CONFLICTING STRIPING.
8. REMOVE TEMPORARY TRAFFIC SIGNAL EQUIPMENT, POLE, PLATFORM, AND OVERHEAD CABLES.
9. CONTRACTOR SHALL NOTIFY MTA BUS STOPS AND ZONES DEPARTMENT AT DANIELSD@METRO.NET, LADOT DASH & COMMUTER EXPRESS AT LADOT.TRANSIT.CONSTRUCTION@LACITY.ORG AND/OR OTHER IMPACTED TRANSIT OPERATOR TWO (2) WEEKS PRIOR TO CONSTRUCTION TO COORDINATE THE RELOCATION OF BUS STOP.
10. INTERCEPT EXISTING CONDUIT. JOIN AND EXTEND INTO PULL BOX.
11. CONTRACTOR SHALL OBSERVE ALL INDUSTRY SAFETY STANDARDS, PARTICULARLY SECTION 2946 AND 2948 OF TITLE 8 OF CAL–OSHA REGARDING WORK NEAR OVERHEAD LINES.
12. REMOVE TEMPORARY TRAFFIC SIGNAL EQUIPMENT AT END OF CONSTRUCTION. REMOVE PLYWOOD BOARDS AT END OF CONSTRUCTION IF INSTALLED ON ABOVE GROUND CONDUITS.
13. ALL CONTROLLER AND SIGNAL WORK SHALL BE COORDINATED WITH THE LADOT TRAFFIC SIGNAL INSPECTOR.
14. CONTRACTOR SHALL NOT POSSESS ANY CONTROLLER EQUIPMENT OR ACCESS THE ACTIVE CONTROLLER CABINET WITHOUT THE LADOT TRAFFIC SIGNAL INSPECTOR PRESENT.
15. AT THE CONCLUSION OF CONSTRUCTION, THE CONTRACTOR SHALL RESTORE THE TRAFFIC SIGNAL AND STRIPING TO THE ORIGINAL CONDITIONS THAT WERE EXISTING PRIOR TO START OF CONSTRUCTION. RESTORE ALL SIGNS AND STRIPING PER GEO DESIGN PLAN, A–7932.
16. CONTRACTOR SHALL CONTACT THE TRAFFIC CONSULTANT FOR ANY PROBLEMS ENCOUNTERED DURING CONSTRUCTION. THE TRAFFIC CONSULTANT SHALL CONTACT LADOT FOR RESOLUTION OF THE SIGNAL RELATED CONSTRUCTION PROBLEMS.

BUREAU OF ENGINEERING — OFFICIAL RECORD

NOTES

1. EXISTING SPORTS LIGHTING POWER DISTRIBUTION PANELS ARE LOCATED INSIDE EXISTING LIGHTING CONTROL PANEL AS SHOWN ON PLAN. NEW LIGHTING CONTROL AND POWER DISTRIBUTION PANELS WILL REPLACE EXISTING PANELS FOR BASEBALL DIAMONDS. CONTRACTOR SHALL COMPLETE THE FOLLOWING PRIOR TO DEMOLITION OF EXISTING LIGHTING SYSTEMS:
   A. FIELD SURVEY EXISTING LIGHTING POWER DISTRIBUTION PANELS TO IDENTIFY CIRCUITS BEING REPLACED AND CIRCUITS THAT MAY BE DISTURBED BY CONSTRUCTION ACTIVITIES.
   B. FIELD LOCATE BURIED LIGHTING WIRING FROM EXISTING LIGHTING PANEL TO IDENTIFY EXISTING CONDUITS THAT MAY BE DISTURBED BY CONSTRUCTION. EXCAVATE TEST PITS AS NEEDED TO LOCATE ALL BURIED ELECTRICAL CONDUITS WITHIN PROJECT WORK AREAS.
   C. DISCONNECT WIRING TO LIGHT POLES AND FIXTURES BEING REPLACED, AND WIRING TO BE IMPACTED BY CONSTRUCTION, AND PULL WIRES OUT OF EXISTING ELECTRICAL CONDUITS, PRIOR TO CONSTRUCTION AND DEMOLITION OF EXISTING LIGHTING SYSTEMS.
   D. PREPARE AND SUBMIT A DETAILED DEMOLITION PLAN, INCLUDING TEXT DESCRIPTION, DRAWINGS AND PHOTOS, TO EXPLAIN WHAT WILL BE DEMOLISHED, HOW IT WILL BE DEMOLISHED, AND PLANS TO INDICATE LOCATIONS OF CONDUITS TO BE DEMOLISHED AND THOSE TO BE PROTECTED IN-PLACE.
   E. ABANDON IN-PLACE EXISTING LIGHTING DISTRIBUTION PANELS LOCATED IN EXISTING LIGHTING CONTROL PANEL, AND LABEL BREAKERS AS ABANDONED.
2. CONTRACTOR TO FIELD VERIFY LOCATION OF EXISTING IRRIGATION FEE LINES AND CONTROL VALVES. CONTRACTOR SHALL PROTECT THE EXISTING IRRIGATION SYSTEM IN-PLACE IN AREAS NOT IMPACTED BY THE EXCAVATION FOR THE INFILTRATION GALLERY AND DESILTING BASINS.
   A. REMOVE EXISTING IRRIGATION PIPING AND CONTROL VALVES WITHIN THE PROPOSED LIMIT OF EXCAVATION FOR STRUCTURES AS SHOWN IN CS02.
   B. REROUTE EXISTING IRRIGATION PIPING PARTIALLY WITHIN THE LIMIT OF EXCAVATION TO THE NEAREST CONTROL VALVE OUTSIDE OF THE EXCAVATION LIMIT.
3. CONTRACTOR TO COORDINATE WITH RECREATION AND PARK (RAP) STAFFS FOR ITEMS TO BE SALVAGED.
4. DEMOLISH EXISTING ASPHALT PAVING AND SUBGRADE TO A DEPTH SHOWN ON DETAIL B/CS04.
5. THIS CONTRACT AND THE TRUST FOR PUBLIC LAND (TPL) CONTRACT HAVE SOME OVERLAPPING AREAS OF WORK. THE INTENT IS TO CONSTRUCT THE FACILITIES IN THIS CONTRACT AND SUPPLEMENT ADDITIONAL SURFACE FEATURES INCLUDED IN THE TPL CONTRACT TO MEET THE SCOPE OF BOTH CONTRACTS.

GRADING AND LAYOUT PLAN

1" = 20'

20' 0 20' 40'

1" = 20'

NOTES

1. GRADING/RETAINING WALL/SHORING PLAN CORRECTION SHEETS (2017 LABC) ITEM C-5.
   a. ALL GRADING SLOPES SHALL BE PLANTED AND SPRINKLERED. (7012.1)
   b. STANDARD 12 INCH HIGH BERM IS REQUIRED AT TOP OF ALL GRADED SLOPES. (7013.3).
   c. NO FILL TO BE PLACED UNTIL THE CITY GRADING INSPECTOR HAS INSPECTED AND APPROVED THE BOTTOM EXCAVATION.
   d. MAN-MADE FILL SHALL BE COMPACTED TO A MINIMUM RELATIVE COMPACTION OF 90% MAX. DRY DENSITY WITHIN 40 FEET BELOW FINISH GRADE, UNLESS A LOWER RELATIVE COMPACTION (NOT LESS THAN 90% OF MAX. DRY DENSITY) IS JUSTIFIED BY THE SOILS ENGINEER.
   e. TEMPORARY EROSION CONTROL TO BE INSTALLED DURING THE WET SEASON (BETWEEN OCTOBER 1 AND APRIL 15). OBTAIN GRADING INSPECTOR'S AND DEPARTMENT OF PUBLIC WORKS APPROVAL OF PROPOSE PROCEDURES [>200 CY] (7007.1).
2. FOR COORDINATES (#) SEE DWG CB03
3. THIS CONTRACT AND THE TRUST FOR PUBLIC LAND (TPL) CONTRACT HAVE SOME OVERLAPPING AREAS OF WORK. THE INTENT IS TO CONSTRUCT THE FACILITIES IN THIS CONTRACT AND SUPPLEMENT ADDITIONAL SURFACE FEATURES INCLUDED IN THE TPL CONTRACT TO MEET THE SCOPE OF BOTH CONTRACTS.

CONSTRUCTION NOTES

1. 6'X8' ACCESS HATCH, DOUBLE LEAF, H-20 LOADING. CONTRACTOR SHALL COORDINATE ACCESS HATCH ASSEMBLY WITH MANUFACTURER OF DESILTING BASIN AND INFILTRATION GALLERY MODULES.
2. 4'X4' ACCESS HATCH, DOUBLE LEAF, H-20 LOADING. FOR DESILTING BASIN AND INFILTRATION GALLERY MODULES, CONTRACTOR SHALL COORDINATE ACCESS HATCH ASSEMBLY WITH MANUFACTURER.
3. PASSIVE AIR VENT, SEE DET F1/CI34.
4. DRAINAGE INLET TO INFILTRATION GALLERY, SEE DETAIL F6/CI34.

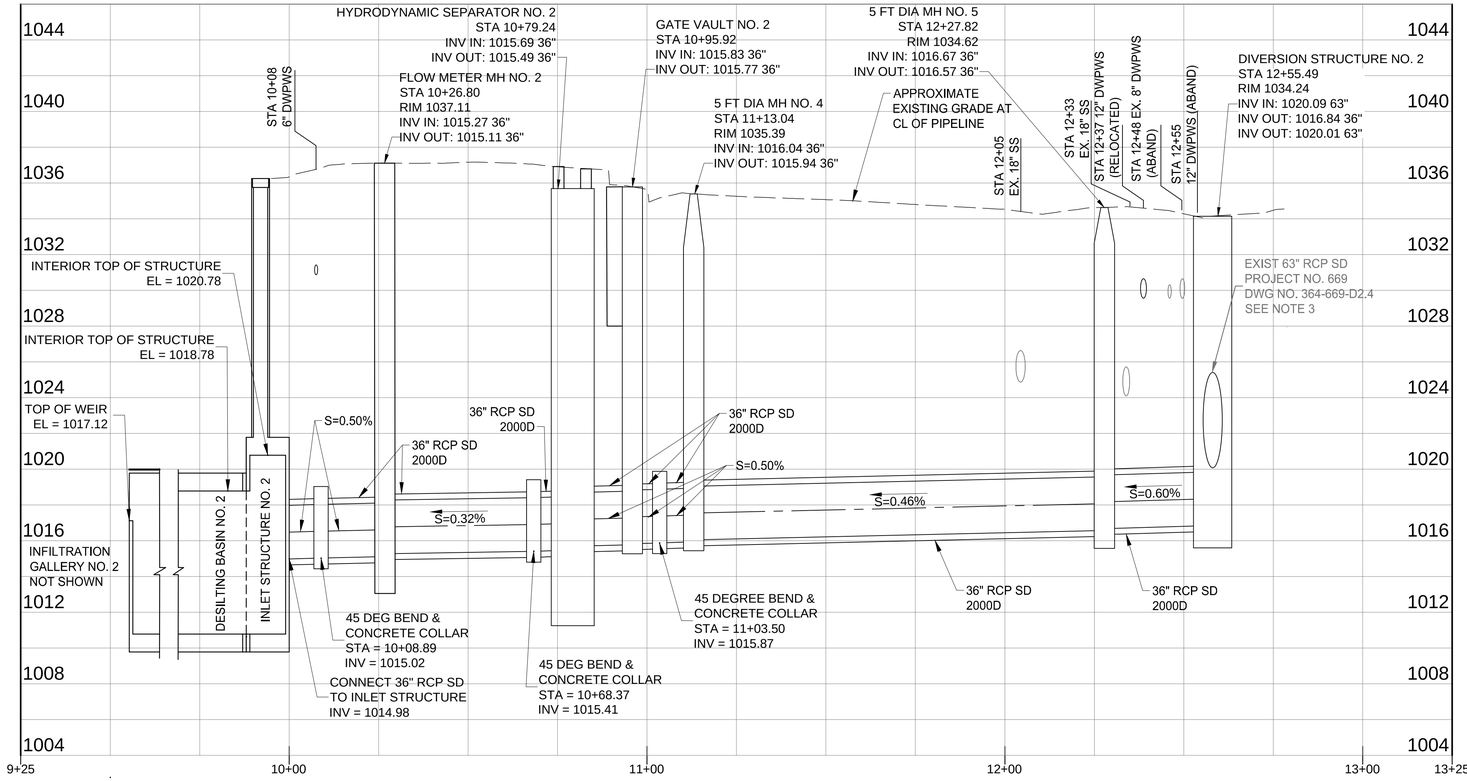
SHEET NAME CU03

SHEET 31 OF 129 SHEETS

SHEET VERSION 4.0.1 FILE PATH: C:\CDMEXT\PAVITHRAB\D0491588\CU103.DWG PLOT DATE: 10/9/2024 2:52 PM SAVED: 10/9/2024 11:16 AM SAVED BY:PAVITHRAB

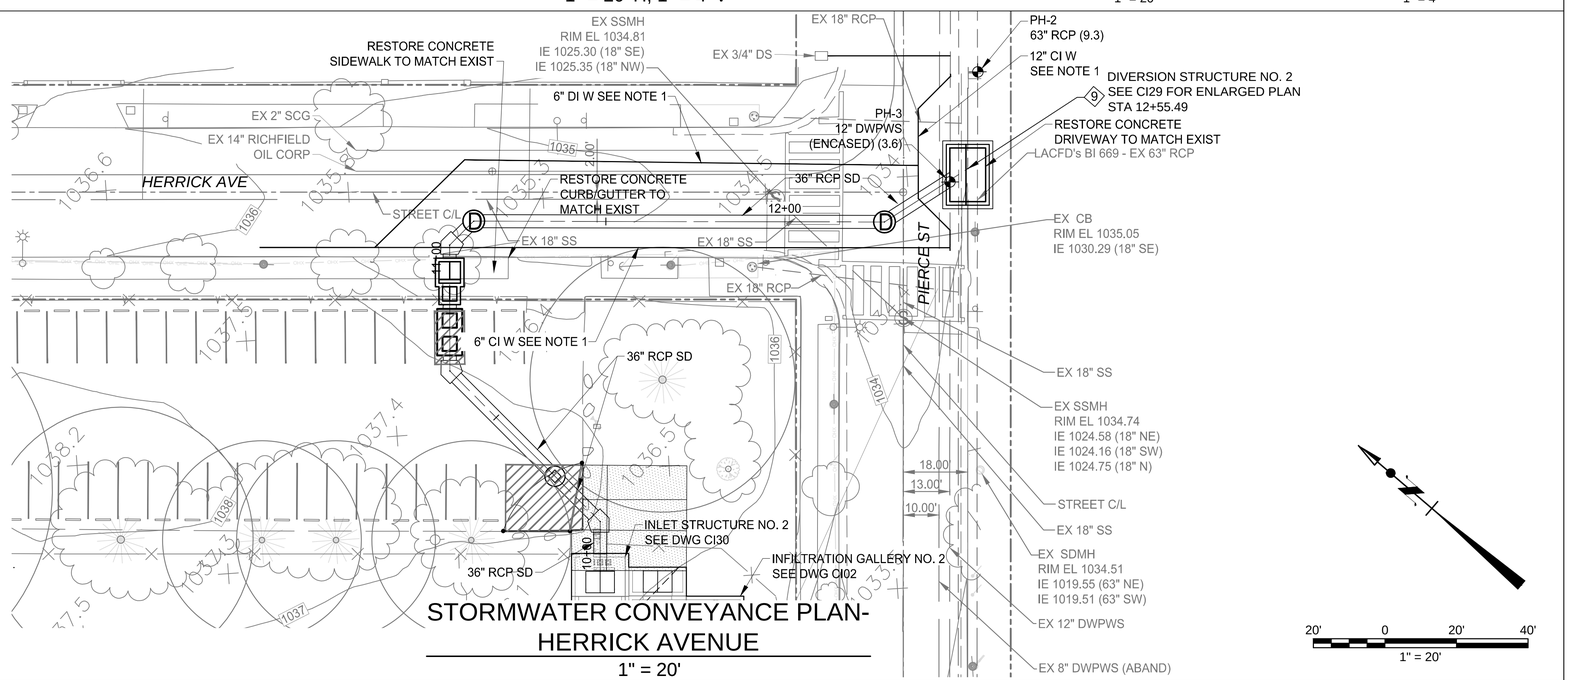


STORMWATER CONVEYANCE PROFILE- HERRICK AVENUE

1" = 20' H; 1" = 4' V

20' 0 20' 40' — 1" = 20'

4' 0 4' 4' — 1" = 4'



STORMWATER CONVEYANCE PLAN- HERRICK AVENUE

1" = 20'

20' 0 20' 40' — 1" = 20'

GENERAL NOTES

1. SD MH NO. 4 AND NO. 5 SHALL BE 5' ID AND IN ACCORDANCE WITH STD PLAN S-150-0. PROVIDE PRESSURE FRAME AND COVER PER STD PLAN S-284-2 WITH THE LETTER "D" LOCATOR ON THE COVER.
2. SD TRENCHING, BEDDING, AND BACKFILL SHALL BE PER SPECIFICATIONS SECTION 02310.
3. EXISTING 63" SD TO REMAIN IN OPERATION AND CONTRACTOR TO DETERMINE AND IMPLEMENT BYPASS FOR THIS STORMWATER FLOW DURING CONSTRUCTION.
4. BOE'S STANDARD PLAN S-477-2 T-TRENCH AND PAVEMENT RESTORATION - ASPHALT CONCRETE STREETS TO BE USED FOR ALL BURIED PIPING. USE SAME DETAIL FOR CROSS COUNTRY PIPE INSTALLATION AND BRING COMPACTED BACKFILL TO GROUND SURFACE. ALSO USE SAME DETAIL FOR NEW ASPHALT AREAS AND BRING COMPACTED FILL TO BOTTOM OF BASE MATERIAL FOR ALL BURIED PIPING.
5. BOE'S STANDARD PLAN S-251-1 PIPE LAYING IN TRENCHES TO BE USED FOR ALL BURIED PIPING.

POINT TABLE

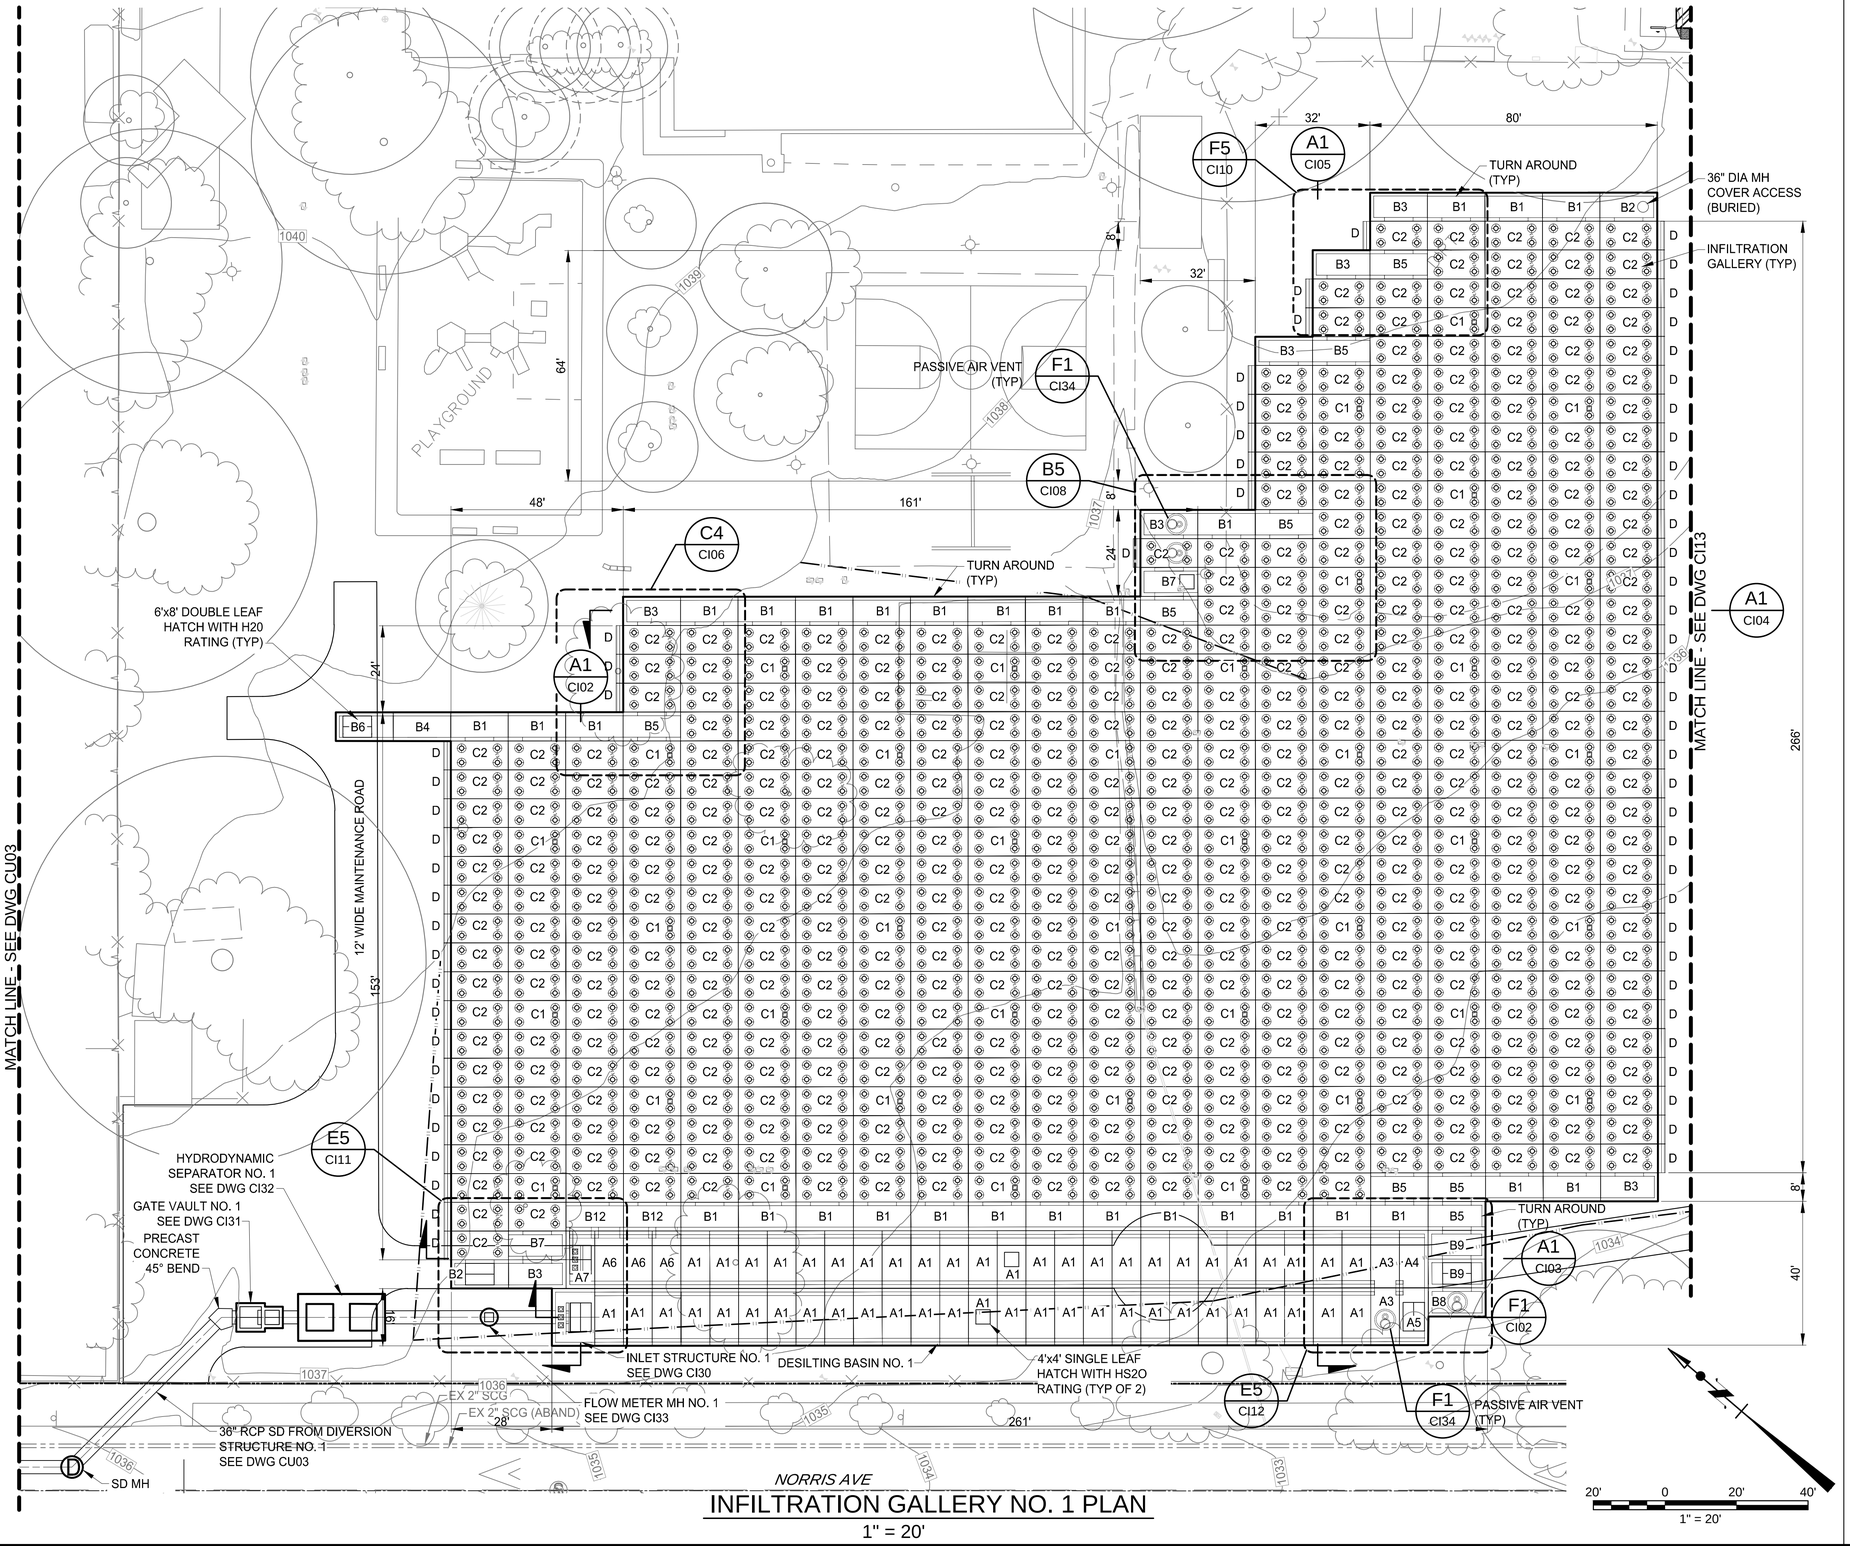
SHEET 33 OF 129 SHEETS



INFILTRATION GALLERY NO. 1 PLAN

1" = 20'

NOTES:

1. OVERALL DIMENSIONS ARE APPROXIMATE. FINAL DIMENSIONS SHALL BE DETERMINED BASED ON SUPPLIER SHOP DRAWING SUBMITTALS.
2. INFILTRATION BASIN NO.1

   INFILTRATION DESIGN CRITERIA TO BE BE MET BY INFILTRATION GALLERY SUPPLIER:

   MINIMUM TOTAL VOLUME OF STORAGE WITH 1 FT OF FREEBOARD= 851,000 CF

   MINIMUM TOTAL VOLUME OF STORAGE WITH NO FREEBOARD= 915,000 CF

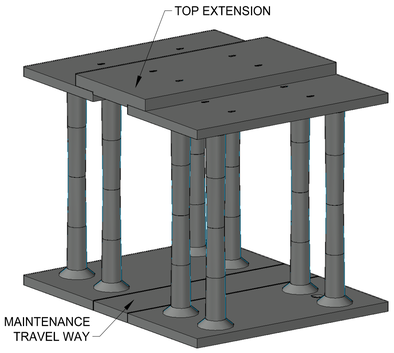
   MINIMUM AREA OF INFILTRATION BENEATH THE GALLERY NOT INCLUDING THE STONE BLANKET 2 FT BEYOND PERIMETER = 69,000 SF

   PEAK INFLUENT FLOW RATES THROUGH SLIDE GATE VAULT IS 37 CFS

   PROVIDE INTERIOR ACCESS TO INFILTRATION GALLERY THROUGH MECHANIZED/ELECTRIC VEHICLE (BY OTHERS) WITH A MINIMUM TRAVEL WIDTH OF 4 FEET THAT ALLOWS THE VEHICLE TO CONTINUALLY ACCESS ALL PRECAST UNITS WITH A MAXIMUM OF 32 FEET VEHICLE BACKUP DISTANCE TO EXIT A DEAD END LOCATION. SEE DETAIL BELOW FOR AN ALTERNATE INTERIOR TURN-AROUND ARRANGEMENT.

   PROVIDE ALL ACCESS HATCHES AND MANHOLE ACCESS IN SIZES AND LOCATIONS ON PLAN.

   ALL UNITS OF THE INFILTRATION GALLERY SHALL BE DESIGNED FOR HS-20 LOADING.
3. DESILTING BASIN NO.1 TO BE PROVIDED AS SHOWN ON THE DRAWINGS AND SHALL BE DESIGNED FOR HS-20 LOADING.



4'-0" MAINTENANCE TRAVEL WAY ISOMETRIC VIEW

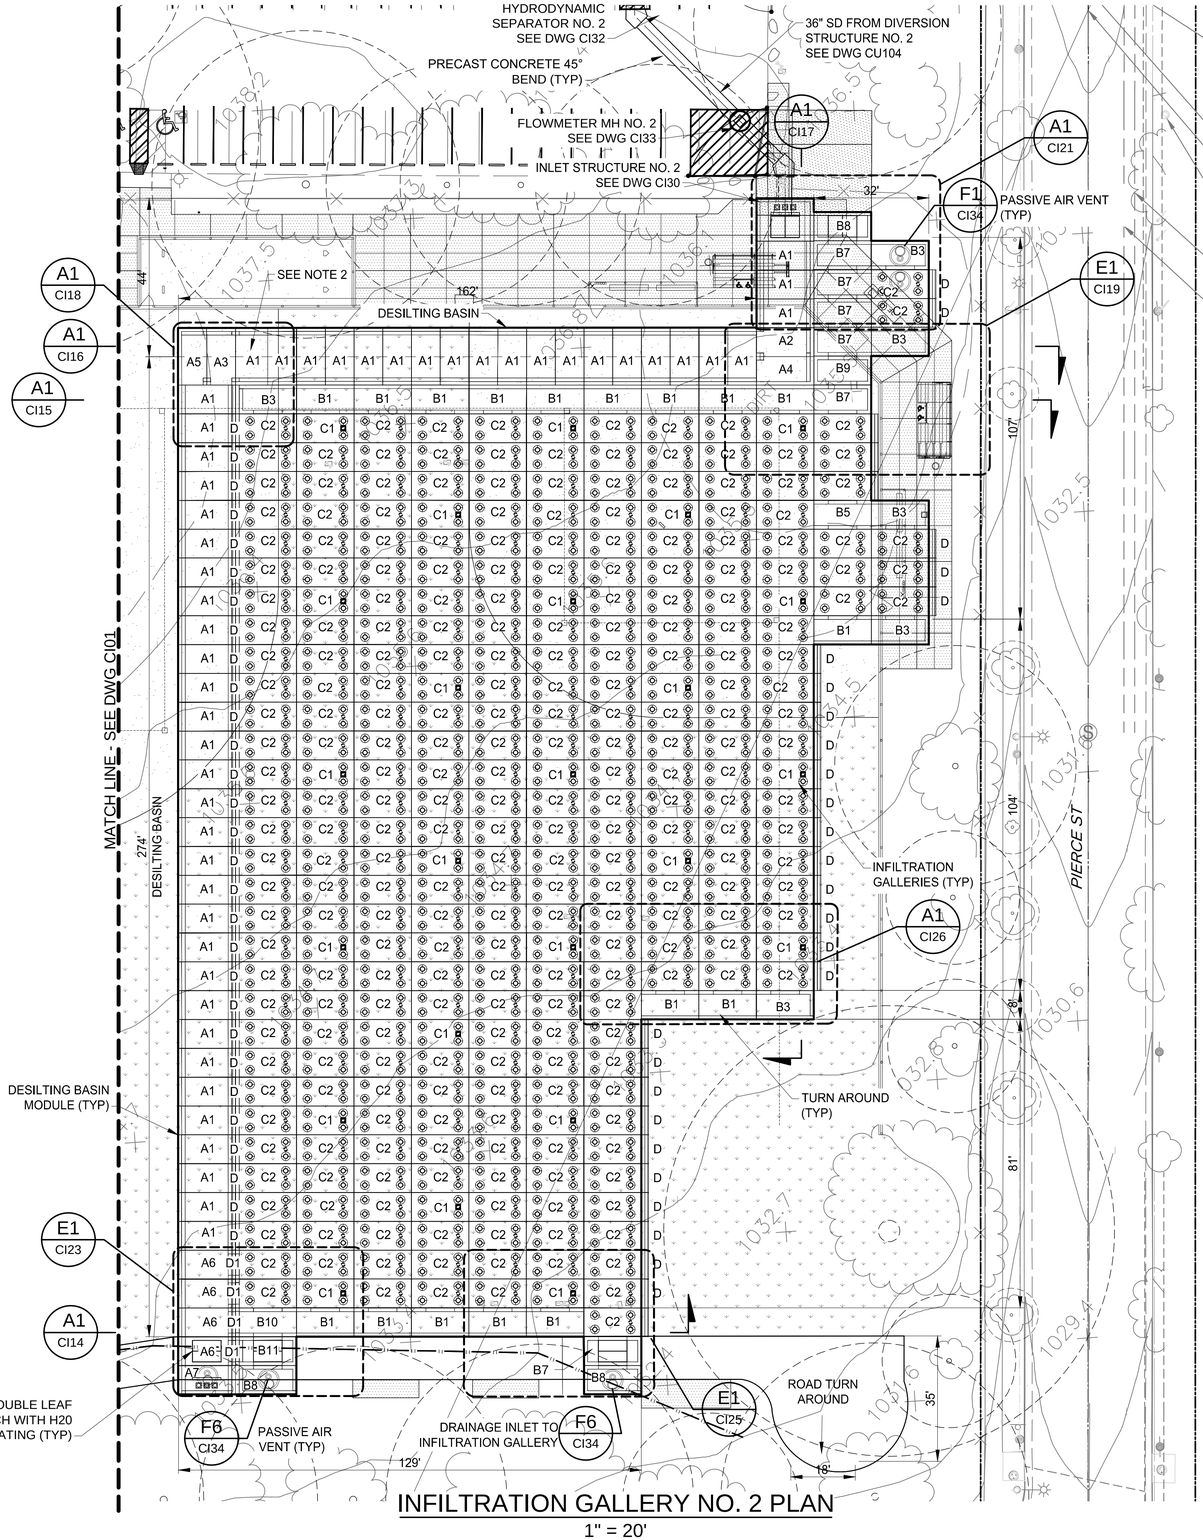
SHEET 45 OF 129 SHEETS



INFILTRATION GALLERY NO. 2 PLAN

1" = 20'

20' 0 20' 40'

1" = 20'

NOTES:

1. OVERALL DIMENSIONS ARE APPROXIMATE. FINAL DIMENSIONS SHALL BE DETERMINED BASED ON SUPPLIER SHOP DRAWING SUBMITTALS.
2. THIS A1 UNIT IS A SPECIALIZED UNIT WIDER THAN THE OTHER A1 UNITS.
3. INFILTRATION BASIN NO.2

   INFILTRATION DESIGN CRITERIA TO BE BE MET BY INFILTRATION GALLERY SUPPLIER:

   MINIMUM TOTAL VOLUME OF STORAGE WITH 1 FT OF FREEBOARD= 525,000 CF

   MINIMUM TOTAL VOLUME OF STORAGE WITH NO FREEBOARD= 564,000 CF

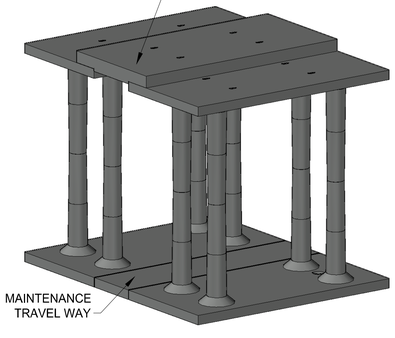
   MINIMUM AREA OF INFILTRATION BENEATH THE GALLERY NOT INCLUDING THE STONE BLANKET 2 FT BEYOND PERIMETER = 43,000 SF

   PEAK INFLUENT FLOW RATES THROUGH SLIDE GATE VAULT IS 29 CFS

   PROVIDE INTERIOR ACCESS TO INFILTRATION GALLERY THROUGH MECHANIZED/ELECTRIC VEHICLE (BY OTHERS) WITH A MINIMUM TRAVEL WIDTH OF 4 FEET THAT ALLOWS THE VEHICLE TO CONTINUALLY ACCESS ALL PRECAST UNITS WITH A MAXIMUM OF 32 FEET VEHICLE BACKUP DISTANCE TO EXIT A DEAD END LOCATION. SEE DETAIL BELOW FOR AN ALTERNATE INTERIOR TURN-AROUND ARRANGEMENT.

   PROVIDE ALL ACCESS HATCHES AND MANHOLE ACCESS IN SIZES AND LOCATIONS ON PLAN.

   ALL UNITS OF THE INFILTRATION GALLERY SHALL BE DESIGNED FOR HS-20 LOADING.
4. DESILTING BASIN NO.1 TO BE PROVIDED AS SHOWN ON THE DRAWINGS AND SHALL BE DESIGNED FOR HS-20 LOADING.



4'-0" MAINTENANCE TRAVEL WAY ISOMETRIC VIEW

CONSTRUCTION LEGEND

1. FURNISH AND INSTALL CONCRETE PAVING
   COLOR: NATURAL GRAY. FINISH: MEDIUM BROOM
   REFER TO DETAIL 301 & 302, SHEET LS03.
2. BASEBALL FIELD NO.1
   REFER TO BASEBALL FIELD ENLARGEMENT. SEE DETAIL 201, SHEET LS02.
3. BASEBALL FIELD NO.2
   REFER TO BASEBALL FIELD ENLARGEMENT. SEE DETAIL 201, SHEET LS02.
4. DUGOUT
   REFER TO RAP STANDARD PLAN. SEE DETAIL 702, SHEET LS07.
5. BULLPEN
   REFER TO RAP STANDARD PLAN. SEE DETAIL 701, SHEET LS07.
6. BATTING CAGE
   REFER TO RAP STANDARD PLAN. SEE DETAIL 601, SHEET LS06. INSTALL 120VAC ELECTRICAL SERVICE FOR EXTERIOR OUTLET.
7. FENCING AND GATES -
   REFER TO BASEBALL FIELD NO.1 AND NO.2 ENLARGEMENTS , SEE DETAIL 1 SHEET LS02 AND DETAIL 201 SHEET LS02.
8. BLEACHERS
   REFER TO BASEBALL FIELD ENLARGEMENTS. SEE DETAIL 201, SHEET LS02.
9. FURNISH AND INSTALL DRINKING FOUNTAIN
   REFER TO RAP STANDARD PLAN. SEE DETAIL 801, SHEET LS08.
10. ANNOUNCER'S AREA
    REFER TO BASEBALL FIELD ENLARGEMENTS DETAIL 201, SHEET LS02. INSTALL 120VAC ELECTRICAL SERVICE WITH EXTERIOR RECEPTACLE & LOCKING COVER. CONFIRM LOCATION PRIOR TO INSTALLATION.
11. SINGLE-LEAF VEHICULAR RINO GATE-25' WIDTH REFER TO RAP STANDARD PLAN. SEE DETAIL 901, SHEET LS09.
12. SINGLE-LEAF VEHICULAR RINO GATE-20' WIDTH REFER TO RAP STANDARD PLAN. SEE DETAIL 902, SHEET LS09.
13. TRASH RECEPTACLE
    KEYSTONE RIDGE RE3D-55 "READING" ROUND LITTER RECEPTACLE WITH LOCKABLE TABS, SIDE ACCESS DOOR, SURFACE MOUNT WITH FLAT LID-NO LINER. SURFACE MOUNT-INSTALL PER MANUFACTURER'S INSTRUCTIONS. COLOR: TBD
14. FITNESS EQUIPMENT WITH RUBBER MATS
    GAMETIME THRIVE 450 EXERCISE EQUIPMENT. AVAILABLE AT GREAT WESTERN RECREATION. 858-344-0445 nate@gwpark.com INSTALL PER MANUFACTURER'S RECOMMENDATIONS. REFER TO DETAILS 1001 & 1002, SHEET LS10.
15. FIELD LIGHTING
    REFER TO ELECTRICAL PLANS
16. EXISTING TREES
    TO REMAIN AND BE PROTECTED IN PLACE. REFER TO TREE PROTECTION REQUIREMENTS, SHEET LPO2. REFER TO TREE SURVEY PLAN, SHEET LP03 AND PLANTING PLANS, SHEET LPO1 FOR ADDITIONAL INFORMATION.
17. EXISTING PAVING
    TO REMAIN AND BE PROTECTED IN PLACE UNLESS OTHERWISE NOTED.
18. EDUCATIONAL SIGNS
    (2) TOTAL. REFER TO DETAIL 802, SHEET LS08. APPROXIMATE LOCATION SHOWN. LOCATION TO BE APPROVED BY ENGINEER PRIOR TO INSTALLATION.

EJ CONCRETE PAVING EXPANSION JOINTS
REFER TO DETAIL 301, SHEET LS03 FOR ADDITIONAL INFORMATION.

CONCRETE PAVING TOOLED SCORELINE
REFER TO DETAIL 301, SHEET LS03 FOR ADDITIONAL INFORMATION.

KEY NOTES:

1. CONTRACTOR TO SURVEY & STAKE ALL HARDSCAPE & BALLFIELD IMPROVEMENTS FROM DIGITAL CADD FILES PROVIDED BY ENGINEER. THE LAYOUT OF ALL HARDSCAPE AND BALLFIELD IMPROVEMENTS SHALL BE APPROVED BY ENGINEER PRIOR TO CONSTRUCTION. NOTIFY ENGINEER IF FIELD CONDITIONS DEVIATE FROM THOSE SHOWN ON THE PLANS.
2. REFER TO SHEETS LS02 THROUGH LS12 FOR CONSTRUCTION DETAILS.
3. BLEACHERS TO BE INSTALLED UNDER SEPARATE PERMIT BY CONTRACTOR. CONTRACTOR THOUGH BLEACHER MANUFACTURER SHALL SUPPLY ALL REQUIRED STRUCTURAL CALCULATIONS AND ANY OTHER DOCUMENTATION REQUIRED FOR PERMIT APPLICATION.
4. SEE TREE PROTECTION REQUIREMENTS FOR TRENCHING NEAR EXISTING TREES.

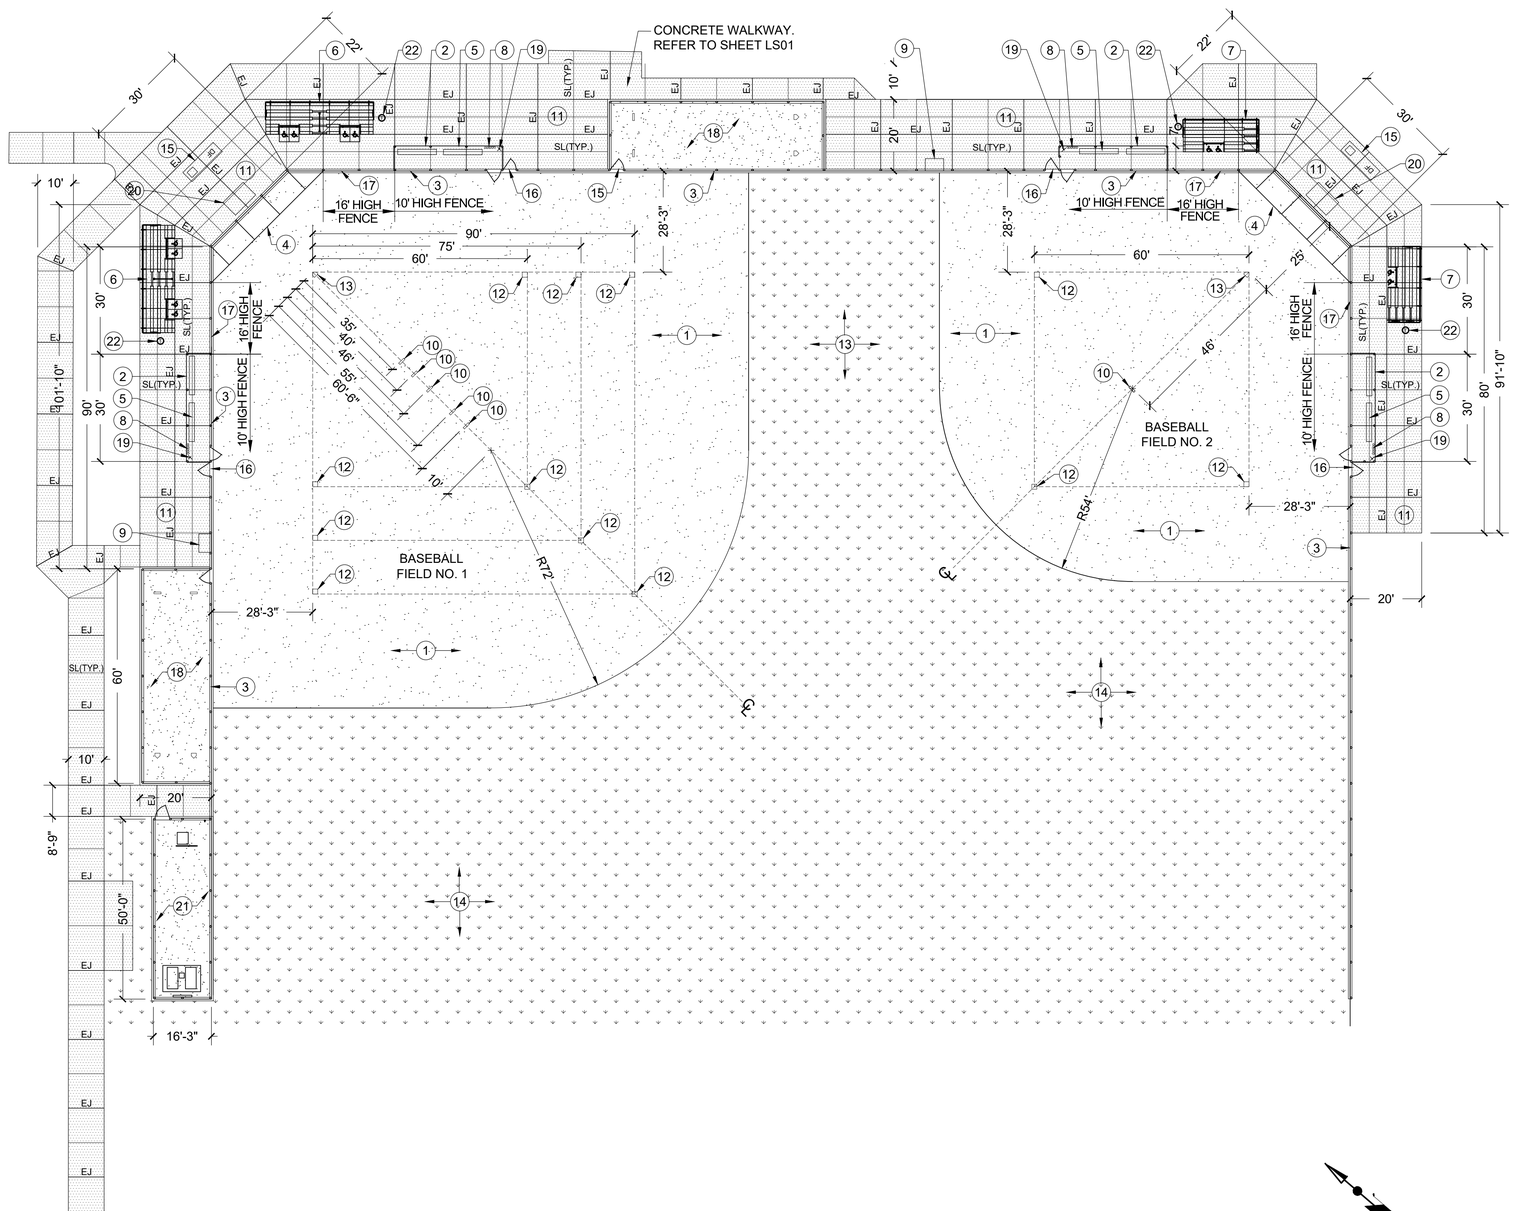
SHEET 68 OF 129 SHEETS



LEGEND:

1. INSTALL 4" - 6" LAYER OF "PRO-GOLD SOFTBALL MIX" PER PLANS AND SPECIFICATIONS, OR APPROVED EQUAL. SUPPLIED BY GAIL MATERIALS: 951-667-6106, WWW.GAILMATERIALS.NET.
2. INSTALL 8' HIGH CHAIN LINK FENCE DUGOUT WITH ALUMINUM ROOF PER DETAIL 702, SHEET LS07.
3. INSTALL 10' HIGH CHAIN LINK SIDE LINE FENCE WITH CONCRETE MOW STRIP PER DETAIL 501, SHEET LS05.
4. INSTALL BACKSTOP: MODEL LA1644T (4-1/2" POSTS, FRONT 23'6" HIGH X 44' WIDE; REAR 16' HIGH X 30' WIDE; SIDES 16' HIGH X 10' WIDE, 7'6" DEEP). FROM LA STEELCRAFT. CONTACT: 866-210-5316. INSTALL PER MANUFACTURER'S INSTRUCTIONS. REFER TO DETAIL 1101, SHEET LS11 FOR ADDITIONAL INFORMATION.
5. INSTALL (2) 12' PLAYERS BENCHES, PER DUGOUT. MODEL # PE-12, AVAILABLE FROM NATIONAL RECREATION SYSTEMS, CONTACT: NATE YOUNKER (858) 344-0445, INSTALL PER MANUFACTURER'S INSTRUCTIONS.
6. INSTALL 30', 5-TIER BLEACHERS (2) WITH WHEELCHAIR CUTOUTS, MODEL # NA-0530-ADA-VP, AVAILABLE FROM NATIONAL RECREATION SYSTEMS, CONTACT: NATE YOUNKER (858) 344-0445, INSTALL PER MANUFACTURER'S INSTRUCTIONS.
7. INSTALL 21', 5-TIER BLEACHERS (2) WITH WHEELCHAIR CUTOUTS, MODEL # NA-0521-ADA-VP, AVAILABLE FROM NATIONAL RECREATION SYSTEMS, CONTACT: NATE YOUNKER (858) 344-0445, INSTALL PER MANUFACTURER'S INSTRUCTIONS.
8. INSTALL (2) BAT RACKS, MODEL # BR-8, AVAILABLE FROM L.A. STEELCRAFT, AVAILABLE FROM NATIONAL RECREATION SYSTEMS, CONTACT: NATE YOUNKER (858) 344-0445, INSTALL PER MANUFACTURER'S INSTRUCTIONS.
9. INFIELD STORAGE BOX, PER DETAIL 504, SHEET LS05.
10. INSTALL BOLCO STEP-DOWN' PITCHERS RUBBER, YOUTH SIZE 4" X 18" SKU# 1236392, AVAILABLE FROM: BSNSPORTS.COM, (800) 856-3488. INSTALL PER MANUFACTURER'S INSTRUCTIONS. FURNISH (2) PITCHER'S RUBBERS, 1 PER FIELD. INSTALL AT DISTANCES SHOWN ON PLAN. FURNISH (1) PITCHER'S RUBBER PER FIELD. TOTAL (2) PITCHER'S RUBBERS.
11. INSTALL CONCRETE PAVING PER DETAIL 301 & 302, SHEET LS03.
12. INSTALL 'HOLLYWOOD IMPACT' BASE (SKU# 1236439) WITH GROUND ANCHORS (SKU# 1236507) AND BASE PLUGS (SKU# BBRPLUGS), AVAILABLE FROM: BSNSPORTS.COM, (800) 856-3488. INSTALL PER MANUFACTURER'S INSTRUCTIONS. FURNISH (2) SETS OF BASES, 1 SET FOR EACH FIELD. INSTALL AT DISTANCES SHOWN ON PLAN.
13. INSTALL 'HOLLYWOOD' HOME PLATE, SKU# 1236477,AVAILABLE FROM: BSNSPORTS.COM, (800) 856-3488. INSTALL PER MANUFACTURER'S INSTRUCTIONS. FURNISH (1) HOME PLATE PER FIELD. TOTAL (2) HOME PLATES. INSTALL AT LOCATION PER PLAN.
14. INSTALL OUTFIELD TURF PER PLANTING PLAN AND SPECIFICATIONS.
15. INSTALL MURDOCK HI-LO DRINKING FOUNTAIN PER DETAIL 801, SHEET LS08.
16. INSTALL 4' WIDE SINGLE CHAIN LINK GATES WHERE INDICATED. PER DETAIL 502, SHEET LS05.
17. INSTALL 16' HIGH CHAIN LINK SIDE LINE FENCE WITH CONCRETE MOW STRIP PER DETAIL 304, SHEET LS03.
18. INSTALL BULLPEN WITH 8' HIGH CHAIN LINK FENCE ON A 12" CONCRETE MOWSTRIP WITH A 4' PEDESTRIAN GATE, DECOMPOSED GRANITE PAVING, TWO HOME PLATES AND TWO PITCHERS RUBBERS FOR EACH BULLPEN PER DETAIL 701, SHEET LS07.
19. PROVIDE (2) SURFACE MOUNT HELMET RACKS. SKU# 1238464.AVAILABLE FROM: BSNSPORTS.COM, (800) 856-3488. INSTALL PER MANUFACTURER'S INSTRUCTIONS.
20. ANNOUNCERS AREA. PROVIDE 12VAC ELECTRICAL SERVICE WITH EXTERIOR RECEPTABLE AND LOCKING COVER.
21. INSTALL BATTING CAGE PER DETAIL 601, SHEET LSO6. INSTALL 120VAC ELECTRICAL SERVICE WTIH EXTERIOR RECEPTACLE AND LOCKING COVER.
22. FURNISH AND INSTALL KEYSTONE RIDGE RE3D-55 "READING" ROUND LITTER RECEPTACLE WITH LOCKABLE TABS, SIDE ACCESS DOOR, SURFACE MOUNT WITH FLAT LID-NO LINER. SURFACE MOUNT-INSTALL PER MANUFACTURER'S INSTRUCTIONS. COLOR: TBD

EJ — CONCRETE PAVING EXPANSION JOINT. REFER TO DETAIL 302, SHEET LS03.

CONCRETE PAVING TOOLED SCORELINE. REFER TO DETAIL 301, SHEET LS03.

NOTE:

N.T.S.

304	16' HIGH CHAIN LINK FENCE	
N.T.S.		RP DETAIL 5040

CONSTRUCTION DETAIL NOTES

1. THE FOLLOWING NOTES APPLY TO ALL DETAILS AS SHOWN IN THIS SET OF DOCUMENTS, UNLESS OTHERWISE NOTED.
2. FOR ADDITIONAL INFORMATION REFER TO CONSTRUCTION NOTES.
3. REFER TO CONSTRUCTION LEGEND FOR INFORMATION RELATIVE TO COLOR, TYPE AND FINISH.
4. UNLESS OTHERWISE NOTED, NEW FINISH SURFACE SHALL BE FLUSH WITH ADJACENT EXISTING SURFACES.
5. FINISH GRADE: 1" BELOW FINISH SURFACE ADJACENT TO TURF AND 2" BELOW ADJACENT TO NON-TURF AREAS.
6. FINAL LOCATION OF CONSTRUCTION ELEMENTS, DRAINAGE DEVICES, SITE AMENITIES, IRRIGATION EQUIPMENT, AND PLANT MATERIAL MAY REQUIRE ADJUSTMENT DUE TO FIELD CONDITIONS AND SHALL BE APPROVED PRIOR TO CONSTRUCTION.
7. CONTRACTOR SHALL VERIFY ALL MATCHING MATERIALS AND COLORS PRIOR TO INSTALLATION. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT OF ANY DISCREPANCIES PRIOR TO INSTALLATION.

FENCE CONSTRUCTION NOTES:

REFER TO THE SPECIFICATIONS SECTION FOR CHAIN LINK FENCING AND INSTALLATION OF CHAIN LINK FENCE FABRIC PER SSPWC 206-6, 304-3 FOR CHAIN LINK FENCE CONSTRUCTION.

ALL FENCING ADJACENT TO PAVING SHALL HAVE PAVING EXTEND BENEATH THE FENCE. ALL OTHER FENCING SHALL HAVE CONCRETE MOW STRIP.

MATERIALS:
1. BRACE BANDS & OFFSET TENSION BANDS: 1/8" X 1" HEAVY W/ 3/8" CARRIAGE BOLTS.
2. THREADED TRUSS RODS: 3/8" DIAMETER ASTM A36 STEEL, 6" LONG THREAD BOTH ENDS. DOUBLE NUT EACH END. NO SPLICES ALLOWED.
3. TRUSS TIGHTENER: 5 3/4" X 1" X 5/16" INDUSTRIAL, 0.59 LB./EACH. (BOTH ENDS OF TRUSS ROD)
4. LINE PANEL RAIL END: 1 7/8" OD 1-HOLE OFFSET, PRESSED STEEL, 0.39 LB./EACH.
5. SHEAR PANEL RAIL END: 1 7/8" OD 2-HOLE PRESSED STEEL, 0.59 LB./EACH.
6. CAPS: CAST IRON, 4 1/2" OD = 2.25 LB.
7. POST & RAIL FABRIC TIES, HOG RINGS: 9 GA. STEEL.
8. TENSION BARS: 1/4" X 3/4" 132" CONTINUOUS.
9. CHAIN LINK FABRIC: SEE ELEVATION.
10. POST AND RAILS: ASTM A120, SCH. 40 CLASS 1 OR ASTM F1083
11. ALL 20' FENCE MATERIALS, FABRIC, POSTS ETC. SHALL BE GALVANIZED FINISH, TYP.

CONCRETE:
1. FOOTING CONCRETE DESIGN FC'=2000 PSI: FOR DURABILITY THE CONTRACTOR SHALL PROVIDE 520-C-2500, 4" SLUMP CONCRETE. PORTLAND CEMENT SHALL BE TYPE II PER SSPWC 201-1.2; COMBINED AGGREGATE GRADING SHALL CONFORM WITH SSPW 201-1.3.2.
2. PRIOR TO PROCEEDING WITH INSTALLATION OF FENCE FRAME AND FABRIC, THE CONTRACTOR SHALL ALLOW 7 DAYS FOR THE FOOTING CONCRETE TO CURE.
3. SUBMITTAL - EACH TRUCKLOAD SHALL BE ACCOMPANIED BY A DELIVERY RECEIPT SHOWING SUPPLIER, LOAD WEIGHT, AND MIX COMPOSITION BY WEIGHT. PRIOR TO PLACING CONCRETE, THE CONTRACTOR SHALL PROVIDE THE PROJECT INSPECTOR WITH A COPY OF THE DELIVERY RECEIPT.

DESIGN SOIL STRENGTH VALUES:
LATERAL BEARING: 100 PSF/FT TO 1500 PSF MAX. FOR DESIGN OF ISOLATED POLES, THE ALLOWABLE LATERAL BEARING HAS BEEN INCREASED BY 100 PERCENT.

CHAIN LINK FABRIC FIELD INSTALLATION:
1. FABRIC SHALL BE CONTINUOUS IN THE LONGITUDINAL DIRECTION BY WEAVING CLOSURE TIES, OF THE SAME MATERIAL AS THE FENCE FABRIC, THROUGH BOTH VERTICAL ENDS.
2. FABRIC SHALL BE FASTENED TO THE RAILS AND LINE POSTS WITH TIE WIRES AT 1'-6" ON CENTER.
3. THE HORIZONTAL SEAM (BETWEEN THE TOP & BOTTOM PANEL) SHALL HAVE A 2" LAP AND SHALL BE FASTENED TOGETHER WITH HOG RINGS 1'-6" OC SPACED EVENLY BETWEEN RAIL TIES.
4. FABRIC SHALL BE STRETCHED TIGHTLY AND KNUCKELED TOP AND BOTTOM.
5. FABRIC SHALL BE PLACED 1" ABOVE THE FINISHED SURFACE.

FENCE FRAME FIELD INSTALLATION
1. " POSTS AND RAILS SHALL BE FABRICATED FROM CONTINUOUS PIPE, EXCEPT FOR POST FIELD SPLICE AS SHOWN ON THE PLAN.
2. " FITTINGS SHALL BE FABRICATED FROM A36 STEEL EXCEPT AS OTHERWISE INDICATED HEREIN. ALL POSTS SHALL BE INSTALLED IN A VERTICAL POSITION,
3. " THE BOTTOM RAIL SHALL BE INSTALLED ON A STRAIGHT GRADE BETWEEN POSTS BY EXCAVATING THE HIGH POINTS OF GROUND TO PROVIDE A UNIFORM 2" CLEARANCE .

CONTRACTOR SHALL SUBMIT AND OBTAIN BUILDING PERMIT FOR ALL FENCING OVER 10' HIGH. CONTRACTOR SHALL PROVIDE ALL REQUIRED ENGINEERING AND CALCULATIONS FOR FOOTINGS.

FENCE CONSTRUCTION NOTES:

REFER TO THE SPECIFICATIONS SECTION FOR CHAIN LINK FENCING AND INSTALLATION OF CHAIN LINK FENCE FABRIC PER SSPWC 206-6, 304-3 FOR CHAIN LINK FENCE CONSTRUCTION.

ALL FENCING ADJACENT TO PAVING SHALL HAVE PAVING EXTEND BENEATH THE FENCE. ALL OTHER FENCING SHALL HAVE CONCRETE MOW STRIP.

MATERIALS:
1. BRACE BANDS & OFFSET TENSION BANDS: 1/8" X 1" HEAVY W/ 3/8" CARRIAGE BOLTS.
2. THREADED TRUSS RODS: 3/8" DIAMETER ASTM A36 STEEL, 6" LONG THREAD BOTH ENDS. DOUBLE NUT EACH END. NO SPLICES ALLOWED.
3. TRUSS TIGHTENER: 5 3/4" X 1" X 5/16" INDUSTRIAL, 0.59 LB./EACH. (BOTH ENDS OF TRUSS ROD)
4. LINE PANEL RAIL END: 1 7/8" OD 1-HOLE OFFSET, PRESSED STEEL, 0.39 LB./EACH.
5. SHEAR PANEL RAIL END: 1 7/8" OD 2-HOLE PRESSED STEEL, 0.59 LB./EACH.
6. CAPS: CAST IRON, 4 1/2" OD = 2.25 LB.
7. POST & RAIL FABRIC TIES, HOG RINGS: 9 GA. STEEL.
8. TENSION BARS: 1/4" X 3/4" 132" CONTINUOUS.
9. CHAIN LINK FABRIC: SEE ELEVATION.
10. POST AND RAILS: ASTM A120, SCH. 40 CLASS 1 OR ASTM F1083
11. ALL 20' FENCE MATERIALS, FABRICS, POSTS ETC. SHALL BE GALVANIZED FINISH, TYP.

CONCRETE:
1. FOOTING CONCRETE DESIGN FC'=2000 PSI: FOR DURABILITY THE CONTRACTOR SHALL PROVIDE 520-C-2500, 4" SLUMP CONCRETE. PORTLAND CEMENT SHALL BE TYPE II PER SSPWC 201-1.2; COMBINED AGGREGATE GRADING SHALL CONFORM WITH SSPW 201-1.3.2.
2. PRIOR TO PROCEEDING WITH INSTALLATION OF FENCE FRAME AND FABRIC, THE CONTRACTOR SHALL ALLOW 7 DAYS FOR THE FOOTING CONCRETE TO CURE.
3. SUBMITTAL - EACH TRUCKLOAD SHALL BE ACCOMPANIED BY A DELIVERY RECEIPT SHOWING SUPPLIER, LOAD WEIGHT, AND MIX COMPOSITION BY WEIGHT. PRIOR TO PLACING CONCRETE, THE CONTRACTOR SHALL PROVIDE THE PROJECT INSPECTOR WITH A COPY OF THE DELIVERY RECEIPT.

DESIGN SOIL STRENGTH VALUES:
LATERAL BEARING: 100 PSF/FT TO 1500 PSF MAX. FOR DESIGN OF ISOLATED POLES, THE ALLOWABLE LATERAL BEARING HAS BEEN INCREASED BY 100 PERCENT.

CHAIN LINK FABRIC FIELD INSTALLATION:
1. FABRIC SHALL BE CONTINUOUS IN THE LONGITUDINAL DIRECTION BY WEAVING CLOSURE TIES, OF THE SAME MATERIAL AS THE FENCE FABRIC, THROUGH BOTH VERTICAL ENDS.
2. FABRIC SHALL BE FASTENED TO THE RAILS AND LINE POSTS WITH TIE WIRES AT 1'-6" ON CENTER.
3. THE HORIZONTAL SEAM (BETWEEN THE TOP & BOTTOM PANEL) SHALL HAVE A 2" LAP AND SHALL BE FASTENED TOGETHER WITH HOG RINGS 1'-6" OC SPACED EVENLY BETWEEN RAIL TIES.
4. FABRIC SHALL BE STRETCHED TIGHTLY AND KNUCKLED TOP AND BOTTOM.
5. FABRIC SHALL BE PLACED 1" ABOVE THE FINISHED SURFACE.

FENCE FRAME FIELD INSTALLATION
1. * POSTS AND RAILS SHALL BE FABRICATED FROM CONTINUOUS PIPE, EXCEPT FOR POST FIELD SPLICE AS SHOWN ON THE PLAN.
2. * FITTINGS SHALL BE FABRICATED FROM A36 STEEL EXCEPT AS OTHERWISE INDICATED HEREIN. ALL POSTS SHALL BE INSTALLED IN A VERTICAL POSITION.
3. * THE BOTTOM RAIL SHALL BE INSTALLED ON A STRAIGHT GRADE BETWEEN POSTS BY EXCAVATING THE HIGH POINTS OF GROUND TO PROVIDE A UNIFORM 2" CLEARANCE .

CONTRACTOR SHALL SUBMIT AND OBTAIN BUILDING PERMIT FOR ALL FENCING OVER 10' HIGH. CONTRACTOR SHALL PROVIDE ALL REQUIRED ENGINEERING AND CALCULATIONS FOR FOOTINGS.

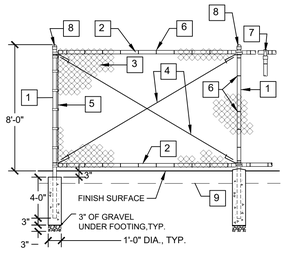
SHEET 71 OF 129 SHEETS

OPTIONS (OPTIONS CHECKED SHALL PREVAIL)

☐ VINYL COATED CHAIN LINK FABRIC SHALL BE PER SPECIFICATIONS. ALL FENCE MATERIALS SHALL BE AS INDICATED HEREON AND PAINTED PER SPECIFICATIONS TO MATCH THE FABRIC COLOR. THE COLOR SHALL BE: BLACK.

☒ ALL FENCING SHALL HAVE A GALVANIZED FINISH.



ELEVATION

FENCING MATERIALS

1. POSTS: END, CORNER AND SLOPE POSTS 2-7/8 IN. O.D., LINE POSTS 2-3/8 IN. O.D. POST SPACING TO BE 10'-0" MAX.
2. RAILS: TOP AND BOTTOM RAILS 1-5/8 IN. O.D.
3. FABRIC: 9 GAUGE, 2 IN. MESH, KNUCKLE TOP AND BOTTOM, PLACE ON PATH OR EXTERIOR SIDE OF POSTS.
4. TRUSS ROD: 3/8 IN. DIAM. THREADED AT BOTH ENDS AND TENSIONED WITH TWO INDUSTRIAL TRUSS TIGHTENERS SECURED TO RAIL ENDS. TRUSS PANEL SHALL BE LOCATED AT END AND CORNER PANELS OF 30' OR GREATER TURN AND AT INTERVALS NOT TO EXCEED 100' . HOG RING FABRIC TO RODS AT MAX. 3'-0" O.C.
5. STRETCHER BAR: 3/16" X ¾" WITH ⅛" X 1" TENSION BANDS AT 1'-0" O.C.
6. TIE WIRES: 11 GAUGE AT 1'-6" O.C. AT TOP, BOTTOM AND LINE POSTS.
7. LINE POST EYE TOPS & RAIL ENDS SHALL BE MALLEABLE IRON OR PRESSED STEEL. SECURE RAIL ENDS TO POSTS WITH ⅛" X 1" BRACE BANDS.
8. POST CAPS SHALL BE MALLEABLE IRON OR PRESSED STEEL.
9. REQUIRED MOW-STRIP IN TURF AREAS.

NOTES:
1. SEE SPECIFICATIONS SECTION FOR CHAIN LINK FENCE CONSTRUCTION FOR ADDITONAL INFORMATION.
2. CONCRETE FOOTINGS SHALL BE ALLOWED TO SET FOR SEVEN (7) DAYS PRIOR TO INSTALLATION OF FABRIC OR HARDWARE.
3. THE BOTTOM OF THE FABRIC SHALL BE POSITIONED ONE INCH ABOVE FINISH GRADE.
4. IN PAVED AREAS TOP OF CONC. FTG. TO BE 3" BELOW FINISH SURFACE TO ALLOW FOR PAVING ABOVE.
5. IN LANDSCAPED AREAS, TOP OF FOOTING SHALL BE 1" ABOVE FINISH GRADE WITH A 1" CROWN ON TOP OF FTG.
6. INSIDE OR ADJACENT TO TURF AREAS, ALL FENCES SHALL HAVE A 12" WIDE X 6" DEEP CONCRETE MOW-STRIP WITH #4 REBAR CENTERED, TYP. MOW STRIP SHALL BE CENTERED ON FENCE.
7. CONC. FTG. TO BE 2500 PSI @ 28 DAYS. PROVIDE 3" OF GRAVEL UNDER CONC. FTG., TYP.

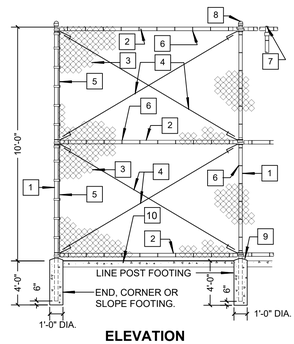
503 | EIGHT FOOT CHAINLINK FENCE

N.T.S. | RP DETAIL 5030

OPTIONS (OPTIONS CHECKED SHALL PREVAIL)

☐ VINYL COATED CHAIN LINK FABRIC SHALL BE AS SPEC'S. ALL FENCE MATERIALS SHALL BE AS INDICATED HEREON AND PAINTED PER SPEC'S TO MATCH FABRIC COLOR. COLOR SHALL BE BLACK.

☒ ALL FENCING SHALL HAVE A STANDARD GALV. FINISH.



ELEVATION

FENCING MATERIALS

1. POSTS: END, CORNER AND SLOPE POSTS 2-7/8". O.D., LINE POSTS 2-3/8" O.D. POST SPACING TO BE 10'-0" MAX.
2. RAILS: TOP ,MID AND BOTTOM RAILS 1-5/8" O.D.
3. FABRIC: 9 GAUGE, 2" MESH, KNUCKLE TOP AND BOTTOM, PLACE ON ACTIVITY OR LAWN SIDE OF POSTS.
4. TRUSS ROD: 3/8 IN. DIAM. THREADED AT BOTH ENDS AND TENSIONED WITH TWO INDUSTRIAL TRUSS TIGHTENERS SECURED TO RAIL ENDS. TRUSS PANEL SHALL BE LOCATED AT END AND CORNER PANELS OF 30" OR GREATER TURN AND AT INTERVALS NOT TO EXCEED 100'. HOG RING FABRIC TO RODS AT MAX. 3'-0" O.C.
5. STRETCHER BAR: 3/16" X 3/4" WITH 1/8" X 1" TENSION BANDS AT 1'-0" O.C.
6. TIE WIRES: 11 GAUGE AT 1'-6" O.C. AT TOP, MID, BOTTOM RAILS AND LINE POSTS.
7. LINE POST EYE TOPS & RAIL ENDS SHALL BE MALLEABLE IRON OR PRESSED STEEL.SECURE RAIL ENDS TO POSTS WITH 1/8" X 1" BRACE BANDS.
8. POST CAPS SHALL BE MALLEABLE IRON OR PRESSED STEEL.
9. PROVIDE A 1" CROWN AT TOP OF ALL POST FOOTINGS. (MODIFY FOR MOW STRIP OPTION).
10. INSTALL 12" WIDE X 6" DEEP CONCRETE MOW STRIP WITH #4 REBAR CONT. IF REQUIRED. SEE NOTES.

NOTES:
1. SEE SPECIFICATIONS SECTION FOR CHAIN LINK FENCE CONSTRUCTION FOR ADDITONAL INFORMATION.
2. CONCRETE FOOTINGS SHALL BE ALLOWED TO SET FOR SEVEN (7) DAYS PRIOR TO INSTALLATION OF FABRIC OR HARDWARE.
3. THE BOTTOM OF THE FABRIC SHALL BE POSITIONED ONE INCH ABOVE FINISH GRADE.
4. IN PAVED AREAS TOP OF CONC. FTG. TO BE 3" BELOW FINISH SURFACE TO ALLOW FOR PAVING ABOVE.
5. IN LANDSCAPED AREAS, TOP OF FOOTING SHALL BE 1" ABOVE FINISH GRADE WITH A 1" CROWN ON TOP OF FTG.
6. INSIDE OR ADJACENT TO TURF AREAS, ALL FENCES SHALL HAVE A 12" WIDE X 6" DEEP CONCRETE MOW-STRIP WITH #4 REBAR CENTERED, TYP. MOW STRIP SHALL BE CENTERED ON FENCE.
7. CONC. FTG. TO BE 2500 PSI @ 28 DAYS. PROVIDE 3" OF GRAVEL UNDER CONC. FTG., TYP.

501 | 10' TALL CHAIN LINK FENCE

N.T.S. | RP DETAIL 5040

FENCE CONSTRUCTION NOTES:

REFER TO THE SPECIFICATIONS SECTION FOR CHAIN LINK FENCING AND INSTALLATION OF CHAIN LINK FENCE FABRIC PER SSPWC 206-6, 304-3 FOR CHAIN LINK FENCE CONSTRUCTION.

ALL FENCING ADJACENT TO PAVING SHALL HAVE PAVING EXTEND BENEATH THE FENCE. ALL OTHER FENCING SHALL HAVE CONCRETE MOW STRIP.

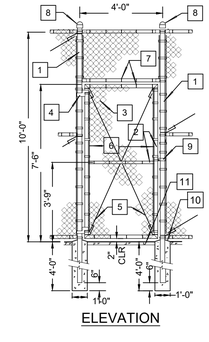
OPTIONS (OPTIONS CHECKED SHALL PREVAIL)

☐ VINYL COATED CHAIN LINK FABRIC SHALL BE AS SPECIFIED IN THE SPECIFICATIONS. ALL FENCE MATERIALS SHALL BE AS INDICATED HEREON AND PAINTED PER SPECIFICATIONS TO MATCH FABRIC COLOR. THE COLOR SHALL BE BLACK.

☒ ALL FENCING SHALL HAVE A STANDARD GALVANIZED FINISH.

☐ INSTALL CONCRETE MOW STRIP UNDER FENCE.



ELEVATION

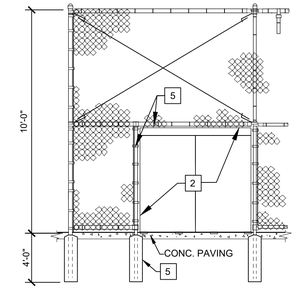
GATE MATERIALS

1. POSTS: 3-1/2 IN. O.D. WITH 1 FT. DIA. x 4'-0" DEEP FTGS.
2. GATE FRAMES: TOP, BOTTOM AND SIDE MEMBERS 2-3/8 IN. O.D., MID RAIL 1 5/8" O.D. MITER GATEFRAMECORNERS WELD AND GRIND SMOOTH.
3. FABRIC: 9 GAUGE, 2 IN. MESH, KNUCKLE TOP AND BOTTOM, PLACE ON ACTIVITY ON LAWN SIDE OF GATES.
4. HINGES: INDUSTRIAL BULLDOG HINGE (180 SWING), 2 HINGES PER GATE, ONE AT TOP AND BOTTOM.
5. TRUSS ROD: 3/8 IN. DIAM. THREADED AT BOTH ENDS AND TENSIONED WITH TWO INDUSTRIAL TRUSS TIGHTENERS SECURED TO GATE FRAME.
6. STRETCHER BAR: 3/16 X 3/4 IN. WITH 1/8 x 1 IN. TENSION BANDS AT 1'-0" O.C.
7. TIE WIRES: 11 GAUGE AT 1'-6" O.C. AT GATE FRAME TOP, BOTTOM AND MID RAILS.
8. POST CAPS: MALLEABLE IRON OR PRESSED STEEL.
9. CAST ALUMINUM FORK LATCH.
10. PROVIDE A 1 IN. CROWN AT TOP OF ALL POST FOOTINGS. (OMIT FOR MOW STRIP OPTION).
11. INSTALL CONCRETE MOW STRIP TO MATCH ADJACENT FENCING IF CHECKED UNDER OPTIONS ABOVE.

NOTES:
1. CHAIN LINK FENCE MATERIALS SHALL CONFORM TO THE CHAIN LINK FENCE SPECITICATIONS.
2. CONCRETE FOOTINGS SHALL BE ALLOWED TO SET FOR SEVEN DAYS PRIOR TO INSTALLATION OF GATES.

502 | 10' HIGH CHAIN LINK FENCE PEDESTRIAN GATE

N.T.S. | RP DETAIL 5210



ELEVATION

NOTES:
1. FOR FENCE MATERIALS AND METHODS OF CONSTRUCTION, SEE DETAIL E9/L402.
2. INSTALL INFIELD STORAGE BOX. CAPITOL ENTERPRISES (626-357-3768) "BALL BOX" MODEL # IS 7256 OR APPROVED EQUAL. COLOR: GREEN. INCLUDE ESCAPE LATCH LOCKING DEVICE.
3. STORAGE BOX SHALL BE INSTALLED PER THE MANUFACTURER'S RECOMMENDATION. THE FRONT OF THE BOX SHALL OPEN TOWARDS THE INFIELD AND SHALL BE FLUSH WITH THE FENCE.
4. LOCATE STORAGE BOX ADJACENT TO THE LINE POST. ALL FENCE FABRIC SHALL BE INSTALLED AS TIGHTLY TO THE BOX AS POSSIBLE.
5. INSTALL ADDITIONAL POST, FOOTING, STRETCHER BAR, TENSION BANDS, AND TIE WIRES.
6. INSTALL A 5" THICK CONCRETE PAD, 7' LONG X 5' WIDE, IF STORAGE BOX IS TO BE PLACED IN TURF AREA. SLOPE CONCRETE PAD TOWARD INFIELD @ 2%.

1. INSTALL 4" - 6" LAYER OF "PRO-GOLD SOFTBALL MIX" PER PLANS AND SPECIFICATIONS, OR APPROVED EQUAL. SUPPLIED BY GAIL MATERIALS: 951-667-6106, WWW.GAILMATERIALS.NET.
2. INSTALL 10' HIGH CHAIN LINK SIDE LINE FENCE WITH CONCRETE MOW STRIP PER DETAIL 501, SHEET LS05.
3. INSTALL BOLCO STEP-DOWN' PITCHERS RUBBER, YOUTH SIZE 4" X 18" SKU# 1236392, AVAILABLE FROM: BSNSPORTS.COM, (800) 856-3488. INSTALL PER MANUFACTURER'S INSTRUCTIONS.
4. INSTALL 'HOLLYWOOD' HOME PLATE, SKU# 1236477,AVAILABLE FROM: BSNSPORTS.COM, (800) 856-3488. INSTALL PER MANUFACTURER'S INSTRUCTIONS. INSTALL (1) PER EACH BULLPEN AT EACH FIELD.
5. INSTALL 4' WIDE SINGLE CHAIN LINK GATES WHERE INDICATED. PER DETAIL 502, SHEET LS05.
6. INSTALL 8' HIGH CHAIN LINK FENCE WITH CONCRETE MOW STRIP PER DETAIL 303, SHEET LS03.

FENCE CONSTRUCTION NOTES:

REFER TO THE SPECIFICATIONS SECTION FOR CHAIN LINK FENCING AND INSTALLATION OF CHAIN LINK FENCE FABRIC PER SSPWC 206-6, 304-3 FOR CHAIN LINK FENCE CONSTRUCTION.

ALL FENCING ADJACENT TO PAVING SHALL HAVE PAVING EXTEND BENEATH THE FENCE. ALL OTHER FENCING SHALL HAVE CONCRETE MOW STRIP.

MATERIALS:
1. BRACE BANDS & OFFSET TENSION BANDS: 1/8" X 1" HEAVY W/ 3/8" CARRIAGE BOLTS.
2. THREADED TRUSS RODS: 3/8" DIAMETER ASTM A36 STEEL, 6" LONG THREAD BOTH ENDS. DOUBLE NUT EACH END. NO SPLICES ALLOWED.
3. TRUSS TIGHTENER: 5 3/4" X 1" X 5/16" INDUSTRIAL, 0.59 LB./EACH. (BOTH ENDS OF TRUSS ROD)
4. LINE PANEL RAIL END: 1 7/8" OD 1-HOLE OFFSET, PRESSED STEEL, 0.39 LB./EACH.
5. SHEAR PANEL RAIL END: 1 7/8" OD 2-HOLE PRESSED STEEL, 0.59 LB./EACH.
6. CAPS: CAST IRON, 4 1/2" OD = 2.25 LB.
7. POST & RAIL FABRIC TIES, HOG RINGS: 9 GA. STEEL.
8. TENSION BARS: 1/4" X 3/4" 132" CONTINUOUS.
9. CHAIN LINK FABRIC: SEE ELEVATION.
10. POST AND RAILS: ASTM A120, SCH. 40 CLASS 1 OR ASTM F1083
11. ALL 20' FENCE MATERIALS, FABRIC, POSTS ETC. SHALL BE GALVANIZED FINISH, TYP.

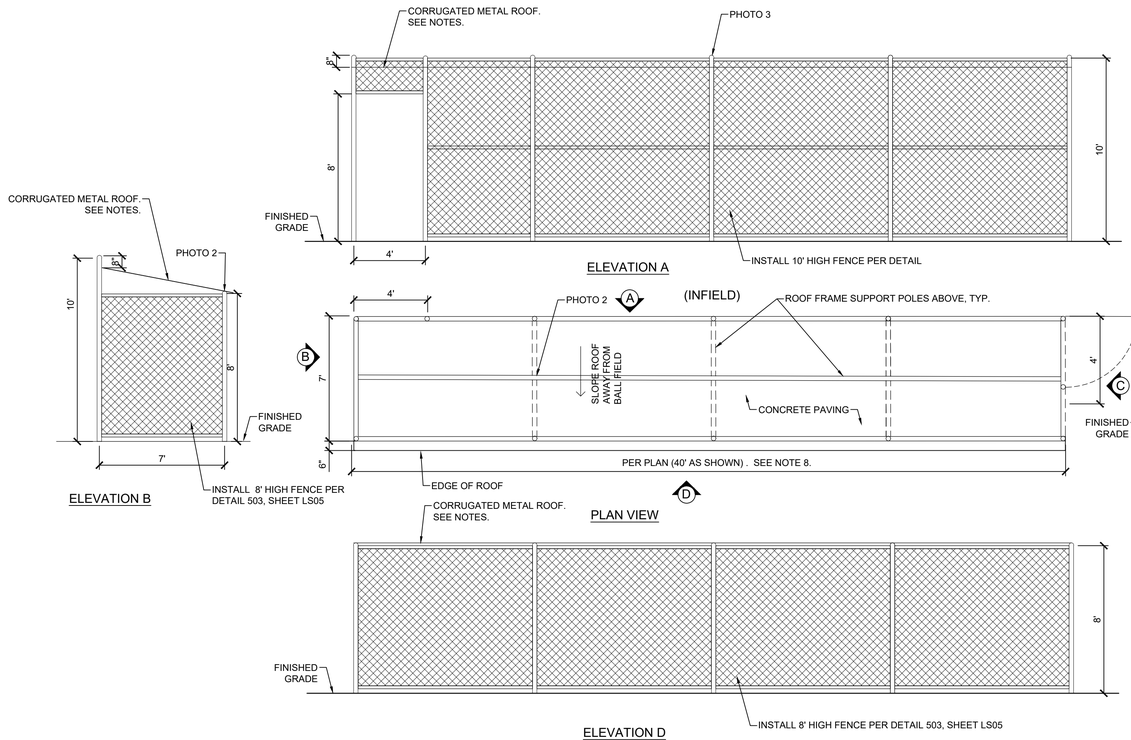
CONCRETE:
1. FOOTING CONCRETE DESIGN FC'=2000 PSI: FOR DURABILITY THE CONTRACTOR SHALL PROVIDE 520-C-2500, 4" SLUMP CONCRETE. PORTLAND CEMENT SHALL BE TYPE II PER SSPWC 201-1.2; COMBINED AGGREGATE GRADING SHALL CONFORM WITH SSPW 201-1.3.2.
2. PRIOR TO PROCEEDING WITH INSTALLATION OF FENCE FRAME AND FABRIC, THE CONTRACTOR SHALL ALLOW 7 DAYS FOR THE FOOTING CONCRETE TO CURE.
3. SUBMITTAL - EACH TRUCKLOAD SHALL BE ACCOMPANIED BY A DELIVERY RECEIPT SHOWING SUPPLIER, LOAD WEIGHT, AND MIX COMPOSITION BY WEIGHT. PRIOR TO PLACING CONCRETE, THE CONTRACTOR SHALL PROVIDE THE PROJECT INSPECTOR WITH A COPY OF THE DELIVERY RECEIPT.

DESIGN SOIL STRENGTH VALUES:
LATERAL BEARING: 100 PSF/FT TO 1500 PSF MAX. FOR DESIGN OF ISOLATED POLES, THE ALLOWABLE LATERAL BEARING HAS BEEN INCREASED BY 100 PERCENT.

CHAIN LINK FABRIC FIELD INSTALLATION:
1. FABRIC SHALL BE CONTINUOUS IN THE LONGITUDINAL DIRECTION BY WEAVING CLOSURE TIES, OF THE SAME MATERIAL AS THE FENCE FABRIC, THROUGH BOTH VERTICAL ENDS.
2. FABRIC SHALL BE FASTENED TO THE RAILS AND LINE POSTS WITH TIE WIRES AT 1'-6" ON CENTER.
3. THE HORIZONTAL SEAM (BETWEEN THE TOP & BOTTOM PANEL) SHALL HAVE A 2" LAP AND SHALL BE FASTENED TOGETHER WITH HOG RINGS 1'-6" OC SPACED EVENLY BETWEEN RAIL TIES.
4. FABRIC SHALL BE STRETCHED TIGHTLY AND KNUCKELED TOP AND BOTTOM.
5. FABRIC SHALL BE PLACED 1" ABOVE THE FINISHED SURFACE.

FENCE FRAME FIELD INSTALLATION
1. * POSTS AND RAILS SHALL BE FABRICATED FROM CONTINUOUS PIPE, EXCEPT FOR POST FIELD SPLICE AS SHOWN ON THE PLAN.
2. * FITTINGS SHALL BE FABRICATED FROM A36 STEEL EXCEPT AS OTHERWISE INDICATED HEREIN. ALL POSTS SHALL BE INSTALLED IN A VERTICAL POSITION.
3. * THE BOTTOM RAIL SHALL BE INSTALLED ON A STRAIGHT GRADE BETWEEN POSTS BY EXCAVATING THE HIGH POINTS OF GROUND TO PROVIDE A UNIFORM 2" CLEARANCE .

CONTRACTOR SHALL SUBMIT AND OBTAIN BUILDING PERMIT FOR ALL FENCING OVER 10' HIGH. CONTRACTOR SHALL PROVIDE ALL REQUIRED ENGINEERING AND CALCULATIONS FOR FOOTINGS.



NOTES:

1. DUGOUT ROOF COVER IS TO BE 2 ½" X ½", 20 GAUGE, CORRUGATED METAL (ALUMINUM), (CLASS A ROOF) ATTACHED TO ROOF SUPPORT POLES WITH ⅜" X 1 ½" TEC SCREWS AND RUBBER WASHER AT 24" O.C.
2. CORRUGATED METAL SHEETS SHALL HAVE 6" MINIMUM OVERLAPS WHEN STACK JOINING 2 PIECES.
3. DUGOUT ROOF FRAME POST SIZE TO BE SAME SIZE AS TOP AND BOTTOM RAILS OF 8' CHAIN LINK FENCE DETAIL 503, SHEET LS05.
4. DUGOUT ROOF FRAME POSTS TO BE WELDED TOGETHER. SEE PHOTO 1.
5. WELD DUGOUT ROOF FRAME TO SIDE OF 10' HIGH FENCE POSTS, 8" BELOW TOP OF POST AND ON TOP OF 8' HIGH DUGOUT FENCE POST CAPS. SEE PHOTO 2 & PHOTO 3.
6. SLOPE DUGOUT ROOF TO DRAIN WATER AWAY FROM BALL FIELD.
7. SEE LANDSCAPE CONSTRUCTION NOTES (CHAIN LINK FENCING) FOR ADDITIONAL REQUIREMENTS.
8. FOR 30' DUGOUTS (AS NOTED PER PLAN), OMIT ONE MIDDLE 10' SECTIONS OF FENCING AND ROOFING.
9. DUGOUT FLOOR SHALL BE CONCRETE PAVING PER DETAIL 301, SHEET LS03. COLOR AND FINISH TO MATCH THROUGHOUT.

REFER TO SHEET LS11, DETAIL 1102 FOR BASEBALL DUGOUT IMAGES

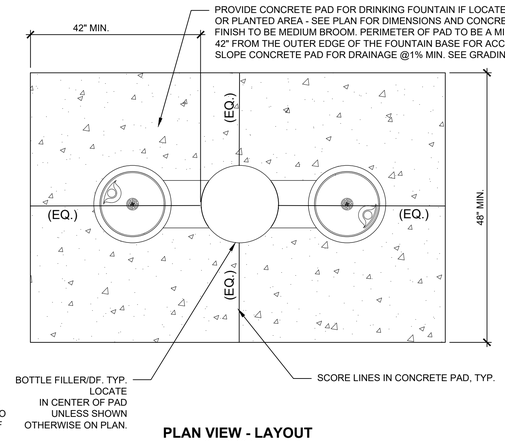
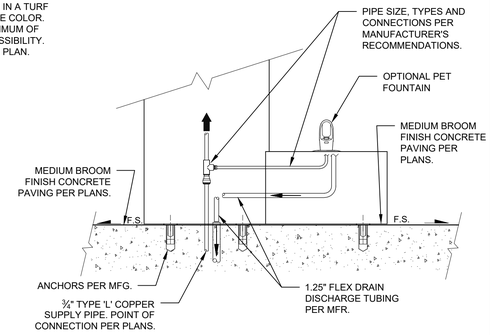
NOT TO SCALE



PLAN VIEW - LAYOUT
NOT TO SCALE



OPTIONAL PET FOUNTAIN
SIDE VIEW - SECTION
NOT TO SCALE

NOTE:

1. CONTRACTOR TO SUBMIT SHOP DRAWINGS TO THE CITY'S PROJECT MANAGER FOR APPROVAL PRIOR TO FABRICATION AND INSTALLATION.
2. REFER TO MANUFACTURER'S INSTALLATION & MAINTENANCE INSTRUCTIONS FOR OPTION INSTALLATION.
3. INSTALL WITH MURDOCK MOUNTING PLATE
4. MDL# IS GYQ84-CV-IAP-RAP. ADD PF TO THE MODEL # WHEN PET FOUNTAIN IS ADDED.
5. WRAP 6" PERFORATED PIPE IN A COURSE WEAVE FILTER FABRIC.

DOMESTIC LINE STERILIZATION PROCEDURE:

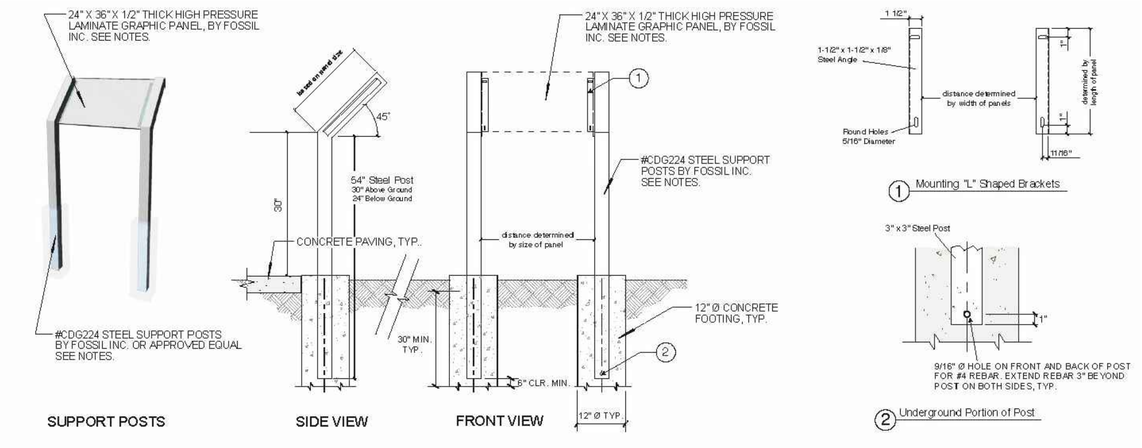
FLUSH DOMESTIC WATER LINES COMPLETELY. INJECT CHLORINE GAS OR LIQUID DISINFECTANT INTO LINE THROUGH A ¾" SERVICE COCK USING A PROPORTIONING PUMP AT A POINT AS CLOSE AS IS PRACTICAL TO THE WATER METER. OPEN BUBBLERS ON ALL UNITS INSTALLED SUFFICIENTLY TO DISTRIBUTE DISINFECTANT THROUGHOUT SYSTEM, SO THAT A MINIMUM CONCENTRATION OF 50 PPM, AS VERIFIED BY TEST, IS MEASURED AT ALL UNITS. DISINFECTANT SHALL REMAIN IN SYSTEM FOR 24 HOURS MINIMUM. AT CONCLUSION, RESIDUAL RETENTION OF DISINFECTANT SHALL NOT BE LESS THAN 10 PPM. ALL LINES SHALL BE FLUSHED THOROUGHLY. A WATER SAMPLE SHALL BE TESTED BY AN APPROVED TESTING LABORATORY. RESULTS SHALL SHOW:

- COLIFORM-AEROGENES ORGANISMS: NEGATIVE
- TOTAL BACTERIA PLATE COUNT: LESS THAN 100/CUBIC CENTIMETER
- WATER POTABILITY: SAFE TO USE. IF RESULTS ARE NEGATIVE, STERILIZATION SHALL BE REPEATED UNTIL STANDARD IS MET.

801	MURDOCK ACCESSIBLE DRINKING FOUNTAIN	
N.T.S.	BOE Version Aug/18	RP DETAIL L1732

CONSTRUCTION DETAIL NOTES

1. THE FOLLOWING NOTES APPLY TO ALL DETAILS AS SHOWN IN THIS SET OF DOCUMENTS, UNLESS OTHERWISE NOTED.
2. FOR ADDITIONAL INFORMATION REFER TO CONSTRUCTION NOTES.
3. REFER TO CONSTRUCTION LEGEND FOR INFORMATION RELATIVE TO COLOR, TYPE AND FINISH.
4. UNLESS OTHERWISE NOTED, NEW FINISH SURFACE SHALL BE FLUSH WITH ADJACENT EXISTING SURFACES.
5. FINISH GRADE: 1" BELOW FINISH SURFACE ADJACENT TO TURF AND 2" BELOW ADJACENT TO NON-TURF AREAS.
6. FINAL LOCATION OF CONSTRUCTION ELEMENTS, DRAINAGE DEVICES, SITE AMENITIES, IRRIGATION EQUIPMENT, AND PLANT MATERIAL MAY REQUIRE ADJUSTMENT DUE TO FIELD CONDITIONS AND SHALL BE APPROVED PRIOR TO CONSTRUCTION.
7. CONTRACTOR SHALL VERIFY ALL MATCHING MATERIALS AND COLORS PRIOR TO INSTALLATION. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT OF ANY DISCREPANCIES PRIOR TO INSTALLATION.



INTERPRETIVE PANEL NOTES:

1.) CONTRACTOR SHALL PROVIDE AND INSTALL (2) INDIVIDUAL INTERPRETIVE SIGN PANELS AND SUPPORTS PER PLAN AND DETAIL. FINAL LOCATION OF EACH PANEL SHALL BE APPROVED BY ENGINEER PRIOR TO INSTALLATION.

2.) 24" X 36" X 1/2" THICK SIGN PANELS MUST BE MANUFACTURED AS DIGITAL HIGH PRESSURE LAMINATE (DHPL) COMPOSED OF SEVERAL LAYERS OF PHENOLIC RESIN IMPREGNATED KRAFT FILLER PAPER, A DIGITALLY IMAGED EMBEDDED GRAPHIC, A LAYER OF MELAMINE RESIN, AND SURFACED BY A LAYER OF TRANSLUCENT EXTERIOR UV / GRAFFITI-RESISTANT OVERLAY PROTECTION AS SUPPLIED BY FOSSIL INDUSTRIES, INC., (631) 245-4172, WWW.FOSSILGRAPHICS.COM, OR APPROVED EQUAL.

3.) THE ENTIRE PANEL, INCLUDING EXTERIOR OVERLAY, MUST BE BONDED UNDER HEAT AND EXTREME PRESSURE TO FORM A COMPOSITE PANEL. THE FINISH MUST BE SMOOTHLY TEXTURED WITH REFLECTIVITY OF 30 +OR (5) GLOSS UNITS. THE DHPL GRAPHICS MUST BE WARRANTED FOR A MINIMUM OF 10 YEARS AGAINST FADING, DE-LAMINATION AND WEATHER DETERIORATION.

4.) EMBEDDED GRAPHICS MUST BE MADE USING A 12-COLOR HIGH-DEFINITION PRINT AT 200 DPI.

5.) GRAPHIC IMAGE FILES AS NECESSARY FOR PRODUCTION OF EACH INDIVIDUAL SIGN PANEL SPECIFIED WILL BE SUPPLIED BY THE PROJECT MANAGER AT THE TIME OF FABRICATION.

6.) SIGN PANEL MANUFACTURER SHALL PROVIDE A PRODUCTION QUALITY SAMPLE FROM A SUPPLIED GRAPHIC FILE FOR APPROVAL PRIOR TO FINAL FABRICATION AND DELIVERY.

802	INTERPRETIVE SIGN PANEL	
N.T.S.		

NOTES:

1. GRANT FUNDS SIGN:
   ONE (1) SIGN SHALL BE PROVIDED FOR GRANT FUNDS. GRANT FUNDS SIGN SHALL INCLUDE COLOR LOGO AND DISCLOSURE STATEMENT FROM COUNTY OF LOS ANGELES SAFE, CLEAN WATER PROGRAM. COLOR LOGO AND DISCLOSURE STATEMENT SHALL BE EQUALLY PROMINENT ON THE SIGN. THE SIGN SHALL BE PREPARED IN A PROFESSIONAL MATTER. THE CONTRACTOR SHALL CREATE A GRANT FUNDS SIGN AT LEAST TWO (2) FEET TALL BY THREE (3) FEET WIDE MADE OF 3/4" THICK EXTERIOR GRADE PLYWOOD OR OTHER APPROVED MATERIAL IN A PROMINENT LOCATION ON THE PROJECT SITE AND SHALL MAINTAIN THE SIGN IN GOOD CONDITION FOR THE DURATION OF THE CONSTRUCTION PERIOD. THE CONTRACTOR SHALL SUBMIT A SHOP DRAWING OF THE GRANT FUNDS SIGN FOR APPROVAL. THE CONTENTS OF THE SIGN WILL INCLUDE: "FUNDING FOR THIS PROJECT HAS BEEN PROVIDED IN FULL OR IN PART FROM THE LOS ANGELES COUNTY FLOOD CONTROL DISTRICT'S SAFE, CLEAN WATER PROGRAM."
2. CONTRACTOR SHALL INSTALL EDUCATIONAL SIGNS PER 2019 CALIFORNIA BUILDING CODE SECTION 11B-216, 11B-302, AND 11B-703, IF APPLICABLE. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS FOR REVIEW AND APPROVAL BY THE ENGINEER PRIOR TO INSTALLATION PER SPECIFICATION SECTION 01330 SHOP DRAWINGS/SUBMITTALS OF THE GENERAL REQUIREMENTS.
3. GRAPHIC IMAGE FOR THE SIGN SHALL BE PROVIDED BY THE ENGINEER. SIGN GRAPHIC BELOW IS A DRAFT PLACEHOLDER, FINAL GRAPHIC IMAGE SHALL BE PROVIDED BY THE ENGINEER.

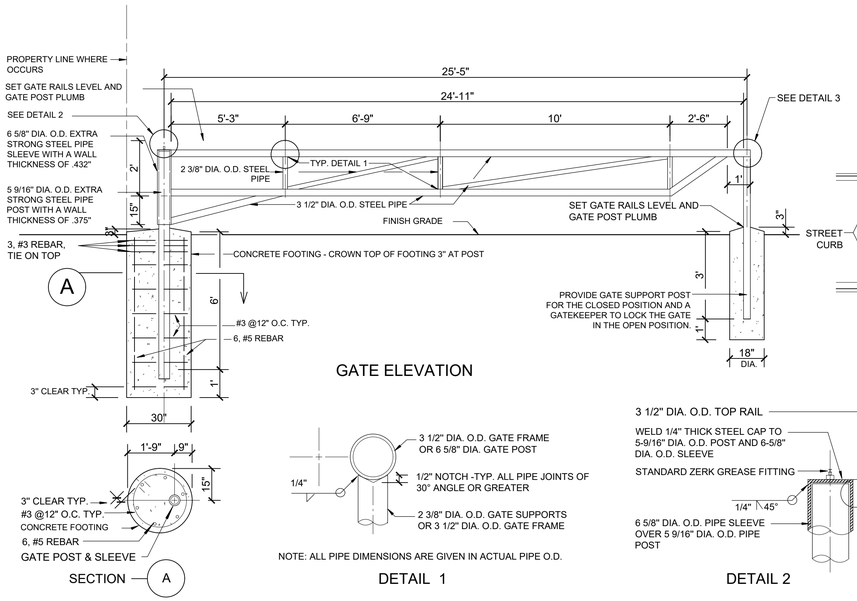
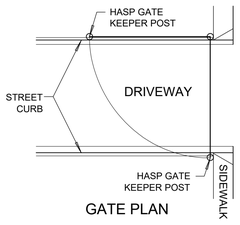
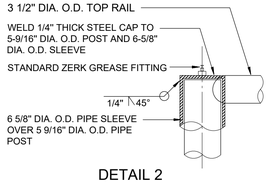
REVISION DATES (DESIGN STAGE ONLY)

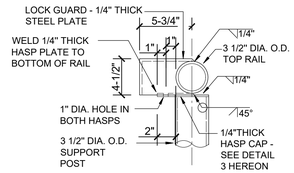


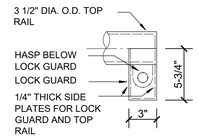


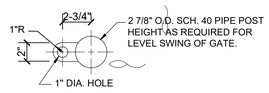
GATE SPECIFICATIONS

1. FABRICATION AND PAINTING: GATE SHALL BE SHOP-FABRICATED AND PAINTED. FABRICATION AND PAINTING SHALL BE DONE UNDER BUREAU OF CONTRACT ADMINISTRATION INSPECTION.
2. ALL PIPE FOR GATE CONSTRUCTION SHALL BE NON-GALVANIZED STEEL.
3. PIPE FOR GATE CONSTRUCTION SHALL BE AS FOLLOWS:
   A. TOP AND BOTTOM RAILS, DIAGONAL AND VERTICAL BRACING AND SUPPORT POSTS SHALL BE SCH. 40 STANDARD STEEL.
   B. 5-9/16" DIAM. O.D. PIPE POST SHALL BE HIGH STRENGTH STEEL PIPE; WALL THICKNESS SHALL BE 0.375".
   C. 6 5/8" DIA. O.D. PIPE POST SLEEVE SHALL BE HIGH STRENGTH STEEL PIPE; WALL THICKNESS SHALL BE 0.432".
4. ALL WELDS SHALL BE GROUND SMOOTH. ALL WELDS SHALL BE PER A.N.S.I./A.W.S. D1.1.81.
5. PROVIDE AND INSTALL AN ADDITIONAL SUPPORT POST TO SECURE THE GATE WHEN FULLY OPEN. THE GATE KEEPER UPPORT POST SHALL HAVE A HASP AS INDICATED IN DETAIL 3A, 3B AND 3C BELOW.
6. ADJUST THE HEIGHT OF THE GATE AND SUPPORT POSTS TO ACCOMMODATE THE EXISTING GRADES.
7. COLOR AND FINISH:
   A. ALL EXTERIOR SURFACES SHALL BE CLEANED WITH "OAKITE" OR EQUAL PRIOR TO PRIMING
   B. ALL EXTERIOR COMPONENTS SHALL BE PRIMED WITH ONE COAT OF RUST-INHIBITING ZINC PRIMER (NO PRIMER OR PAINT ON 5-9/16" DIAM POST).
   C. ALL EXTERIOR COMPONENTS SHALL BE PAINTED WITH TWO COATS OF ACRYLIC ENAMEL; COLOR SHALL BE 'OSHA' NO. 2166 (WHITE)
8. PRIOR TO INSTALLATION OF GATE, COMPLETELY COAT THE ENTIRE ABOVE GRADE SURFACE OF THE 5-9/16" DIA. O.D. GATE POST WITH GREASE. AFTER THE GATE IS INSTALLED, FILL THE SPACE BETWEEN THE POST SLEEVE AND POST WITH ADDITIONAL GREASE USING BOTH GREASE FITTINGS.









DETAILS 3A-3C: HASP AND LOCK GUARD

STEELCRAFT PRODUCTS	MODEL	SHEET
P.O. Box 90365 - Pasadena, CA 91103 PHN 626-798-7401 FAX 626-798-1482	BS 1644T BASEBALL BACKSTOP	4 OF 4

ASSEMBY INSTRUCTIONS

1. Dig six (6) holes @ 60" deep and 24" diam as shown on the plan view.
2. Place the four 2-7/8" od back posts (A) in the four back holes.
3. Place the two 2-7/8" od end posts (B) in the end holes with lugs parallel to the front opening.
4. Each post shall be 16'-0" above ground and 10'-0" on center. Place a horizontal brace (C) on the ground between each of the posts. Place a rail end fitting on each end of these braces. Place a brace band over each post adjacent to each rail end fitting. Bolt rail end fitting to the corresponding brace band. Make sure the horizontal brace fits into the rail end fittings at least 1". If they don't, adjust the posts accordingly.
   **NOTE: All carriage bolt heads are facing the playing field.
5. With the proper spacing assured, plumb all posts and pour the concrete footings. Allow 24 hrs. for concrete to set and then proceed as follows.
6. Attach four angle fittings (H) to back posts (A).
7. Hood Post Erection: Insert the four hood support posts (D) into open end of the four angle fittings (H) on back posts, with bent portion toward the playing field.
8. Tighten set screws holding hood posts in place.
9. Install mid (C) and front (E) horizontal tie members, using four "T" fitting (i). Attach triangle supports (F).
10. Install horizontal braces (C) between the posts above ground. These braces can be installed in a manner similar to directions in item 4. Larger size bands are furnished for use on the angle fittings.
11. Unroll the 9 ga wire (J) from end of roll. Stretch the wire for measuring and open the knuckle on each side of the roll at 9'-7" and weave out one strand of wire.
12. Weave a tension bar (T) through the last loops on the un-knuckled sides. Place this wire against playing field side of one of the wing panels with the tension bars parallel to the uprights.
13. Stretch wire on the wing panels. Slip 6 tension bands (N) over each post adjacent to the tension bars. The tension bars must be offset so that the wire will be stretched on the playing field side (inside) of the backstop. Equally space the 6 tension band up and down the posts on each side of the wire panel and bolt into position.

    **NOTE: If the wire is too loose, remove a strand of wire as in item 11 above or, if the wire is too tight to fasten into position, reweave into panel, the strand of wire removed in item 11 above.
14. Stretch Wire Back Panel The back two panels will be stretched in one piece between outside back posts (A). The length of the wire needed should be 3" shorter than the distance between the inside of the two corner posts (A). (Make sure wire is stretched when measuring)
15. Place this wire against the playing field side of the backstop with the tension bars parallel and adjacent to posts (A). Stretch and secure into position with 6 tension bands on each post.
16. Install and stretch wire in the opposite wing as described in items 12 and 13 above.
17. Stretch Wire - Hood Panels Install wire on hood, one panel at a time. Measure out the 11 ga chain link (J) wire as in item 12 above. and install as in item 13.
    **NOTE: Wire goes on the outside (top) of hood.
18. Stretch Wire - Corner Panels Install wire on corner panels using 11 ga chain link (K) wire. Cut off extra wire where necessary. Tie at 12" along top side panels.
19. Use tie wire (O) and tie all chain link to the adjacent horizontal braces at approx. 18" apart.
20. Tighten all set screws and bolts & nuts.

NOTE: BASEBALL BACKSTOP DETAILS AND NOTES ARE FOR REFERENCE ONLY. CONTRACTOR SHALL CONTACT LA STEELCRAFT FOR RECOMMENDATIONS FOR INSTALLATION. LA STEELCRAFT, PASADENA CA. lasteelcraft.com 1-800-851-0865

CONSTRUCTION DETAIL NOTES

1. THE FOLLOWING NOTES APPLY TO ALL DETAILS AS SHOWN IN THIS SET OF DOCUMENTS, UNLESS OTHERWISE NOTED.
2. FOR ADDITIONAL INFORMATION REFER TO CONSTRUCTION NOTES.
3. REFER TO CONSTRUCTION LEGEND FOR INFORMATION RELATIVE TO COLOR, TYPE AND FINISH.
4. UNLESS OTHERWISE NOTED, NEW FINISH SURFACE SHALL BE FLUSH WITH ADJACENT EXISTING SURFACES.
5. FINISH GRADE: 1" BELOW FINISH SURFACE ADJACENT TO TURF AND 2" BELOW ADJACENT TO NON-TURF AREAS.
6. FINAL LOCATION OF CONSTRUCTION ELEMENTS, DRAINAGE DEVICES, SITE AMENITIES, IRRIGATION EQUIPMENT, AND PLANT MATERIAL MAY REQUIRE ADJUSTMENT DUE TO FIELD CONDITIONS AND SHALL BE APPROVED PRIOR TO CONSTRUCTION.
7. CONTRACTOR SHALL VERIFY ALL MATCHING MATERIALS AND COLORS PRIOR TO INSTALLATION. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT OF ANY DISCREPANCIES PRIOR TO INSTALLATION.

PLANTING PLAN NOTES

1. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, AND EQUIPMENT NECESSARY TO FURNISH AND INSTALL PLANT MATERIAL AS SHOWN ON THE DRAWINGS AND AS DESCRIBED IN THE SPECIFICATIONS.
2. ALL WORK ON THE IRRIGATION SYSTEM, INCLUDING HYDROSTATIC, COVERAGE, AND OPERATIONAL TESTS AND THE BACKFILLING AND COMPACTION OF TRENCHES SHALL BE COMPLETED AND APPROVED PRIOR TO PLANTING OPERATIONS.
3. SEE LANDSCAPE PLANTING SPECIFICATIONS FOR SOIL PREPARATION REQUIREMENTS.
4. ALL AREAS DISTURBED BY CONSTRUCTION ACTIVITY WILL REQUIRE TURF REPLACEMENT AND REMEDIATION FOR SOIL COMPACTION. REFER TO TURF NOTE BELOW.

NOTE: TURF AREAS

THE CONSTRUCTION SHALL CONSIST OF TWO PRIMARY STAGES.

STAGE 1: CIVIL CONSTRUCTION OF ALL THE STORM WATER RELATED ELEMENTS AND THE SITE IMPROVEMENTS SHOWN INSIDE THE PRIMARY LIMITS OF WORK. (I.E. CONSTRUCTION FENCING).

A. DURING THIS STAGE, ALL EXISTING TURF AND LANDSCAPING TO REMAIN OUTSIDE THE PRIMARY CONSTRUCTION AREA (I.E. CONSTRUCTION FENCING) SHALL REMAIN ACCESSIBLE TO THE PUBLIC AND WILL BE MAINTAINED BY THE PARKS DEPARTMENT STAFF. DURING THIS PERIOD, THE CONTRACTOR SHALL NOT INTERRUPT THE EXISTING IRRIGATION WATER SUPPLY TO THESE AREAS AND SHALL ASSURE THE EXISTING CONTROL SYSTEM REMAINS IN OPERATION. ANY DISRUPTION TO IRRIGATION IN THESE AREAS THAT CAUSES DAMAGE TO THE EXISTING TURF HEALTH OR COVERAGE WILL BE REPAIRED AT THE CONTRACTOR'S EXPENSE BY OVERSEEDING WITH A SEED MIX OF SIMILAR COMPOSITION AS THE TURF TO BE REPAIRED/REPLACED AND FERTILIZED WITH A BALANCED LONG-RELEASE TURF FERTILIZER.

B. THE NEW IRRIGATION AND PLANTING WORK INSIDE THE PRIMARY WORK AREA MAY BE INCLUDED IN THIS STAGE AT THE CONTRACTOR'S DISCRETION.

C. INSIDE THE PRIMARY LIMITS OF WORK, AREAS OF EXISTING TURF TO BE RETAINED DURING CONSTRUCTION SHALL BE IRRIGATED AND MAINTAINED BY THE CONTRACTOR AS NEEDED. AFTER THE COMPLETION OF PRIMARY CONSTRUCTION, ANY EXISTING TURF AREAS WHICH ARE DEAD OR DAMAGED BY CONSTRUCTION ACTIVITY (INCLUDING ANY AREAS USED FOR PARKING, STORAGE, LAYDOWN, IRRIGATION TRENCHING ETC.) MUST BE REPLACED WITH THE SOD SPECIFIED AFTER THE AREA HAS BEEN DE-COMPACTED TO THE SATISFACTION OF THE ENGINEER AND AMENDED PER THE LANDSCAPE PLANTING SPECIFICATIONS. ANY AREAS OF EXISTING TURF REMAINING WITH BARE AREAS LARGER THAN 12" X12" SHALL BE REPAIRED BY OVERSEEDING. DEAD OR BARE AREAS LARGER THAN 36" X36" SHALL BE REPAIRED WITH SOD. AT COMPLETION OF THE MAINTENANCE AND ESTABLISHMENT PERIOD (SEE LANDSCAPE PLANTING SPECIFICATIONS), A FULL HEALTHY AND CONTINUOUS COVER OF TURF IS EXPECTED.

D. ALL TURF AREAS DAMAGED OR REMOVED BY CONSTRUCTION ACTIVITY SHALL BE DE-COMPACTED (IF OUTSIDE OF EXCAVATION LIMITS) AND AMENDED PER THE LANDSCAPE PLANTING SPECIFICATIONS, THEN PLANTED WITH SOD AS SPECIFIED IN THE PLANTING LEGEND.

STAGE 2: DURING THIS STAGE (AFTER SUBSTANTIAL COMPLETION OF STAGE 1), ADDITIONAL SITE AND IRRIGATION IMPROVEMENTS OUTSIDE THE PRIMARY LIMITS OF WORK (SEE IRRIGATION PLANS) SHALL BE COMPLETED IN THE REMAINDER OF THE PARK AREAS AS INDICATED ON THE PLANS. ANY AREAS OF EXISTING TURF DAMAGED BY CONSTRUCTION OR IRRIGATION TRENCHING SHALL BE REPAIRED AT THE CONTRACTOR'S EXPENSE BY OVERSEEDING WITH A SEED MIX OF SIMILAR COMPOSITION AS THE TURF TO BE REPLACED AND FERTILIZED WITH A BALANCED LONG-RELEASE TURF FERTILIZER.

SHEET NAME LP01

SHEET 79 OF 129 SHEETS

TREE PROTECTION – EXISTING TREES
All trees to remain in place shall be protected using the following guidelines:

TREE PROTECTION SPECIFICATIONS
These tree protection specifications shall be followed to protect all trees whose dripline is encroached upon either directly or indirectly by construction within City parks.

ANY FAILURE BY THE CONTRACTOR TO ADHERE TO THE REQUIREMENTS SPECIFIED BELOW WILL RESULT IN THE SUSPENSION OF ALL CONSTRUCTION ACTIVITIES, TO BE DONE AT THE CONTRACTOR'S EXPENSE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACEMENT OF OR PAYMENT FOR ANY TREES DAMAGED THROUGH NON-COMPLIANCE WITH THESE SPECIFICATIONS. THE MONETARY OR REPLACEMENT VALUE OF IMPACTED TREES WILL BE DETERMINED BY A RECREATION AND PARKS (RAP) ARBORIST OR BY A RAP APPROVED ISA CERTIFIED ARBORIST.

A Recreation and Parks Arborist shall be invited to the Job Start Meeting and also notified 48-hours prior to construction. Contact Steve Dunlap (213) 485-4826.

All trees that occur within the area of work, as shown on the plans, and *NOT* specifically designated for removal, shall be protected by the following means:

1. **Defining the Tree Protection Zone (TPZ)** - The **radius** (not the diameter) of the TPZ, measured from the outside of the tree trunk, shall be calculated according to the following:
   (a) **Single trunk trees -** multiply the trunk diameter in inches, measured 4.5' above grade, by 1.5 feet.
   (b) **Multi trunk trees -** multiply the sum of the diameters of all trunks in inches, measured 4.5' above grade, by 1.5 feet.
   (c) **Palm trees -** 5' from the base of the trunk.
   (d) **If a TPZ is delineated on the plans, the size and shape shown on the plans shall supercede the above requirements.**

2. The contractor shall install a 5' high temporary chain link fence with one pedestrian access gate along the boundary of the TPZ. See detail for temporary chain link fence on detail sheet.

3. The contractor shall provide one sign per each 20 lineal ft. of fence surrounding the TPZ indicating that fencing shall not be removed. See TPZ sign detail.

4. No work is permitted within the TPZ without the approval of: 1) the project Landscape Architect, 2) the Project Manager, and 3) RAP Forestry staff. Any work authorized by RAP Forestry staff within the TPZ must be done in accordance with the recommendations of RAP Forestry and under the supervision of a Monitoring Arborist. The Monitoring Arborist shall be supplied by the Contractor at his own expense, and be an ISA Certified Arborist or a Registered Consulting Arborist with verifiable experience in protecting trees. The Monitoring Arborist must be approved by RAP Forestry prior to commencement of work.

5. Within the TPZ, the contractor shall adhere to the following requirements, including, but not limited to:
   (a) No stockpiling or storage of any material, debris, or soil.
   (b) No storage of any construction equipment.
   (c) No vehicular access.
   (d) No un-approved trenching, excavation or disturbance of soil will be allowed.
   (e) No objects of any kind shall be attached to tree trunks.
   (f) For any approved excavation or trenching, no cutting of roots over 2" diameter will be allowed. Contractor shall use a pneumatic drill (a.k.a. "air spade") to excavate under woody roots larger than 2" in diameter. If any roots are unintentionally severed, remedial cuts are to be made under the supervision the Monitoring arborist, and soil backfilled immediately.

6. Within the boundaries of the construction zone (including the TPZ), the contractor shall be responsible for mitigating construction-related dust accumulation on all trees by spraying the trunks, limbs, and foliage with water to a maximum height of 30 feet during the months of April through November, at monthly intervals.

7. Beyond the TPZ, the contractor shall also be responsible for protecting all existing trees to remain in place within the boundaries of the construction zone, including vehicular access areas, lay down areas, and any other areas impacted by construction activities. Any damage to trees in these areas shall also be subject to the same monetary or replacement requirements specified below. Any necessary root cutting in this area must be approved in advance by either RAP Forestry or by a RAP approved ISA certified arborist employed by the Contractor. See also the General Conditions for any damage done by the contractor to landscaping or other park amenities that fall outside the boundaries of the construction zone.

8. Irrigation to all existing trees NOT specifically designated for removal shall be kept in operation for the duration of the project. Contractor shall be responsible for hand watering all impacted trees if necessitated by temporary shutdowns to or demolition of existing irrigation systems. Trees are to be irrigated deeply and as often as required such that soil moisture is detectable at a minimum depth of 18" using a soil probe.

9. Upon completion of all trenching, grading, excavation and soil preparation work, contractor shall remove all items installed to protect trees during the construction process with approval of the Project Manager.

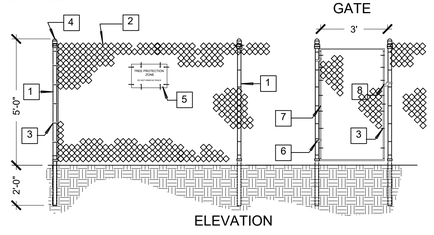
10. Any of the following Southern California native tree species fall under Ordinance No. 177404 of the Los Angeles Municipal Code:
    (a) Oaks, including Valley Oak (*Quercus lobata)*, California Live Oak (*Quercus agrifolia)*, or any other tree of the oak genus indigenous to California but excluding Scrub Oak *(Quercus dumosa/Q. berberidifolia);*
    (b) Southern California Black Walnut *(Juglans californica* var. *californica);*
    (c) Western Sycamore *(Platanus racemosa);*
    (d) California Bay *(Umbellularia californica).*

Contractor shall comply with the requirements of the ordinance found at: http://cityplanning.lacity.org/Code_Studies/Other/ProtectedTreeOrd.pdf.

DAMAGES
If a tree that is designated to remain is removed or caused to be irreversibly damaged as determined by the Recreation and Parks Arborist, install a replacement tree matching in size, quality and variety using an installer designated by the Recreation and Parks Arborist. If an acceptable replacement tree is not available, pay damages to the City for the value of the damaged tree as assessed by the tree value formula in the ISA Guide for Establishing Value of Trees and Other Plants.

FENCING MATERIALS

1. POSTS: O.D., LINE POSTS 2-3/8 IN. O.D. POST SPACING TO BE 10'-0" MAX. POSTS TO BE DRIVEN 2' BELOW RELATIVE GRADE.
2. FABRIC: 9 GAUGE, 2 IN. MESH, KNUCKLE TOP AND BOTTOM, PLACE ON OUTER SIDE OF POST.
3. TIE WIRES: 11 GAUGE AT 12" O.C.
4. POST TOPS MALLEABLE IRON OR PRESSED STEEL.
5. 24"x18" SIGN. ATTACH WITH TIE WIRES. SIGN TO BE PROVIDED BY RAP.
6. HINGES: INDUSTRIAL BULLDOG HINGE (180 SWING) 2 HINGES PER GATE, ONE TOP AND ONE BOTTOM.
7. GATE FRAME: SIDES, 2-3/8" DIA
8. LOCKABLE CAST ALUMINUM FORK LATCH POST TOPS MALLEABLE IRON OR PRESSED STEEL.



NOTES:
1. THE BOTTOM OF THE FABRIC SHALL BE POSITIONED ONE INCH ABOVE FINISH GRADE.
2. PROVIDE FOR ONE 3' WIDE GATE PER ENCLOSURE.
3. ALL FENCING TO HAVE A STANDARD GALVANIZED FINISH.

4 | 5' HIGH TREE PROTECTION FENCE

2SS1 4ES1 4CS1 4SS1 4S-SS1 9SST	TORO 570Z-6P-PRX TURF STRIP SPRAY TURF SPRAY, 6" POP-UP WITH BUILT IN-RISER PRESSURE REGULATOR, AND X-FLOW WATER SHUT-OFF DEVICE. ALSO INCLUDES THE ZERO FLUSH WIPER SEAL. 1/2" FEMALE-THREADED INLET.
1401 1402 1404 1408	RAIN BIRD RWS-M-B-C-1402 1401 ROOT WATERING SYSTEM WITH 18" TUBE, .50 GPM BUBBLER AND CHECK VALVE ON RISER. INSTALL WITH SAND SOCK. QUANTITY PER TREE AS SHOWN ON PLANS

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
(2)	TORO T5 RAPIDSET SS SERIES TURF ROTOR WITH HUNTER TJS SWING JOINT PER DETAIL 302/LI03. PROVIDE LA (LOW ANGLE) WITH 12" BODY AT SHRUB AREAS
(12)	TORO T7PSS-02 12.0 SERIES TURF ROTOR WITH HUNTER TJS SWING JOINT PER DETAIL 302/LI03
(16)	TORO T7PSS-02 16.0 SERIES TURF ROTOR WITH HUNTER TJS SWING JOINT PER DETAIL 302/LI03
(24)	TORO T7PSS-02 24.0 SERIES TURF ROTOR WITH HUNTER TJS SWING JOINT PER DETAIL 302/LI03

POINT OF CONNECTION NOTE 1:

POINT OF CONNECTION SHALL BE AT AN EXISTING 2 WATER METER. VERIFY THE ACTUAL LOCATION, SIZE AND WATER PRESSURE IN THE FIELD PRIOR TO STARTING WORK. IF ANY OF THE POC INFORMATION SHOWN ON THESE DRAWINGS IS FOUND TO BE DIFFERENT THAN THE ACTUAL POC INFORMATION GATHERED IN THE FIELD, IMMEDIATELY NOTIFY THE ENGINEER. SHOULD THE CONTRACTOR FAIL TO VERIFY THE POC INFORMATION ANY CHANGES REQUIRED BY LOW PRESSURE OR VOLUME SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

CONTROLLER NOTE 2:

REMOVE EXISTING CONTROLLER AND INSTALL NEW CONTROLLER PER IRRIGATION LEGEND AND DETAIL. REFER TO MANUFACTURER'S RECOMMENDATIONS. CONTACT OWNER'S AUTHORIZED REPRESENTATIVE FOR LOCATION APPROVAL PRIOR TO INSTALLATION. CONNECT TO EXISTING 120 VAC POWER SUPPLY

NOTE:
THE IRRIGATION SYSTEM WAS DESIGNED FOR A STATIC WATER PRESSURE OF 148 PSI. CONTRACTOR SHALL VERIFY EXISTING STATIC WATER PRESSURE PRIOR TO COMMENCING WORK. IF STATIC WATER PRESSURE IS LESS THAN 148 PSI, THEN CONTRACTOR SHALL NOTIFY THE ENGINEER IMMEDIATELY FOR DIRECTION ON HOW TO PROCEED. FAILURE TO NOTIFY ENGINEER SHALL PLACE ALL REQUIRED REPAIRS/EQUIPMENT AND OTHER RELATED COST AS THE FULL RESPONSIBILITY OF THE IRRIGATION CONTRACTOR.

KEY NOTES

1. REFER TO SHEET LI02 FOR IRRIGATION LEGEND AND NOTES.
2. REFER TO SHEETS LI03-LI06 FOR DETAILS.
3. REFER TO SHEET LI307-LI08 FOR CALCULATIONS.

Loss for Backflow: 12.41 PSI
Loss for Master Valve: 0.53 PSI
Loss for Water Meter: 1.18 PSI
Critical Station Pressure at POC: 66.4 PSI
Pressure Available: 146 PSI
Residual Pressure Available: 79.6 PSI

IRRIGATION NOTES

1. IRRIGATION SYSTEM COMPONENTS ARE SHOWN DIAGRAMMATICALLY. CONTRACTOR SHALL MARK MAINLINE ROUTING AND MANIFOLD LOCATIONS IN THE FIELD FOR REVIEW AND APPROVAL BY ENGINEER. LATERAL LINE LOCATIONS SHALL BE ROUTED WHEN POSSIBLE TO AVOID TREE PROTECTION ZONES. SEE TREE PROTECTION SPECIFICATIONS FOR TRENCHING REQUIREMENTS INSIDE TPZ'S.
2. AT ALL TIMES DURING CONSTRUCTION, CONTRACTOR SHALL MAINTAIN TEMPORARY WATER SUPPLY AND CONTROLLER CONNECTED TO AREAS WITH PLANT MATERIAL TO REMAIN, OR PROVIDE ALTERNATE METHOD OF AUTOMATIC OPERATION.
3. ANY EXISTING IRRIGATION SYSTEM COMPONENTS DEPICTED HEREIN ARE BASED UPON AS-BUILT RECORD DRAWINGS, AND ARE SHOWN HERE FOR INFORMATIONAL PURPOSES ONLY. CONTRACTOR SHALL VERIFY THE LOCATION OF ALL EXISTING SYSTEM COMPONENTS TO REMAIN PRIOR TO ENGAGING IN CONSTRUCTION ACTIVITIES. CONTRACTOR SHALL IMMEDIATELY NOTIFY PROJECT MANAGER OF ANY DISCREPANCIES BETWEEN AS-BUILT AND EXISTING CONDITIONS.
4. THE CONTRACTOR SHALL VERIFY THE LOCATIONS OF ALL EXISTING UTILITIES, STRUCTURES AND SERVICES BEFORE COMMENCING WORK. THE LOCATIONS OF ANY UTILITIES, STRUCTURES AND SERVICES SHOWN IN THESE PLANS ARE APPROXIMATE ONLY. ANY DISCREPANCIES BETWEEN THESE PLANS AND ACTUAL FIELD CONDITIONS SHALL BE REPORTED TO THE PROJECT MANAGER IMMEDIATELY. THE CONTRACTOR SHALL PROMPTLY REPAIR OR REPLACE ANY EXISTING OR NEWLY CONSTRUCTED UTILITIES OR SITE FEATURES DAMAGED BY THEIR WORK AT THEIR OWN EXPENSE.
5. THE CONTRACTOR SHALL NOT WILLFULLY INSTALL ANY EQUIPMENT AS SHOWN ON THE PLANS WHEN IT IS OBVIOUS IN THE FIELD THAT CONDITIONS OR OBSTRUCTIONS EXIST THAT WERE UNKNOWN AT THE TIME THESE PLANS WERE PREPARED. CONTRACTOR SHALL IMMEDIATELY NOTIFY THE PROJECT MANAGER OF ANY SUCH CONDITIONS PRIOR TO PERFORMING ANY AFFECTED WORK. IN THE EVENT THAT THIS NOTIFICATION IS NOT GIVEN, THE CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY FOR ANY NECESSARY MODIFICATIONS TO COMPLETED WORK.
6. CONTRACTOR SHALL COORDINATE THEIR WORK WITH OTHER CONTRACTORS FOR THE LOCATION AND INSTALLATION OF PIPE SLEEVES AND LATERALS UNDER PAVING IN A TIMELY MANNER. SEE TRENCHING DETAIL FOR SLEEVING REQUIREMENTS. PLACE SLEEVES IN ACCORDANCE WITH APPLICABLE CODES.
7. THE CONTRACTOR SHALL FLUSH AND PRESSURE TEST ALL MAINLINES PER IRRIGATION SYSTEM SPECIFICATIONS. CONTRACTOR SHALL FLUSH ALL LATERAL LINES AND IRRIGATION HEADS PER THE LANDSCAPE CONSTRUCTION NOTES.
8. THE INTENT OF THESE IRRIGATION PLANS IS TO PROVIDE HEAD-TO-HEAD COVERAGE TO ALL TURF AREAS. **IF REQUIRED, HEAD LAYOUT IN NEW CONSTRUCTION AREAS WILL BE ADJUSTED IN THE FIELD UNDER THE DIRECTION OF THE ENGINEER AS NEEDED TO ACHIEVE THE REQUIRED COVERAGE**. AS PART OF THE SCOPE OF WORK, THE CONTRACTOR SHALL PROVIDE ANY ADDITIONAL HEADS AND/OR ALTERNATE NOZZLES REQUIRED TO ACHIEVE PROPER COVERAGE WITH A MINIMUM OF OVERSPRAY AT NO ADDITIONAL COST TO THE CITY.
9. UPON COMPLETION OF INSTALLATION, CONTRACTOR SHALL CONDUCT A COVERAGE TEST PER IRRIGATION SPECIFICATIONS. CONTRACTOR SHALL NOTIFY PROJECT MANAGER TO REQUEST THE TEST, WHICH WILL BE SCHEDULED AT THE SOONEST DATE POSSIBLE PER AVAILABILITY OF RAP AND LADWP STAFF.
10. REFER TO IRRIGATION SYSTEMS SPECIFICATIONS FOR ADDITIONAL INFORMATION REGARDING THIS SECTION OF WORK.
11. IN ADDITION TO THE SLEEVES AND CONDUITS SHOWN ON THE DRAWINGS, THE IRRIGATION CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING THE INSTALLATION OF SLEEVES AND CONDUITS OF SUFFICIENT SIZE WITHIN ALL PAVED AREAS.
12. NOTIFY PROJECT MANAGER OF ANY ASPECTS OF LAYOUT THAT WILL PROVIDE INCOMPLETE OR INSUFFICIENT WATER COVERAGE OF PLANT MATERIAL AND DO NOT PROCEED UNTIL THEIR INSTRUCTIONS ARE OBTAINED.
13. EQUIPMENT SHOWN IN HARDSCAPE AREAS ARE FOR DESIGN CLARIFICATION ONLY AND SHALL BE INSTALLED WHENEVER POSSIBLE WITHIN PLANTED AREAS A REASONABLE, REACHABLE DISTANCE FROM HARDSCAPE OR TURF AREAS.
14. DUE TO THE SCALE OF THE DRAWINGS, IT IS NOT POSSIBLE TO INDICATE ALL OFFSETS, FITTINGS, SLEEVES, ETC., WHICH MAY BE REQUIRED. CAREFULLY INVESTIGATE THE STRUCTURAL AND FINISHED CONDITIONS AFFECTING ALL WORK AND PLAN WORK ACCORDINGLY, FURNISHING SUCH FITTINGS, ETC., AS MAY BE REQUIRED TO MEET SUCH CONDITIONS. THE WORK SHALL BE INSTALLED IN SUCH A MANNER AS TO AVOID CONFLICTS BETWEEN IRRIGATION SYSTEMS, PLANTING, AND ARCHITECTURAL FEATURES.

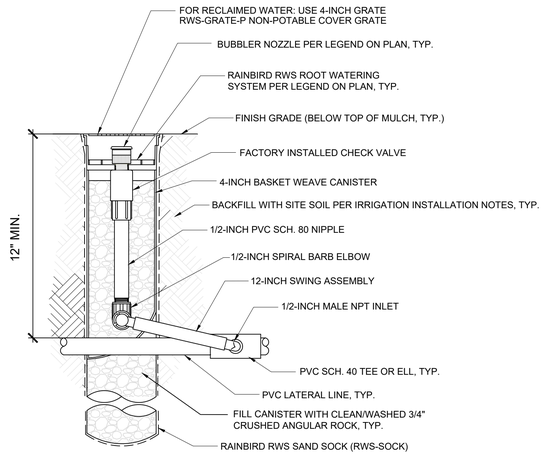
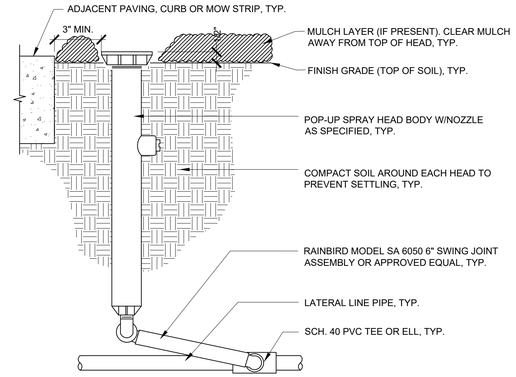
NOTES:
1.) ALL FITTINGS AND RESTRAINTS ARE AS AS MANUFACTURED BY HARCO FITTINGS (www.harcofittings.com) OR APPROVED EQUAL. INSTALL ALL FITTINGS AND RESTRAINTS PER MANUFACTURER'S INSTRUCTIONS.
2.) SEE VALVE BOX PLACEMENT, RCV INSTALLATION, AND QUICK COUPLER INSTALLATION DETAILS FOR ADDITIONAL INFORMATION.

305	VALVE MANIFOLD ASSEMBLY	
N.T.S.	BOE VERSION 02/16/18 RWF	RP DETAIL 135



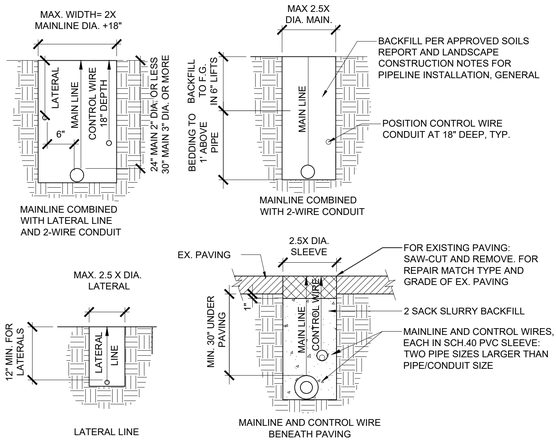
NOTE: ALWAYS LOCATE RWS CANISTERS WITHIN 12" OR LESS FROM EDGE OF TREE ROOTBALL.

303	ROOT WATERING SYSTEM BUBBLER ASSEMBLY	
N.T.S.	BOE VERSION Sep/07 - RF	RAP DETAIL L1660



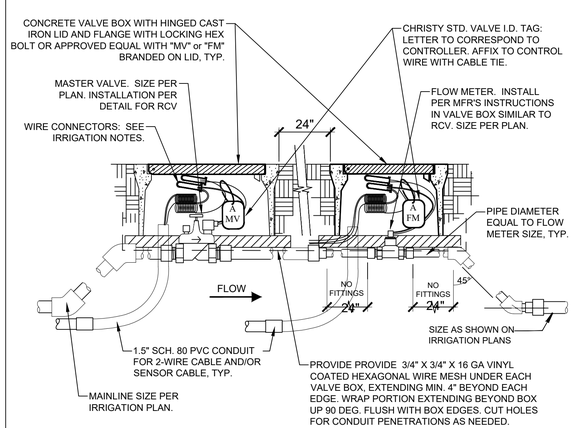
NOTES:
1. PLACE ALL HEADS 1/4" ABOVE FINISH GRADE AT INITIAL INSTALLATION. SET HEADS 3" AWAY FROM WALKS, CURBS, OR MOW STRIPS.
2. INSTALL ALL HEADS PERPENDICULAR TO FINISH GRADE.
3. THOROUGHLY FLUSH ALL LATERAL LINE PIPES TO REMOVE DIRT AND DEBRIS BEFORE INSTALLATION OF NOZZLES.
4. ADJUST ALL HEADS TO PROPER ARC AND RADIUS AS NECESSARY TO ACHIEVE PROPER COVERAGE AND UNIFORMITY. IF PROPER COVERAGE AND UNIFORMITY IS NOT ACHIEVED WITH THE SPECIFIED NOZZLE, CONTRACTOR SHALL CHANGE NOZZLE AS NEEDED UNTIL DESIRED PERFORMANCE IS ACHIEVED.

301	POP-UP SPRAY HEAD INSTALLATION	
N.T.S.	REVISED: 6/09/20 RWF	RP DETAIL 1622



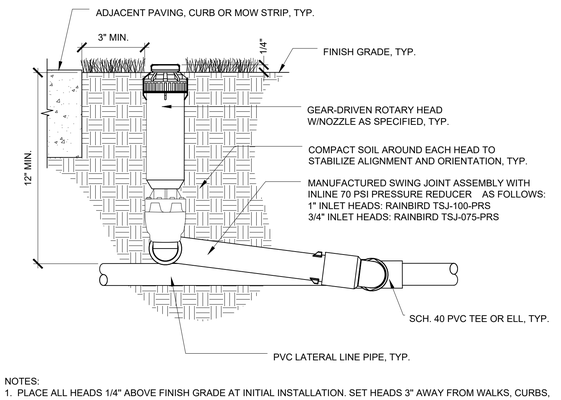
NOTE:
1. PIPE AND CONTROL WIRE CROSSING UNDER PAVING OR WALKWAY OVER 8' WIDE SHALL BE SLEEVED AS INDICATED ABOVE.
2. PIPE BEDDING AND BACKFILL SHALL BE PER APPROVED SOILS REPORT AND LANDSCAPE CONSTRUCTION NOTES, PIPELINE INSTALLATION GENERAL.

306	IRRIGATION TRENCHING DETAIL - 2 WIRE	
N.T.S.	BOE VERSION 02/08/18	RP DETAIL 1350



NOTES:
1. CONNECT FLOW METER LEADS TO SENSOR DECODER OR SENSOR CABLE PER CONTROLLER MFR'S INSTRUCTIONS.
2. CONNECT MASTER VALVE LEADS TO SENSOR DECODER PER CONTROLLER MFR'S INSTRUCTIONS.
3. ALL WIRE CONNECTIONS SHALL BE MADE WITH A WIRE CONNECTOR PER IRRIGATION NOTES.

304	FLOW METER AND MASTER VALVE, 2-WIRE SYSTEM	
N.T.S.		RAP DETAIL L1512



NOTES:
1. PLACE ALL HEADS 1/4" ABOVE FINISH GRADE AT INITIAL INSTALLATION. SET HEADS 3" AWAY FROM WALKS, CURBS, OR MOW STRIPS.
2. INSTALL ALL HEADS PERPENDICULAR TO FINISH GRADE.
3. THOROUGHLY FLUSH ALL LATERAL LINE PIPES TO REMOVE DIRT AND DEBRIS BEFORE INSTALLATION OF NOZZLES.
4. ADJUST ALL HEADS TO PROPER ARC AND RADIUS AS NECESSARY TO ACHIEVE PROPER COVERAGE AND UNIFORMITY. IF PROPER COVERAGE AND UNIFORMITY IS NOT ACHIEVED WITH THE SPECIFIED NOZZLE, CONTRACTOR SHALL CHANGE NOZZLE AS NEEDED IN CONSULTATION WITH LANDSCAPE ARCHITECT UNTIL DESIRED PERFORMANCE IS ACHIEVED.

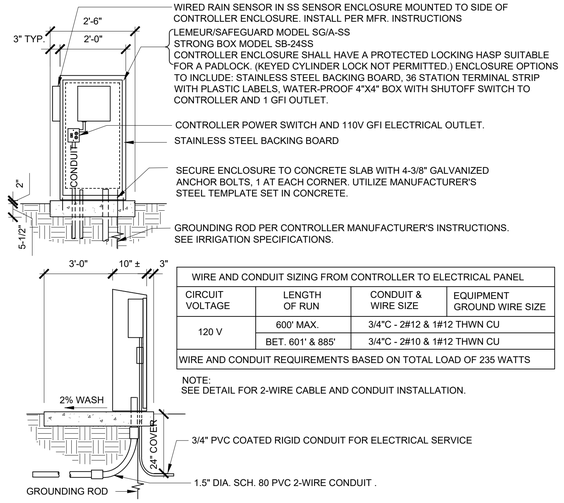
504	THRUST BLOCK INSTALLATION	
N.T.S.	BOE VERSION Sep/07	RP DETAIL L1340



WIRED RAIN SENSOR IN SS SENSOR ENCLOSURE MOUNTED TO SIDE OF CONTROLLER ENCLOSURE. INSTALL PER MFR. INSTRUCTIONS

LEMEUR/SAFEGUARD MODEL SG/A-SS
STRONG BOX MODEL SB-24SS
CONTROLLER ENCLOSURE SHALL HAVE A PROTECTED LOCKING HASP SUITABLE FOR A PADLOCK. (KEYED CYLINDER LOCK NOT PERMITTED.) ENCLOSURE OPTIONS TO INCLUDE: STAINLESS STEEL BACKING BOARD, 36 STATION TERMINAL STRIP WITH PLASTIC LABELS, WATER-PROOF 4"X4" BOX WITH SHUTOFF SWITCH TO CONTROLLER AND 1 GFI OUTLET.

CONTROLLER POWER SWITCH AND 110V GFI ELECTRICAL OUTLET.

STAINLESS STEEL BACKING BOARD

SECURE ENCLOSURE TO CONCRETE SLAB WITH 4-3/8" GALVANIZED ANCHOR BOLTS, 1 AT EACH CORNER. UTILIZE MANUFACTURER'S STEEL TEMPLATE SET IN CONCRETE.

GROUNDING ROD PER CONTROLLER MANUFACTURER'S INSTRUCTIONS. SEE IRRIGATION SPECIFICATIONS.

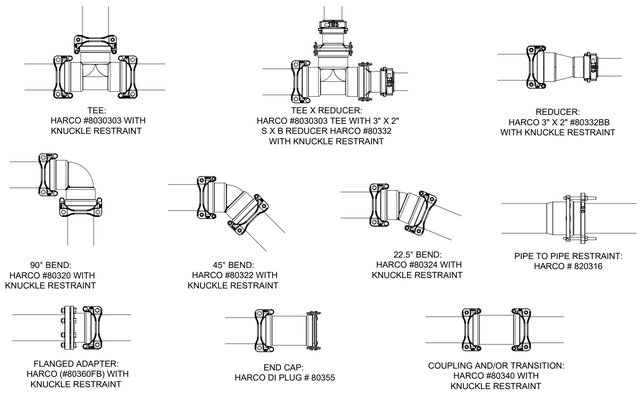
WIRE AND CONDUIT SIZING FROM CONTROLLER TO ELECTRICAL PANEL			
CIRCUIT VOLTAGE	LENGTH OF RUN	CONDUIT & WIRE SIZE	EQUIPMENT GROUND WIRE SIZE
120 V	600' MAX.	3/4"C - 2#12 & 1#12 THWN CU	
	BET. 601' & 885'	3/4"C - 2#10 & 1#12 THWN CU	
WIRE AND CONDUIT REQUIREMENTS BASED ON TOTAL LOAD OF 235 WATTS			

NOTE:
SEE DETAIL FOR 2-WIRE CABLE AND CONDUIT INSTALLATION.

3/4" PVC COATED RIGID CONDUIT FOR ELECTRICAL SERVICE

1.5" DIA. SCH. 80 PVC 2-WIRE CONDUIT .

503	CONTROLLER AND ENCLOSURE	
N.T.S.	BOE VERSION Feb/18	RAP DETAIL L1470



NOTE: ADDITIONAL PIPE & FITTING CONFIGURATIONS MAY BE NECESSARY TO COMPLETE WORK SHOWN ON PLANS DUE TO UNFORSEEN SITE CONDITIONS. CONSULT MANUFACTURER FOR ADDITIONAL INFORMATION. USE #60-100-03 KNUCKLE RESTRAINT ON FITTINGS WHERE DESIGNATED.

MAINLINE PIPE FITTINGS:

1.) DUCTILE IRON FITTINGS WILL BE REQUIRED FOR ALL MAINLINE PIPE CONNECTIONS (CONSTANT PRESSURE) FOR 3" OR LARGER PIPE UNDER THE FOLLOWING CONDITIONS:

A. AS SHOWN ON OTHER DETAILS INCLUDED WITHIN IN THESE PLANS AND SPECIFICATIONS.

B. AT ALL DIRECTIONAL FITTINGS SUCH AS TEES, ELBOWS, ETC., AND REDUCERS, ADAPTERS AND COUPLINGS AS NOTED OR DETAILED.

2.) DUCTILE IRON FITTINGS SHALL BE A "PUSH-ON" TYPE FOR IPS SIZED PVC PIPE BY HARCO FITTINGS (www.harcofittings.com) OR APPROVED EQUAL.

3.) ALL GASKETED PVC PIPE JOINTS WITHIN 25' OF DUCTILE IRON DIRECTIONAL FITTINGS SHALL BE RESTRAINED USING PIPE TO PIPE RESTRAINT SHOWN. FOR END CAPS AND TERMINAL GATE VALVES, ALL GASKETED PVC PIPE JOINTS WITHIN 40' SHALL BE RESTRAINED USING PIPE TO PIPE RESTRAINT SHOWN. REFER TO MANUFACTURERS FITTING RESTRAINT GUIDE FOR ADDITIONAL INFORMATION.

4.) ALL BOLTS ON FITTING RESTRAINTS SHALL BE TIGHTENED USING A TORQUE WRENCH ONLY FOLLOWING THE MANUFACTURER'S SPECIFICATIONS. THE CONTRACTOR SHALL BE PREPARED TO VERIFY THE TORQUE OF THE BOLTS WITH A TORQUE WRENCH IN THE PRESENCE OF THE BCA INSPECTOR AND SHALL HAVE A TORQUE WRENCH AVAILABLE ON SITE UNTIL JOB ACCEPTANCE.

5.) GLUED JOINTS **SHALL NOT BE** USED IN ANY MAINLINE PVC FITTINGS OR PIPE 3" OR LARGER IN DIAMETER UNLESS SPECIFICALLY DENOTED ON PLANS OR DETAILS INCLUDED IN THIS DRAWING SET.

6.) THRUST BLOCKS **SHALL ONLY BE** USED FOR MAINLINE FITTINGS WHERE SPECIFICALLY DESIGNATED IN PLANS OR DETAILS.

505	RESTRAINED FITTINGS FOR 3" MAINLINE

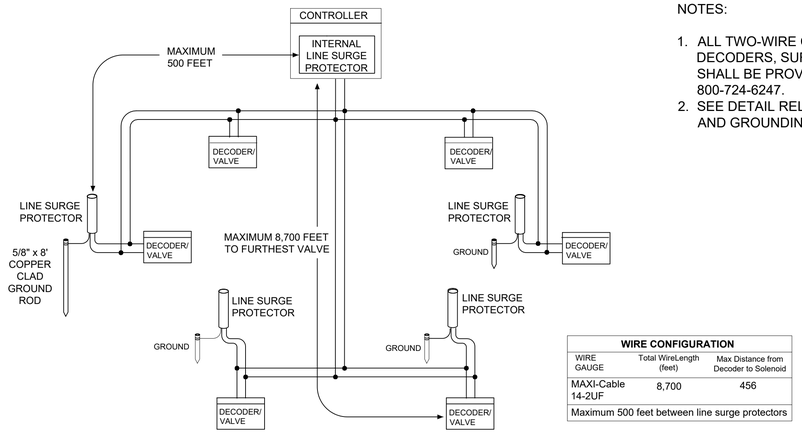
SHEET 86 OF 129 SHEETS



NOTES:

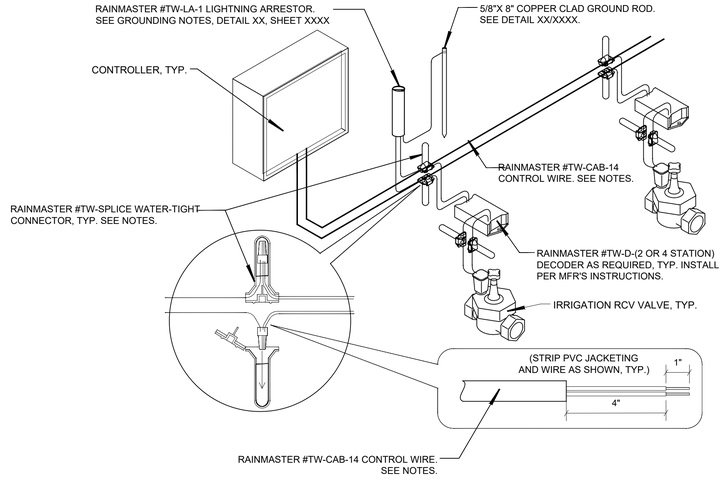
1. ALL TWO-WIRE COMPONENTS (WIRE, DECODERS, SURGE PROTECTORS, ETC.) SHALL BE PROVIDED BY RAINBIRD, 800-724-6247.
2. SEE DETAIL RELATED DETAILS FOR WIRING AND GROUNDING CONNECTIONS.

WIRE CONFIGURATION

WIRE GAUGE	Total WireLength (feet)	Max Distance from Decoder to Solenoid
MAXI-Cable 14-2UF	8,700	456
Maximum 500 feet between line surge protectors		

602 | 2-WIRE SYSTEM LAYOUT

N.T.S. | B.O.E. 02/16/18 | L1372



WIRING NOTES:
1.) CONTROL WIRE SHALL BE RAINMASTER #TW-CAB-14 OR APPROVED EQUAL: POLYETHYLENE DOUBLE-JACKETED OR UF-B UL PVC DOUBLE-JACKETED TWO-CONDUCTOR SOLID CORE DESIGNED FOR DIRECT BURIAL WITH INSULATION 3/16 INCH (.060) THICK, HIGH DENSITY, SUNLIGHT RESISTANT INCASED IN AN OUTER JACKET OF POLYETHYLENE OR PVC CONFORMING TO ICEA S-GL-402 OR NEMA WC5, HAVING A MINIMUM WALL THICKNESS OF .045 INCHES. (TWO-WIRE POLYETHYLENE "TWISTED" CABLE OR SINGLE STRAND 14-GAUGE PVC IRRIGATION WIRE DOES NOT CONFORM TO THESE SPECIFICATIONS AND WILL NOT BE ACCEPTED).

2.) ALL WIRE INSULATION SHALL BE INTACT AND FREE OF NICKS AND CUTS

3.) ATTACHING DECODERS:

- TWIST WIRES TO PROVIDE A SOLID MECHANICAL CONNECTION BEFORE SECURING THE ATTACHMENT BY ADDING THE WIRE NUT.
- RAINMASTER #TW-SPLICE-14 OR APPROVED EQUAL (SURESPLICE, TRADEMARKED) GEL FILLED CONNECTORS (OR SIMILAR) SHALL BE USED ON ALL CONNECTIONS.
- GREASE FILLED WIRE NUTS WILL NOT BE ACCEPTED.
- TEST ALL CONNECTIONS BEFORE IMMERSING THE WIRE NUT IN THE GEL-FILLED CAP.
- ADHERE TO ALL LOCAL AND NATIONAL BUILDING AND ELECTRICAL CODES.
- CONTRACTOR SHALL GUARANTEE ALL WIRE CONNECTIONS TO BE ABSOLUTELY WATER TIGHT.

4.) ALL EQUIPMENT SHALL BE INSTALLED PER THE MANUFACTURER'S SPECIFICATIONS.

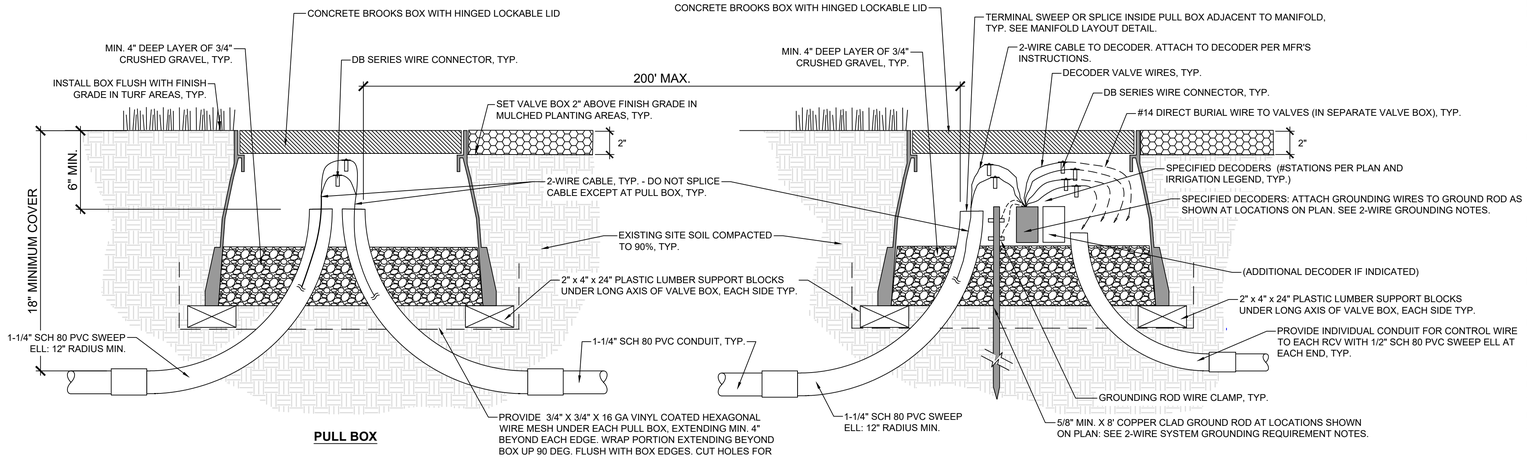
WORK ORDER EW40078F

SHEET NAME LI06

SHEET 87 OF 129 SHEETS



NOTES:

1. ALL CONDUIT AND FITTINGS SHALL BE SCHEDULE 80 PVC. CHANGES IN DIRECTION OF CONDUIT PATH SHALL NOT EXCEED 360 DEG. FOR EACH SECTION BETWEEN PULL BOXES.
2. MAXIMUM DISTANCE BETWEEN PULL BOXES SHALL BE 200 FEET.
3. MAXIMUM LENGTH OF SECONDARY WIRE PATH (14 AWG) FROM FIELD DECODER TO SOLENOID IS 450 FEET.
4. PROVIDE A COIL OF MIN. 24" OF 2-WIRE CABLE AT EACH SPLICE OR DECODER CONNECTION POINT.

TWO-WIRE SYSTEM GROUNDING REQUIREMENTS:

SURGE PROTECTION USING PROPER GROUNDING RODS IS REQUIRED FOR PROTECTION AGAINST SURGE DAMAGE DUE TO LIGHTNING OR OTHER ELECTRICAL SURGE EVENTS. CONFORMANCE TO THIS SURGE SUPPRESSION SPECIFICATION IS NECESSARY TO RETAIN WARRANTY PROTECTION UNDER MANUFACTURER'S WARRANTY TERMS.

THE INSTALLATION SHALL CONFORM TO MANUFACTURER'S INSTRUCTIONS, AND MUST MEET OR EXCEED THE AMERICAN SOCIETY OF IRRIGATION CONSULTANTS (ASIC) EARTH GROUNDING GUIDELINE 100-2002.
HTTP://WWW.ASIC.ORG/UPLOADS/ASSETS/011007_121320_ASIC_GROUNDING_GUIDELINES.DOC

GROUND RODS AS REFERRED TO IN THIS SPECIFICATION SHALL CONFORM TO THE FOLLOWING STANDARDS:

1.) ALL GROUNDING RODS SHALL BE BARE COPPER OF 5/8" DIAMETER OR GREATER, AND 8' LENGTH OR GREATER.

2.) A MEASURED RESISTANCE READING OF NO MORE THAN 10 OHMS IS NECESSARY AT EACH LIGHTNING ARRESTOR. ASIC SPEC: SECTION 7.0 - MEASURING RESISTANCE, ITEM A.

GROUND RODS SHALL BE LOCATED AT A MINIMUM DISTANCE TO ASSURE THAT THE TWO-WIRE PATH IS OUTSIDE OF THE ELECTRODE SPHERE OF INFLUENCE FOR THE GROUNDING ROD: THE GROUND ROD MUST BE CONNECTED AT LEAST 8' AWAY FROM THE TWO-WIRE PATH, AT A RIGHT ANGLE TO THE TWO-WIRE PATH.

UNDER NO CIRCUMSTANCES SHOULD A GROUND ROD BE INSTALLED IN OR UNDER A VALVE BOX, METER BOX OR ELECTRICAL BOX.

CONNECTIONS TO GROUNDING RODS:
ALL CONNECTIONS TO GROUND RODS SHALL CONFORM TO ASIC EARTH GROUNDING GUIDELINE 100-2002, AND SHALL CONSIST OF A SCREW CLAMP TYPE OF CONNECTION.

ANY WIRE EXTENSIONS REQUIRED TO CONNECT FROM A GROUND ROD TO A LIGHTNING ARRESTOR OR ENCLOSURE GROUND LUG SHALL BE BARE COPPER, AND SHALL NOT HAVE ANY SHARP BENDS OR KINKS. WIRE EXTENSIONS CONNECTED TO LIGHTNING ARRESTORS SHALL USE A CADWELD TYPE OR SCREW CLAMP TYPE CONNECTION WHERE THE BARE COPPER GROUND WIRE MEETS THE GREEN GROUNDING WIRE FROM THE LIGHTNING ARRESTOR.

701	2-WIRE CABLE INSTALLATION AND GROUNDING

DESIGN CRITERIA:

CODES:
CBC-2019 (CALIFORNIA BUILDING CODE 2019)

ACI 318-14 (BUILDING CODE REQUIREMENTS FOR STRUCTURAL CONCRETE)

ACI 350-06 (CODE REQUIREMENTS FOR ENVIRONMENTAL ENGINEERING CONCRETE STRUCTURES)

DESIGN LOADS:

DEAD LOADS:
INCLUDE WEIGHT OF ALL MATERIALS OF CONSTRUCTION

LIVE LOADS:

TOP SLABS	200	PSF (NON-REDUCIBLE)

RISK CATEGORY III

WIND DESIGN DATA:

BASIC WIND SPEED V_{ULT}	101	MPH (ULTIMATE)
V_{ASD}	78	MPH (ALLOWABLE)
EXPOSURE CATEGORY	C	

SEISMIC DESIGN DATA:

SOIL SITE CLASS	D
MAPPED SPECTRAL RESPONSE ACCELERATIONS	
SHORT PERIOD	Ss = 2.446g
ONE SECOND PERIOD	S1 = 0.826g
SPECTRAL RESPONSE COEFFICIENTS	
SHORT PERIOD	Sds = 1.595g
ONE SECOND PERIOD	Sd1 = 1.260g
SEISMIC DESIGN CATEGORY	D
SEISMIC IMPORTANCE FACTOR	Ie = 1.25

SNOW:

GROUND SNOW LOAD Pg	0 PSF (NON-REDUCIBLE)

FOUNDATIONS:

FOR GEOTECHNICAL INFORMATION, REFER TO "STORMWATER CAPTURE PARKS PROGRAM DAVID M. GONZALES RECREATION CENTER GEOTECHNICAL INVESTIGATION" DATED AUGUST 31ST, 2020 BY NINYO & MOORE IRVINE, CA

ALLOWABLE BEARING PRESSURE = 4000 PSF (MAT FOUNDATION)
1/3 INCREASE IN BEARING PRESSURE FOR SHORT TERM LOADING IS ALLOWED

ALL EXTERIOR FOUNDATIONS SHALL EXTEND TO A DEPTH = 18"

LATERAL SOIL PRESSURES:
AT-REST = 57 PSF
PASSIVE = 300 PSF
SEISMIC = 52*H PSF (TRIANGULAR - WHERE H IS HEIGHT OF SOIL)
SURCHARGE COEFFICIENT = 0.47
STRUCTURAL FILL COMPACTION = 90% (ASTM D1557)

FOUNDATION PREPARATION:

FOUNDATION SHALL BE PLACED ON A MINIMUM OF 2 FT OF NEW STRUCTURAL FILL.
SEE CIVIL DRAWINGS FOR STRUCTURAL FILL AND OVER EXCAVATION REQUIREMENTS.

SEISMIC REQUIREMENTS - NON-STRUCTURAL COMPONENTS:

IN ACCORDANCE WITH THE REQUIREMENTS OF THE CBC AND BY REFERENCE ASCE 7-16, ALL MECHANICAL, ELECTRICAL AND NON-STRUCTURAL COMPONENTS AND EQUIPMENT AND ANCHORAGES SHALL BE DESIGNED IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 13 OF ASCE 7 WITH A COMPONENT IMPORTANCE FACTOR Ip=1.0

FOR THIS PURPOSE, ALL COMPONENTS AND EQUIPMENT SHALL BE CONSIDERED TO HAVE THE SAME SEISMIC DESIGN CATEGORY AS THAT OF THE STRUCTURE THEY OCCUPY.

GENERAL CONDITIONS:

ALL STRUCTURAL DRAWINGS SHALL BE USED IN CONJUNCTION WITH THE OTHER PROJECT DRAWINGS AND SPECIFICATIONS.

SEE MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS FOR ANCHORS, PIPE SLEEVES, CONDUITS OR OTHER ITEMS TO BE EMBEDDED IN OR PASS THROUGH THE STRUCTURE MEMBERS. IN GENERAL, EMBEDMENTS AND PENETRATIONS LESS THAN 12 INCHES IN DIAMETER ARE NOT SHOWN ON STRUCTURAL DRAWINGS.

STANDARD DETAILS SHALL BE USED AT ALL APPLICABLE LOCATIONS, UNLESS NOTED OTHERWISE ON DRAWINGS.

SEE CIVIL SITE PLANS FOR STRUCTURE LOCATION COORDINATES.

FIELD VERIFY ALL EXISTING DIMENSIONS PRIOR TO CONSTRUCTION.

WRITTEN DIMENSIONS SHALL TAKE PRECEDENCE OVER SCALED SIZES.

CONSTRUCTION NOTES:

TEMPORARY SHORING SHALL NOT BE REMOVED UNTIL THE FULL STRENGTH (f'c) ACHIEVED.

PRIOR TO INSTALLATION OF EQUIPMENT COORDINATE AND CONFIRM THE ANCHORAGE REQUIREMENTS WITH THE MANUFACTURER. THE ANCHORAGE SYSTEM SHALL NOT DAMAGE THE CONCRETE.

CONTRACTOR SHALL VERIFY ALL DIMENSIONS IN THE FIELD. THE ENGINEER SHALL BE NOTIFIED OF ANY DISCREPANCY BETWEEN DRAWINGS IMMEDIATELY UPON DISCOVERY.

CAST-IN-PLACE CONCRETE:

REINFORCED CONCRETE SHALL CONFORM TO ACI 318, ACI 350, ACI 301 & ACI 350.5.

REINFORCING STEEL FABRICATION SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF THE CRSI MANUAL OF STANDARD PRACTICE.

ALL EXPOSED CORNERS OF CONCRETE SHALL HAVE 3/4" CHAMFER, UNLESS OTHERWISE NOTED.

WALL REINFORCEMENT AT CORNERS OR JUNCTIONS OF WALLS SHALL BE CONTINUOUS, LAPPED, OR TERMINATED IN AN ACI STANDARD 90 DEGREE STANDARD HOOK DETAIL. LAP SPLICES SHALL CONFORM WITH THE TABLE ON THE STANDARD DETAIL SHEETS.

UNLESS OTHERWISE INDICATED ON THE DRAWINGS, BARS SHALL BE DOWELED. DOWELS SHALL BE THE SAME SIZE AND SPACING AS THE REINFORCEMENT WHICH IS SPLICED UNLESS OTHERWISE NOTED.

SLAB, BEAM, AND COLUMN REINFORCING BARS SHALL HAVE A MINIMUM EXTENSION OR ANCHORAGE INTO SUPPORTS IN ACCORDANCE WITH ACI 318 AND ACI 350.

STIRRUP SUPPORT BARS SHALL BE PROVIDED AS REQUIRED TO SECURE TOP BARS AGAINST DISPLACEMENT.

UNLESS OTHERWISE INDICATED ON THE DRAWINGS, CONCRETE COVER OVER #11 AND SMALLER REINF BARS SHALL BE AS FOLLOWS:

SLABS:
FORMED CONCRETE SURFACES AND UNFORMED TOP SURFACES FOR DRY CONDITIONS.....2"
FORMED CONCRETE SURFACES AND UNFORMED TOP SURFACES EXPOSED TO WEATHER, IN CONTACT WITH SOIL OR FLUIDS, OR LOCATED OVER FLUIDS.....2"
AT UNFORMED CONCRETE SURFACES CAST AGAINST THE SOIL OR CONCRETE WORK MATS..... 3"
BEAMS:
FORMED CONCRETE SURFACES FOR DRY CONDITIONS:
STIRRUPS, SPIRALS AND TIES.....2"
PRINCIPAL REINFORCEMENT.....2 1/2"
FORMED CONCRETE SURFACES EXPOSED TO WEATHER, IN CONTACT WITH SOIL OR FLUIDS, OR BEAMS LOCATED OVER FLUIDS:
STIRRUPS AND TIES.....2"
PRINCIPAL REINFORCEMENT.....2 1/2"
WALLS:
FORMED CONCRETE SURFACES FOR DRY CONDITIONS..... 2"
FORMED CONCRETE SURFACES EXPOSED TO WEATHER OR IN CONTACT WITH SOIL OR FLUIDS.....2"

CONCRETE COVER IS THE LEAST DISTANCE BETWEEN EMBEDDED REINFORCEMENT AND THE SURFACE OF THE CONCRETE. THE SURFACE OF THE CONCRETE IS THE BOTTOM OF RUSTICATION OR REVEAL STRIPS WHEN USED.

NO BACKFILL SHALL BE PLACED AGAINST WALLS UNTIL CONCRETE HAS REACHED THE SPECIFIED STRENGTH AND ALL CONNECTING SLABS AND BEAMS PROVIDING SUPPORT TO THE WALLS HAVE BEEN CAST AND HAVE REACHED THE SPECIFIED STRENGTH. BACKFILL MATERIALS AND TECHNIQUE SHALL FOLLOW THE GEOTECHNICAL REPORT RECOMMENDATIONS.

CONCRETE ANCHORS AND POST-INSTALLED REBAR:

CONTRACTOR SHALL LOCATE EXISTING REINFORCING USING NON-DESTRUCTIVE METHODS PRIOR TO DRILLING HOLES FOR ADHESIVE AND EXPANSION ANCHORS. ADJUST SPACING OF ANCHORS TO MISS REINFORCING, AND SUBMIT FOR APPROVAL OF THE ENGINEER.

ADHESIVE FOR EMBEDDED DOWELS AND ANCHORS IN CONCRETE SHALL BE HILTI HIT-HY-200 (ICC EVALUATION REPORT 3187), OR APPROVED EQUAL. ALL DRILLED HOLES SHALL BE SIZED ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.

EXPANSION ANCHORS IN CONCRETE SHALL BE HILTI KWIK BOLT TZ, (ICC EVALUATION REPORT 1917) OR APPROVED EQUAL.

CONCRETE JOINTS:

CONSTRUCTION JOINTS SHALL NOT BE PLACED AT LOCATIONS OTHER THAN THOSE SHOWN ON THE DRAWINGS WITHOUT THE PRIOR WRITTEN APPROVAL OF THE ENGINEER.

CONSTRUCTION JOINTS AND SURFACES SHALL BE PREPARED IN ACCORDANCE WITH SPECIFICATIONS.

MISCELLANEOUS METALS:

ANCHORS AND FASTENERS FOR ALUMINUM CONSTRUCTION SHALL BE TYPE 316 STAINLESS STEEL UNLESS NOTES OTHERWISE.

ALL ANGLE FRAMES ARE TO BE MITERED AND WELDED OR MOLDED AT CORNERS.

HOT-DIP GALVANIZING, SHOP PAINTING AND FIELD PAINTING, WHERE REQUIRED, SHALL BE IN ACCORDANCE WITH THE SPECIFICATIONS.

PROVIDE ANTI-SEIZE COMPOUND FOR STAINLESS STEEL OR ALUMINUM HARDWARE.

TYPICAL STRUCTURAL MATERIALS:

SEE PROJECT SPECIFICATIONS AND NOTES ON DRAWINGS FOR INDIVIDUAL STRUCTURES FOR DETAILED OR SPECIAL REQUIREMENTS.

CONCRETE
STRUCTURAL CONCRETE: f'c = 4500 PSI
SITE WORK CONCRETE, INCLUDING FILL DUCT ENCASEMENT AND MISC. CIVIL STRUCTURES, WHERE NOTED: f'c = 3000 PSI
REINFORCING STEEL: ASTM A615, GRADE 60 (Fy = 60,000 PSI)
CEMENT: ASTM C150, TYPE II

STRUCTURAL STEEL:
MISC PLATES AND BARS - ASTM A36
ANCHOR RODS: ASTM F1554, 3/4" Ø MINIMUM UNO (Fy = 36 KSI)
WELDING ELECTRODES: E70XX (Ft = 70 KSI)

STRUCTURAL ALUMINUM:
ALLOY: 6061-T6
SHAPES: ASTM B308
SHEET: ASTM B209
BOLTS, NUTS AND WASHERS: TYPE 316 STAINLESS STEEL OR TYPE 2024-T4
WELDING FILLER MATERIAL: 5356

ABBREVIATIONS:

ABBREVIATIONS AND DESIGNATIONS FOR STEEL MEMBERS MAY BE FOUND IN THE CURRENT MANUAL OF STEEL CONSTRUCTION MANUAL BY AISC.

ABBREVIATIONS OF TECHNICAL SOCIETIES AND TRADE ASSOCIATIONS MAY BE FOUND IN THE SPECIFICATIONS.

WELDING SYMBOLS AND ABBREVIATIONS MAY BE FOUND IN AWS 2.4.

DEFERRED DESIGN

THE FOLLOWING PORTIONS OF THE PROJECT ARE DEFERRED DESIGN ITEMS AND HAVE NOT BEEN DESIGNED BY THE ENGINEER OF RECORD:

a. PRECAST STRUCTURES AND CONNECTIONS
b. PIPE SUPPORTS AND ANCHORAGE
c. EQUIPMENT AND ELECTRICAL GEAR ANCHORAGE

DEFERRED DESIGN ITEMS SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW DURING THE CONSTRUCTION PHASE OF THE PROJECT.

DEFERRED DESIGN ITEMS SHALL BE STAMPED AND SEALED BY A REGISTERED CALIFORNIA CIVIL OR STRUCTURAL ENGINEER.

DEFERRED DESIGN ITEMS SHALL NOT BE ERECTED OR INSTALLED UNTIL ENGINEER OF RECORD HAS REVIEWED THE SUBMITTAL DOCUMENTS AND INDICATED THAT THEY HAVE BEEN FOUND TO BE IN GENERAL CONFORMANCE WITH THE DESIGN OF THE STRUCTURE.

LEAK TEST FOR LIQUID CONTAINING STRUCTURES

LEAK TESTING SHALL BE PREFORMED ON LIQUID CONTAINING CONCRETE BASINS IN ACCORDANCE WITH ACI 350.1. LEAK TEST SHALL BE PERFORMED PRIOR TO BACKFILLING AND WITH ROOF SLAB INSTALLED. WATER LEVEL FOR TESTING SHALL BE TO THE FOLLOWING ELEVATIONS:

a. GATE VAULT NO. 1 = EL 1037.12
b. GATE VAULT NO. 2 = EL 1035.58
c. DIVERSION STRUCTURE NO. 1 = EL 1044.25
d. DIVERSION STRUCTURE NO. 2 = EL 1034.92
e. INLET STRUCTURE = NOT REQUIRED

STRUCTURAL OBSERVATION:

STRUCTURAL OBSERVATIONS SHALL BE CONDUCTED IN ACCORDANCE WITH THE REQUIREMENTS SET FORTH IN CHAPTER 17 OF THE CBC.

IN ACCORDANCE WITH THE REQUIREMENTS OF CHAPTER 1704 OF THE CBC, THE OWNER SHALL EMPLOY A REGISTERED DESIGN PROFESSIONAL TO PERFORM STRUCTURAL OBSERVATIONS FOR SEISMIC RESISTANCE. SITE VISITS SHALL BE MADE TO OBSERVE GENERAL COMPLIANCE WITH THE APPROVED STRUCTURAL PLANS, SPECIFICATIONS AND CHANGE ORDERS. THE REGISTERED DESIGN PROFESSIONAL SHALL SUBMIT A STATEMENT IN WRITING TO THE BUILDING OFFICIAL AND OWNER STATING THAT THE SITE VISITS HAVE BEEN MADE AND IDENTIFY ANY REPORTED DEFICIENCIES THAT, TO THE BEST OF THE STRUCTURAL OBSERVER'S KNOWLEDGE, HAVE NOT BEEN RESOLVED. STRUCTURAL OBSERVATIONS DO NOT INCLUDE OR WAIVE THE INSPECTIONS REQUIRED BY SECTIONS 109, 1705 OR OTHER SECTIONS OF THE CODE.

PER CBC 1704.6, ALL CAST-IN-PLACE CONCRETE STRUCTURES ARE SUBJECT TO STRUCTURAL OBSERVATION AT A FREQUENCY OF ONCE PER STRUCTURE PER ELEMENT DURING REINFORCMENT INSTALLATION FOR EACH OF THE FOLLOWING ELEMENTS: FOUNDATIONS, WALLS, AND TOP SLABS.

SCHEDULE OF SPECIAL INSPECTIONS

1. THIS DRAWING IS PROVIDED TO OUTLINE THE MINIMUM LEVEL OF SPECIAL INSPECTIONS DURING CONSTRUCTION TO ENSURE CONFORMANCE TO THE REQUIREMENTS OF THE CONTRACT DOCUMENTS. A STATEMENT OF SPECIAL INSPECTIONS WILL BE PREPARED BY A REGISTERED DESIGN PROFESSIONAL AND SUBMITTED WITH THE BUILDING PERMIT APPLICATION.

2. SPECIAL INSPECTIONS WILL BE CONDUCTED IN ACCORDANCE WITH THE REQUIREMENTS SET FORTH IN CHAPTER 17 OF THE CALIFORNIA BUILDING CODE (CBC).

3. IN ACCORDANCE WITH THE REQUIREMENTS OF CHAPTER 17 OF THE CALIFORNIA BUILDING CODE, THE OWNER WILL PROVIDE A SPECIAL INSPECTOR (AN APPROVED AGENCY OR AGENCIES, INDEPENDENT FROM THE CONTRACTOR AND EMPLOYING QUALIFIED PERSONNEL) TO PERFORM SPECIAL INSPECTIONS IDENTIFIED IN THE STATEMENT OF SPECIAL INSPECTIONS. THE SPECIAL INSPECTOR WILL FURNISH INSPECTION REPORTS TO THE ENGINEER AND BUILDING OFFICIAL.

4. SPECIAL INSPECTIONS SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR QUALITY CONTROL OF THE WORK OR FOR CONFORMANCE TO THE REQUIREMENTS OF THE CONTRACT DOCUMENTS. DETECTION, OR FAILURE TO DETECT, DEFECTS IN THE WORK SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY TO CORRECT ALL DEFECTS IN THE WORK, WHETHER DETECTED OR NOT, AND OF RESPONSIBILITY FOR CONFORMANCE TO THE REQUIREMENTS OF THE CONTRACT DOCUMENTS.

5. REMOVE AND REPLACE, OR REPAIR, DEFECTS IN THE WORK AND WORK NOT IN CONFORMANCE WITH THE REQUIREMENTS OF THE CONTRACT DOCUMENTS AT NO ADDITIONAL COST TO THE OWNER. CONTRACTOR SHALL BEAR THE COSTS FOR THE INSPECTION OF ANY REPLACED OR REPAIRED PORTIONS OF THE WORK.

6. CONTRACTOR SHALL COOPERATE WITH SPECIAL INSPECTIONS BY PROVIDING SUFFICIENT NOTICE FOR THE SCHEDULING OF PERSONNEL AND BY ALLOWING FREE AND SAFE ACCESS TO THE WORK FOR OBSERVATION, VERIFICATION, SAMPLING AND INSPECTION. PROVIDE AND PERMIT THE USE OF LADDERS, SCAFFOLDING, INCIDENTAL EQUIPMENT, AND SAFETY EQUIPMENT AS MAY BE REQUIRED TO CONDUCT SPECIAL INSPECTIONS. ALL SUCH PROVISIONS FOR FREE AND SAFE ACCESS AND EQUIPMENT SHALL BE SAFE, IN GOOD WORKING CONDITION, AND ERECTED, MAINTAINED, AND HANDLED BY QUALIFIED PERSONNEL.

7. SPECIAL INSPECTIONS DO NOT APPLY TO CONTRACTOR'S EQUIPMENT, TEMPORARY STRUCTURES USED FOR CONSTRUCTION, MEANS AND METHODS OF CONSTRUCTION, OR SITE SAFETY. CONTRACTOR SHALL REMAIN RESPONSIBLE FOR ADEQUACY AND SAFETY OF EQUIPMENT, TEMPORARY STRUCTURES USED FOR CONSTRUCTION, MEANS AND METHODS OF CONSTRUCTION AND SITE SAFETY.

REVISION DATES (DESIGN STAGE ONLY)

GENERAL NOTES

RACEWAYS

1. CONDUIT RUNS WHERE SHOWN ARE DIAGRAMMATIC, AND SHOULD BE RUN TO SUIT SITE CONDITIONS EXCEPT WHERE SHOWN DIMENSIONED ON THE DRAWINGS. THE RACEWAY SYSTEM SHALL COMPLY WITH ALL CODES, INCLUDING BUT NOT LIMITED TO:
   a. NEC.
   b. CITY OF LA ELECTRICAL CODES AND PLAN CHECK REQUIREMENTS.
   c. GROUNDING PER NEC ARTICLE 250.
2. CONTRACTOR SHALL PROVIDE AND INSTALL ALL NECESSARY CONDUITS, FITTINGS, JUNCTION BOXES AND ALL NECESSARY COMPONENTS WHETHER SHOWN OR NOT ON THE DRAWINGS. TO MAKE ELECTRICAL INSTALLATION COMPLETE AND OPERATIONAL.
3. ALL ELECTRICAL CONDUITS ARE SHOWN DIAGRAMMATICALLY AND PANEL AND EQUIPMENT LOCATIONS SHALL BE PLACED TO SUIT FIELD CONDITIONS.
4. ELECTRICAL CONTRACTOR TO LIMIT THE NUMBER OF 90° BENDS BETWEEN PULL POINTS TO COMPLY WITH THE REQUIREMENTS OF THE CALIFORNIA ELECTRICAL SAFETY ORDERS, THE NATIONAL ELECTRICAL CODE AND THE LOS ANGELES CITY ELECTRICAL CODE.
5. PROVIDE 30" (MAXIMUM) LENGTH OF FLEXIBLE CONDUIT WHERE RIGID CONDUIT TERMINATES AT EQUIPMENT SUBJECT TO MOVEMENT FROM VIBRATION, EXPANSION AND CONTRACTION.
6. ELECTRICAL CONTRACTOR SHALL PROVIDE GALVANIZE STEEL SUPPORTS FOR ALL ELECTRICAL WORK (CONDUIT, PANELS, BOXES ETC.)
7. CONDUITS TERMINATED AT MOTOR CONTROL CENTER, SWITCHGEAR CONTROL CABINETS, ETC, SHALL BE EQUIPPED WITH GROUNDING BUSHINGS AND SHALL BE EFFECTIVELY BONDED TO GROUNDING BUSES.
8. ALL OUTDOOR ELECTRICAL DEVICES AND ENCLOSURES SHALL BE WEATHERPROOF AND CORROSION RESISTANT (NEMA 4X OR 3R) ALL INDOOR DEVICES AND ENCLOSURES SHALL BE NEMA 12.
9. SWITCHGEAR, MOTOR CONTROL CENTERS, AND ALL OUTDOOR FREE STANDING CABINETS/PANELS SHALL BE SET ON A 4" HIGH MINIMUM CONCRETE PAD.
10. ALL SWITCHES, PULL BOXES, ETC. SHALL BE MOUNTED 48" ABOVE FLOOR SURFACES UNLESS NOTED OTHERWISE.
11. ALL BENDS IN CABLES SHALL BE MADE SO THAT THE PROTECTIVE COVERING OF THE CABLE WILL NOT BE INJURED. NO BEND SHALL HAVE A RADIUS LESS THAN THE MINIMUM RECOMMENDED BY THE CABLE MANUFACTURER.
12. THE MINIMUM SIZE OF CONDUIT INSTALLED ABOVE GRADE SHALL BE 3/4" UNLESS OTHERWISE NOTED.
13. INSTALLATIONS SHALL BE IN ACCORDANCE WITH ALL CODES AND STANDARDS. ALL LIGHTING AND RECEPTACLE CIRCUITS SHALL INCLUDE 1#12 GROUND WIRE.
14. ALL ABOVE GRADE CONDUITS AND FITTINGS SHALL BE RIGID GALVANIZED STEEL. USE RIGID STEEL CONDUIT, INCLUDING BUSHINGS, COUPLINGS, ELBOWS, NIPPLES, AND OTHER FITTINGS, GALVANIZED BY HOT-DIPPING, AND MEETING THE REQUIREMENTS OF ANSI C80.1, ANSI C80.4, UL, AND THE LAEC. DO NOT USE SETSCREW TYPE COUPLINGS, BUSHINGS, BENDS, NIPPLES, AND OTHER FITTINGS, UNLESS APPROVED BY THE ENGINEER OR THE INSPECTOR. FACTORY BENDS ARE NOT PERMITTED UNLESS APPROVED BY THE ENGINEER OR THE INSPECTOR.
15. REQUIRE ALL INSTALLED UNDERGROUND CONDUITS, ENCASED IN CONCRETE SHALL BE PVC SCHEDULE 40 AS A MINIMUM. ALL UNDERGROUND CONDUIT SHALL BE BURIED A MINIMUM OF 24 INCHES BELOW GRADE WITH TRACEABLE WARNING TAPE 12" ABOVE CONDUIT. SEE TYPICAL CONDUIT PLACEMENT IN TRENCH DETAIL (SEE SHEET EP08, DETAIL E-16).

CONDUCTORS

1. PROVIDE CONDUCTORS WITH TYPE THW OR TYPE THHN/THWN INSULATION, EXCEPT FOR SIZES NO. 6 AND LARGER SHALL HAVE WITH XHHW INSULATION.
2. ALL POWER AND CONTROL CABLES SHALL BE COPPER. NETWORK CABLES SHALL BE FIBER OPTIC CABLE WHERE SPECIFIED.
3. PROVIDE CABLE THAT IS UL LISTED TYPE TC AND CONFORMS TO THE REQUIREMENTS OF UL 1277 AND NEC ARTICLE 340, OR UL LISTED POWER LIMITED CIRCUIT CABLE THAT CONFORMS TO THE REQUIREMENTS OF ARTICLE 725 OF THE LAEC. PROVIDE CABLES PERMANENTLY AND LEGIBLY MARKED WITH THE MANUFACTURER'S NAME, THE MAXIMUM WORKING VOLTAGE FOR WHICH THE CABLE WAS TESTED, THE TYPE OF CABLE, AND LABELED UL (OR SUBMIT EVIDENCE OF UL LISTING).
4. ACCEPTABLE MANUFACTURERS: SOUTHWIRE, HOUSTON WIRE AND CABLE COMPANY, BELDEN ALPHA WIRE COMPANY, GENERAL CABLE OR EQUAL.

TYPE 1 (600-VOLT MULTI-CONDUCTOR CONTROL CABLE, TYPE TC)

1. MULTI-CONDUCTOR CONTROL CIRCUIT INTERCONNECTION CABLE WITH GROUND. SUITABLE FOR INSTALLATION IN OPEN AIR, IN CABLE TRAYS, CONDUIT, OR OTHER APPROVED RACEWAYS. MAXIMUM CABLE TEMPERATURE RATING 90 DEGREES C DRY LOCATIONS, 75 DEGREES C WET LOCATIONS. PASSES VERTICAL TRAY FLAME TEST.

TYPE 2 (600-VOLT NO. 16 AWG TWISTED, SHIELDED PAIR INSTRUMENTATION CABLE, TYPE TC)

1. SINGLE PAIR INSTRUMENTATION CABLE DESIGNED FOR NOISE REJECTION FOR PROCESS CONTROL, COMPUTER, OR DATA LOG APPLICATIONS. SUITABLE FOR INSTALLATION IN CABLE TRAYS, CONDUIT, OR OTHER APPROVED RACEWAYS. MAXIMUM CABLE TEMPERATURE RATING SHALL BE 90 DEGREES C DRY LOCATIONS, 75 DEGREES C WET LOCATIONS.
2. INDIVIDUAL CONDUCTORS: BARE SOFT ANNEALED COPPER, CLASS B, 7-STRAND CONCENTRIC PER ASTM B 8; 20 AWG, 7-STRAND TINNED COPPER DRAIN WIRE.

TYPE 3 (600-VOLT MULTI-CONDUCTOR POWER CABLE, TYPE TC):

1. 3 OR 4 -CONDUCTOR, WITH GROUND AND OVERALL JACKET. SUITABLE FOR INSTALLATION IN OPEN AIR, IN CABLE TRAYS, CONDUIT, OR OTHER APPROVED RACEWAYS. MAXIMUM CABLE TEMPERATURE RATING 90 DEGREES C DRY LOCATIONS, 75 DEGREES C WET LOCATIONS.
2. INDIVIDUAL CONDUCTORS: CLASS B STRANDED, COATED, OR UNCOATED COPPER.

TYPE 4 (600-VOLT NO. 16 TWISTED, SHIELDED TRIAD INSTRUMENTATION CABLE, TYPE TC):

1. SINGLE TRIAD INSTRUMENTATION CABLE DESIGNED FOR NOISE REJECTION FOR PROCESS CONTROL, COMPUTER, OR DATA LOG APPLICATIONS. SUITABLE FOR INSTALLATION IN CABLE TRAY, CONDUIT, OR OTHER APPROVED RACEWAYS. MAXIMUM CABLE TEMPERATURE RATING SHALL BE 90 DEGREES C DRY LOCATIONS, 75 DEGREES C WET LOCATIONS.
2. CONDUCTORS: BARE SOFT ANNEALED COPPER, CLASS B, 7-STRAND CONCENTRIC PER ASTM B 8; 20 AWG, 7-STRAND, TINNED COPPER DRAIN WIRE.

TYPE 5 (600-VOLT NO. 18 AWG, MULTI-TWISTED SHIELDED PAIRS WITH A COMMON OVERALL SHIELD INSTRUMENTATION CABLE, TYPE TC):

1. TWISTED, SHIELDED PAIRS OF INSTRUMENT CABLES, GROUPED IN A SINGLE CABLE, DESIGNED FOR USE AS INSTRUMENTATION, PROCESS CONTROL, AND COMPUTER CABLE. SUITABLE FOR INSTALLATION IN CABLE TRAY, CONDUIT, OR OTHER APPROVED RACEWAYS. MAXIMUM CABLE TEMPERATURE RATING SHALL BE 90 DEGREES C DRY LOCATIONS, 75 DEGREES C WET LOCATIONS.
2. BARE SOFT ANNEALED COPPER, CLASS B, 7-STRAND, CONCENTRIC PER ASTM B 8. TINNED COPPER DRAIN WIRES. PAIR DRAIN WIRE SIZE AWG 20, GROUP DRAIN WIRE SIZE AWG 18.

GROUNDING

1. ALL METALLIC STRUCTURES AND EQUIPMENT SUCH AS STRUCTURAL STEEL, GENERATOR AND MOTOR FRAMES, ENCLOSURES, CABINETS FOR SWITCHGEAR AND OTHER ELECTRIC EQUIPMENT, METALLIC CONDUITS, CABLE TRAYS, STAIRS, FENCES AND HANDRAILS SHALL BE PERMANENTLY AND EFFECTIVELY GROUNDED. THE GROUND CONNECTION SHALL BE MADE TO THE PLANT GROUND GRID. REFER TO STANDARD DETAILS.
2. ALL GROUNDING CONDUCTORS SHALL BE BARE STRANDED SOFT DRAWN COPPER, CLASS B, UNLESS OTHERWISE NOTED.
3. THE GROUND CABLE SHALL BE INSTALLED, WHERE POSSIBLE, BENEATH SLABS, ATTACHED TO BUILDING STEEL OR RUN IN RACEWAYS AS SHOWN.
4. BURIED GROUND CABLES SHALL BE A MINIMUM OF 18" BELOW GRADE EXCEPT UNDER BUILDINGS WHERE THEY SHALL BE A MINIMUM OF 6" BELOW BOTTOM OF SLAB.
5. CONDUIT RUNS SHALL BE BONDED TOGETHER TO FORM A CONTINUOUS ELECTRICAL CONDUCTOR.
6. WHERE SEAL-TIGHT FLEXIBLE CONDUIT FOR MOTOR CONNECTION IS USED, PROVIDE GROUNDING JUMPER BETWEEN THE RIGID STEEL CONDUIT (MOTOR FEEDER) AND THE MOTOR BOX OR FRAME.
7. GENERATOR CASINGS, EXCITERS, SWITCHGEARS, MOTOR CONTROL CENTERS, LARGE METAL TANKS, TRANSFORMER CORES, AND MOTOR FRAMES LARGER THAN 150HP SHALL BE GROUNDED AT TWO POINTS.
8. THE FRAMES OF MOTORS SMALLER THAN 150HP SHALL BE GROUNDED DIRECTLY TO THE GROUND GRID OR TO THE STEEL COLUMN CONNECTED TO THE GROUND LOOP WITH COPPER WIRE OF SIZE AS REQUIRED BY THE LOS ANGELES CITY ELECTRICAL CODE.
9. ALL EQUIPMENT GROUND TERMINAL LUGS SHALL BE OF THE MECHANICAL TYPE.
10. BENDS IN GROUND CABLE SHALL BE GREATER THAN 12 TIMES THE CABLE OUTSIDE DIAMETER.
11. GROUNDING CONDUCTOR PIGTAIL AND INSERT LOCATIONS ARE APPROXIMATE ONLY. CONTRACTOR SHALL VERIFY IN THE FIELD AND LOCATE THEM CLOSE TO MOTOR, EQUIPMENT, GENERATOR, OR METAL STRUCTURE SERVED.
12. GROUNDING PIGTAIL SHALL BE THE SAME SIZE AS THE PHASE WIRE BUT NO LESS THAN NUMBER 8 AWG.
13. WHERE BARE GROUND CONDUCTORS ARE EXPOSED, CONTRACTOR SHALL PROVIDE PVC SCHEDULE 80 CONDUITS WITH ULTRA-VIOLET LIGHT PROTECTION.
14. ALL FLEXIBLE MOTOR CONDUITS SHALL HAVE OUTER GROUND CONDUCTOR.

EQUIPMENT AND DEVICES

1. ALL EQUIPMENT DIMENSIONS SHOWN ON PLANS AND ELEVATIONS ARE APPROXIMATE ONLY. THE CONTRACTOR SHALL USE THE SHOP DRAWINGS FOR PROPER FOUNDATION AND PAD LAYOUT, ETC. FOR FINAL INSTALLATION WITHOUT ANY ADDITIONAL COST TO THE CITY.
2. IT IS INCUMBENT UPON THE CONTRACTOR TO COORDINATE WITH HIS SUBCONTRACTORS TO MAKE SURE THAT EQUIPMENT SUPPLIERS PROVIDE ALL NECESSARY ELECTRICAL INFORMATION TO THE ELECTRICAL SUBCONTRACTOR FOR INCLUSION OF COSTS IN BID PACKAGE. ALL NECESSARY MATERIALS AND LABOR TO COMPLETE ELECTRICAL INSTALLATION SHALL BE PROVIDED WHETHER SHOWN OR NOT SHOWN ON THE DRAWINGS. ALL ELECTRICAL WORK SHALL BE IN ACCORDANCE WITH ALL CODES AND STANDARDS PER SPECIFICATION.
3. SWITCHGEARS, SWITCHBOARDS, MOTOR CONTROL CENTERS AND ALL FREE STANDING PANELS SHALL BE SET WITH LEVELING CHANNELS UNLESS OTHERWISE NOTED.
4. CONTRACTOR TO PROVIDE DESIGNS AND DETAILS FOR ALL MOUNTING AND ANCHORAGE OF EQUIPMENT IN ACCORDANCE WITH CHAPTER 23 OF THE LATEST EDITION OF THE UNIFORM BUILDING CODE AND LOS ANGELES BUILDING CODE.

MISCELLANEOUS

1. THE CONTRACTOR TO CONFIRM EXISTING CONDITIONS INCLUDING CONDUIT RUNS. ELECTRICAL DESIGN UPGRADE IS BASED ON CITY-PROVIDED, EXISTING "AS-BUILT" DRAWINGS WHICH MAY NOT BE ENTIRELY ACCURATE.
2. IN CASE OF INTERFERENCE BETWEEN ELECTRICAL EQUIPMENT AND OTHER EQUIPMENT THE CONTRACTOR SHALL NOTIFY THE ENGINEER IN WRITING AND THE ENGINEER SHALL REVIEW PROPOSED CHANGES BEFORE THEY ARE MADE.
3. ALL RECEPTACLES SHALL BE MOUNTED 18" ABOVE FLOOR SURFACE, UNLESS OTHERWISE NOTED ON THE DRAWINGS.
4. ALL RECEPTACLES IN OUTDOOR AND ANTICIPATED WET AREAS SHALL BE GROUND FAULT INTERRUPTER TYPE RECEPTACLES WITH WEATHER PROOF COVER PLATES.
5. PROVIDE MAINTENANCE HOLES OR PULL BOXES WHEREVER THEY ARE REQUIRED TO MAKE A WORKABLE INSTALLATION.
6. CIRCUITS OF DIFFERENT SERVICE VOLTAGE RANGES SHALL BE INSTALLED IN SEPARATE RACEWAYS, PULLBOXES AND JUNCTION BOXES. THE VOLTAGE AND SERVICE LEVELS ARE:
   (1) 120V-480VOLT
   (2) INSTRUMENTATION AND CONTROL LESS THAN 50VDC
      a) ANALOG
      b) SIGNAL
   (3) TELEPHONE AND COMMUNICATIONS.
   (4) FIBER OPTICS
7. RECEPTACLES, LIGHTING AND CONTROL CIRCUITS SHALL BE TYPE THHN/THWN WIRE.
8. ALL ELECTRICAL EQUIPMENT AND DEVICES SHALL BE UL APPROVED OR OTHER INDEPENDENT AGENCIES APPROVED BY THE CITY OF LOS ANGELES.
9. NO PIPING, DUCTS OR FOREIGN EQUIPMENT SHALL BE PERMITTED TO BE LOCATED WITHIN THE DEDICATED SPACE ABOVE THE ELECTRICAL EQUIPMENT.

MINIMUM SUBMITTAL REQUIREMENTS FOR SCHEMATIC DIAGRAMS:

1. ALL CONTROLS SHOWN DE-ENERGIZED.
2. CONTRACTOR SHALL INCORPORATE NECESSARY FUNCTIONS FOR PROPER OPERATIONS AND PROTECTION OF SYSTEMS.
3. SLAVE OR INTERPOSING RELAYS SHALL BE ADDED WHERE REQUIRED TO PROVIDE ALL NECESSARY CONTACTS REQUIRED FOR THE SCHEMATIC DIAGRAM SHOWN.
4. ALL DEVICES SHOWN ON MOTOR STARTER SCHEMATIC DIAGRAMS SHALL BE MOUNTED IN MOTOR STARTER CUBICLES, UNLESS OTHERWISE NOTED.

ELECTRICAL STUDIES

1. CONTRACTOR IS RESPONSIBLE FOR PREPARING A POWER SYSTEM ANALYSIS REPORT INCLUDING, SHORT CIRCUIT CALCULATIONS, A PROTECTIVE DEVICE COORDINATION STUDY, ARC-FLASH STUDY, AND A HARMONIC ANALYSIS. THE STUDY SHALL BEGIN WITH THE UTILITY COMPANY'S FEEDER PROTECTIVE DEVICE AND INCLUDE ALL OF THE ELECTRICAL DISTRIBUTION EQUIPMENT DOWN TO AND INCLUDING LOW VOLTAGE MOTOR CONTROL CENTERS, POWER DISTRIBUTION PANEL BOARDS AND LIGHTING PANELS AND TRANSFORMERS.
2. ALL INFORMATION REQUIRED TO PERFORM THE STUDY SHALL BE OBTAINED BY THE ENTITY PERFORMING THE STUDY. ALL COSTS FOR THIS WORK INCLUDING FIELD SETTINGS OF DEVICES, ADJUSTMENTS, AND MODIFICATIONS TO EQUIPMENT THAT ARE REQUIRED FOR CONFORMANCE WITH THE APPROVED STUDY SHALL BE INCLUDED IN THE CONTRACTOR BID PROPOSAL AND IS NOT REIMBURSABLE BY THE CITY.
3. PROVIDE AND INSTALL ARC-FLASH AWARENESS WARNING LABELS ON EACH ELECTRICAL EQUIPMENT PANEL AS REQUIRED.

ELECTRIC MOTORS

1. UNLESS OTHERWISE SPECIFIED, ALL 3-PHASE MOTORS SHALL BE TEFC, SQUIRREL-CAGE INDUCTION, CONSTANT SPEED, HAVE ANTI-FRICTION BEARINGS AND CLASS F INSULATION, AND BE IN ACCORDANCE WITH ALL NEMA STANDARDS. MOTORS SHALL HAVE A MINIMUM SERVICE FACTOR OF 1.15 AT 40°C AMBIENT, AND STAINLESS STEEL AUTOMATIC BREATHER-DRAINS AT THE LOWEST POINT OF THE MOTOR ENCLOSURE.
2. ALL SINGLE-PHASE MOTORS, UNLESS OTHERWISE SPECIFIED, SHALL MEET ALL NEMA STANDARDS, BE TEFC, WITH ANTI-FRICTION BEARINGS, CLASS F INSULATION, AND HAVE A 1.15 SERVICE FACTOR AT 40°C AMBIENT.
3. ALL MOTORS LARGER THAN 3 HORSEPOWER SHALL BE PREMIUM EFFICIENCY, CAST IRON, CORROSIVE RESISTANT, HOSTILE ENVIRONMENT DESIGN, BALDOR "ECP", RELIANCE "XE", U. S. MOTORS "CORRO-DUTY", OR EQUAL. MOTORS LESS THAN 3 HORSEPOWER SHALL BE OF CAST IRON, STEEL OR ALUMINUM CONSTRUCTION, PREMIUM EFFICIENCY, AND CORROSIVE RESISTANT, HOSTILE ENVIRONMENT DESIGN.
4. MOTORS AND CONTROLS SHALL BE ADEQUATELY SIZED SO THE NAMEPLATE RATING WILL NOT BE EXCEEDED UNDER THE MAXIMUM DESIGN CAPACITY OF THE EQUIPMENT SUPPLIED.
5. ALL MOTOR NAMEPLATES SHALL BE STAINLESS STEEL, PERMANENTLY SECURED TO THE MOTOR, AND PROVIDE THE FOLLOWING INFORMATION: (1) NEMA DESIGN LETTER, (2) VOLTAGE, (3) PHASES, (4) FREQUENCY, (5) HORSEPOWER, (6) FULL LOAD CURRENT, (7) CLASS OF INSULATION, (8) FULL LOAD RPM, (9) AMBIENT TEMPERATURE/SERVICE FACTOR, (10) TIME RATING, (11) KVA CODE, (12) FRAME SIZE, (13) MFG. TYPE OR MODEL, (14) MFG. CATALOG NUMBER WITH DATE CODE, AND (15) SERIAL NUMBER.

SCOPE OF WORK

1. ADDITION OF 480V, 3 PHASE, 4 WIRE, 400 A ELECTRICAL SERVICE TRANSFORMER TO THE SITE.
2. ADDITION OF ELECTRICAL SERVICE AND DISTRIBUTION PANELS.
3. POWER AND CONTROL WIRING FOR STORMWATER DIVERSION EQUIPMENT.
4. POWER AND CONTROL WIRING FOR SPORT LIGHTING SYSTEMS. TITLE 24 REQUIREMENT IS EXEMPT FOR LIGHTING FOR SPORTS AND ATHLETIC FIELDS, AND CHILDREN'S PLAYGROUNDS PER 2019 BUILDING ENERGY EFFICIENCY STANDARD, SECTION 140.7 (a) 4.
5. SUPERVISORY CONTROL AND DATA ACQUISITION (SCADA) CONTROL PANEL FOR STORMWATER DIVERSION PROGRAMMABLE CONTROLLER, AND FOR RADIO COMMUNICATION EQUIPMENT.
6. METHANE HAZARD SITE: METHANE ZONE.
7. ELECTRICAL WORK SHALL COMPLY WITH CURRENT CODE CYCLE (2020 LAEC, 2019 CEC 2017 NEC).

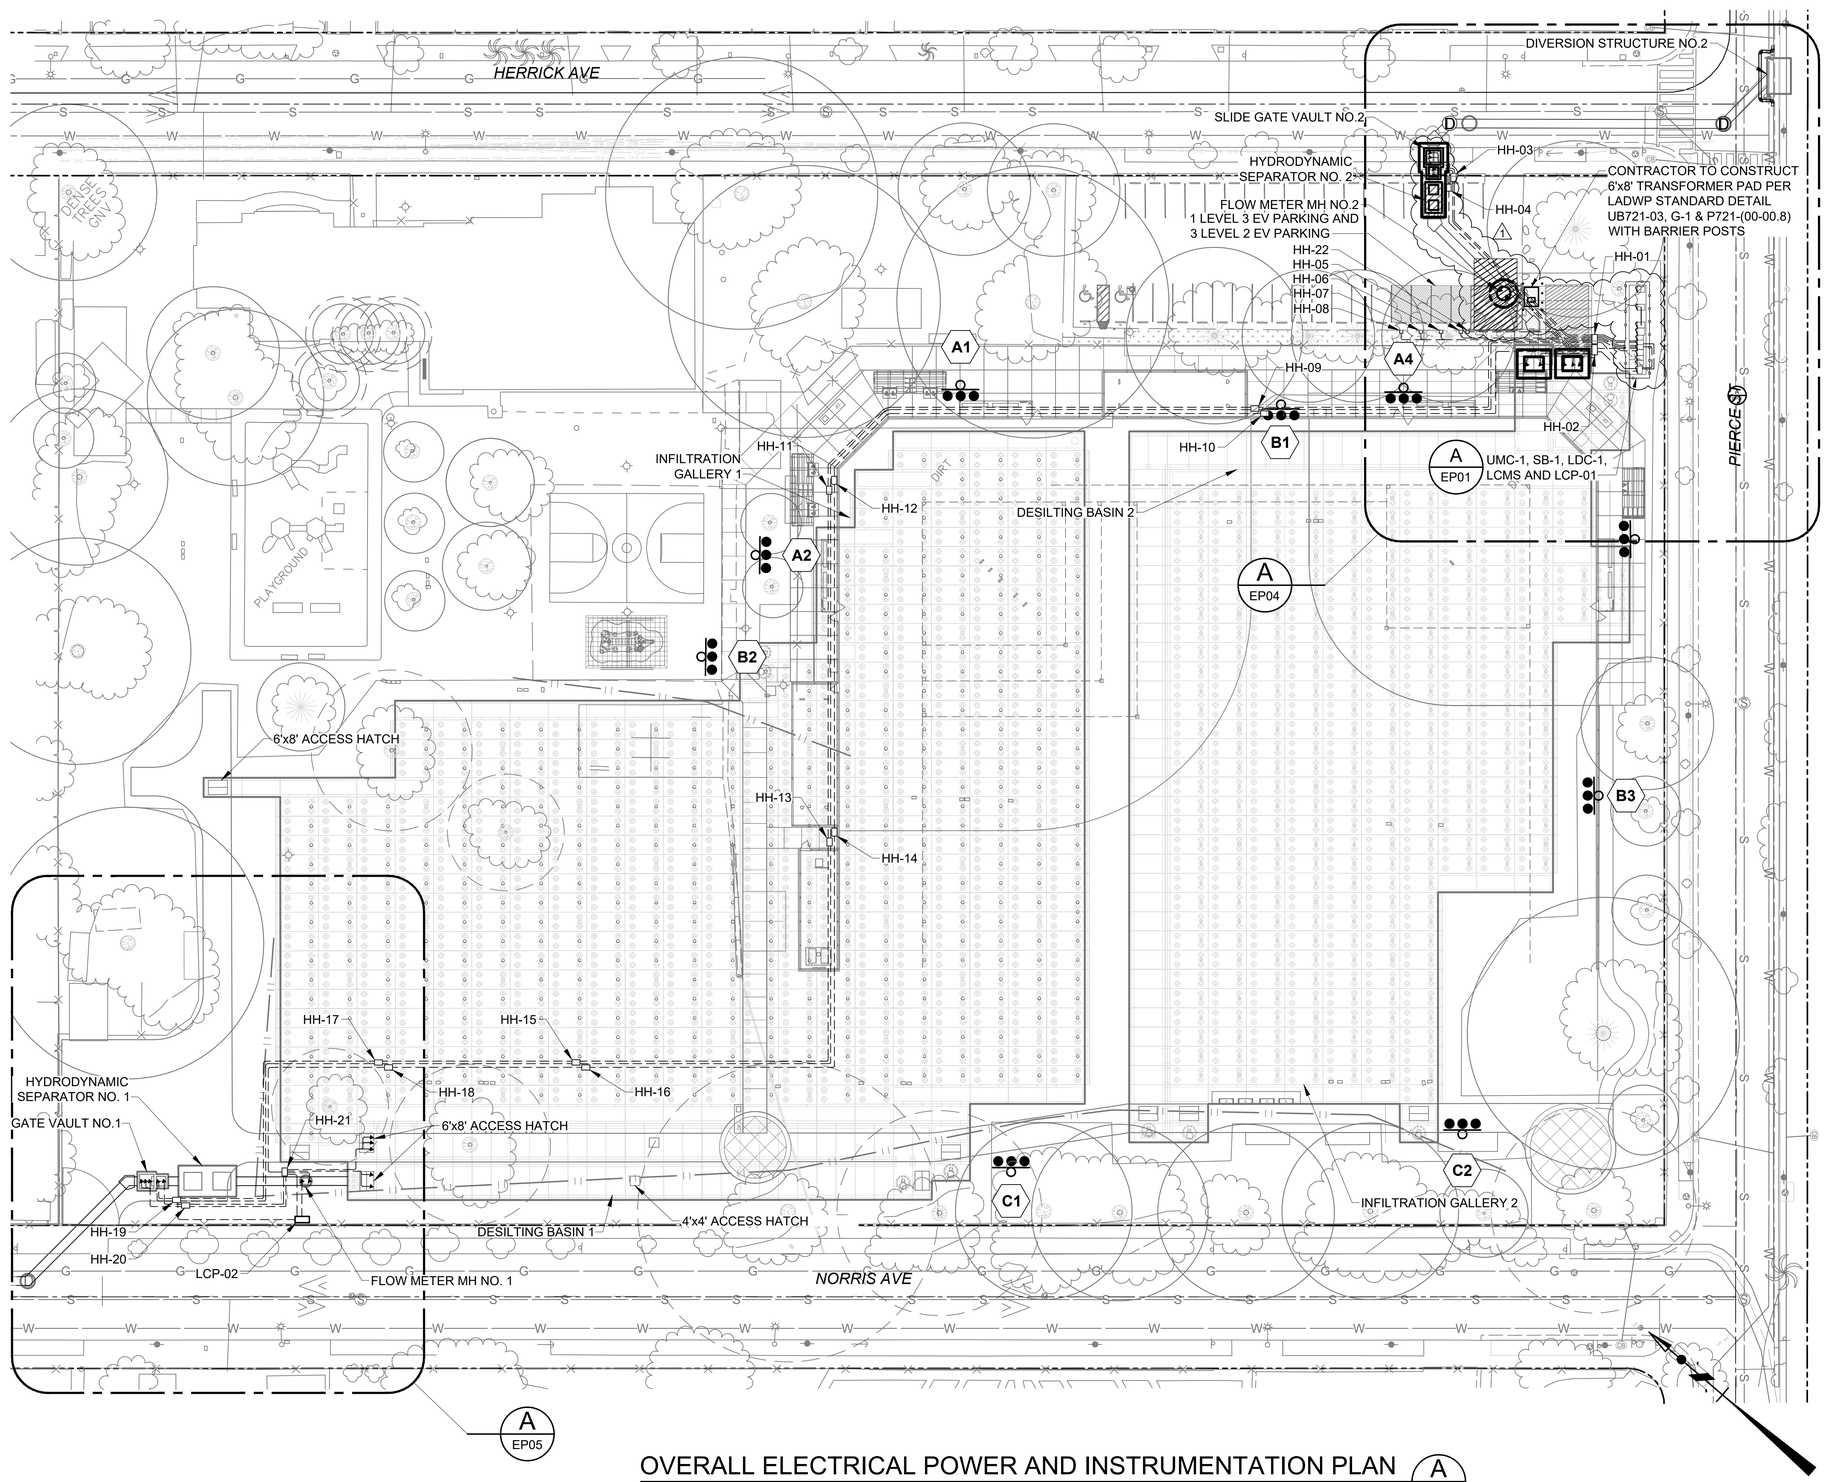
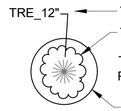
SHEET 106 OF 129 SHEETS

BUREAU OF ENGINEERING OFFICIAL RECORD



LEGEND



ELECTRICAL NOTES:

1. TREE PROTECTION ZONES ARE IDENTIFIED HEREIN ON THE PLANS WITH CIRCLES WITH DASHED LINES AROUND EXISTING TREES. CONTRACTOR SHALL AVOID CONSTRUCTION WITHIN TREE PROTECTION ZONES AS MUCH AS PRACTICAL, AND ASSIST THE CITY IN PROTECTING EXISTING TREES. CONDUIT ROUTING SHOWN HEREIN IS DIAGRAMMATIC, AND CONTRACTOR SHALL PREPARE DETAILED CONDUIT AND EQUIPMENT LOCATION PLANS FOR CITY REVIEW, INCLUDING PROPOSED CONDUIT ROUTING THAT PROTECTS TREES. WHERE REQUIRED TO ROUTE CONDUITS OUTSIDE TREE PROTECTION ZONES, CONTRACTOR SHALL PROVIDE UP TO 10 ADDED BURIED ELECTRICAL PULLBOXES, IN ADDITION TO THOSE SHOWN ON THE PLANS HEREIN, AT NO ADDED COST TO THE CITY.
2. CONTRACTOR SHALL COORDINATE FLOW METER INSTALLATION ARRANGEMENTS AND DETAILS WITH FLOW METER MANUFACTURER, AND SUBMIT MANUFACTURER'S CERTIFICATION IN WRITING THAT INSTALLATION ARRANGEMENTS ARE HYDRAULICALLY ACCEPTABLE FOR ALL FLOW METERS. MANUFACTURER SHALL PROVIDE UP TO ONE DAY OF FIELD INSTALLATION AND SUPPORT AS NEEDED TO REFINE FLOW METER INSTALLATION AND TUNING.
3. CONTRACT ELECTRICAL SCOPE INCLUDES CONDUITS WITH PULL WIRES AND PULL BOXES FOR FUTURE INSTALLATION OF EV CHARGERS. EV CHARGING STATIONS, CABLES AND APPURTENANCES, WILL BE PROVIDED AND INSTALLED BY OTHERS. CONTRACTOR SHALL COORDINATE WITH BOE TO CONFIRM LOCATIONS OF EV CHARGER CONDUITS.
4. PROVIDE JUNCTION BOX INSIDE BASIN ABOVE WATER LEVEL & ACCESSIBLE FROM HATCH FOR BOTH INTRUSION SWITCH & LEVEL TRANSMITTER. SECURE LEVEL TX VENT TUBE IN JUNCTION BOX AS MANUFACTURERS INSTRUCTIONS.
5. PROVIDE JUNCTION BOX FOR FLOAT SWITCH INSIDE BASIN.
6. PROVIDE JUNCTION BOX INSIDE FLOW METER VAULT. CABLE AS SPECIFIED BY MANUFACTURER. SEE SHEET CI20 DETAIL A9 FOR FLOW METER MOUNTING DETAIL.
7. BURIED ELECTRICAL PULLBOXES AND HANDHOLES SHALL BE PRECAST CONCRETE WITH CAST IRON OR CORROSION RESISTANT STEEL LIDS ON METAL FRAMES, SUCH THAT THEY CAN BE WELDED SHUT AND COMPLY WITH NEC 314.30, AND BE UL LISTED. LID SHALL BE MARKED AS "POWER" OR "SIGNAL" AS APPROPRIATE AND TOP OF LID TO BE FLUSH WITH FINISHED GRADE. PROVIDE ALL PULLBOXES AND HANDHOLES MINIMUM SIZES AT 10" X17"X30" DEEP. PROVIDE LIDS WITH H20 TRAFFIC RATING. PULLBOXES AND HANDHOLES SHALL BE BY CHRISTY, OLDCASTLE, AND JENSEN OR EQUAL.

ELECTRICAL POWER AND INSTRUMENTATION DETAIL PLAN

A / EP-03

SCALE: 1" = 10'-0"

KEY NOTES:

1. 2-5" CONDUIT ONLY TO BE COORDINATED WITH LADWP REQUIREMENTS (480V, POWER FROM NEW PAD MOUNTED LADWP TRANSFORMER TO UTILITY METERING CABINET, UMC-1).
2. 2-5"C, 4C#3/0, 1C#4 GND (480V, POWER FROM UTILITY METERING CABINET, UMC-1 TO SWITCHBOARD, SB-1).
3. 1"C, 1-5C#14 (120VAC, PLC-CMD SIGNALS FROM LCP-01 TO SLG-2 CP AT SB-1-4B). 1"C, 1-8C#16 (24VDC, GATE STATUS FROM LCP-01 TO SLG-2 CP AT SB-1-4B). 1"C, 1-2C#12, 1C#12 GND (120V, POWER FROM DP-2 AT SB-1-4M TO LCP-01).
4. 1"C, 1-5C#14 (120VAC, PLC-CMD SIGNALS FROM LCP-01 TO SLG-1 CP AT SB-1-5F). 1"C, 1-8C#16 (24VDC, GATE STATUS FROM LCP-01 TO SLG-1 CP AT SB-1-5F).
5. 1"C, 1 MANUFACTURER'S CABLE FROM FLOW METER MH NO.1 TO LCP-02 AND FLOW METER MH NO.2 TO INTRINSICALLY SAFE BARRIER PANEL. FLOW SENSOR TO BE INSTALLED BY MANUFACTURER'S RECOMMENDATION. SEE CIVIL SHEET CI33, DETAIL A1 AND A9 FOR FLOW METER MOUNTING DETAIL.
6. 1"C, 1-4C#14 (24V, INTRUSION ALARM FROM FLOW METER MH NO.1 OR NO.2 TO INTRINSICALLY SAFE BARRIER PANEL AT SB-1-5M).
7. 1.5"C, 1-4TSP #16 (4-20MA, 1 LEVEL + 1 FLOAT SIGNALS), 1-2TSP #16 (4-20MA, 1 LEVEL SIGNAL), & 2-4C#14 (24VDC, 2 INTRUSION ALARMS).
8. 1"C, 1-3C#12, 1C#12 GND (480V, POWER) FROM SLG-2 CP AT SB-1-4B TO SLIDE GATE ACTUATOR AT DRY VAULT NO.2.
9. 1"C, 1-12C#14,(120V, CMD & STATUS SIGNALS) FROM SLG-2 CP AT SB-1-4B TO SLIDE GATE ACTUATOR AT DRY VAULT NO.2.
10. 1"C, 1-4C#14 (24VDC, INTRUSION ALARM) FROM INTRINSICALLY SAFE BARRIER PANEL AT SB-1-5M TO DRY VAULT NO.2.
11. 1.5"C, 1-4TSP #16 (4-20MA, LEVEL SIGNAL AND FLOAT SIGNAL) & 1-4C#14 (24VDC, INTRUSION ALARM) FROM INTRINSICALLY SAFE RELAYS PANEL AT SB-1-5M TO [GATE VAULT NO.1, NO.2 OR INFILTRATION GALLERY NO.2].
12. 2" CONDUIT FROM HAND HOLE HH-05 AT PARKING LOT TO SB-1-5D FOR FUTURE INSTALLATION OF (EV-1) FAST EV CHARGER.
13. 3 -1" CONDUITS FROM HH-06, HH-07, HH-08 AT PARKING LOT TO (208V, 3 PHASE) DISTRIBUTION PANEL, DP-1 AT SB-1-6E FOR FUTURE INSTALLATION OF LEVEL 2 EV CHARGERS (TOTAL OF 3).
14. PROVIDE 1.5" CONDUIT FOR EV CHARGER DATA SIGNAL FROM HH-22 AT PARKING LOT TO LCP-01 PANEL.
15. 1.5"C, 1-2TSP #16 (4-20MA, LEVEL SIGNAL) & 1-4C#14 (24VDC, INTRUSION ALARM) FROM INTRINSICALLY SAFE RELAYS PANEL AT SB-1-4M TO [DESILTING BASIN NO.2] OR [DESILTING BASIN NO.1].
16. 2"C, 1-2TSP #16 (4-20MA, FLOW SIGNAL) FROM LCP-02 NEAR FLOW METER MH-2 TO LCP-01. EV CHARGER DATA SIGNALS FROM HH-22 AT PARKING LOT TO LCP-01.
17. 3"C, 4-4TSP #16 (4-20MA, 4 LEVELS + 4 FLOAT SIGNALS), 3-2TSP #16 (4-20MA, 3 LEVEL SIGNALS), & 1 MANUFACTURER'S CABLE (1 FLOW SIGNALS FROM FLOW MTER MH-02 TO SB-1-5M. 2"C, 10-4C#14 (24VDC, 10 INTRUSION ALARMS) FROM HH-02 TO SB-1-5M.
18. 1"C, 1-3C#8, 1C#10 GND (480V, POWER) FROM SLG-1 PANEL AT SB-1-5F TO SLIDE GATE ACTUATOR AT DRY VAULT NO.1.
19. 1.5"C, 1-12C#12,(120V, CMD & STATUS SIGNALS) FROM SLG-1 PANEL AT SB-1-5F TO SLIDE GATE ACTUATOR AT DRY VAULT NO.1. 1-3C#12, (120V, POWER TO FLOW TRANSMITTER AT FIT-300) FROM LCP-01 TO LCP-02 NEAR FLOW METER MH-01.
20. 2"C, 2-4TSP #16 (4-20MA, 2 LEVEL + 2 FLOAT SIGNALS) & 2-2TSP #16 (4-20MA, 1 LEVEL SIGNAL AND 1 FLOW SIGNAL) 2"C, 5-4C#14 (24VDC, 4 INTRUSION ALARMS).
21. 3"C, 6-2TSP #16 (4-20MA, 6 LEVEL SIGNALS AND 4 FLOAT SIGNALS) 1 MANUFACTURER'S CABLE (1 FLOW SIGNALS) & 2"C, 10-4C#14 (24VDC, 10 INTRUSION ALARMS) FROM SB-1-5M TO LCP-01.
22. 1"C, 1-3C#12, (120V, POWER TO FLOW TRANSMITTER AT FIT-300) FROM LCP-01 TO LCP-02 NEAR FLOW METER MH-01.
23. 1"C, 1-2TSP #16 (4-20MA, 1 FLOW SIGNAL) FROM LCP-02 NEAR FLOW METER. MH-01 TO LCP-01.

GENERAL NOTES:

1. BURIED ELECTRICAL PULLBOXES AND HANDHOLES SHALL BE PRECAST CONCRETE WITH CAST IRON OR CORROSION RESISTANT STEEL LIDS ON METAL FRAMES, SUCH THAT THEY CAN BE WELDED SHUT AND COMPLY WITH NEC 314.30, AND BE UL LISTED. LID SHALL BE MARKED AS "POWER" OR "SIGNAL" AS APPROPRIATE AND TOP OF LID TO BE FLUSH WITH FINISHED GRADE. PROVIDE ALL PULLBOXES AND HANDHOLES MINIMUM SIZES AT 10" X17"X30" DEEP AND PENTA-HEAD BOLTS. PROVIDE LIDS WITH H20 TRAFFIC RATING. PULLBOXES AND HANDHOLES SHALL BE BY CHRISTY, OLDCASTLE, AND JENSEN OR EQUAL.

HANDHOLE -ID	SIZE	DEPTH
HH-01,02	36"X24"	44"
HH-03,05,06,07,08,22	10"X17"	34"
HH-04,09,11,13,15,17,19,20	18"X12"	34"
HH-10,12,14,16,18	20"X16"	34"
HH-21	20"X16"	44"

2. PROVIDE JUNCTION BOX INSIDE BASIN ABOVE WATER LEVEL & ACCESSIBLE FROM HATCH FOR BOTH INTRUSION LIGHT SWITCH & LEVEL TRANSMITTER. SECURE LEVEL TX VENT TUBE IN JUNCTION BOX AS MANUFACTURERS INSTRUCTIONS.
3. PROVIDE JUNCTION BOX FOR FLOAT SWITCH INSIDE BASIN.

ELECTRICAL POWER AND INSTRUMENTATION DETAIL PLAN

SCALE: 1" = 10'-0"

A / EP-03

KEY NOTES:

1. 2-5" CONDUIT ONLY TO BE COORDINATED WITH LADWP REQUIREMENTS (480V, POWER FROM NEW PAD MOUNTED LADWP TRANSFORMER TO UTILITY METERING CABINET, UMC-1).
2. 2-5"C, 4C#3/0, 1C#4 GND (480V, POWER FROM UTILITY METERING CABINET, UMC-1 TO SWITCHBOARD, SB-1).
3. 1"C, 1-5C#14 (120VAC, PLC-CMD SIGNALS FROM LCP-01 TO SLG-2 CP AT SB-1-4B).
   1"C, 1-8C#16 (24VDC, GATE STATUS FROM LCP-01 TO SLG-2 CP AT SB-1-4B).
   1"C, 1-2C#12, 1C#12 GND (120V, POWER FROM DP-2 AT SB-1-4M TO LCP-01).
4. 1"C, 1-5C#14 (120VAC, PLC-CMD SIGNALS FROM LCP-01 TO SLG-1 CP AT SB-1-5F).
   1"C, 1-8C#16 (24VDC, GATE STATUS FROM LCP-01 TO SLG-1 CP AT SB-1-5F).
5. 1"C, 1 MANUFACTURER'S CABLE FROM FLOW METER MH NO.1 TO LCP-02 AND FLOW METER MH NO.2 TO INTRINSICALLY SAFE BARRIER PANEL.
   FLOW SENSOR TO BE INSTALLED BY MANUFACTURER'S RECOMMENDATION. SEE CIVIL SHEET CI33, DETAIL A1 AND A9 FOR FLOW METER MOUNTING DETAIL.
6. 1"C, 1-4C#14 (24V, INTRUSION ALARM FROM FLOW METER MH NO.1 OR NO.2 TO INTRINSICALLY SAFE BARRIER PANEL AT SB-1-5M).
7. 1.5"C, 1-4TSP #16 (4-20MA, 1 LEVEL + 1 FLOAT SIGNALS),
   1-2TSP #16 (4-20MA, 1 LEVEL SIGNAL), &
   2-4C#14 (24VDC, 2 INTRUSION ALARMS).
8. 1"C, 1-3C#12, 1C#12 GND (480V, POWER) FROM SLG-2 CP AT SB-1-4B TO SLIDE GATE ACTUATOR AT DRY VAULT NO.2.
9. 1"C, 1-12C#14,(120V, CMD & STATUS SIGNALS) FROM SLG-2 CP AT SB-1-4B TO SLIDE GATE ACTUATOR AT DRY VAULT NO.2.
10. 1"C, 1-4C#14 (24VDC, INTRUSION ALARM) FROM INTRINSICALLY SAFE BARRIER PANEL AT SB-1-5M TO DRY VAULT NO.2.
11. 1.5"C, 1-4TSP #16 (4-20MA, LEVEL SIGNAL AND FLOAT SIGNAL) &
    1-4C#14 (24VDC, INTRUSION ALARM) FROM INTRINSICALLY SAFE RELAYS PANEL AT SB-1-5M TO [GATE VAULT NO.1, NO.2 OR INFILTRATION GALLERY NO.2].
12. 2" CONDUIT FROM HAND HOLE HH-05 AT PARKING LOT TO SB-1-5D FOR FUTURE INSTALLATION OF (EV-1) FAST EV CHARGER.
13. 3 -1" CONDUITS FROM HH-06, HH-07, HH-08 AT PARKING LOT TO (208V, 3 PHASE) DISTRIBUTION PANEL, DP-1 AT SB-1-6E FOR FUTURE INSTALLATION OF LEVEL 2 EV CHARGERS (TOTAL OF 3).
14. PROVIDE 1.5" CONDUIT FOR EV CHARGER DATA SIGNAL FROM HH-22 AT PARKING LOT TO LCP-01 PANEL.
15. 1.5"C, 1-2TSP #16 (4-20MA, LEVEL SIGNAL) &
    1-4C#14 (24VDC, INTRUSION ALARM) FROM INTRINSICALLY SAFE RELAYS PANEL AT SB-1-4M TO [DESILTING BASIN NO.2] OR [DESILTING BASIN NO.1].
16. 2"C, 1-2TSP #16 (4-20MA, FLOW SIGNAL) FROM LCP-02 NEAR FLOW METER MH-2 TO LCP-01.
    EV CHARGER DATA SIGNALS FROM HH-22 AT PARKING LOT TO LCP-01.
17. 3"C, 4-4TSP #16 (4-20MA, 4 LEVELS + 4 FLOAT SIGNALS),
    3-2TSP #16 (4-20MA, 3 LEVEL SIGNALS), &
    1 MANUFACTURER'S CABLE (1 FLOW SIGNALS FROM FLOW MTER MH-02 TO SB-1-5M.
    2"C, 10-4C#14 (24VDC, 10 INTRUSION ALARMS) FROM HH-02 TO SB-1-5M.
18. 1"C, 1-3C#8, 1C#10 GND (480V, POWER) FROM SLG-1 PANEL AT SB-1-5F TO SLIDE GATE ACTUATOR AT DRY VAULT NO.1.
19. 1.5"C, 1-12C#12,(120V, CMD & STATUS SIGNALS) FROM SLG-1 PANEL AT SB-1-5F TO SLIDE GATE ACTUATOR AT DRY VAULT NO.1.
    1-3C#12, (120V, POWER TO FLOW TRANSMITTER AT FIT-300) FROM LCP-01 TO LCP-02 NEAR FLOW METER MH-01.
20. 2"C, 2-4TSP #16 (4-20MA, 2 LEVEL + 2 FLOAT SIGNALS) &
    2-2TSP #16 (4-20MA, 1 LEVEL SIGNAL AND 1 FLOW SIGNAL)
    2"C, 5-4C#14 (24VDC, 4 INTRUSION ALARMS).
21. 3"C, 6-2TSP #16 (4-20MA, 6 LEVEL SIGNALS AND 4 FLOAT SIGNALS)
    1 MANUFACTURER'S CABLE (1 FLOW SIGNALS) &
    2"C, 10-4C#14 (24VDC, 10 INTRUSION ALARMS) FROM SB-1-5M TO LCP-01.
22. 1"C, 1-3C#12, (120V, POWER TO FLOW TRANSMITTER AT FIT-300) FROM LCP-01 TO LCP-02 NEAR FLOW METER MH-01.
23. 1"C, 1-2TSP #16 (4-20MA, 1 FLOW SIGNAL) FROM LCP-02 NEAR FLOW METER. MH-01 TO LCP-01.

GENERAL NOTES:

1. BURIED ELECTRICAL PULLBOXES AND HANDHOLES SHALL BE PRECAST CONCRETE WITH CAST IRON OR CORROSION RESISTANT STEEL LIDS ON METAL FRAMES, SUCH THAT THEY CAN BE WELDED SHUT AND COMPLY WITH NEC 314.30, AND BE UL LISTED. LID SHALL BE MARKED AS "POWER" OR "SIGNAL" AS APPROPRIATE AND TOP OF LID TO BE FLUSH WITH FINISHED GRADE. PROVIDE ALL PULLBOXES AND HANDHOLES MINIMUM SIZES AT 10" X17"X30" DEEP AND PENTA-HEAD BOLTS. PROVIDE LIDS WITH H20 TRAFFIC RATING. PULLBOXES AND HANDHOLES SHALL BE BY CHRISTY, OLDCASTLE, AND JENSEN OR EQUAL.

HANDHOLE -ID	SIZE	DEPTH
HH-01,02	36"X24"	44"
HH-03,05,06,07,08,22	10"X17"	34"

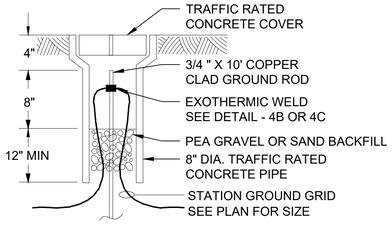
REVISION DATES (DESIGN STAGE ONLY)

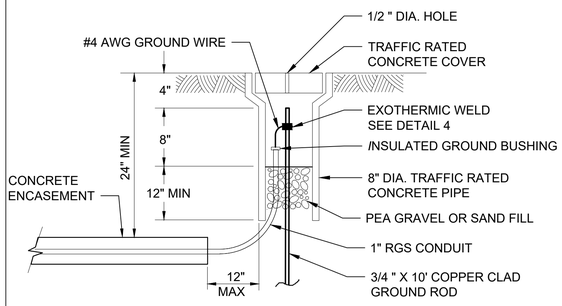
THE CITY OF LOS ANGELES OR ITS OFFICERS OR AGENTS SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OR COMPLETENESS OF ELECTRONIC COPIES OF THIS PLAN SHEET.

GROUND WELL — E-01

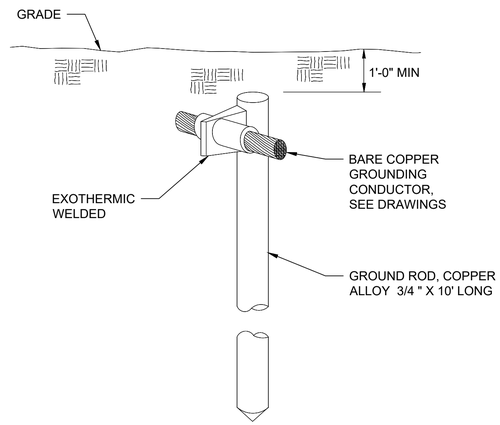


NOTE:
1. PROVIDE MINIMUM OF FOUR GROUND RODS IN GROUND WELLS.

INSULATED GROUND CABLE MOUNTING IN GROUND WELL — E-02

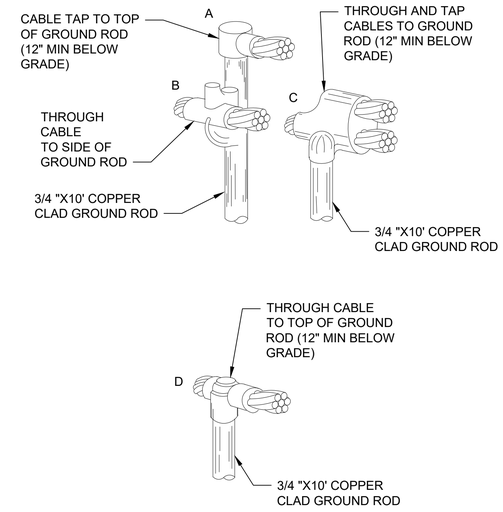


BURIED GROUND ROD — E-03

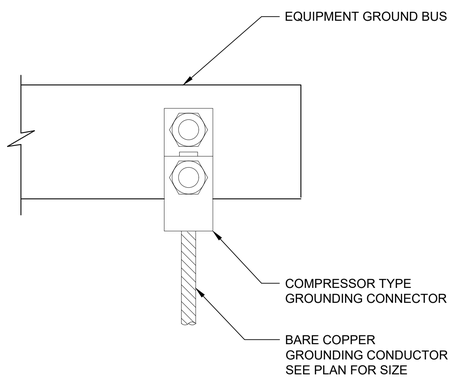


NOTE:
1. CONTRACTOR SHALL PROVIDE UP TO FOUR GROUND RODS CONNECTED TO GROUND LOOPS AROUND ELECTRICAL ENCLOSURE. CONTRACTOR SHALL SUBMIT PROPOSED GROUNDING PLAN FOR APPROVAL.

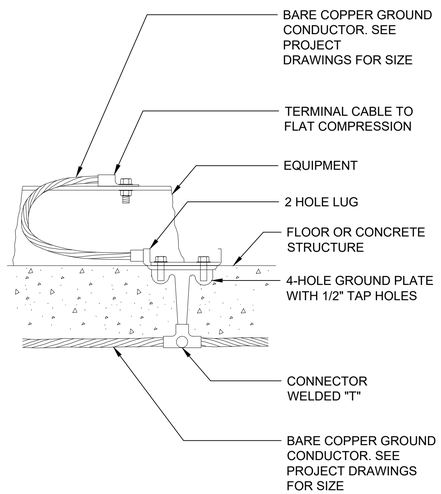
EXOTHERMIC WELDS CABLE TO GROUND ROD — E-04



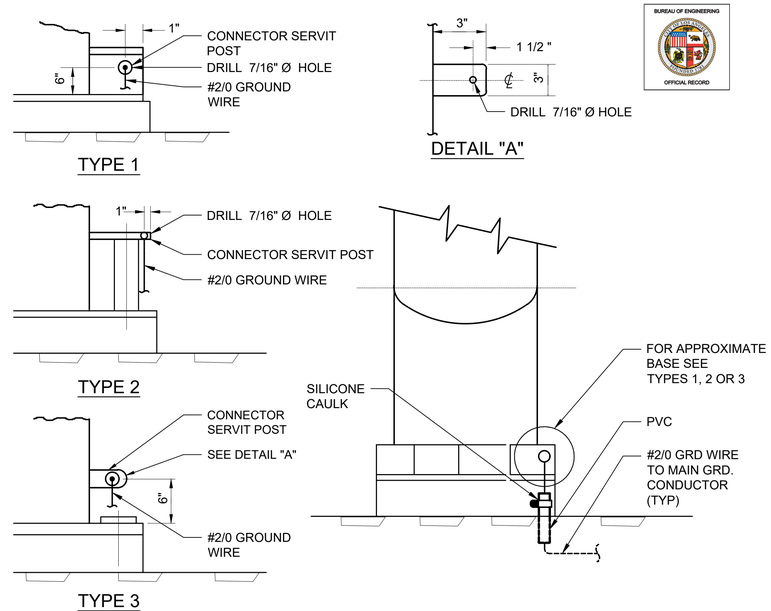
TYPICAL GROUND BUS CONNECTION — E-05



TYPICAL GROUND EQUIPMENT CONNECTION — E-06



TYPICAL EQUIPMENT GROUNDING — E-07



NOTE:
1. ALL TANKS, LADDERS AND HANDRAILS TO BE GROUNDED.

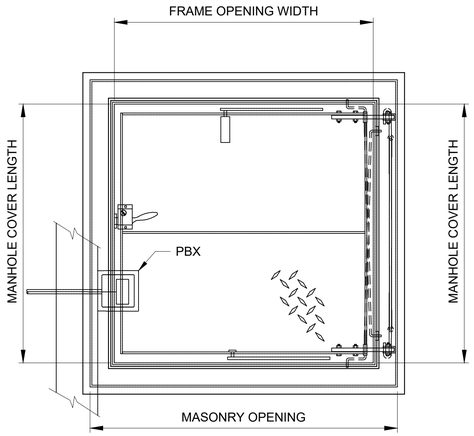
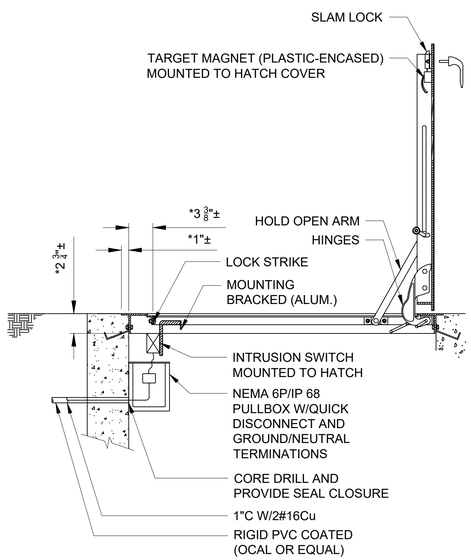
REVISION DATES (DESIGN STAGE ONLY)



PLAN



* VERIFY ALL DIMENSIONS

SECTION A-A

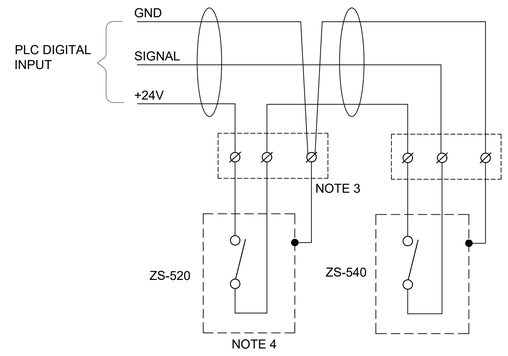
* VERIFY TYPICAL FRAME DIMENSIONS

NOTES:

1. PROVIDE SERIES II (SQUARE BODY) TOPWORX GO SWITCH BY EMERSON OR EQUAL (CLASS I, DIV 2). PROVIDE AMP3 TARGET MAGNET, NEMA 4X SST BODY, AND MINI QUICK DISCONNECT. INSTALL PER MANUFACTURER'S RECOMMENDATIONS.
2. FASTEN TARGET TO UNDERSIDE OF ACCESS HATCH. PROVIDE MOUNTING BRACKETS WHERE REQUIRED TO PLACE TARGET WITHIN RANGE OF SENSING AREA. MECHANICALLY FASTEN MOUNTING BRACKET TO HATCH COVER, AND SWITCH TO VAULT STRUCTURE.
3. ALL MOUNTING HARDWARE SHALL BE TYPE 316 SST. PROVIDE MIN. 1/4" DIA. BOLTS FOR ATTACHMENTS.
4. ADJUST DETAIL AS REQUIRED FOR FIELD INSTALLATION ARRANGEMENT
5. PROVIDE SEPARATION BETWEEN DISSIMILAR METALS TO PREVENT GALVANIC CORROSION.

DETAIL - VAULT HATCH COVER | E-11

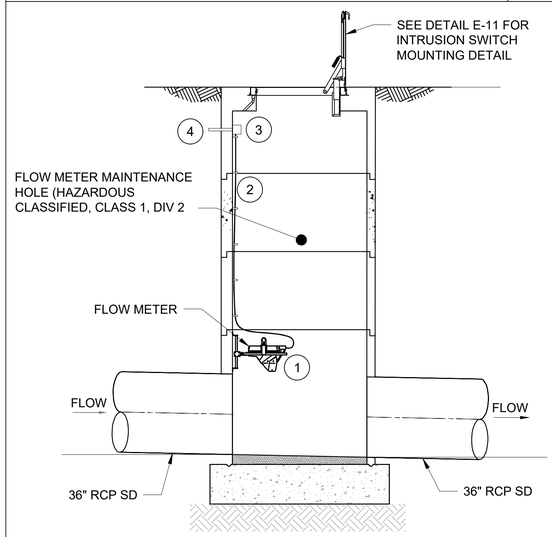
SWITCH LOCATION	TAG
DIVERSION STRUCT	ZS-110
BAFFLE BOX	ZS-200
INFILTR BASIN	ZS-520 ZS-540



NOTES:

1. SEE PROXIMITY SWITCH INSTALLATION DETAIL E-11.
2. PROVIDE SEPARATE PLC DIGITAL INPUTS FOR DIVERSION STRUCTURE, BAFFLE BOX & INFILTRATION BASIN.
3. PROVIDE NEMA 4X, SS JUNCTION BOX LOCATED INSIDE BASIN/ BOX
4. INTRUSION SWITCH CONTACT CLOSED WHEN HATCH CLOSED.

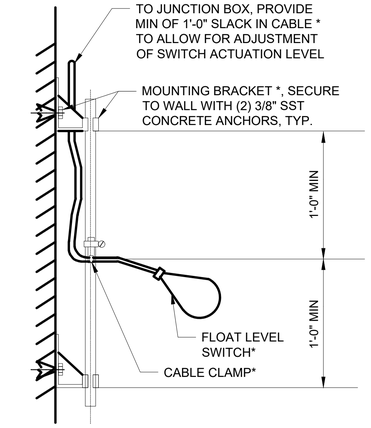
DETAIL - HATCH INTRUSION ALARM TYPICAL WIRING DIAGRAM (WIRING FOR BASIN SHOWN) | E-08



NOTES:

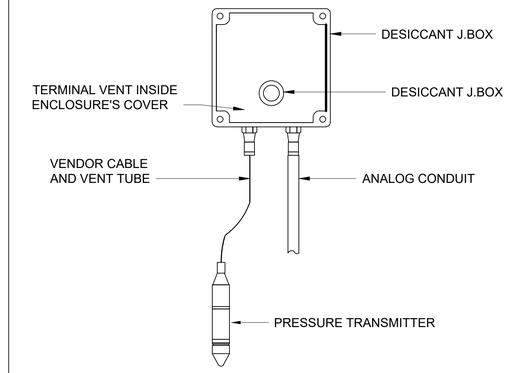
1. FLOW METER DETAIL BASED ON INTRINSICALLY SAFE HATCH FLO-DAR FLOW SENSOR, SEE CIVIL DRAWING CI33 FOR ADDITIONAL MOUNTING INFORMATION. INSTALL WALL BRACKET AND FLOW SENSOR MANUFACTURE'S RECOMMENDATIONS.
2. MANUFACTURER'S SENSOR CABLE, SECURE TO SIDE OF MAINTENANCE HOLE.
3. 316 SS, WATER PROOF JUNCTION BOX.
4. CONDUIT TO BARRIER RELAYS, MANUFACTURER'S CABLE, SEE CONNECTION DIAGRAM, DETAIL E-13. PROVIDE CONDUIT SEAL AT BARRIER ENCLOSURE PER NEC.

A/V FLOW METER MOUNTING DETAIL | E-12

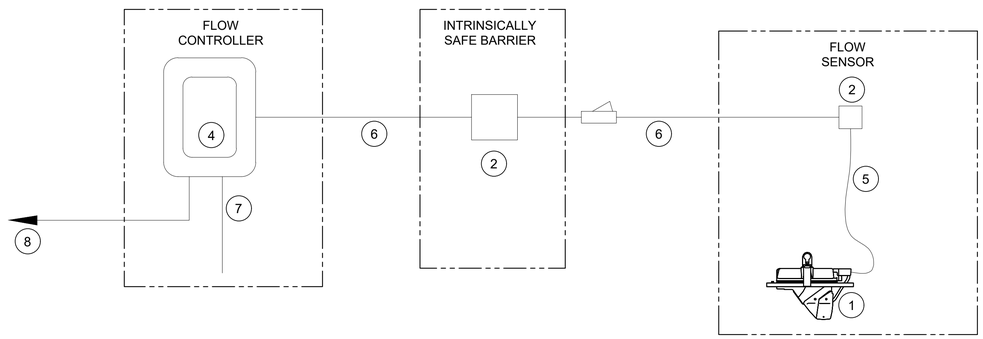


NOTE:
1. COMPONENTS DESIGNATED BY * ARE SUPPLIED BY INSTRUMENT MANUFACTURER.

TYPICAL FLOAT TYPE LEVEL SWITCH INSTALLATION | E-09



DROP-IN PRESSURE TRANSMITTER DESICCANT J-BOX DETAIL | E-10



A/V FLOW METER INTRINSICALLY SAFE CONFIGURATION

NO	DESCRIPTION	LOCATION FE/FIT 300	LOCATION FE/FIT 350
1	HATCH FLO-DAR FLOW SENSOR INTRINSICALLY SAFE OPTION	FLOW METER MH NO.1	FLOW METER MH NO.2
2	WATER PROOF JUNCTION BOX	FLOW METER MH NO.1	FLOW METER MH NO.2
3	INTRINSICALLY SAFE BARRIER	CABINET LCP-02	SB INTRINSICALLY SAFE BARRIER PANEL
4	HATCH FLOW CONTROLLER, FL1500	CABINET LCP-02	SB INTRINSICALLY SAFE BARRIER PANEL
5	MANUFACTURER'S SENSOR CABLE	FLOW METER MH NO.1	FLOW METER MH NO.1
6	MANUFACTURER'S SENSOR CABLE		
7	120 VAC POWER FROM LCP-01		
8	4-20 mA SIGNAL TO PLC

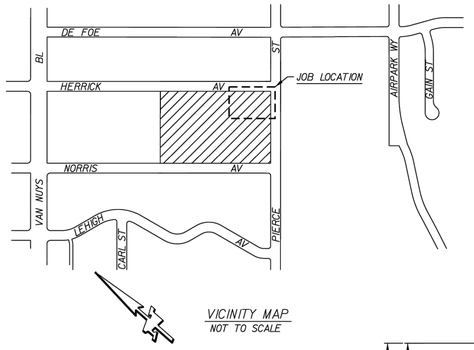
METHANE ZONE
REFER TO DWG H-242



VICINITY MAP
NOT TO SCALE

NOTES:

1. THIS SITE IS CLASSIFIED AS A METHANE ZONE AND MUST COMPLY WITH THE REQUIREMENTS SPECIFIED IN LADWP UGCS H-242.
2. TRUCK ACCESS AND STAGING AREA MUST BE RATED AT HIGHWAY LOADING AND HAVE A 10' MINIMUM VERTICAL CLEARANCE.
3. COORDINATE ALL WORK WITH THE LADWP ELECTRIC SERVICE REPRESENTATIVE, AREA 107 AT (818) 771-4067.

INSPECTION

1. FULL INSPECTION AND APPROVAL BY A LOS ANGELES DEPARTMENT OF WATER AND POWER (LADWP) ELECTRIC SERVICE REPRESENTATIVE IS REQUIRED PRIOR TO THE INSTALLATION OF CABLE AND EQUIPMENT.
2. NOTIFY THE LADWP ELECTRIC SERVICE REPRESENTATIVE FOR AREA 107 TELEPHONE NUMBER (818) 771-4067, FIVE (5) NORMAL WORKING DAYS IN ADVANCE OF CONSTRUCTION.
3. THE CUSTOMER SHALL ARRANGE FOR ELECTRICAL INSPECTION BY THE LOS ANGELES DEPARTMENT OF BUILDING AND SAFETY FOR THEIR ELECTRICAL WORK. THE SERVICE WILL NOT BE ENERGIZED UNTIL NOTIFICATION OF APPROVAL HAS BEEN RECEIVED BY THE LADWP.

GENERAL

1. ALL FACILITIES MUST BE PROVIDED AND INSTALLED IN ACCORDANCE WITH THE LADWP'S ELECTRIC SERVICE REQUIREMENTS.
2. CONDUITS AND STRUCTURES SHALL BE INSTALLED PER LADWP'S UNDERGROUND CONSTRUCTION STANDARDS (UGCS), AND PER LADWP'S UNDERGROUND SPECIFICATION 104 AND APPENDIX I AS LAST REVISED.
3. THE CUSTOMER WILL BE RESPONSIBLE FOR PROVIDING GENERATORS OR AN ALTERNATE SOURCE OF POWER DURING THE CUTOVER FROM TEMPORARY TO PERMANENT SERVICE.

SCHEDULE

1. IN ORDER TO AVOID SCHEDULING DELAYS IN THE INSTALLATION OF LADWP EQUIPMENT FOR YOUR PROJECT, THE CUSTOMER MUST COMPLETE THE INSTALLATION AND LADWP'S INSPECTION OF THE CONDUIT, SUBSTRUCTURES, AND SWITCHBOARDS A MINIMUM OF SIX (6) WEEKS PRIOR TO THE RELEASE FROM THE LOS ANGELES DEPARTMENT OF BUILDING AND SAFETY.
2. LADWP WILL INSTALL ELECTRICAL METERS AND ENERGIZE THE ELECTRICAL SERVICE TYPICALLY WITHIN TEN (10) WORKING DAYS, AFTER ALL RELEASES HAVE BEEN OBTAINED FROM BOTH LADWP AND THE LOS ANGELES DEPARTMENT OF BUILDING AND SAFETY.
3. THE CUSTOMER MUST SUBMIT A SERVICE APPLICATION FOR EACH METER TO THE LADWP COMMERCIAL RESOURCE CENTER AT 1-800-499-8840 PRIOR TO THE METER INSTALLATION IN ORDER FOR THE SERVICE TO BE TURNED ON.

CONDUIT

1. PRIMARY CONDUITS: 2-4" PLASTIC ENCASED BURIED TYPE (EB-35) CONDUITS ENCASED IN 3" OF CONCRETE. MINIMUM COVER FROM TOP OF CONCRETE ENVELOPE TO FINISHED GRADE, EXCEPT AT TRANSFORMER PAD, SHALL BE 30 INCHES IN PAVED AREAS AND 36 INCHES IN LANDSCAPED AREAS. WHEN TERMINATING CONDUIT FOR SUBSEQUENT CONNECTION BY THE LADWP, THE DEPTH AT THE PROPERTY LINE MUST BE A MINIMUM OF 36 INCHES. DEPTH MEASUREMENTS AT PROPERTY LINE ARE TO BE TAKEN FROM GUTTER GRADE.
2. SECONDARY CONDUITS: 2-5" (POWER) PLASTIC DIRECT BURIED TYPE (DB-120) CONDUITS. CONDUITS SHALL HAVE A MINIMUM COVER OF 24 INCHES. THE 5" CONDUIT SHALL TERMINATE IN THE SPECIFIED PULL BOX ADJACENT TO THE UNDERGROUND PULL SECTION.
3. WHEN THE PRIMARY CONDUITS ARE BEING INSTALLED ON FILLED GROUND, FOUR #4 REINFORCING BARS SHALL BE INSTALLED IN THE CONCRETE ENVELOPE.
4. FIVE-INCH CONDUIT RADIUS BENDS MAY NOT BE STOCKED BY LOCAL SUPPLIERS AND MUST BE ORDERED AT LEAST FOUR WEEKS IN ADVANCE OF CONSTRUCTION. BENDS AND OFFSETS MADE BY USING ANGLE OR OFFSET COUPLINGS WILL NOT BE ACCEPTED.
5. ALL PLASTIC CONDUITS SHALL BE IN ACCORDANCE WITH RECOGNIZED STANDARDS. FOR PVC THE STANDARD IS ASTM F-512 AS LAST REVISED. CONDUIT MAY BE SUBJECTED TO TESTING BY THE LADWP AT THE REQUEST OF THE LADWP ELECTRIC SERVICE REPRESENTATIVE.
6. CONDUIT SHALL BE MANDRELLED WITH A MANDREL PROVIDED BY THE LADWP. INSTALL A FLAT, WOVEN MULTI-FIBER POLYESTER RIBBON, MINIMUM 3/8-INCH NOMINAL WIDTH AND 1250 POUND MINIMUM TENSILE STRENGTH PULLING TAPE IN ALL DUCTS. THE PULLING TAPE SHALL BE PRINTED WITH THE RATED TENSILE STRENGTH AND SEQUENTIAL FOOTAGE MARKINGS WITH LEGIBLE AND STABLE PRINT. THE TAPE SHALL BE IN ONE CONTINUOUS LENGTH THROUGH EACH DUCT WITH NO CUTS, SPLICES OR TIES ALLOWED.

STRUCTURE

1. PROVIDE AND INSTALL ONE 8' X 10' TRANSFORMER PAD WITH HANDHOLE AND PROTECTIVE BARRIERS IN ACCORDANCE WITH LADWP UGCS P721-00-00.8) AND UB721-07 GROUP 1 AS LAST REVISED.
2. THE LOS ANGELES DEPARTMENT OF BUILDING AND SAFETY REQUIRES A BUILDING PERMIT FOR STRUCTURES EXCEEDING 48 INCHES IN DEPTH, INSTALLED ON PRIVATE PROPERTY.
3. THE CONDUIT, STRUCTURE, AND SERVICE POINT SHALL BE LOCATED AS SHOWN UNLESS CHANGES ARE APPROVED BY THE LADWP DESIGN ENGINEER AND CONFIRMED BY THE CUSTOMER.

STAGING AREA

1. THE CUSTOMER'S STAGING AREA MUST BE BUILT TO SUSTAIN A MINIMUM LOAD CAPACITY OF 24 TONS PER LADWP UGCS P721-00.4 & -00.5.
2. THE LADWP REQUIRES A PERMANENT STAGING AREA FOR THE INSTALLATION AND MAINTENANCE OF THE LADWP TRANSFORMER IN THE CUSTOMER'S PROPOSED LOCATION. ANY REPAIRS NECESSARY TO THE CUSTOMER'S DRIVEWAYS AND SURFACE MATERIALS DURING THE INSTALLATION AND FUTURE MAINTENANCE OF THIS TRANSFORMER WILL BE THE RESPONSIBILITY OF THE PROPERTY OWNER.

METHANE ZONE

1. THIS SITE IS CLASSIFIED AS A METHANE ZONE AND MUST COMPLY WITH THE REQUIREMENTS SPECIFIED IN LADWP UGCS H-242.
2. TP 10943-R REQUIRES THE FOLLOWING:
   A. METAL GRATING ACCESS COVER PER LADWP UGCS UB728-01.
   B. 18-INCH CONCRETE ANCHOR AT EACH CONDUIT ENTRANCE.
3. NEW MS 400A REQUIRES A SEPARATED UNDERGROUND PULL SECTION FOR VENTING WITH GAS SEALS.
4. NEW MS 400A REQUIRES A SURFACE MOUNTED TERMINATION PULL BOX FOR VENTING WITH GAS SEALS.

FAULT CURRENT

THE MAXIMUM AVAILABLE SYMMETRICAL FAULT CURRENT AT THE 480Y/277 VOLT, 3 PHASE, 4-WIRE SERVICE POINT WILL BE 38,000 AMPERES.

CUSTOMER CHARGES

1. THE LADWP WILL BILL THE CUSTOMER APPROXIMATELY $60,000 FOR CONDUIT CONSTRUCTION IN PUBLIC PROPERTY.
2. CONDUIT CONSTRUCTION PERMIT FEES AND TRAFFIC MANAGEMENT FEES, IF APPLICABLE, WILL BE DETERMINED BY THE LOS ANGELES DEPARTMENT OF PUBLIC WORKS. THE LADWP WILL BILL THE CUSTOMER FOR PERMIT FEES AFTER THE PERMIT IS ISSUED.
3. THE LADWP WILL BILL THE CUSTOMER $9558 FOR TRANSFORMER DEPOSIT FEE. DEPOSIT FEE IS ELIGIBLE FOR REFUND AFTER FIVE YEARS PER LADWP RULE 16-E. ELECTRIC SYSTEM OF THE RULES GOVERNING WATER AND ELECTRIC SERVICE. ANY CLAIM FOR THE REFUND MUST BE MADE BEFORE ONE YEAR FOLLOWING THE END OF THE FIVE-YEAR PERIOD.

PERMIT NOTE

AN APPROVED TRAFFIC CONTROL PLAN MAY BE REQUIRED FOR LADWP TO OBTAIN A CONSTRUCTION PERMIT FROM LOS ANGELES DEPARTMENT OF PUBLIC WORKS. THE CUSTOMER MAY BE REQUIRED TO HIRE A CONTRACTOR TO DEVELOP A TRAFFIC CONTROL PLAN AND PROVIDE LABOR AND MATERIALS TO MANAGE TRAFFIC DURING CONSTRUCTION. THE CUSTOMER SHALL OBTAIN APPROVAL OF THE PLAN BY THE LOS ANGELES DEPARTMENT OF TRANSPORTATION AND PROVIDE A COPY TO LADWP IF REQUIRED.

GENERAL NOTES

1. EXISTING SPORTS LIGHTING POWER DISTRIBUTION PANELS ARE LOCATED INSIDE EXISTING LIGHTING CONTROL PANEL AS SHOWN ON PLAN. NEW LIGHTING CONTROL AND POWER DISTRIBUTION PANELS WILL REPLACE EXISTING PANELS FOR BASEBALL DIAMONDS. CONTRACTOR SHALL COMPLETE THE FOLLOWING PRIOR TO DEMOLITION OF EXISTING LIGHTING SYSTEMS:
   - A. FIELD SURVEY EXISTING LIGHTING POWER DISTRIBUTION PANELS TO IDENTIFY CIRCUITS BEING REPLACED AND CIRCUITS THAT MAY BE DISTURBED BY CONSTRUCTION ACTIVITIES.
   - B. FIELD LOCATE BURIED LIGHTING WIRING FROM EXISTING LIGHTING PANEL TO IDENTIFY EXISTING CONDUITS THAT MAY BE DISTURBED BY CONSTRUCTION. EXCAVATE TEST PITS AS NEEDED TO LOCATE ALL BURIED ELECTRICAL CONDUITS WITHIN PROJECT WORK AREAS.
   - C. DISCONNECT WIRING TO LIGHT POLES AND FIXTURES BEING REPLACED, AND WIRING TO BE IMPACTED BY CONSTRUCTION, AND PULL WIRES OUT OF EXISTING ELECTRICAL CONDUITS, PRIOR TO CONSTRUCTION AND DEMOLITION OF EXISTING LIGHTING SYSTEMS.
   - D. PREPARE AND SUBMIT A DETAILED DEMOLITION PLAN, INCLUDING TEXT DESCRIPTION, DRAWINGS AND PHOTOS, TO EXPLAIN WHAT WILL BE DEMOLISHED, HOW IT WILL BE DEMOLISHED, AND PLANS TO INDICATE LOCATIONS OF CONDUITS TO BE DEMOLISHED AND THOSE TO BE PROTECTED IN-PLACE.
   - E. ABANDON IN-PLACE EXISTING LIGHTING DISTRIBUTION PANELS LOCATED IN EXISTING LIGHTING CONTROL PANEL, AND LABEL BREAKERS AS ABANDONED.
3. CONTRACTOR TO PROVIDE FEEDER POWER TO TWO BASEBALL DIAMONDS FED FROM NEW LIGHTING DISTRIBUTION PANEL PER LIGHTING SITE PLAN (EL01).

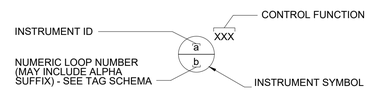
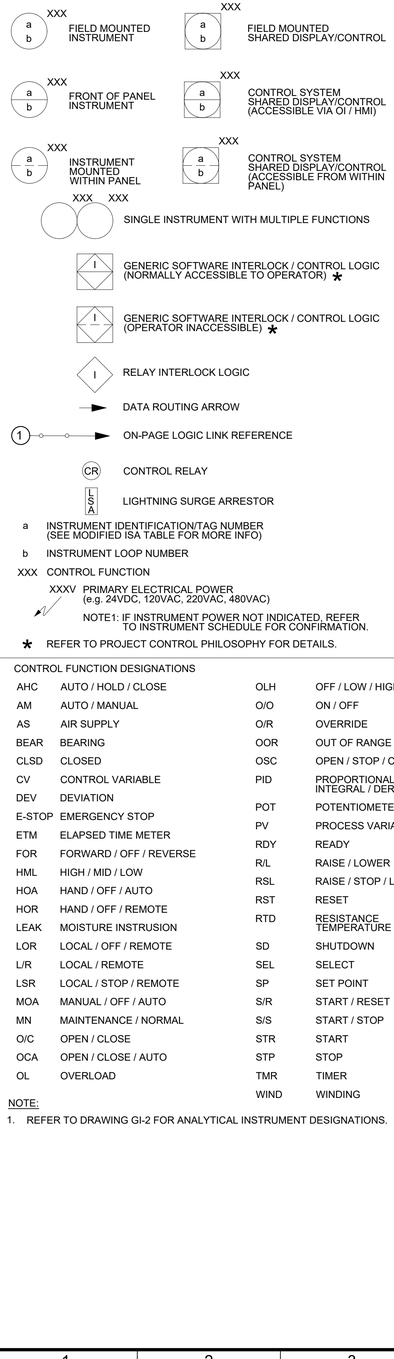
INSTRUMENTATION CALL - OUT



INSTRUMENT SYMBOLS



a INSTRUMENT IDENTIFICATION/TAG NUMBER (SEE MODIFIED ISA TABLE FOR MORE INFO)

b INSTRUMENT LOOP NUMBER

XXX CONTROL FUNCTION

XXXV PRIMARY ELECTRICAL POWER (e.g. 24VDC, 120VAC, 220VAC, 480VAC)

NOTE1: IF INSTRUMENT POWER NOT INDICATED, REFER TO INSTRUMENT SCHEDULE FOR CONFIRMATION.

* REFER TO PROJECT CONTROL PHILOSOPHY FOR DETAILS.

CONTROL FUNCTION DESIGNATIONS

AHC	AUTO / HOLD / CLOSE	OLH	OFF / LOW / HIGH
AM	AUTO / MANUAL	O/O	ON / OFF
AS	AIR SUPPLY	O/R	OVERRIDE
BEAR	BEARING	OOR	OUT OF RANGE
CLSD	CLOSED	OSC	OPEN / STOP / CLOSE
CV	CONTROL VARIABLE	PID	PROPORTIONAL / INTEGRAL / DERIVATIVE
DEV	DEVIATION	POT	POTENTIOMETER
E-STOP	EMERGENCY STOP	PV	PROCESS VARIABLE
ETM	ELAPSED TIME METER	RDY	READY
FOR	FORWARD / OFF / REVERSE	R/L	RAISE / LOWER
HML	HIGH / MID / LOW	RSL	RAISE / STOP / LOWER
HOA	HAND / OFF / AUTO	RST	RESET
HOR	HAND / OFF / REMOTE	RTD	RESISTANCE TEMPERATURE DETECTOR
LEAK	MOISTURE INSTRUSION	SD	SHUTDOWN
LOR	LOCAL / OFF / REMOTE	SEL	SELECT
L/R	LOCAL / REMOTE	SP	SET POINT
LSR	LOCAL / STOP / REMOTE	S/R	START / RESET
MOA	MANUAL / OFF / AUTO	S/S	START / STOP
MN	MAINTENANCE / NORMAL	STR	START
O/C	OPEN / CLOSE	STP	STOP
OCA	OPEN / CLOSE / AUTO	TMR	TIMER
OL	OVERLOAD	WIND	WINDING

NOTE:

1. REFER TO DRAWING GI-2 FOR ANALYTICAL INSTRUMENT DESIGNATIONS.

INSTRUMENT SYMBOLS - CONT

COMPUTING OR CONVERTING FUNCTIONS

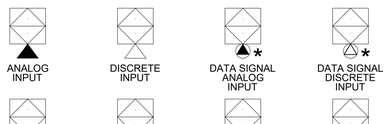
COMPUTING

SUMMING		DERIVATIVE		EXPONENTIAL	
MULTIPLYING		AVERAGING		BIAS	
DIVIDING		RATIO	1:1	HIGH LIMITING	
SQ ROOT EXTRACTION		DIFFERENCE		LOW LIMITING	
PROPORTIONAL	P	HIGH SELECTING		LINEARIZER	
INTEGRAL	I	LOW SELECTING			

CONVERTING

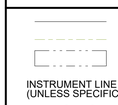
E	VOLTAGE	R	RESISTANCE (ELECT)	A	ANALOG
I	CURRENT	D	DIGITAL	B	BINARY
P	PNEUMATIC			H	HYDRAULIC

PLC / REMOTE I/O POINTS



* FIELD NETWORK INTERFACE. SEE SPECIFICATION FOR MORE INFORMATION

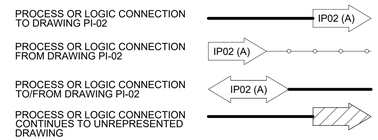
INSTRUMENTATION LINE SYMBOLOGY



INSTRUMENT LINE DEFINITIONS (UNLESS SPECIFICALLY NOTED OTHERWISE PER DRAWING LEGEND)

COMMUNICATION LINE DEFINITIONS (UNLESS SPECIFICALLY NOTED OTHERWISE PER DRAWING LEGEND)

SIGNAL AND PROCESS OFF-PAGE CONNECTORS



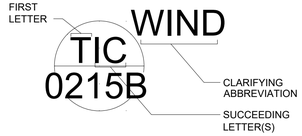
NOTE: REFER TO INSTRUMENTATION LINE SYMBOLOGY FOR PROCESS AND LOGIC LINESTYLE DEFINITION.

ISA TABLE (MODIFIED)

	FIRST LETTER		SUCCEEDING LETTER(S)		
	MEASURED OR INITIATING VARIABLE	MODIFIER	READOUT OR PASSIVE FUNCTION	OUTPUT FUNCTION	MODIFIER
A	ANALYSIS		ALARM		
B	BURNER, COMBUSTION				
C	CONDUCTIVITY			CONTROL	CLOSED
D	DENSITY	DIFFERENTIAL			
E	VOLTAGE		SENSOR (PRIMARY ELEMENT)		
F	FLOW RATE	RATIO (FRACTION)			FORWARD
G			GAUGE, GLASS, VIEWING DEVICE		
H	HAND				HIGH
I	CURRENT (ELECTRICAL)		INDICATE		
J	POWER	SCAN			
K	TIME, TIME SCHEDULE	TIME RATE OF CHANGE		CONTROL STATION	
L	LEVEL		LIGHT		LOW
M	MOISTURE	MOMENTARY			MIDDLE, INTERMEDIATE
N	TORQUE		ISOLATE	ISOLATOR	
O			ORIFICE, RESTRICTION		OPEN
P	PRESSURE, VACUUM		POINT (TEST) CONNECTION		
Q	QUANTITY	INTEGRATE, TOTALIZE			
R	RADIATION		RECORD		REVERSE
S	SPEED, FREQUENCY	SAFETY		SWITCH	
T	TEMPERATURE			TRANSMIT	
U	MULTIVARIABLE		MULTIFUNCTION	MULTIFUNCTION	MULTIFUNCTION
V	VIBRATION, MECHANICAL ANALYSIS			VALVE, DAMPER, LOUVER	
W	WEIGHT, FORCE		WELL		
X	INTRUSION	X AXIS			
Y	EVENT, STATE, OR PRESENCE	Y AXIS		COMPUTE, CONVERT	
Z	POSITION, DIMENSION	Z AXIS		DRIVER, ACTUATOR, FINAL CONTROL ELEMENT	

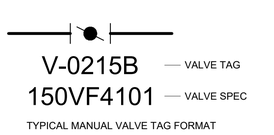
TAG SCHEMA

TYPICAL INSTRUMENT & CONTROL VALVE TAGGING



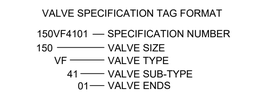
TYPICAL PIPE LINE TAG FORMAT

TYPICAL VALVE TAG / SPEC FORMAT

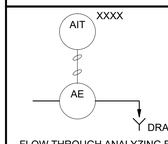


TYPICAL MANUAL VALVE TAG FORMAT

VALVE SPECIFICATION TAG FORMAT



ANALYTICAL INSTRUMENTS



FLOW THROUGH ANALYZING ELEMENT WITH REMOTE TRANSMITTER

ALK	ALKALINITY
CL_2	CHLORINE CONCENTRATION
COMB	COMBUSTIBLE GAS
COND	CONDUCTIVITY
DO	DISSOLVED OXYGEN
TEMP	TEMPERATURE
NH_2CL	MONO-CHLORAMINE

LEL	LOWER EXPLOSIVE LIMIT
NO_3 / NO_2	NITRATE / NITRITE
NH_3 / NH_4	AMMONIA / AMMONIUM
O_2	OXYGEN CONCENTRATION
O_3	OZONE
ORP	OXIDATION - REDUCTION POTENTIAL
PC	PARTICLE COUNTER
pH	HYDROGEN ION CONCENTRATION
SCU	STREAMING CURRENT UNIT
SO_2	SULFUR DIOXIDE
TKN	TOTAL KJELDAHL NITROGEN
TN	TOTAL NITROGEN
TOC	TOTAL ORGANIC CARBON
TURB	TURBIDITY
TSS	TOTAL SUSPENDED SOLIDS
UVI	ULTRA VIOLET INTENSITY
UVT	ULTRA VIOLET TRANSMITTANCE

- FLOAT VALVE

VALVE AND GATE ACTUATORS

- DIAPHRAGM ACTUATOR
- E/H = ELECTROHYDRAULIC, P = PNEUMATIC, S = SOLENOID
- MOTOR ACTUATOR
- PISTON ACTUATOR
- WEIGHT BALANCED ACTUATOR

GATES

- SLIDE GATE
- STOP GATE OR SHEAR GATE

WASTEWATER EQUIPMENT

- BELT FILTER PRESS
- SHAFTLESS CONVEYOR
- SCREW CONVEYOR
- CENTRIFUGE
- GRAVITY BELT THICKENER
- BELT CONVEYOR
- SLUDGE GRINDER

PUMPS & COMPRESSORS

- SLUDGE DIAPHRAGM PUMP
- HORIZONTAL CENTRIFUGAL PUMP
- GENERIC PUMP
- CHEMICAL METERING PUMP
- DRUM PUMP
- ROTARY GEAR PUMP
- SPLIT-CASE PUMP
- HOSE / PERISTALTIC PUMP
- PLUNGER / PISTON PUMP
- PROGRESSIVE CAVITY PUMP
- ROTARY LOBE PUMP
- SUBMERSIBLE SUMP PUMP
- SUBMERSIBLE TURBINE PUMP
- VERTICAL TURBINE PUMP
- VERTICAL CENTRIFUGAL PUMP
- INCLINED ARCHIMEDES SCREW PUMP
- VERTICAL SUMP PUMP
- RECIPROCATING COMPRESSOR
- ROTARY SCREW COMPRESSOR

HVAC

- AIR CONDITIONING UNIT
- DUCT AIR FILTER
- AIR HANDLING UNIT
- NON-MOTORIZED DAMPER
- MOTORIZED DAMPER
- DEHUMIDIFIER
- DUCT SMOKE DETECTOR
- EVAPORATIVE COOLER
- HEATER
- HVAC BOILER
- HVAC FAN
- VENT FAN
- HVAC LOUVER
- THERMOSTAT
- STEAM GENERATOR
- UNIT HEATER
- WATER HEATER
- AFTER COOLER

PIPING ACCESSORIES

- ANNULAR SEAL
- ATMOSPHERIC VENT
- BLIND FLANGE
- CAP - BREATHER
- CAP - SCREW / THREADED
- CAP - WELDED
- CAP - QUICK DISCONNECT
- CHLORINE INJECTOR OR CHEMICAL EDUCTOR
- DIAPHRAGM SEAL
- DRAIN
- EXPANSION CHAMBER WITH RUPTURE DISK
- EDUCTOR
- FLANGED
- FLEXIBLE CONNECTION - BELLOWS TYPE (OR)
- FLAME ARRESTOR
- FLOOR CLEANOUT (FCO)
- FILTER
- HUB DRAIN
- INLINE MIXER
- PIPE MATERIAL CHANGE
- PULSATION DAMPENER
- REDUCER - CONCENTRIC
- REDUCER - ECCENTRIC
- REMOVABLE SPOOL PIECE
- UNION
- RUPTURE DISK
- STRAINER - BASKET TYPE
- STRAINER - DUPLEX BASKET TYPE
- STRAINER - WYE TYPE
- SLOPE
- TRAP
- WALL CLEANOUT (OR / WCO)
- TIE-IN POINT

BLOWERS

- AERATOR
- BLOWER
- POSITIVE DISPLACEMENT BLOWER
- SINGLE STAGE CENTRIFUGAL BLOWER

MISCELLANEOUS

- BRIDGE CRANE
- CALIBRATION COLUMN
- CONTAINER SCALE
- CARTRIDGE FILTER
- DEMISTOR
- FIRE HYDRANT
- GAS BOTTLE
- HEAT EXCHANGER - PLATE TYPE
- HEAT EXCHANGER - STRAIGHT TYPE
- HEAT EXCHANGER - U TUBE
- HEATER
- HORN
- PANEL-MOUNTED HORN
- BEACON
- MISCELLANEOUS EQUIPMENT
- MIXER
- MOTOR SYMBOL
- HORIZONTAL PRESSURE VESSEL
- VERTICAL PRESSURE VESSEL
- RADIO ANTENNA
- REFRIGERATOR DRYER
- SAMPLE COOLER
- AUTO-BACKWASHING STRAINER
- TANK WITH CONE SHAPED ROOF
- TANK WITH DOME ROOF
- TANK WITH FLOATING COVER
- TANK, VESSEL, OR BIN
- TEMPERING TANK
- TOTE TANK
- WATER LEVEL
- GENERATOR
- PARTICULATE FILTER

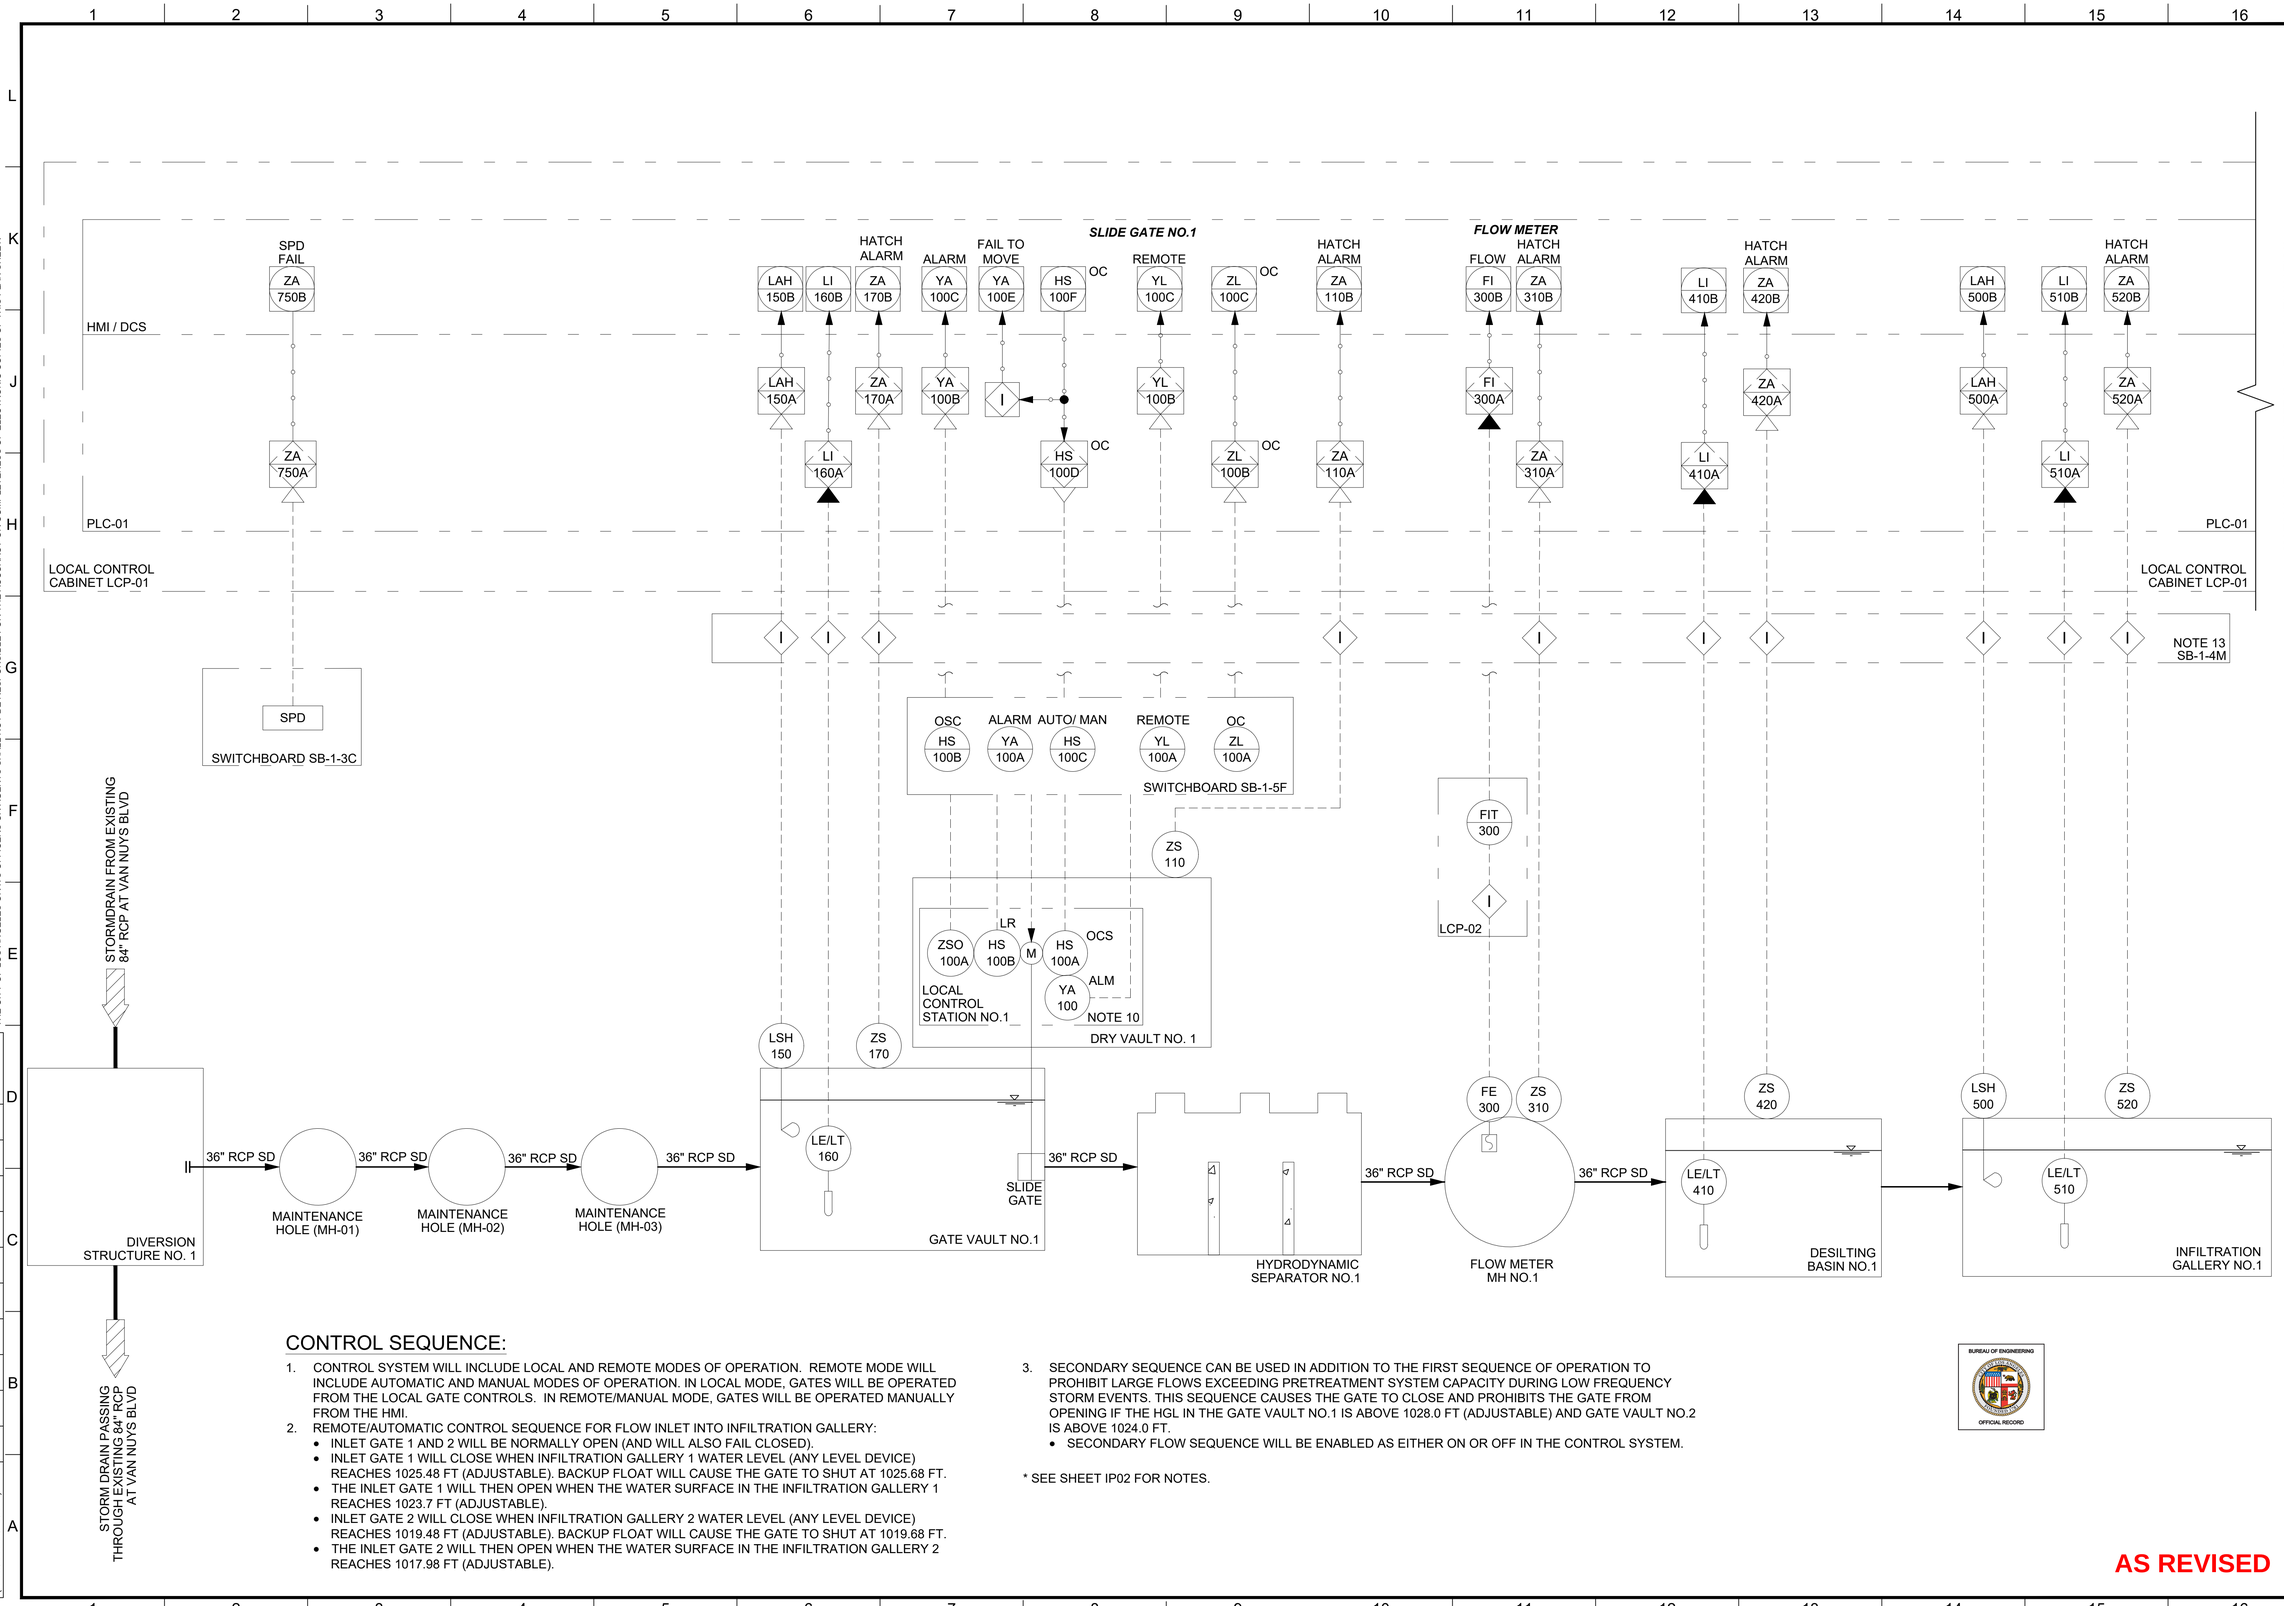
SHEET 125 OF 129 SHEETS

BUREAU OF ENGINEERING — OFFICIAL RECORD

AS REVISED



CONTROL SEQUENCE:

1. CONTROL SYSTEM WILL INCLUDE LOCAL AND REMOTE MODES OF OPERATION. REMOTE MODE WILL INCLUDE AUTOMATIC AND MANUAL MODES OF OPERATION. IN LOCAL MODE, GATES WILL BE OPERATED FROM THE LOCAL GATE CONTROLS. IN REMOTE/MANUAL MODE, GATES WILL BE OPERATED MANUALLY FROM THE HMI.
2. REMOTE/AUTOMATIC CONTROL SEQUENCE FOR FLOW INLET INTO INFILTRATION GALLERY:
   - INLET GATE 1 AND 2 WILL BE NORMALLY OPEN (AND WILL ALSO FAIL CLOSED).
   - INLET GATE 1 WILL CLOSE WHEN INFILTRATION GALLERY 1 WATER LEVEL (ANY LEVEL DEVICE) REACHES 1025.48 FT (ADJUSTABLE). BACKUP FLOAT WILL CAUSE THE GATE TO SHUT AT 1025.68 FT.
   - THE INLET GATE 1 WILL THEN OPEN WHEN THE WATER SURFACE IN THE INFILTRATION GALLERY 1 REACHES 1023.7 FT (ADJUSTABLE).
   - INLET GATE 2 WILL CLOSE WHEN INFILTRATION GALLERY 2 WATER LEVEL (ANY LEVEL DEVICE) REACHES 1019.48 FT (ADJUSTABLE). BACKUP FLOAT WILL CAUSE THE GATE TO SHUT AT 1019.68 FT.
   - THE INLET GATE 2 WILL THEN OPEN WHEN THE WATER SURFACE IN THE INFILTRATION GALLERY 2 REACHES 1017.98 FT (ADJUSTABLE).
3. SECONDARY SEQUENCE CAN BE USED IN ADDITION TO THE FIRST SEQUENCE OF OPERATION TO PROHIBIT LARGE FLOWS EXCEEDING PRETREATMENT SYSTEM CAPACITY DURING LOW FREQUENCY STORM EVENTS. THIS SEQUENCE CAUSES THE GATE TO CLOSE AND PROHIBITS THE GATE FROM OPENING IF THE HGL IN THE GATE VAULT NO.1 IS ABOVE 1028.0 FT (ADJUSTABLE) AND GATE VAULT NO.2 IS ABOVE 1024.0 FT.
   - SECONDARY FLOW SEQUENCE WILL BE ENABLED AS EITHER ON OR OFF IN THE CONTROL SYSTEM.

* SEE SHEET IP02 FOR NOTES.

KEY NOTES:

ITEM	DESCRIPTION	REMARKS
1	NEMA 4X, 316 SS CABINET	72"(H) X 36"(W) X 24"(D). 3 POINT LATCHING
2	AIR CONDITIONER, OUTDOOR NEMA 4X	SIZE FOR MAXIMUM AMBIENT OF 110 DEG F
3	NAMEPLATE: LINE 1: " ELECTRICAL CONTROL". LINE 2: "WATER TREATMENT". LINE 3: "LCP-01".	ENGRAVED TEXT 3/8" HIGH, BLACK LETTERING ON WHITE
4	CABINET INTERNAL LED LIGHT AND CABINET INTRUSION SWITCH	WITH DOOR SWITCH
5	INNER DEADFRONT DOOR	STEEL. POWDER COATED WHITE
6	OPERATOR INTERFACE TERMINAL	HONEYWELL, 900 SERIES, 15" TOUCHSCREEN AND KEYPAD. ETHERNET PORT. 65 K COLOR DISPLAY
7	CABINET BACK PANEL	STEEL. POWDER COATED WHITE
8	CABINET 120VAC DISCONNECT	SEE SHEET ES01 FOR POWER CONNECTION FROM PANEL BOARD DP-2
9	GFCI RECEPTACLE	15 AMP WITH INDICATOR
10	120 VAC DISTRIBUTION	PROVIDE CIRCUIT BREAKERS FOR ALL SUB-CIRCUITS SEE SHEET EP12.
11	RACK MOUNT UPS, 1500KVA MINIMUM.	SIZE TO MATCH LOAD WITH 60 MINUTE RUN TIME AT CALCULATED LOAD, EXCLUDING AIR CONDITIONER.
	EXTERNAL BATTERY IF REQUIRED.	
12	PROGRAMMABLE LOGIC CONTROLLER	HONEYWELL CONTROLEDGE PLC, NO EXCEPTIONS
		8 SLOT MAIN BASE MINIMUM, WITH CPU, COMMUNICATIONS AND I/O MODULES
13	INDUSTRIAL SECURITY APPLIANCE	CISCO 4000 SERIES.
14	REMOTE TERMINATION PANELS FOR I/O	HONEYWELL RTP MATCHING I/O MODULES PROVIDED
15	FLOW TRANSMITTER	AS REQUIRED
16	CELLULAR MODEM AT&T FIRSTNET	PROVIDED BY SERVICE PROVIDER & INSTALLED BY CONTRACTOR.
17	CELLULAR ANTENNA	PROVIDED BY SERVICE PROVIDER & INSTALLED BY CONTRACTOR.

GENERAL NOTES:

1. PROVIDE CONDUIT SEALS FOR ALL CONDUITS BEGINNING IN A HAZARDOUS CLASSIFIED AREA.

THE CITY OF LOS ANGELES OR ITS OFFICERS OR AGENTS SHALL NOT BE RESPONSIBLE FOR THE ACCURACY OR COMPLETENESS OF ELECTRONIC COPIES OF THIS PLAN SHEET.

REVISION DATES (DESIGN STAGE ONLY)

Sheet Version 4.0

Z:\DWG\20005-01_LABOE TOS 25 STORMWATER\NUVIS\DAVID M GONZALES RECREATION CENTER\CD'S\SHEETS TPL\DMG G-01.DWG 11/7/2024 11:51 AM

CONSTRUCTION PLAN NOTES

1. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, AND EQUIPMENT FOR THE INSTALLATION OF ALL IMPROVEMENTS AS SHOWN ON THE DRAWINGS AND AS DESCRIBED IN THE SPECIFICATIONS.
2. CONTRACTOR SHALL REVIEW ALL EXISTING SITE CONDITIONS PRIOR TO SUBMITTING BID AND PRIOR TO COMMENCING INSTALLATION. IF ANY DISCREPANCIES EXIST, THEY SHOULD BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE CITY'S/OWNER'S AUTHORIZED REPRESENTATIVE.
9. DEVIATIONS BETWEEN THE DRAWINGS AND ACTUAL FIELD CONDITIONS SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE ENGINEER.
4. COSTS INCURRED DUE TO REPAIR, RESTORATION, OR REPLACEMENT OF EXISTING IMPROVEMENTS WHICH ARE DESIGNATED "TO BE PROTECTED" OR "TO REMAIN" WHICH ARE DAMAGED AS A RESULT OF CONSTRUCTION OPERATIONS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
5. UNLESS DESIGNATED ON THE DRAWINGS OTHERWISE, ALL MATERIALS DESIGNATED FOR REMOVAL SHALL BE DISPOSED OF OFF-SITE IN A LEGAL MANNER.
6. HARDSCAPE SHALL BE PLACED PER GEOTECHNICAL SOILS REPORT. IF SUCH REPORT IS UNAVAILABLE, CONTRACTOR SHALL DISCUSS PLACEMENT ON SUITABLE GRADE WITH THE ENGINEER.
7. CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING AND STAKING ALL SEWER, WATER AND UTILITY LINES ABOVE OR BELOW GRADE THAT MIGHT BE DAMAGED AS A RESULT OF CONSTRUCTION OPERATIONS. CONTRACTOR SHALL ASSUME SOLE RESPONSIBILITY FOR ANY COST INCURRED FOR REPAIR, RESTORATION, OR REPLACEMENT OF AFOREMENTIONED UTILITIES DAMAGED AS A RESULT OF CONSTRUCTION OPERATIONS.
8. ABANDONED PIPES SHALL BE CAPPED OR PLUGGED IN A MANNER APPROVED BY THE ENGINEER.
9. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS, MANUFACTURER'S CUT OR DATA SHEETS FOR APPROVAL PRIOR TO ORDERING MATERIALS. CONTRACTOR SHALL FURNISH TO THE ENGINEER A CERTIFICATE OF COMPLIANCE FOR SUCH FURNISHED MATERIALS.
10. UNLESS DESIGNATED ON THE DRAWINGS OTHERWISE, MATERIALS TO BE PURCHASED AND FURNISHED BY THE CONTRACTOR SHALL BE NEW.

DEMOLITION PLAN NOTES

1. CONTRACTOR SHALL MEET WITH THE AUTHORIZED CITY'S REPRESENTATIVE AND ENGINEER PRIOR TO START OF CONSTRUCTION TO DISCUSS THE EXISTING CONDITIONS, EXTENT OF DEMOLITION, AND FENCING. PROVIDE & MAINTAIN ACCESS TO THE EXISTING COMMERCE FACILITIES IF APPLICABLE. CONTRACTOR SHALL INCLUDE THE PREVISION OF ACCESS IN THEIR BID.
2. CONTRACTOR IS RESPONSIBLE FOR NOTIFYING UTILITY COMPANIES AND ASSURING ALL UTILITIES TO BE CUT OFF DURING REMOVAL. ALL ACTIVE UTILITIES SHALL BE PROTECTED AND TO REMAIN IN PLACE.
3. CARE SHALL BE TAKEN DURING DEMOLITION AND REMOVAL WORK TO AVOID DAMAGE TO EXISTING FACILITIES AND AMENITIES AS NOTED ON PLANS.
4. CONTRACTOR SHALL REMOVE AND DISPOSE OF PROPERLY OFFSITE ALL ITEMS NOTED FOR REMOVAL IN A LEGAL MANNER.
5. UNLESS OTHERWISE NOTED, ALL EXISTING TREES SHALL REMAIN & BE PROTECTED.
6. THE STUMPS OF ALL TREES BEING REMOVED SHALL BE GROUND DOWN TO A MINIMUM 6" BELOW SURROUNDING GRADE. FILL HOLE WITH SOIL FLUSH WITH ADJACENT GRADE. COORDINATE WITH SOIL REMOVAL.
7. REMOVAL OF ANY EXISTING TREE SHALL BE REVIEWED AND APPROVED BY THE ENGINEER & CITY ARBORIST PRIOR TO CONSTRUCTION.
8. CONTRACTOR SHALL SECURE PROJECT SITE DURING CONSTRUCTION STAGES OF DEVELOPMENT & AS DIRECTED BY CITY. CONTRACTOR SHALL PAY FOR AND PROVIDE ADDITIONAL TEMPORARY CONSTRUCTION FENCE AS NECESSARY TO SECURE SITE.
9. CONTRACTOR SHALL PAY FOR, PROVIDE, AND ATTACH A GREEN SCREEN PRIVACY FENCE FABRIC TO THE TEMPORARY CONSTRUCTION FENCE. FABRIC SHALL BE ATTACHED TO INSIDE FACE OF THE FENCE, AND SHALL BE ATTACHED PER MANUFACTURER DETAILS AND SPECIFICATIONS.
10. REMOVAL QUANTITIES NOTES ON PLANS ARE APPROXIMATE, CONTRACTOR IS RESPONSIBLE FOR VERIFYING QUANTITIES PRIOR TO BID.
11. CONTRACTOR SHALL PAY FOR, INCLUDE IN THEIR BID, & CONSTRUCT A TEMPORARY 6' HIGH CONSTRUCTION FENCE WITH SCREEN FABRIC. TEMPORARY FENCING SHALL BE CONSTRUCTED PRIOR TO SITE DEMOLITION & AS DIRECTED BY ENGINEER. FINAL LOCATION OF THE TEMPORARY CONSTRUCTION FENCE SHALL BE REVIEWED AND APPROVED BY THE ENGINEER PRIOR TO CONSTRUCTION.
12. COST INCURRED DUE TO REPAIR, AND OR REPLACEMENT OF EXISTING IMPROVEMENTS WHICH ARE NOT DESIGNATED FOR REMOVAL AND WHICH ARE DAMAGED AS A RESULT OF CONSTRUCTION OPERATIONS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
13. UNLESS NOTED OTHERWISE, ALL MATERIALS DESIGNATED FOR REMOVAL SHALL BE DISPOSED OF OFF-SITE IN A LEGAL MATTER.
14. ABANDONED PIPES SHALL BE CAPPED OR PLUGGED IN A MANNER APPROVED BY THE CITY'S OWNER/AUTHORIZED REPRESENTATIVE.
15. CONCRETE INDICATED FOR REMOVAL SHALL BE CUT TO A TRUE LINE NEATLY SAWED EDGES. IF A SAWCUT IS WITHIN THREE FEET (3') OF AN EXISTING EXPANSION OR CONTROL JOINT, CONCRETE SHALL BE REMOVED TO THAT JOINT OR EDGE.

IRRIGATION NOTES

1. THE CONTRACTOR SHALL REVIEW RELATED DRAWINGS AND SHALL ENSURE COORDINATION WITH ALL APPLICABLE TRADES PRIOR TO SUBMITTING BID.
2. OPERATE IRRIGATION CONTROLLER(S) BETWEEN THE HOURS OF 10:00 PM AND 7:00 AM.
3. NOTIFY UNDERGROUND SERVICE ALERT AT 811 AT LEAST 48 HOURS PRIOR TO ANY EXCAVATION.
4. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, AND EQUIPMENT NECESSARY TO FURNISH AND INSTALL THE IRRIGATION SYSTEM AS SHOWN ON THE DRAWINGS, AS DESCRIBED IN THE SPECIFICATIONS, AND IN ACCORDANCE WITH APPLICABLE CODES AND ORDINANCES BY LICENSED CONTRACTORS AND EXPERIENCED WORKERS. CONTRACTOR SHALL OBTAIN AND PAY FOR ALL REQUIRED PERMITS AND FEES RELATING TO THEIR WORK.
5. DESIGN REFLECTS COMPLIANCE WITH CALIFORNIA STATE ASSEMBLY BILL 325 (AB 325) AND THE STATE'S MODEL ORDINANCE AND/OR THE LOCAL GOVERNING AGENCY'S ADOPTED WATER EFFICIENT LANDSCAPE ORDINANCE.
6. DRAWINGS ARE DIAGRAMMATIC. CONTRACTOR SHALL BE RESPONSIBLE FOR ADJUSTMENTS NECESSARY TO CONFORM TO ACTUAL FIELD CONDITIONS. ALL PIPING, VALVES, ETC. SHOWN WITHIN PAVED AREAS ARE FOR DESIGN CLARIFICATION ONLY AND SHALL BE INSTALLED IN PLANTING AREAS WHERE POSSIBLE. DUE TO THE SCALE OF THE DRAWINGS, IT IS NOT POSSIBLE TO INDICATE ALL OFFSETS, FITTINGS, SLEEVES, WHICH MAY BE REQUIRED. CAREFULLY INVESTIGATE THE STRUCTURAL AND FINISHED CONDITIONS AFFECTING ALL WORK AND PLAN WORK ACCORDINGLY, TO FURNISH ALL REQUIRED MATERIALAVOID ANY CONFLICTS BETWEEN THE SPRINKLER SYSTEM, PLANTING AND ARCHITECTURAL FEATURES. PARALLEL PIPES MAY BE INSTALLED IN COMMON TRENCH. PIPES ARE NOT TO BE INSTALLED DIRECTLY ABOVE ONE ANOTHER. THE WORK SHALL BE INSTALLED IN SUCH A MANNER AS TO AVOID CONFLICTS BETWEEN IRRIGATION SYSTEMS, PLANTING, AND ARCHITECTURAL FEATURES.
7. IRRIGATION SLEEVES SHOWN FOR MAJOR STREET AND DRIVEWAY CROSSINGS FOR CLARITY ONLY. ALL PIPE SLEEVES TO BE MINIMUM 2X DIAMETER OF PIPE. ALL MAINLINE SHALL BE ACCOMPANIED WITH A MINIMUM 2-INCH DIAMETER WIRE SLEEVE. SLEEVING TO EXTEND MINIMUM 12 INCHES BEYOND PAVING OR AS NECESSARY TO ACCESS. CONTRACTOR SHALL INSTALL SLEEVING BELOW ALL PAVING, HARDSCAPE, ETC. AS SHOWN AND AS DIRECTED BY ENGINEER. IN ADDITION TO THE SLEEVES AND CONDUITS SHOWN ON THE DRAWINGS, THE IRRIGATION CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING THE INSTALLATION OF SLEEVES AND CONDUITS OF SUFFICIENT SIZE UNDER ALL PAVED AREAS.
8. DO NOT WILLFULLY INSTALL THE SPRINKLER SYSTEM AS SHOWN ON THE DRAWINGS WHEN IT IS OBVIOUS IN THE FIELD THAT OBSTRUCTIONS, GRADE DIFFERENCES OR DIFFERENCES IN THE AREA DIMENSIONS EXIST THAT MIGHT NOT HAVE BEEN CONSIDERED IN THE ENGINEERING. SUCH OBSTRUCTIONS OR DIFFERENCES SHOULD BE BROUGHT TO THE ATTENTION OF THE OWNERS/OWNER'S AUTHORIZED REPRESENTATIVE. IN THE EVENT THAT THIS NOTIFICATION IS NOT PERFORMED, THE CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY FOR ANY REVISIONS NECESSARY.
9. CONTRACTOR SHALL FLUSH ALL LINES AND ADJUST ALL HEADS FOR OPTIMUM PERFORMANCE IN ACCORDANCE WITH THE SPECIFICATIONS AND TO PREVENT OVERSPRAY ONTO HARDSCAPE AREAS OR STRUCTURAL ELEMENTS. THIS SHALL INCLUDE SELECTING THE BEST DEGREE OF ARC TO FIT ACTUAL SITE CONDITIONS AND TO THROTTLE THE FLOW CONTROL AT EACH VALVE TO OBTAIN THE OPTIMUM OPERATING PRESSURE FOR EACH SYSTEM. ALL MAINLINES SHALL BE FLUSHED PRIOR TO THE INSTALLATION OF IRRIGATION HEADS. AT 30 DAYS AFTER INSTALLATION EACH SYSTEM SHALL BE FLUSHED TO ELIMINATE GLUE AND DIRT PARTICLES FORM THE LINES. COSTS INCURRED DUE TO ANY ADJUSTMENTS FOR 100% COVERAGE, INCLUDING THOSE REQUESTED BY THE ENGINEER SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
10. SYSTEM DESIGN IS BASED ON A MINIMUM OPERATING PRESSURE 70 (P.S.I.) AND A MAXIMUM DEMAND 9.2 (G.P.M.) AS SHOWN AT EACH POINT OF CONNECTION ON THE DRAWINGS. CONTRACTOR SHALL VERIFY PRESSURE AND DEMAND AT EACH POINT OF CONNECTION PRIOR TO COMMENCING INSTALLATION AND SUBMIT SUCH IN WRITING TO THE OWNERS/OWNER'S AUTHORIZED REPRESENTATIVE. IF ANY DISCREPANCIES EXIST, THEY SHOULD BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE OWNERS/OWNER'S AUTHORIZED REPRESENTATIVE.
11. WHEREVER POSSIBLE, CONTROL WIRES SHALL OCCUPY THE SAME TRENCH AS PIPES.
12. EACH CONTROLLER SHALL HAVE ITS OWN INDEPENDENT GROUND WIRE.
13. SPLICING OF 24 VOLT WIRES WILL NOT BE PERMITTED EXCEPT IN VALVE BOXES. CONTRACTOR TO LEAVE A 24" COIL OF EXCESS WIRE AT EACH SPLICE AND EVERY 100' ON CENTER ALONG WIRE RUN. TAPE WIRE BUNDLES 10' ON CENTER. NO TAPING WILL BE PERMITTED INSIDE SLEEVES.
14. WIRE CONNECTORS SHALL BE 3M-DBY/Y-6 DIRECT BURY OR APPROVED EQUAL.
15. CONTROL VALVES SHALL BE SIZED AS DESIGNATED ON THE DRAWINGS AND SHALL BE INSTALLED IN VALVE BOXES AS INDICATED IN THE DETAILS. BOXES SHALL BE SET FLUSH WITH THE FINISH GRADE OR SURFACE AND PERMANENTLY MARKED WITH THE LETTERS R.C.V.
16. CONTRACTOR SHALL INSTALL ANTI-DRAIN CHECK VALVES AS NECESSARY TO PREVENT LOW HEAD DRAINAGE. IN LOCATIONS WHERE LOW HEAD DRAINAGE WILL CAUSE EROSION AND EXCESS WATER, INSTALL KING BROS. CV SERIES CHECK VALVES IN LATERAL LINES FOR EVERY 10' OF ELEVATION CHANGE.
17. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO BECOME FAMILIAR WITH ALL GRADE DIFFERENCES, LOCATION OF WALLS, RETAINING WALLS, ETC. COORDINATE WORK WITH THE GENERAL CONTRACTOR AND OTHER SUBCONTRACTORS FOR THE LOCATION AND THE INSTALLATION OF PIPE SLEEVES THROUGH WALLS, UNDER ROADWAYS, PAVING, STRUCTURES, ETC. CONTRACTOR TO VERIFY THE LOCATION OF EXISTING UNDERGROUND UTILITIES AND STRUCTURES PRIOR TO THE EXCAVATION OF TRENCHES. CONTRACTOR IS TO REPAIR ANY DAMAGE CAUSED BY THEIR WORK AT NO ADDITIONAL COST TO THE OWNER.
18. REMOTE CONTROL VALVES SHALL BE PROGRAMMED IN SEQUENCE AS SHOWN ON PLANS UNLESS DIRECTED OTHERWISE BY OWNERS/OWNER'S AUTHORIZED REPRESENTATIVE. RUN WIRE FROM EACH RCV TO THE CONTROLLER. SPLICING WIRES TOGETHER OUTSIDE OF VALVE BOXES WILL NOT BE PERMITTED.
19. INSTALL VALVE BOXES MINIMUM 12" FROM AND PERPENDICULAR TO WALK, CURB, LAWN, BUILDING OR LANDSCAPE FEATURE. AT MULTIPLE VALVE BOX GROUPS, EACH BOX SHALL BE AN EQUAL DISTANCE FROM THE WALK, CURB, LAWN, ETC. AND EACH BOX SHALL BE MINIMUM 12" APART. SHORT SIDE OF VALVE BOXES SHALL BE PARALLEL TO WALK, CURB, LAWN, ETC.
20. LOCATE QUICK COUPLING VALVE 12" FROM HARDSCAPE AREA. .
21. NOTIFY ENGINEER OF ANY ASPECTS OF LAYOUT THAT WILL PROVIDE INCOMPLETE OR INSUFFICIENT WATER COVERAGE OF PLANT MATERIAL AND DO NOT PROCEED UNTIL HIS/HER INSTRUCTIONS ARE OBTAINED.
22. ALL EXCAVATIONS ARE TO BE FILLED WITH COMPACTED BACKFILL. REPAIR ALL SETTLED TRENCHES PROMPTLY. REPAIR ALL SETTLED TRENCHES PROMPTLY, FOR A PERIOD OF 1 YEAR AFTER COMPLETION OF WORK.
23. INSTALL ONE (1) SPARE CONTROL WIRE FOR EVERY 6 (SIX) STATIONS ON THE CONTROLLER ALONG THE ENTIRE MAIN LINE. SPARE WIRES SHALL BE THE SAME COLOR (ONE WITH A WHITE STRIPE) AND OF A DIFFERENT COLOR THAN OTHER CONTROL WIRES. LOOP 36" EXCESS WIRE INTO EACH SINGLE VALVE BOX AND INTO ONE VALVE BOX IN EACH GROUP OF VALVES. SPARE WIRE(S), NOT APPLICABLE FOR TWO-WIRE SYSTEMS.
24. NOTIFY ARCHITECT OF ANY ASPECTS OF LAYOUT THAT WILL PROVIDE INCOMPLETE OR INSUFFICIENT WATER COVERAGE OF PLANT MATERIAL AND DO NOT PROCEED UNTIL HIS/HER INSTRUCTIONS ARE OBTAINED.
25. NOTIFY ALL LOCAL JURISDICTIONS FOR INSPECTION AND TESTING OF INSTALLED BACKFLOW PREVENTION DEVICE.
26. CONNECT FLOW SENSOR TO CONTROLLER WITH CONDUCTOR DIRECT BURIAL SHIELDED SENSOR CABLE (FS-CAB) INSTALL EACH CABLE IN A SEPARATE 1-1/4" PVC SCHEDULE 40 CONDUIT WITH SWEEP-ELLS.
27. CONTRACTOR SHALL WARRANT THAT THE IRRIGATION SYSTEM WILL BE FREE FROM DEFECTS IN MATERIALS AND WORKMANSHIP FOR A PERIOD OF 1 YEAR AFTER FINAL ACCEPTANCE OF WORK..
28. THE CONTRACTOR SHALL PERMANENTLY HOT STAMP ALL VALVE BOX LIDS WITH 2-INCH MINIMUM LETTER HEIGHT AS FOLLOWS:
    - 'X1' FOR REMOTE CONTROL VALVES ('X' = CONTROLLER AND '1' = STATION NUMBER)
    - 'FS' FOR FLOW SENSOR
    - 'MV' FOR MASTER CONTROL VALVE
    - 'GV' FOR GATE VALVE
    - 'QC' FOR QUICK COUPLING VALVE
    - 'SP' FOR SPLICE BOX OR PULL BOX

PLANTING PLAN NOTES

1. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, AND EQUIPMENT NECESSARY TO FURNISH AND INSTALL PLANT MATERIAL AS SHOWN ON THE DRAWINGS AND AS DESCRIBED IN THE SPECIFICATIONS.
2. UNLESS DESIGNATED ON THE DRAWINGS OTHERWISE, STRUCTURAL IMPROVEMENTS AND HARDSCAPE SHALL BE INSTALLED PRIOR TO PLANTING OPERATIONS.
3. ALL WORK ON THE IRRIGATION SYSTEM, INCLUDING HYDROSTATIC, COVERAGE, AND OPERATIONAL TESTS AND THE BACKFILLING AND COMPACTION OF TRENCHES SHALL BE PERFORMED PRIOR TO PLANTING OPERATIONS.
4. PLANT LIST ON THE DRAWINGS SHALL BE USED AS A GUIDE ONLY. CONTRACTOR SHALL TAKEOFF AND VERIFY SIZES AND QUANTITIES BY PLAN CHECK.
5. SAMPLES OF FERTILIZERS, ORGANIC AMENDMENT AND SOIL CONDITIONERS SHALL BE SUBMITTED PRIOR TO INCORPORATION. CONTRACTOR SHALL FURNISH TO THE ENGINEER A CERTIFICATE OF COMPLIANCE FOR SUCH FURNISHED MATERIALS.
6. LOCATIONS OF PLANT MATERIAL SHALL BE REVIEWED ON SITE BY THE ENGINEER PRIOR TO INSTALLATION.
7. CLIENT OR CONTRACTOR SHALL OBTAIN AGRICULTURAL SOILS TESTING AND RECOMMENDATIONS AFTER GRADING OPERATIONS AND PRIOR TO PLANT INSTALLATION. INCORPORATE AMENDMENTS AS INDICATED IN THE SOILS REPORT.
8. IF, DURING PLANTING OPERATIONS THERE SEEMS TO BE MINIMAL OR NO PERCOLATION IN PLANTING PITS, CONTRACTOR SHALL CEASE PLANTING OPERATIONS AND IMMEDIATELY NOTIFY THE CITY/OWNER'S AUTHORIZED REPRESENTATIVE TO DISCUSS ALTERNATIVE TO MAINTAINING POSITIVE ROOTBALL DRAINAGE MEASURES.
9. SHRUB AREAS SHALL RECEIVE A 3" LAYER OF FOREST FLOOR COMPOSTED WOOD MULCH ¾"- 1 ½" SIZE. OR EQUAL. MULCH SHALL HAVE A MINIMUM 80% RECYCLED CONTENT.

GENERAL CONSTRUCTION DETAIL NOTES

1. THE FOLLOWING NOTES APPLY TO ALL DETAILS AS SHOWN IN THIS SET OF DOCUMENTS, UNLESS OTHERWISE NOTED.
2. FOR ADDITIONAL INFORMATION REFER TO CONSTRUCTION AND GRADING NOTES.
3. REFER TO CONSTRUCTION LEGEND FOR INFORMATION RELATIVE TO COLOR, TYPE AND FINISH.
4. UNLESS OTHERWISE NOTED, NEW FINISH SURFACE SHALL BE FLUSH WITH ADJACENT EXISTING SURFACES.
5. FINISH GRADE: 1" BELOW FINISH SURFACE ADJACENT TO TURF AND 2" BELOW ADJACENT TO NON-TURF AREAS.
6. FINAL LOCATION OF CONSTRUCTION ELEMENTS, DRAINAGE DEVICES, SITE AMENITIES, IRRIGATION EQUIPMENT, AND PLANT MATERIAL MAY REQUIRE ADJUSTMENT DUE TO FIELD CONDITIONS AND SHALL BE APPROVED PRIOR TO CONSTRUCTION.
7. CONTRACTOR SHALL VERIFY ALL MATCHING MATERIALS AND COLORS PRIOR TO INSTALLATION. CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT OF ANY DISCREPANCIES PRIOR TO INSTALLATION.

THE TRUST FOR PUBLIC LAND

NOTICE TO CONTRACTORS

1. SPECIFICATIONS: ALL WORK SHALL CONFORM TO THE LATEST EDITION AND SUPPLEMENTS OF "THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION" (GREENBOOK), AND THE CORRESPONDING "ADDITIONS AND AMENDMENTS TO THE LATEST EDITION OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION" (BROWN BOOK).

2. THIS IMPROVEMENT CONSISTS OF WORK CALLED FOR ONLY ON THIS PLAN.

3. STANDARD PLANS FOR THIS PROJECT:

CITY OF LOS ANGELES

27983	STANDARD SADDLE CONNECTION
S-110-1	HOUSE CONNECTION SEWERS
S-111-0	HOUSE CONNECTION REMODELING
S-121-1	PLASTIC PLATE LINER DETAILS
S-137-1	ADJUSTING SEWER MAINTENANCE HOLES TO GRADE
S-140-0	SEWER MANHOLES - GENERAL
S-141-0	BRICK MANHOLE
S-142-0	PRECAST CONCRETE SEWER MANHOLE
S-251-1	PIPE LAYING IN TRENCHES
S-282-2	MAINTENANCE HOLE FRAME AND COVER 27-INCH
S-410-2	TYPES OF CURB AND GUTTER
S-412-0	EXTRUDED ASPHALT CONCRETE (AC) CURB
S-420-2	ALLEY INTERSECTION
S-430-1	JOINTS IN CONCRETE PAVEMENT
S-432-1	STANDARD STREET CROWN SECTIONS
S-440-3	DRIVEWAYS
S-442-3	CURB RAMPS

S-456-2	TREE WELL, ROOT BARRIER AND PLANTING
S-460-0	GUIDE MARKERS
S-627-0	SYMBOLS FOR CONSTRUCTION NOTES
S-663-1	TREE STAKING AND GUYING DETAILS
S-791-1	ADVANCE CONSTRUCTION NOTICE SIGNS

AMERICAN PUBLIC WORKS ASSOCIATION (APWA)
(IF APPLICABLE)

LOS ANGELES COUNTY DEPARTMENT OF PUBLIC WORKS (LACDPW)
(IF APPLICABLE)

4. INSPECTION: ALL WORK AND MATERIALS SHALL BE INSPECTED BY THE INSPECTOR OF PUBLIC WORKS DURING CONSTRUCTION PURSUANT TO LATEST EDITION OF STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (GREENBOOK) AS AMENDED BY THE CITY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS "BROWN BOOK", AND THE STANDARD PLANS FOR PUBLIC WORKS CONSTRUCTION AS APPLICABLE. CALL (213) 485-5080 BEFORE NOON OF THE WORKING DAY BEFORE THE FIRST SCHEDULED DAY OF CONSTRUCTION.
PRIOR TO THE START OF ANY CONSTRUCTION, DEMOLITION, REMOVALS, SAWCUTTING, OR INSTALLATION OF TRAFFIC CONTROL THE CONTRACTOR SHALL MEET WITH THE INSPECTOR TO DISCUSS SAFETY, TRAFFIC CONTROL REQUIREMENTS, PUBLIC ACCESS, CONSTRUCTION IMPACT MITIGATION, REMOVAL LIMITS, AND CONTRACTOR'S PLANNED SEQUENCING OF OPERATIONS.
PRIOR TO OR AT THE PROJECT PRECONSTRUCTION MEETING THE PERMITTEE OR ITS CONTRACTOR SHALL PROVIDE THE INSPECTOR TWO SETS OF FULL-SIZE PLANS AND MAINTAIN ONE SET OF FULL-SIZE PLANS AT THE SITE DURING CONSTRUCTION. INDEXED PLANS ARE AVAILABLE FROM THE CITY'S WEBSITE AT HTTP://ENGVAULT.LACITY.ORG.

5. THE CONTRACTOR, IN CONFORMANCE WITH LOS ANGELES CITY ORDINANCE NO. 150,478 SHALL POTHOLE EXISTING SUBSURFACE INSTALLATIONS CARRYING UNSTABLE SUBSTANCES TO DETERMINE THEIR LOCATIONS AND ELEVATIONS BEFORE COMMENCING EXCAVATION.

6. UNDERGROUND SERVICE ALERT: BEFORE COMMENCING ANY EXCAVATION, THE CONTRACTOR SHALL OBTAIN AN UNDERGROUND SERVICE ALERT (USA) INQUIRY I.D. NUMBER BY CALLING (800) 227-2600. TWO WORKING DAYS SHALL BE ALLOWED AFTER THE I.D. NUMBER IS OBTAINED AND BEFORE THE CONTRACTOR STARTS THE EXCAVATION WORK SO THAT UTILITY OWNERS CAN BE NOTIFIED. IF THE UTILITY OWNER IS THE CITY OF LOS ANGELES, A CONFIRMATION NUMBER INDICATING THE CITY HAS BEEN NOTIFIED SHALL BE OBTAINED BY USA AND/OR THE CONTRACTOR FROM THE APPROPRIATE CITY DEPARTMENT. THE I.D. NUMBER TOGETHER WITH THE DATE ACQUIRED SHALL BE REPORTED TO THE BUREAU OF CONTRACT ADMINISTRATION WHEN CALLING FOR INSPECTION. I.D. NUMBERS WILL NOT BE GIVEN MORE THAN 10 DAYS BEFORE STARTING EXCAVATION WORK.

7. AT LEAST THIRTY (30) DAYS BEFORE THE START OF CONSTRUCTION THE CONTRACTOR/ENGINEER SHALL CONTACT THE BUREAU OF STREET SERVICES, COORDINATING SECTION AT (213) 847-3200 TO VERIFY THAT THERE IS NO PROPOSED PROJECT IN THIS AREA.

8. NOTIFICATION: AT LEAST TEN (10) DAYS BEFORE THE START OF CONSTRUCTION, THE CONTRACTOR SHALL NOTIFY, IN WRITING, ABUTTING PROPERTY OCCUPANTS OF THE PROPOSED CONSTRUCTION START DATE. A COPY OF SAID WRITTEN NOTIFICATION SHALL BE PROVIDED TO THE PUBLIC WORKS INSPECTOR FOR APPROVAL BEFORE THEY ARE DISTRIBUTED TO THE OCCUPANTS OF THE ABUTTING PROPERTY.

9. ADVANCE CONSTRUCTION NOTICE SIGNS:
IN ADDITION TO SIGNS REQUIRED BY THE PROVISIONS OF THE "WORK AREA TRAFFIC CONTROL HANDBOOK" (WATCH), LATEST EDITION, FURNISH AND PLACE SIGNS FOR GIVING ADVANCE NOTICE TO MOTORISTS OF TRAFFIC DISRUPTION AS PART OF THIS PROJECT IN ACCORDANCE WITH STANDARD PLAN S-791-1.

10. CUTS OR EXCAVATIONS IN STREETS THAT HAVE BEEN RESURFACED ONE YEAR OR LESS FROM THE DATE OF A PROPOSED CUT OR EXCAVATION ARE PROHIBITED UNLESS THE PERMITTEE RESURFACES THE ENTIRE BLOCK OR INTERSECTION WITHIN WHICH SUCH CUT OR EXCAVATION OCCURS, PER ORDINANCE NO. 171922, 171923, 171924, AND SPECIAL ORDER NO. 06-0807.

11. CONSTRUCTION STAKES FOR CURB AND LONGITUDINAL GUTTER, WITH GRADE LESS THAN 0.50%, SHALL BE SET AT 12.5 FEET ON CENTER.

12. REMOVALS:
A. REMOVE ALL EXISTING IMPROVEMENTS THAT INTERFERE WITH THE CONSTRUCTION OF THIS PROJECT.
B. ALL UTILITIES SHALL BE REMOVED OR RELOCATED BY OTHERS.

12
13. REPAIR AND/OR REPLACE ANY EXISTING BROKEN OR OFF-GRADE PAVEMENT, CONCRETE CURB, GUTTER OR SIDEWALK IMMEDIATELY ADJACENT TO OR WITHIN THE AREA OF THIS IMPROVEMENT SATISFACTORY TO THE CITY ENGINEER.

NOTICE TO CONTRACTORS CONT'D

15. SURVEY MONUMENT PRESERVATION IS REQUIRED AND SHALL INCLUDE SUBMITTAL OF PRE AND POST CONSTRUCTION SURVEY MONUMENT TIES TO BOTH HORIZONTAL AND VERTICAL CONTROL POINTS PUBLISHED IN THE LOS ANGELES CITY ENGINEER FIELD BOOKS AND PRECISE BENCHMARK BOOKS. THIS DOES NOT RELIEVE THE CONTRACTOR OF FULFILLING ANY ADDITIONAL REQUIREMENTS SET FORTH BY SECTIONS 2-9.1 AND 2-9.3 OF THE LATEST EDITION OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (GREENBOOK AND BROWN BOOK).

16. IMPORTANT NOTICE: ALL REQUIRED PUBLIC IMPROVEMENTS MUST BE COMPLETED BEFORE A TEMPORARY CERTIFICATE OF OCCUPANCY OR A CERTIFICATE OF OCCUPANCY WILL BE ISSUED FOR THIS PROJECT PER ORDINANCE NO. 165081.

17. TRAFFIC LANE REQUIREMENTS:
(List any special lane requirements by DOT, subject to concurrence by the District office).
OR
THE LATEST EDITION AND SUPPLEMENTS OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (GREENBOOK) AND THE CORRESPONDING ISSUE OF THE "BROWN BOOK" WILL BE SATISFACTORY FOR TRAFFIC AND ACCESS. TRAFFIC CONTROL SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF THE "WORK AREA TRAFFIC CONTROL HANDBOOK" (WATCH) ADOPTED BY THE BOARD OF PUBLIC WORKS OF THE CITY OF LOS ANGELES.

18. EXISTING PAVING TO REMAIN AND BE PROTECTED IN PLACE UNLESS OTHERWISE NOTED.

EJ CONCRETE PAVING EXPANSION JOINTS
REFER TO DETAIL 401, SHEET LS04 FOR ADDITIONAL INFORMATION.

CONCRETE PAVING TOOLED SCORELINE
REFER TO DETAIL 401, SHEET LS04 FOR ADDITIONAL INFORMATION.

PLANTER AREA - SHRUBS
REFER TO PLANTING PLAN.

PLANTER AREA - NO MOW TURF/NATIVE GRASSES
REFER TO PLANTING PLAN

KEY NOTES:

1. CONTRACTOR TO SURVEY & STAKE ALL HARDSCAPE IMPROVEMENTS FROM DIGITAL CADD FILES PROVIDED BY ENGINEER. THE LAYOUT OF ALL HARDSCAPE IMPROVEMENTS SHALL BE APPROVED BY ENGINEER AND RECREATION AND PARKS FORESTRY PRIOR TO CONSTRUCTION. NOTIFY ENGINEER IF FIELD CONDITIONS DEVIATE FROM THOSE SHOWN ON THE PLANS.
2. NO CONCRETE SHALL BE INSTALLED UNTIL ALL FORMS ARE APPROVED BY ENGINEER FOR ADA COMPLIANCE. CONTRACTOR SHALL SURVEY EXISTING PAVEMENT WHERE NEW CONCRETE IS ADJOINING EXISTING FOR ADA COMPLIANCE. NOTIFY ENGINEER WHERE ADJOINING PAVING IS NOT COMPLIANT.
3. REFER TO SHEETS LS02 THROUGH LS05 FOR CONSTRUCTION DETAILS.
4. SEE TREE PROTECTION REQUIREMENTS FOR TRENCHING NEAR EXISTING TREES. DASHED LINE SHOWN AT EXISTING TREE REPRESENTS TREE PROTECTION ZONE.

NOTE: PRIOR TO ANY CONSTRUCTION WITHIN A TREE PROTECTION ZONE, CONTRACTOR SHALL CONTACT THE CITY RECREATION AND PARKS FORESTRY DIVISION ARBORIST, LEON BORDITSKY, AT (213) 425-7390 TO REVIEW AND APPROVE WORK WITHIN THE TPZ PRIOR TO INSTALLATION. NO WORK SHALL BE CONDUCTED WITHOUT CITY ABORIST APPROVAL.

NOTES:

1.) INSTALL PER DETAIL. REFER TO MANUFACTURER'S INSTRUCTION FOR PLUMBING AND MOUNTING DRINKING FOUNTAIN UNIT.

2.) CONTRACTOR SHALL SUBMIT LOCATION FOR SUMP AND OVERFLOW DRAINAGE LAYOUT FOR APPROVAL BY PROJECT MANAGER PRIOR TO BEGINNING EXCAVATION.

DOMESTIC LINE STERILIZATION PROCEDURE:

1.) FLUSH DOMESTIC WATER LINES COMPLETELY.
2.) USING A PROPORTIONING PUMP, INJECT SODIUM HYPOCHLORITE LIQUID DISINFECTANT INTO THE DOMESTIC LINE THROUGH A ¾" SERVICE COCK AT A POINT AS CLOSE TO THE WATER METER AS POSSIBLE.
3.) OPEN BUBBLERS ON ALL D.F. UNITS INSTALLED TO DISTRIBUTE DISINFECTANT THROUGHOUT THE DOMESTIC LINE SYSTEM.
4.) VERIFY BY TESTING THAT A MINIMUM CONCENTRATION OF 50 PPM OF DISINFECTANT IS ACHIEVED AT EACH D.F. UNIT.
5.) DISINFECTANT SHALL REMAIN IN THE SYSTEM FOR 24 HOURS MINIMUM.
6.) AT THE END OF THE 24 HOUR PERIOD, THE RESIDUAL LEVEL OF DISINFECTANT SHALL NOT BE LESS THAN 10 PPM.
7.) ALL LINES SHALL BE FLUSHED THOROUGHLY AFTER DISINFECTION IS COMPLETED.
8.) A WATER SAMPLE AT EACH D.F. UNIT SHALL BE TESTED BY AN APPROVED TESTING LABORATORY. REQUIRED RESULTS ARE:
- COLIFORM-AEROGENES ORGANISMS: NEGATIVE
- TOTAL BACTERIA PLATE COUNT: LESS THAN 100 PER CUBIC CENTIMETER
- WATER POTABILITY: SAFE TO USE

IF THE REQUIRED RESULTS ARE NOT MET, STERILIZATION PROCESS LISTED ABOVE SHALL BE REPEATED UNTIL THE REQUIRED TEST RESULTS ARE MET.

SHEET NAME LS05
SHEET 12 OF 25 SHEETS

REVISION DATES (DESIGN STAGE ONLY)

STORM WATER | AGUAS PLUVIALES

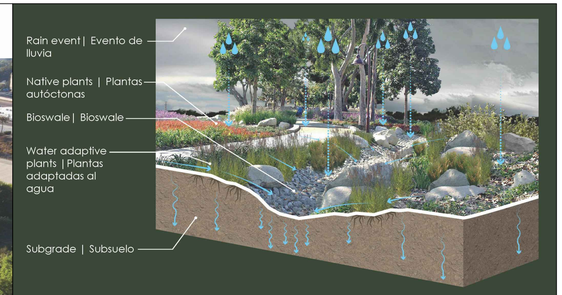
THE HAZARD OF STORM PRECIPITATION | PELIGRO DE PRECIPITACIÓN DE TORMENTA

English

The Environmental Protection Agency (EPA) defines stormwater as "run-off generated from precipitation from rain or snowmelt events that flows over land or impervious surfaces without percolating into the ground." Without adequately managing this stormwater, the landscape will experience flooding, and natural habitats will experience exposure to pollution.

Español

La Agencia de Protección del Medio Ambiental (EPA, por sus siglas en inglés) define las aguas pluviales como "la escorrentía generada por las precipitaciones procedentes de la lluvia o el deshielo que fluye sobre la tierra o las superficies impermeables sin filtrarse en el suelo". Si no se gestionan adecuadamente estas aguas pluviales, el paisaje se inundará y los hábitats naturales quedarán expuestos a la contaminación.



BIOSWALE

English

Water generated by rain events flows to the lowest point in the landscape. A bioswale acts as the lowest point, drawing moisture to its center using the force of gravity. During the water's journey downstream, plant material collects any pollutants that the water might be carrying. This process helps bodies of water avoid contamination from human-generated pollutants.

Español

El agua generada por las lluvias fluye hasta el punto más bajo del paisaje. Un bioswale actúa como el punto más bajo, atrayendo la humedad hacia su centro usando la fuerza de la gravedad. Durante el viaje del agua río abajo, el material vegetal recoge cualquier contaminante que el agua pueda transportar. Este proceso ayuda a las masas de agua a evitar la contaminación de los contaminantes generados por el hombre.

602 | 36"X18" INTERPRETIVE SIGN GRAPHIC - STORM WATER
N.T.S.

TREES | ÁRBOLES

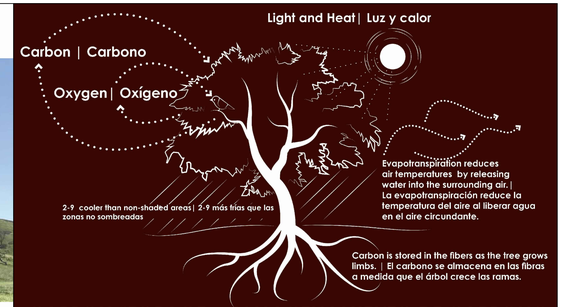
TREES REDUCE HEAT | LOS ÁRBOLES REDUCEN EL CALOR

English

Tree planting is ideal for improving your community's environment and overall air quality. Trees help reduce direct heat from the sun by absorbing sunlight and preventing heat collection on asphalt and concrete, making the surrounding environment cooler and more tolerable during extreme heat events. Trees also help reduce heat through the process of transpiration cooling. As trees release water into the atmosphere from their leaves, the surrounding air is cooler as water moves from liquid to vapor.

Español

La plantación de árboles es ideal para mejorar el medio ambiente de su comunidad y la calidad general del aire. Los árboles ayudan a reducir el calor directo del sol absorbiendo la luz solar e impidiendo la acumulación de calor en el asfalto y el concreto, lo que hace que el ambiente circundante sea más fresco y tolerable durante los eventos de calor extremos. Los árboles también ayudan a reducir el calor a través del proceso de enfriamiento por transpiración. A medida que los árboles liberan agua a la atmósfera a través de sus hojas, el aire circundante se enfría al pasar el agua de líquido a vapor.



CARBON STORAGE | ALMACENAMIENTO DE CARBONO

English

Planting trees are an excellent way to help improve air quality. They take in carbon, a greenhouse gas that exists in the air, through photosynthesis. Carbon is stored in tree fibers, which sequesters the carbon in the atmosphere. The longer a tree grows, the more carbon dioxide (CO_2) it will store and the more oxygen it will produce throughout its lifetime.

Español

La plantación de árboles es una forma excelente de ayudar a mejorar la calidad del aire. Captan el carbono, un gas de efecto invernadero que existe en el aire, mediante la fotosíntesis. El carbono se almacena en las fibras de los árboles, que secuestran el carbono de la atmósfera. Cuanto más crezca un árbol, más dióxido de carbono (CO_2) almacenará y más oxígeno producirá a lo largo de su vida.

601 | 36"X18" INTERPRETIVE SIGN GRAPHIC - TREES
N.T.S.

POLLINATORS | POLINIZADORAS

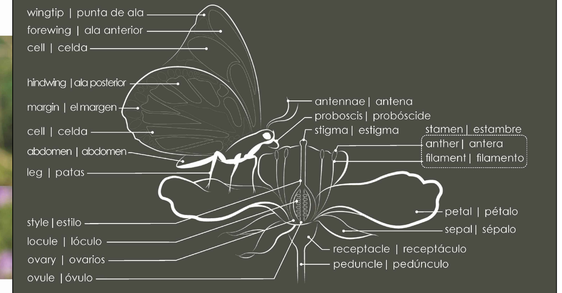
IMPORTANCE OF POLLINATORS | IMPORTANCIA DE LOS POLINIZADORES

English

Pollinators in California include butterflies, bees, moths, insects, bats, and bird species. These species help flowers reproduce by spreading pollen and bearing fruit for seed dispersal. Without these pollination species, our environment would lack biological diversity, thus affecting our environment's ecological health and food production. Say "thank you" to the next pollinator you see.

Español

Los polinizadores en California incluyen mariposas, abejas, polillas, insectos, murciélagos y especies de aves. Estas especies ayudan a las flores a reproducirse esparciendo polen y dando frutos para la dispersión de semillas. Sin estas especies de polinización, nuestro medio ambiente carecería de diversidad biológica, lo que afectaría la salud ecológica y la producción de alimentos de nuestro medio ambiente. Diga "gracias" al próximo polinizador que vea.



HOW DOES POLLINATION WORK? | ¿CÓMO FUNCIONA LA POLINIZACIÓN?

English

Plants have a symbiotic relationship with the species that pollinated them. The plant attracts pollinators to its flower with vibrant light emanating from its petals. This light indicates that the flower contains a food source (nectar and pollen). Once the pollinator has landed, pollen (located on the anther) will rub onto the tiny hairs or feathers of the pollinator. When the pollinator flies to another plant of the same species, the pollen will fall into the plant's stigma, thus beginning the plant's reproductive cycle.

Español

Las plantas tienen una relación simbiótica con las especies que las polinizan. La planta atrae a los polinizadores a su flor con una luz vibrante que emana de sus pétalos. Esta luz indica que la flor contiene una fuente de alimento (néctar y polen). Una vez que el polinizador se ha posado, el polen (situado en la antera) se rozará con los pequeños pelos o plumas del polinizador. Cuando el polinizador vuele a otra planta de la misma especie, el polen caerá en el estigma de la planta, comenzando así el ciclo reproductivo de la planta.

(24)	TORO T7PSS-02 24.0 SERIES TURF ROTOR WITH HUNTER TJS SWING JOINT PER DETAIL 302/LI03

POINT OF CONNECTION NOTE 1:

POINT OF CONNECTION SHALL BE AT AN EXISTING 2 WATER METER. VERIFY THE ACTUAL LOCATION, SIZE AND WATER PRESSURE IN THE FIELD PRIOR TO STARTING WORK. IF ANY OF THE POC INFORMATION SHOWN ON THESE DRAWINGS IS FOUND TO BE DIFFERENT THAN THE ACTUAL POC INFORMATION GATHERED IN THE FIELD, IMMEDIATELY NOTIFY THE ENGINEER. SHOULD THE CONTRACTOR FAIL TO VERIFY THE POC INFORMATION ANY CHANGES REQUIRED BY LOW PRESSURE OR VOLUME SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

CONTROLLER NOTE 2:

REMOVE EXISTING CONTROLLER AND INSTALL NEW CONTROLLER PER IRRIGATION LEGEND AND DETAIL. REFER TO MANUFACTURER'S RECOMMENDATIONS. CONTACT OWNER'S AUTHORIZED REPRESENTATIVE FOR LOCATION APPROVAL PRIOR TO INSTALLATION. CONNECT TO EXISTING 120 VAC POWER SUPPLY

NOTE:
THE IRRIGATION SYSTEM WAS DESIGNED FOR A STATIC WATER PRESSURE OF 148 PSI. CONTRACTOR SHALL VERIFY EXISTING STATIC WATER PRESSURE PRIOR TO COMMENCING WORK. IF STATIC WATER PRESSURE IS LESS THAN 148 PSI, THEN CONTRACTOR SHALL NOTIFY THE ENGINEER IMMEDIATELY FOR DIRECTION ON HOW TO PROCEED. FAILURE TO NOTIFY ENGINEER SHALL PLACE ALL REQUIRED REPAIRS/EQUIPMENT AND OTHER RELATED COST AS THE FULL RESPONSIBILITY OF THE IRRIGATION CONTRACTOR.

KEY NOTES

1. REFER TO SHEET LI02 FOR IRRIGATION LEGEND AND NOTES.
2. REFER TO SHEETS LI03-LI06 FOR DETAILS.
3. REFER TO SHEET LI307-LI08 FOR CALCULATIONS.

Residual Pressure Available:	79.6 PSI

IRRIGATION NOTES

1. IRRIGATION SYSTEM COMPONENTS ARE SHOWN DIAGRAMMATICALLY. CONTRACTOR SHALL MARK MAINLINE ROUTING AND MANIFOLD LOCATIONS IN THE FIELD FOR REVIEW AND APPROVAL BY ENGINEER. LATERAL LINE LOCATIONS SHALL BE ROUTED WHEN POSSIBLE TO AVOID TREE PROTECTION ZONES. SEE TREE PROTECTION SPECIFICATIONS FOR TRENCHING REQUIREMENTS INSIDE TPZ'S.
2. AT ALL TIMES DURING CONSTRUCTION, CONTRACTOR SHALL MAINTAIN TEMPORARY WATER SUPPLY AND CONTROLLER CONNECTED TO AREAS WITH PLANT MATERIAL TO REMAIN, OR PROVIDE ALTERNATE METHOD OF AUTOMATIC OPERATION.
3. ANY EXISTING IRRIGATION SYSTEM COMPONENTS DEPICTED HEREIN ARE BASED UPON AS-BUILT RECORD DRAWINGS, AND ARE SHOWN HERE FOR INFORMATIONAL PURPOSES ONLY. CONTRACTOR SHALL VERIFY THE LOCATION OF ALL EXISTING SYSTEM COMPONENTS TO REMAIN PRIOR TO ENGAGING IN CONSTRUCTION ACTIVITIES. CONTRACTOR SHALL IMMEDIATELY NOTIFY PROJECT MANAGER OF ANY DISCREPANCIES BETWEEN AS-BUILT AND EXISTING CONDITIONS.
4. THE CONTRACTOR SHALL VERIFY THE LOCATIONS OF ALL EXISTING UTILITIES, STRUCTURES AND SERVICES BEFORE COMMENCING WORK. THE LOCATIONS OF ANY UTILITIES, STRUCTURES AND SERVICES SHOWN IN THESE PLANS ARE APPROXIMATE ONLY. ANY DISCREPANCIES BETWEEN THESE PLANS AND ACTUAL FIELD CONDITIONS SHALL BE REPORTED TO THE PROJECT MANAGER IMMEDIATELY. THE CONTRACTOR SHALL PROMPTLY REPAIR OR REPLACE ANY EXISTING OR NEWLY CONSTRUCTED UTILITIES OR SITE FEATURES DAMAGED BY THEIR WORK AT THEIR OWN EXPENSE.
5. THE CONTRACTOR SHALL NOT WILLFULLY INSTALL ANY EQUIPMENT AS SHOWN ON THE PLANS WHEN IT IS OBVIOUS IN THE FIELD THAT CONDITIONS OR OBSTRUCTIONS EXIST THAT WERE UNKNOWN AT THE TIME THESE PLANS WERE PREPARED. CONTRACTOR SHALL IMMEDIATELY NOTIFY THE PROJECT MANAGER OF ANY SUCH CONDITIONS PRIOR TO PERFORMING ANY AFFECTED WORK. IN THE EVENT THAT THIS NOTIFICATION IS NOT GIVEN, THE CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY FOR ANY NECESSARY MODIFICATIONS TO COMPLETED WORK.
6. CONTRACTOR SHALL COORDINATE THEIR WORK WITH OTHER CONTRACTORS FOR THE LOCATION AND INSTALLATION OF PIPE SLEEVES AND LATERALS UNDER PAVING IN A TIMELY MANNER. SEE TRENCHING DETAIL FOR SLEEVING REQUIREMENTS. PLACE SLEEVES IN ACCORDANCE WITH APPLICABLE CODES.
7. THE CONTRACTOR SHALL FLUSH AND PRESSURE TEST ALL MAINLINES PER IRRIGATION SYSTEM SPECIFICATIONS. CONTRACTOR SHALL FLUSH ALL LATERAL LINES AND IRRIGATION HEADS PER THE LANDSCAPE CONSTRUCTION NOTES.
8. THE INTENT OF THESE IRRIGATION PLANS IS TO PROVIDE HEAD-TO-HEAD COVERAGE TO ALL TURF AREAS. **IF REQUIRED, HEAD LAYOUT IN NEW CONSTRUCTION AREAS WILL BE ADJUSTED IN THE FIELD UNDER THE DIRECTION OF THE ENGINEER AS NEEDED TO ACHIEVE THE REQUIRED COVERAGE**. AS PART OF THE SCOPE OF WORK, THE CONTRACTOR SHALL PROVIDE ANY ADDITIONAL HEADS AND/OR ALTERNATE NOZZLES REQUIRED TO ACHIEVE PROPER COVERAGE WITH A MINIMUM OF OVERSPRAY AT NO ADDITIONAL COST TO THE CITY.
9. UPON COMPLETION OF INSTALLATION, CONTRACTOR SHALL CONDUCT A COVERAGE TEST PER IRRIGATION SPECIFICATIONS. CONTRACTOR SHALL NOTIFY PROJECT MANAGER TO REQUEST THE TEST, WHICH WILL BE SCHEDULED AT THE SOONEST DATE POSSIBLE PER AVAILABILITY OF RAP AND LADWP STAFF.
10. REFER TO IRRIGATION SYSTEMS SPECIFICATIONS FOR ADDITIONAL INFORMATION REGARDING THIS SECTION OF WORK.
11. IN ADDITION TO THE SLEEVES AND CONDUITS SHOWN ON THE DRAWINGS, THE IRRIGATION CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING THE INSTALLATION OF SLEEVES AND CONDUITS OF SUFFICIENT SIZE WITHIN ALL PAVED AREAS.
12. NOTIFY PROJECT MANAGER OF ANY ASPECTS OF LAYOUT THAT WILL PROVIDE INCOMPLETE OR INSUFFICIENT WATER COVERAGE OF PLANT MATERIAL AND DO NOT PROCEED UNTIL THEIR INSTRUCTIONS ARE OBTAINED.
13. EQUIPMENT SHOWN IN HARDSCAPE AREAS ARE FOR DESIGN CLARIFICATION ONLY AND SHALL BE INSTALLED WHENEVER POSSIBLE WITHIN PLANTED AREAS A REASONABLE, REACHABLE DISTANCE FROM HARDSCAPE OR TURF AREAS.
14. DUE TO THE SCALE OF THE DRAWINGS, IT IS NOT POSSIBLE TO INDICATE ALL OFFSETS, FITTINGS, SLEEVES, ETC., WHICH MAY BE REQUIRED. CAREFULLY INVESTIGATE THE STRUCTURAL AND FINISHED CONDITIONS AFFECTING ALL WORK AND PLAN WORK ACCORDINGLY, FURNISHING SUCH FITTINGS, ETC., AS MAY BE REQUIRED TO MEET SUCH CONDITIONS. THE WORK SHALL BE INSTALLED IN SUCH A MANNER AS TO AVOID CONFLICTS BETWEEN IRRIGATION SYSTEMS, PLANTING, AND ARCHITECTURAL FEATURES.

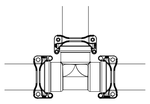
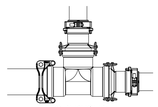
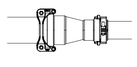
N.T.S.	BOE VERSION Feb/18	RAP DETAIL L1470



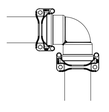
TEE:
HARCO #8030303 WITH KNUCKLE RESTRAINT



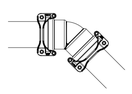
TEE X REDUCER:
HARCO #8030303 TEE WITH 3" X 2" S X B REDUCER HARCO #80332 WITH KNUCKLE RESTRAINT



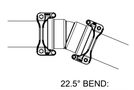
REDUCER:
HARCO 3" X 2" #80332BB WITH KNUCKLE RESTRAINT



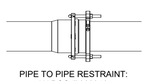
90° BEND:
HARCO #80320 WITH KNUCKLE RESTRAINT



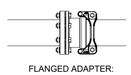
45° BEND:
HARCO #80322 WITH KNUCKLE RESTRAINT



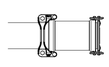
22.5° BEND:
HARCO #80324 WITH KNUCKLE RESTRAINT



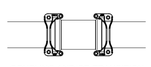
PIPE TO PIPE RESTRAINT:
HARCO # 820316



FLANGED ADAPTER:
HARCO (#80360FB) WITH KNUCKLE RESTRAINT



END CAP:
HARCO DI PLUG # 80355



COUPLING AND/OR TRANSITION:
HARCO #80340 WITH KNUCKLE RESTRAINT

MAINLINE PIPE FITTINGS:

1.) DUCTILE IRON FITTINGS WILL BE REQUIRED FOR ALL MAINLINE PIPE CONNECTIONS (CONSTANT PRESSURE) FOR 3" OR LARGER PIPE UNDER THE FOLLOWING CONDITIONS:

A. AS SHOWN ON OTHER DETAILS INCLUDED WITHIN IN THESE PLANS AND SPECIFICATIONS.

B. AT ALL DIRECTIONAL FITTINGS SUCH AS TEES, ELBOWS, ETC., AND REDUCERS, ADAPTERS AND COUPLINGS AS NOTED OR DETAILED.

2.) DUCTILE IRON FITTINGS SHALL BE A "PUSH-ON" TYPE FOR IPS SIZED PVC PIPE BY HARCO FITTINGS (www.harcofittings.com) OR APPROVED EQUAL.

3.) ALL GASKETED PVC PIPE JOINTS WITHIN 25' OF DUCTILE IRON DIRECTIONAL FITTINGS SHALL BE RESTRAINED USING PIPE TO PIPE RESTRAINT SHOWN. FOR END CAPS AND TERMINAL GATE VALVES, ALL GASKETED PVC PIPE JOINTS WITHIN 40' SHALL BE RESTRAINED USING PIPE TO PIPE RESTRAINT SHOWN. REFER TO MANUFACTURERS FITTING RESTRAINT GUIDE FOR ADDITIONAL INFORMATION.

4.) ALL BOLTS ON FITTING RESTRAINTS SHALL BE TIGHTENED USING A TORQUE WRENCH ONLY FOLLOWING THE MANUFACTURER'S SPECIFICATIONS. THE CONTRACTOR SHALL BE PREPARED TO VERIFY THE TORQUE OF THE BOLTS WITH A TORQUE WRENCH IN THE PRESENCE OF THE BCA INSPECTOR AND SHALL HAVE A TORQUE WRENCH AVAILABLE ON SITE UNTIL JOB ACCEPTANCE.

5.) GLUED JOINTS **SHALL NOT BE** USED IN ANY MAINLINE PVC FITTINGS OR PIPE 3" OR LARGER IN DIAMETER UNLESS SPECIFICALLY DENOTED ON PLANS OR DETAILS INCLUDED IN THIS DRAWING SET.

6.) THRUST BLOCKS **SHALL ONLY BE** USED FOR MAINLINE FITTINGS WHERE SPECIFICALLY DESIGNATED IN PLANS OR DETAILS.

NOTE: ADDITIONAL PIPE & FITTING CONFIGURATIONS MAY BE NECESSARY TO COMPLETE WORK SHOWN ON PLANS DUE TO UNFORSEEN SITE CONDITIONS. CONSULT MANUFACTURER FOR ADDITIONAL INFORMATION. USE #60-100-03 KNUCKLE RESTRAINT ON FITTINGS WHERE DESIGNATED.

505	RESTRAINED FITTINGS FOR 3" MAINLINE

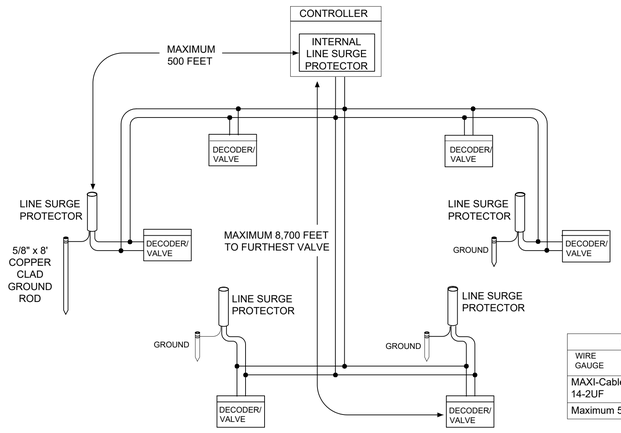
APPROVED BY: M. REYES	10/17/22

WORK ORDER EW40078F

SHEET NAME LI05

SHEET 18 OF 25 SHEETS



NOTES:

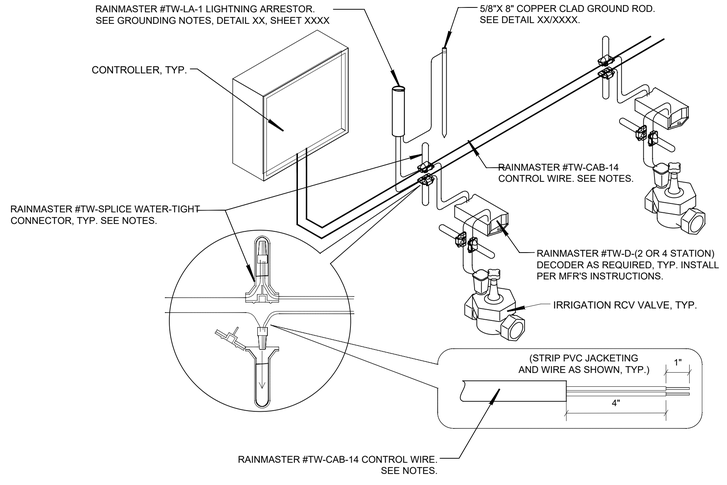
1. ALL TWO-WIRE COMPONENTS (WIRE, DECODERS, SURGE PROTECTORS, ETC.) SHALL BE PROVIDED BY RAINBIRD, 800-724-6247.
2. SEE DETAIL RELATED DETAILS FOR WIRING AND GROUNDING CONNECTIONS.

WIRE CONFIGURATION

WIRE GAUGE	Total WireLength (feet)	Max Distance from Decoder to Solenoid
MAXI-Cable 14-2UF	8,700	456
Maximum 500 feet between line surge protectors		

602 | 2-WIRE SYSTEM LAYOUT

N.T.S. | B.O.E. 02/16/18 | L1372



WIRING NOTES:
1.) CONTROL WIRE SHALL BE RAINMASTER #TW-CAB-14 OR APPROVED EQUAL: POLYETHYLENE DOUBLE-JACKETED OR UF-B UL PVC DOUBLE-JACKETED TWO-CONDUCTOR SOLID CORE DESIGNED FOR DIRECT BURIAL WITH INSULATION 3/16 INCH (.060Ó) THICK, HIGH DENSITY, SUNLIGHT RESISTANT INCASED IN AN OUTER JACKET OF POLYETHYLENE OR PVC CONFORMING TO ICEA S-GL-402 OR NEMA WC5, HAVING A MINIMUM WALL THICKNESS OF .045 INCHES. (TWO-WIRE POLYETHYLENE "TWISTED" CABLE OR SINGLE STRAND 14-GAUGE PVC IRRIGATION WIRE DOES NOT CONFORM TO THESE SPECIFICATIONS AND WILL NOT BE ACCEPTED).

2.) ALL WIRE INSULATION SHALL BE INTACT AND FREE OF NICKS AND CUTS

3.) ATTACHING DECODERS:

- TWIST WIRES TO PROVIDE A SOLID MECHANICAL CONNECTION BEFORE SECURING THE ATTACHMENT BY ADDING THE WIRE NUT.
- RAINMASTER #TW-SPLICE-14 OR APPROVED EQUAL (SURESPLICE, TRADEMARKED) GEL FILLED CONNECTORS (OR SIMILAR) SHALL BE USED ON ALL CONNECTIONS.
- GREASE FILLED WIRE NUTS WILL NOT BE ACCEPTED.
- TEST ALL CONNECTIONS BEFORE IMMERSING THE WIRE NUT IN THE GEL-FILLED CAP.
- ADHERE TO ALL LOCAL AND NATIONAL BUILDING AND ELECTRICAL CODES.
- CONTRACTOR SHALL GUARANTEE ALL WIRE CONNECTIONS TO BE ABSOLUTELY WATER TIGHT.

4.) ALL EQUIPMENT SHALL BE INSTALLED PER THE MANUFACTURER'S SPECIFICATIONS.

PULL BOX

TERMINAL OR MANIFOLD BOX

701	2-WIRE CABLE INSTALLATION AND GROUNDING	
N.T.S.		RP DETAIL L1430

NOTES:

1. ALL CONDUIT AND FITTINGS SHALL BE SCHEDULE 80 PVC. CHANGES IN DIRECTION OF CONDUIT PATH SHALL NOT EXCEED 360 DEG. FOR EACH SECTION BETWEEN PULL BOXES.
2. MAXIMUM DISTANCE BETWEEN PULL BOXES SHALL BE 200 FEET.
3. MAXIMUM LENGTH OF SECONDARY WIRE PATH (14 AWG) FROM FIELD DECODER TO SOLENOID IS 450 FEET.
4. PROVIDE A COIL OF MIN. 24" OF 2-WIRE CABLE AT EACH SPLICE OR DECODER CONNECTION POINT.

TWO-WIRE SYSTEM GROUNDING REQUIREMENTS:

SURGE PROTECTION USING PROPER GROUNDING RODS IS REQUIRED FOR PROTECTION AGAINST SURGE DAMAGE DUE TO LIGHTNING OR OTHER ELECTRICAL SURGE EVENTS. CONFORMANCE TO THIS SURGE SUPPRESSION SPECIFICATION IS NECESSARY TO RETAIN WARRANTY PROTECTION UNDER MANUFACTURER'S WARRANTY TERMS.

THE INSTALLATION SHALL CONFORM TO MANUFACTURER'S INSTRUCTIONS, AND MUST MEET OR EXCEED THE AMERICAN SOCIETY OF IRRIGATION CONSULTANTS (ASIC) EARTH GROUNDING GUIDELINE 100-2002.
HTTP://WWW.ASIC.ORG/UPLOADS/ASSETS/011007_121320_ASIC_GROUNDING_GUIDELINES.DOC

GROUND RODS AS REFERRED TO IN THIS SPECIFICATION SHALL CONFORM TO THE FOLLOWING STANDARDS:

1.) ALL GROUNDING RODS SHALL BE BARE COPPER OF 5/8" DIAMETER OR GREATER, AND 8' LENGTH OR GREATER.

2.) A MEASURED RESISTANCE READING OF NO MORE THAN 10 OHMS IS NECESSARY AT EACH LIGHTNING ARRESTOR. ASIC SPEC: SECTION 7.0 - MEASURING RESISTANCE, ITEM A.

GROUND RODS SHALL BE LOCATED AT A MINIMUM DISTANCE TO ASSURE THAT THE TWO-WIRE PATH IS OUTSIDE OF THE ELECTRODE SPHERE OF INFLUENCE FOR THE GROUNDING ROD: THE GROUND ROD MUST BE CONNECTED AT LEAST 8' AWAY FROM THE TWO-WIRE PATH, AT A RIGHT ANGLE TO THE TWO-WIRE PATH.

UNDER NO CIRCUMSTANCES SHOULD A GROUND ROD BE INSTALLED IN OR UNDER A VALVE BOX, METER BOX OR ELECTRICAL BOX.

CONNECTIONS TO GROUNDING RODS:
ALL CONNECTIONS TO GROUND RODS SHALL CONFORM TO ASIC EARTH GROUNDING GUIDELINE 100-2002, AND SHALL CONSIST OF A SCREW CLAMP TYPE OF CONNECTION.

ANY WIRE EXTENSIONS REQUIRED TO CONNECT FROM A GROUND ROD TO A LIGHTNING ARRESTOR OR ENCLOSURE GROUND LUG SHALL BE BARE COPPER, AND SHALL NOT HAVE ANY SHARP BENDS OR KINKS. WIRE EXTENSIONS CONNECTED TO LIGHTNING ARRESTORS SHALL USE A CADWELD TYPE OR SCREW CLAMP TYPE CONNECTION WHERE THE BARE COPPER GROUND WIRE MEETS THE GREEN GROUNDING WIRE FROM THE LIGHTNING ARRESTOR.

WORK ORDER EW40078F

SHEET NAME LP01

SHEET 22 OF 25 SHEETS

PLANTING PLAN NOTES

1. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, AND EQUIPMENT NECESSARY TO FURNISH AND INSTALL PLANT MATERIAL AS SHOWN ON THE DRAWINGS AND AS DESCRIBED IN THE SPECIFICATIONS.
2. ALL WORK ON THE IRRIGATION SYSTEM, INCLUDING HYDROSTATIC, COVERAGE, AND OPERATIONAL TESTS AND THE BACKFILLING AND COMPACTION OF TRENCHES SHALL BE COMPLETED AND APPROVED PRIOR TO PLANTING OPERATIONS.
3. PLANT LIST ON THE DRAWINGS SHALL BE USED AS A GUIDE ONLY. CONTRACTOR SHALL TAKEOFF AND VERIFY SIZES AND QUANTITIES BY PLAN CHECK.
4. LOCATIONS OF PLANT MATERIAL SHALL BE REVIEWED ON SITE BY THE CITY/OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO INSTALLATION.
5. TREES SHALL BE PLANTED NO CLOSER THAN TEN FEET (10') FROM UTILITIES.
6. IF, DURING PLANTING OPERATIONS THERE SEEMS TO BE MINIMAL OR NO PERCOLATION IN PLANTING PITS, CONTRACTOR SHALL CEASE PLANTING OPERATIONS AND IMMEDIATELY NOTIFY THE CITY/OWNER'S AUTHORIZED REPRESENTATIVE TO DISCUSS ALTERNATIVE TO MAINTAINING POSITIVE ROOTBALL DRAINAGE MEASURES.
7. SEE LANDSCAPE PLANTING SPECIFICATIONS FOR SOIL PREPARATION REQUIREMENTS.

KEY NOTES

1. ALL AREAS IMPACTED BY CONSTRUCTION ACTIVITY WILL REQUIRE TURF REPLACEMENT AND REMEDIATION FOR SOIL COMPACTION. REFER TO TURF NOTE BELOW.

NOTE: TURF AREAS

THE CONSTRUCTION SHALL CONSIST OF TWO PRIMARY STAGES.

STAGE 1: CIVIL CONSTRUCTION OF ALL THE STORM WATER RELATED ELEMTNES AND THE SITE IMPROVEMENTS SHOWN INSIDE THE PRIMARY LIMITS OF WORK. (I.E. CONSTRUCTION FENCING).

A. DURING THIS STAGE, ALL EXISTING TURF AND LANDSCAPING TO REMAIN OUTSIDE THE PRIMARY CONSTRUCTION AREA (I.E. CONSTRUCTION FENCING) SHALL REMAIN ACCESSIBLE TO THE PUBLIC AND WILL BE MAINTAINED BY THE PARKS DEPARTMENT STAFF. DURING THIS PERIOD, THE CONTRACTOR SHALL NOT INTERRUPT THE EXISTING IRRIGATION WATER SUPPLY TO THESE AREAS AND SHALL ASSURE THE EXISTING CONTROL SYSTEM REMAINS IN OPERATION. ANY DISRUPTION TO IRRIGATION IN THESE AREAS THAT CAUSES DAMAGE TO THE EXISTING TURF HEALTH OR COVERAGE WILL BE REPAIRED AT THE CONTRACTOR'S EXPENSE BY OVERSEEDING WITH A SEED MIX OF SIMILAR COMPOSITION AS THE TURF TO BE REPAIRED/REPLACED AND FERTILIZED WITH A BALANCED LONG-RELEASE TURF FERTILIZER.

B. THE NEW IRRIGATION AND PLANTING WORK INSIDE THE PRIMARY WORK AREA MAY BE INCLUDED IN THIS STAGE AT THE CONTRACTOR'S DISCRETION.

C. INSIDE THE PRIMARY LIMITS OF WORK, AREAS OF EXISTING TURF TO BE RETAINED DURING CONSTRUCTION SHALL BE IRRIGATED AND MAINTAINED BY THE CONTRACTOR AS NEEDED. AFTER THE COMPLETION OF PRIMARY CONSTRUCTION, ANY EXISTING TURF AREAS WHICH ARE DEAD OR DAMAGED BY CONSTRUCTION ACTIVITY (INCLUDING ANY AREAS USED FOR PARKING, STORAGE, LAYDOWN, IRRIGATION TRENCHING ETC.) MUST BE REPLACED WITH THE SOD SPECIFIED AFTER THE AREA HAS BEEN DE-COMPACTED TO THE SATISFACTION OF THE ENGINEER AND AMENDED PER THE LANDSCAPE PLANTING SPECIFICATIONS. ANY AREAS OF EXISTING TURF REMAINING WITH BARE AREAS LARGER THAN 12" X12" SHALL BE REPAIRED BY OVERSEEDING. DEAD OR BARE AREAS LARGER THAN 36" X36" SHALL BE REPAIRED WITH SOD. AT COMPLETION OF THE MAINTENANCE AND ESTABLISHMENT PERIOD (SEE LANDSCAPE PLANTING SPECIFICATIONS), A FULL HEALTHY AND CONTINUOUS COVER OF TURF IS EXPECTED.

D. ALL TURF AREAS DAMAGED OR REMOVED BY CONSTRUCTION ACTIVITY SHALL BE DE-COMPACTED (IF OUTSIDE OF EXCAVATION LIMITS) AND AMENDED PER THE LANDSCAPE PLANTING SPECIFICATIONS, THEN PLANTED WITH SOD AS SPECIFIED IN THE PLANTING LEGEND.

STAGE 2: DURING THIS STAGE (AFTER SUBSTANTIAL COMPLETION OF STAGE 1), ADDITIONAL SITE AND IRRIGATION IMPROVEMENTS OUTSIDE THE PRIMARY LIMITS OF WORK (SEE IRRIGATION PLANS) SHALL BE COMPLETED IN THE REMAINDER OF THE PARK AREAS AS INDICATED ON THE PLANS. ANY AREAS OF EXISTING TURF DAMAGED BY CONSTRUCTION OR IRRIGATION TRENCHING SHALL BE REPAIRED AT THE CONTRACTOR'S EXPENSE BY OVERSEEDING WITH A SEED MIX OF SIMILAR COMPOSITION AS THE TURF TO BE REPLACED AND FERTILIZED WITH A BALANCED LONG-RELEASE TURF FERTILIZER.

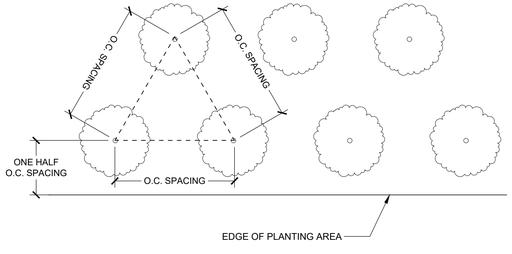
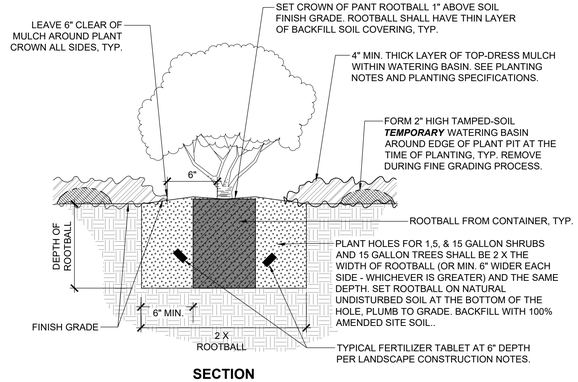
INSTALL A 3" LAYER OF WOOD CHIP MULCH PER SPECIFICATIONS. MULCH SHALL BE SPREAD EVENLY THROUGHOUT ALL PLANTER AREAS.



NOTES:
1. ALL SHRUBS/GROUNDCOVER TO BE TRIANGULAR SPACED UNLESS SHOWN OTHERWISE. SEE PLANTING LEGEND FOR O.C. SPACING.

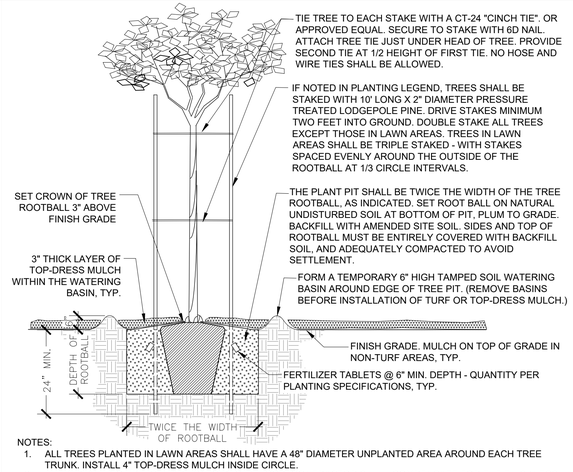
203 ON-CENTER TRIANGULAR PLANT SPACING
N.T.S. | BOE VERSION Sep/07 | RP DETAIL L2060



SECTION

NOTES:
1. PLANTING FINISH GRADE SHALL BE DEFINED AS TOP OF SOIL.
2. IN ALL CASES THE PLANT ROOTBALL SHALL BE COMPLETELY COVERED WITH BACKFILL SOIL - NO PORTION OF THE ROOTBALL SHALL BE LEFT EXPOSED TO AIR OR SUNLIGHT ***BEFORE APPLICATION OF MULCH***.
3. DELETE FERTILIZER TABLETS FOR CERTAIN CALIF. NATIVE PLANTS - SEE PLANTING LEGEND.

202 SHRUB PLANTING
N.T.S. | BOE VERSION OCT/19 | RP DETAIL L2030



NOTES:
1. ALL TREES PLANTED IN LAWN AREAS SHALL HAVE A 48" DIAMETER UNPLANTED AREA AROUND EACH TREE TRUNK. INSTALL 4" TOP-DRESS MULCH INSIDE CIRCLE.
2. WHEN PLANTING TREES IN AREAS TO RECEIVE SOD, CONTRACTOR SHALL COMPENSATE FOR THE THICKNESS OF THE SOD AND SET TOP OF TREE ROOTBALL APPROPRIATELY TO AVOID A LOW AREA AND PONDING OF WATER.

201 TREE PLANTING AND STAKING

TREE PROTECTION – EXISTING TREES
All trees to remain in place shall be protected using the following guidelines:

TREE PROTECTION SPECIFICATIONS
These tree protection specifications shall be followed to protect all trees whose dripline is encroached upon either directly or indirectly by construction within City parks.

ANY FAILURE BY THE CONTRACTOR TO ADHERE TO THE REQUIREMENTS SPECIFIED BELOW WILL RESULT IN THE SUSPENSION OF ALL CONSTRUCTION ACTIVITIES, TO BE DONE AT THE CONTRACTOR'S EXPENSE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACEMENT OF OR PAYMENT FOR ANY TREES DAMAGED THROUGH NON-COMPLIANCE WITH THESE SPECIFICATIONS. THE MONETARY OR REPLACEMENT VALUE OF IMPACTED TREES WILL BE DETERMINED BY A RECREATION AND PARKS (RAP) ARBORIST OR BY A RAP APPROVED ISA CERTIFIED ARBORIST.

A Recreation and Parks Arborist shall be invited to the Job Start Meeting and also notified 48-hours prior to construction. Contact Steve Dunlap (213) 485-4826.

All trees that occur within the area of work, as shown on the plans, and *NOT* specifically designated for removal, shall be protected by the following means:

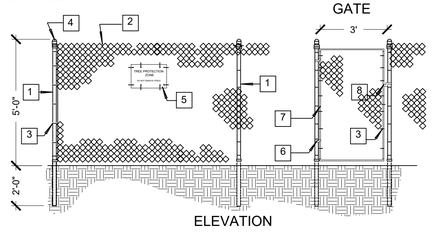
1. **Defining the Tree Protection Zone (TPZ)** - The **radius** (not the diameter) of the TPZ, measured from the outside of the tree trunk, shall be calculated according to the following:
   (a) **Single trunk trees -** multiply the trunk diameter in inches, measured 4.5' above grade, by 1.5 feet.
   (b) **Multi trunk trees -** multiply the sum of the diameters of all trunks in inches, measured 4.5' above grade, by 1.5 feet.
   (c) **Palm trees -** 5' from the base of the trunk.
   (d) **If a TPZ is delineated on the plans, the size and shape shown on the plans shall supercede the above requirements.**
2. The contractor shall install a 5' high temporary chain link fence with one pedestrian access gate along the boundary of the TPZ. See detail for temporary chain link fence on detail sheet.
3. The contractor shall provide one sign per each 20 lineal ft. of fence surrounding the TPZ indicating that fencing shall not be removed. See TPZ sign detail.
4. No work is permitted within the TPZ without the approval of: 1) the project Landscape Architect, 2) the Project Manager, and 3) RAP Forestry staff. Any work authorized by RAP Forestry staff within the TPZ must be done in accordance with the recommendations of RAP Forestry and under the supervision of a Monitoring Arborist. The Monitoring Arborist shall be supplied by the Contractor at his own expense, and be an ISA Certified Arborist or a Registered Consulting Arborist with verifiable experience in protecting trees. The Monitoring Arborist must be approved by RAP Forestry prior to commencement of work.
5. Within the TPZ, the contractor shall adhere to the following requirements, including, but not limited to:
   (a) No stockpiling or storage of any material, debris, or soil.
   (b) No storage of any construction equipment.
   (c) No vehicular access.
   (d) No un-approved trenching, excavation or disturbance of soil will be allowed.
   (e) No objects of any kind shall be attached to tree trunks.
   (f) For any approved excavation or trenching, no cutting of roots over 2" diameter will be allowed. Contractor shall use a pneumatic drill (a.k.a. "air spade") to excavate under woody roots larger than 2" in diameter. If any roots are unintentionally severed, remedial cuts are to be made under the supervision the Monitoring arborist, and soil backfilled immediately.
6. Within the boundaries of the construction zone (including the TPZ), the contractor shall be responsible for mitigating construction-related dust accumulation on all trees by spraying the trunks, limbs, and foliage with water to a maximum height of 30 feet during the months of April through November, at monthly intervals.
7. Beyond the TPZ, the contractor shall also be responsible for protecting all existing trees to remain in place within the boundaries of the construction zone, including vehicular access areas, lay down areas, and any other areas impacted by construction activities. Any damage to trees in these areas shall also be subject to the same monetary or replacement requirements specified below. Any necessary root cutting in this area must be approved in advance by either RAP Forestry or by a RAP approved ISA certified arborist employed by the Contractor. See also the General Conditions for any damage done by the contractor to landscaping or other park amenities that fall outside the boundaries of the construction zone.
8. Irrigation to all existing trees NOT specifically designated for removal shall be kept in operation for the duration of the project. Contractor shall be responsible for hand watering all impacted trees if necessitated by temporary shutdowns to or demolition of existing irrigation systems. Trees are to be irrigated deeply and as often as required such that soil moisture is detectable at a minimum depth of 18" using a soil probe.
9. Upon completion of all trenching, grading, excavation and soil preparation work, contractor shall remove all items installed to protect trees during the construction process with approval of the Project Manager.
10. Any of the following Southern California native tree species fall under Ordinance No. 177404 of the Los Angeles Municipal Code:
    (a) Oaks, including Valley Oak (*Quercus lobata)*, California Live Oak (*Quercus agrifolia)*, or any other tree of the oak genus indigenous to California but excluding Scrub Oak *(Quercus dumosa/Q. berberidifolia);*
    (b) Southern California Black Walnut *(Juglans californica* var. *californica);*
    (c) Western Sycamore *(Platanus racemosa);*
    (d) California Bay *(Umbellularia californica)*.

Contractor shall comply with the requirements of the ordinance found at: http://cityplanning.lacity.org/Code_Studies/Other/ProtectedTreeOrd.pdf.

DAMAGES
If a tree that is designated to remain is removed or caused to be irreversibly damaged as determined by the Recreation and Parks Arborist, install a replacement tree matching in size, quality and variety using an installer designated by the Recreation and Parks Arborist. If an acceptable replacement tree is not available, pay damages to the City for the value of the damaged tree as assessed by the tree value formula in the ISA Guide for Establishing Value of Trees and Other Plants.

FENCING MATERIALS

1. POSTS: O.D., LINE POSTS 2-3/8 IN. O.D. POST SPACING TO BE 10'-0" MAX. POSTS TO BE DRIVEN 2' BELOW RELATIVE GRADE.
2. FABRIC: 9 GAUGE, 2 IN. MESH, KNUCKLE TOP AND BOTTOM, PLACE ON OUTER SIDE OF POST.
3. TIE WIRES: 11 GAUGE AT 12" O.C.
4. POST TOPS MALLEABLE IRON OR PRESSED STEEL.
5. 24"x18" SIGN. ATTACH WITH TIE WIRES. SIGN TO BE PROVIDED BY RAP.
6. HINGES: INDUSTRIAL BULLDOG HINGE (180 SWING) 2 HINGES PER GATE, ONE TOP AND ONE BOTTOM.
7. GATE FRAME: SIDES, 2-3/8" DIA
8. LOCKABLE CAST ALUMINUM FORK LATCH POST TOPS MALLEABLE IRON OR PRESSED STEEL.



NOTES:
1. THE BOTTOM OF THE FABRIC SHALL BE POSITIONED ONE INCH ABOVE FINISH GRADE.
2. PROVIDE FOR ONE 3' WIDE GATE PER ENCLOSURE.
3. ALL FENCING TO HAVE A STANDARD GALVANIZED FINISH.

00100 DEFINITIONS (9/18/07)

Unless otherwise stated, the words "directed, required, permitted, ordered, instructed, designated, considered necessary, prescribed, approved, acceptable, satisfactory," or words of like meaning, refer to actions, statements, judgments, conclusions, and decisions within the responsibility of the Engineer or the Inspector.

Addenda: Written documents issued during the Bidding Period which modify, supersede, or supplement the original Contract Documents.

Additions and Amendments to the Standard Specifications for Public Works Construction (SSPWC): Also known as the “Brownbook”. Previous editions of the document were titled Standard Plan S-610.

“as shown”, “as indicated”, or “as specified”: These words are understood to be followed by the phrase "in the Contract Documents."

Bid: The offer of the Bidder submitted on the prescribed forms setting forth the price(s) for the Work.

Bid Proposal: The notice that informs prospective Bidders of the opportunity to submit a Bid, bidding procedures and other requirements.

Bid Guaranty: The certified check or Bidder’s Surety Bond accompanying the Bid as a guaranty that the Bidder will enter into a contract with the Board for the performance of the Work.

Bidder: The person or persons, partnership, firm or corporation submitting a Bid or proposal for the Work defined in the Contract Documents.

Bidding Period: The time period allocated to the Bidder to enable preparation of a Bid.

Board: The Board of Public Works, of the City of Los Angeles.

Bond: Bid bond, performance and payment bond or other instrument of security.

“Brownbook”: City of Los Angeles, Department of Public Works, Additions and Amendments to the SSPWC.

Calendar day: All days beginning with the date specified in the Notice to Proceed, and ending with the date the City issues the Statement of Completion.

Change Order: A written order to the Contractor signed by the Engineer directing an addition, deletion or revision in the Work, or an adjustment in the Contract Price or time which is issued after the effective date of the Contract and effects less modification than is effected by a Supplemental Agreement. A Change Order may or may not also be signed by the Contractor.

County Sealer: The Director of Weights & Measures of the County of Los Angeles.

City: The City of Los Angeles, a municipal corporation.

Claim: A written demand or assertion by one of the parties seeking, as a matter of right, an interpretation of the Contract Documents, payment of money, extension of time or other relief. The party asserting the Claim must set forth the facts and circumstances for which the other party is responsible.

Code: Codes of the State of California as well as any other Federal or local law, statute, ordinance, rule or regulation.

Contract: The agreement between the City and the Contractor for the Work described in the Contract Documents.

Contract Documents: Includes, but is not limited to, the Notice Inviting Bids, Bid Proposal, Notice(s) to Bidders, Contractor's Bid, Performance bond, Payment bond, General and Supplementary Conditions, Special Provisions, General Requirements, Federal and State Requirements, Standard and Reference Specifications, Technical and Nontechnical Specifications, Geotechnical Baseline Report, Geotechnical Design Summary Report, Soil Reports and Subsurface Investigation Reports, Standard Plans, Plans, Summary of First Notice Replies, and Addenda, Plan Clarifications, Request for Information, Supplemental Agreements, Change Orders issued after Contract award and other documents designated by the Engineer.

Contract Price: The total amount of money for which the Contract is awarded.

Contract Unit Price: The amount stated in the Bid for a single unit of an item of Work.

Contractor: A person or persons, partnership, firm or corporation licensed by the State of California as a general contractor. The terms "Prime Contractor" and Contractor are synonymous.

Contractor's Representative: A representative of the Contractor present at the site to supervise, organize, coordinate and direct daily construction activities and who is authorized to receive and fulfill instructions from the Engineer or Inspector.

"days": Consecutive calendar days unless otherwise specifically stated.

Drawings: See Plans.

"easement": Permission to access or utilize property not owned by the City.

Engineer: The City Engineer, head of the Bureau of Engineering, or an authorized representative.

Equal: See "or equal".

Final Field Acceptance: Verification by the Final Inspector that all physical corrections required by the Final Inspection Correction List have been completed. This verification will be evidenced by issuance of a Statement of Completion, which will establish the date of the completion of the Work.

GBR: See Geotechnical Baseline Report.

GDR: See Geotechnical Data Report.

General Conditions: Instructions to the Contractor setting forth its responsibilities and the City's responsibilities for proper execution of the Work indicated herein.

General Requirements: Division 1 of the Specifications.

Geotechnical Baseline Report: This report establishing the baselines for geotechnical conditions anticipated to be encountered during underground and subsurface construction. This report establishes the basis for identification of changed site/ground conditions.

Geotechnical Data Report: This report contains factual information gathered during exploration and design. It may include logs of exploratory borings, laboratory test data, and geologic, seismic or environmental data.

“Greenbook”: Standard Specifications for Public Works Construction (SSPWC) published by Public Works Standards, Inc, latest edition.

“holiday”: In reference to days, the holidays and dates as observed by the City. A list of such holidays is available from the Board office.

Illegal Subcontractor Substitution: Anyone other than the Bid-listed or approved subcontractor(s) performing any portion of the Work designated to be performed by said subcontractor without prior approval of the Inspector.

“immediately notify”: The obligation to cause verbal notification of Engineer and Inspector of some condition or event as soon as possible upon discovery or knowledge of the condition or event and in all instances, no more than two (2) hours.

Inspector: The Inspector of Public Works, (Director of the Bureau of Contract Administration), or an authorized representative designated by the Bureau of Contract Administration.

“jobsite”: The area upon or in which the Contractor’s operations are carried on and such other areas adjacent thereto as may be designated as such by the Contract Documents.

“law”: Any Federal, State or local law, statute, ordinance, rule, regulation or Code.

“liquidated damages”: The amount the Contractor shall pay to the City, as determined by rates and amounts as fixed in the Contract Documents, due to the Contractor’s failure to complete the Work within the time specified.

“non-conforming work”: Unapproved construction, defective work or damaged materials that does not fully comply with the Contract Documents.

Notice of Award: The written notice by the City to the successful Bidder stating that upon compliance by the successful Bidder of required conditions, the City will execute the Contract.

Notice to Proceed: The written notice by the City to the successful Bidder stating that the Work or portions of the Work shall commence.

Notice to Withhold: The written notice by the City to the Contractor advising that certain payments shall be withheld due to unacceptable execution of the Work by the Contractor.

“or equal”: In reference to products, equipment, or materials proposed by the Contractor for use in the Work.

Partial Acceptance: Any portion of the Work that has been completed in accordance with the plans and specifications and has been accepted in writing by the Inspector ("Statement of Partial Completion" form).

"person": Any individual, firm, association, partnership, corporation, trust, joint venture, or other legal entity.

Plans: The drawings, profiles, cross sections, shop drawings, and supplemental drawings, or reproductions thereof, issued or approved by the Engineer, which show the location, character, dimensions or details of the Work.

Private Contract: Work subject to City inspection, control, and approval, involving private funds, not administered by the City.

Project: The Work and/or construction operations executed through the performance of this Contract.

Project Manual: See Contract Documents.

Protest: See Claim.

Reference Specifications: Those bulletins, standards, rules, methods of analysis or test, codes, and specifications of other agencies, engineering societies, or industrial associations referred to in the Contract Documents. These refer to the edition, including amendments in effect and published at the time of advertising the project, adopted by the Board, if applicable, unless specifically referred to by edition, volume, or date.

"right of entry": Written permission from an owner of a facility or property to access the facility or property for a specific purpose.

Special Provisions: Any provision which supplements or modifies the Specifications.

Specifications: Written requirements describing the commercial, legal, technical and nontechnical aspects of the project. Specifications include but are not limited to Terms, Provisions, General Conditions, General Requirements, Technical Specifications, Equipment Schedules, and all revisions made to the specifications in Addenda, and Change Orders.

Standard Plans or "Std. Plan": Details of standard structures, devices or instructions referred to on the Plans or in the Specifications by title or number.

State: The State of California.

Statement of Completion: A form issued by the Bureau of Contract Administration following Final Inspection and upon completion of all physical corrections required by the Final Inspection Correction List. This shall signify the acceptance of all field work and establish the date of completion of the Work.

Statement of Partial Completion: A form issued by the Bureau of Contract Administration following Partial Final Inspection and upon completion of all physical corrections required by the Partial Final Inspection Correction List. This shall signify the acceptance of a specific portion, or portions, of the Work to be so utilized or otherwise placed into service.

Subcontractor: Any individual, firm, or corporation, other than an employee of the Contractor, having a direct contract with the Contractor or with any other subcontractor for the performance of the Work. A Subcontractor is a contractor who is licensed pursuant to California Business and Professions Code, Section 7000 et. seq. A Subcontractor does not have any direct contract with the City related to the project.

Subcontractor Substitution: Anyone other than the Bid-listed or approved subcontractor(s), including the Contractor, performing any portion of the Work designated to be performed by said subcontractor.

Sub-subcontractor: A "Sub-Subcontractor" is a Subcontractor, within the definition of that term, who has a contract with a Subcontractor and has no Contract with the City related to the project.

Supervision: With reference to supervision by the Engineer, the performance of obligations, and the exercise of rights, specifically imposed upon and granted to the City in becoming a party to the Contract. Except as specifically stated herein, supervision by the City shall not mean active and direct superintendence of details of the Work.

Supplemental Agreement: A written amendment of the Contract Documents, signed by the Contractor and City.

Supplier: An individual, organization, or firm who may not be required for the purposes of the Work to be licensed pursuant to California Business and Professions Code as a contractor, or subcontractor, within the meanings of those terms as defined herein above, who provides equipment and/or materials for the Work, to the Contractor, a Subcontractor, or a Sub-Subcontractor, including that fabricated to a special design, but who does not perform labor at the site except for labor or labor supervision required by some manufacturers as part of their equipment installation for warranty or other purposes. The term "supplier" also includes fabricator, manufacturer, or vendor.

Surety: Any individual, firm or corporation bound with and for the Contractor for the acceptable performance, execution and completion of the Work, and for the satisfaction of all obligations incurred.

Unauthorized Subcontractor Substitution: Any reduction, increase, or other change to any Subcontractor dollar amount without written approval by the Inspector.

Unavoidable Delay: Delay arising from causes beyond the control and without the fault or negligence of the Contractor and its Subcontractors at all tiers, and solely due to acts of God, acts of government in its sovereign capacity, riots, insurrections, wars, fires, floods, earthquakes, tidal waves, epidemics, quarantine restrictions, industry-wide strikes, freight embargoes, or unusually severe weather.

Work: Includes all material, labor, utility services, tools, expendable equipment, and all appliances, machinery, transportation, appurtenances and specified services necessary to perform and complete the Contract; and such additional items not specifically indicated or described that can be reasonably inferred as belonging to the item described or indicated and as required by good practice to provide a complete and operable satisfactory system or structure. As used herein, "provide" shall be understood to mean "furnish and install, complete in place."

Workday: All days beginning with the date specified in the Notice to Proceed, and ending with the date the City issues the Statement of Completion, except for the following days:

A) Saturday,

B) Sunday,

C) any day designated as a holiday by the City,

D) any day designated as a holiday in a Master Labor Agreement binding the Contractor,

E) any day the Contractor is prevented from working for cause as established by “Unavoidable Delay” of these General Conditions; and

F) any day the Contractor is prevented from working during the first five (5) hours of the workday with at least sixty percent (60%) of the normal Work force for cause as established by “Unavoidable Delay” of these General Conditions.

Worksite: See "jobsite."

00101 – 00199 NOT USED

00200 SCOPE (10/17/01)

The work to be performed under this Contract shall consist of furnishing all tools, equipment, materials, supplies and manufactured articles, all transportation, services, including fuel, power and water, and essential communications, and the performance of all labor, Work, required calculations testing, inspections or operations, or operations required for the fulfillment of the Contract, in strict accordance with the specifications, schedules, and Plans, all of which are made a part hereof, and including such detail sketches as may be furnished by the Engineer from time to time during the construction in explanation of said Plans. The Work shall be complete and all material, and services incidentals, quality or not specifically called for quality and conditions noted, in the Specifications, or not shown on the Plans, which may be necessary for complete and proper construction to carry out the Contract in good faith and a satisfactory manner shall be performed, furnished, and installed by the Contractor at no increase in cost to the City.

00201 AUTHORITY OF THE BOARD, ENGINEER, AND INSPECTOR (5/2/02)

The Board has the final authority in all matters affecting the Work. The Contractor shall promptly comply with instructions from the Engineer or the Inspector.

The Engineer is authorized to require performance of the Work consistent with the meaning of the Plans and the Contract Documents. On all questions related to the interpretation of Plans or Specifications, the decision of the Engineer is final and binding. As authorized by the Board, the Engineer may issue Change Orders to increase, decrease or modify the scope of work.

The Inspector is authorized to enforce compliance with the Contract Documents, to determine the acceptability, quality and quantity of materials and workmanship, administer requirements with respect to subcontracts, and to prepare and process progress payment estimates. Unless otherwise ordered by the Board, the Inspector’s determination of satisfactory performance is a condition precedent to payment under this Contract. For such matters, the decision of the Inspector is final and binding. In the event of a dispute between the Contractor and the Inspector, the latter is authorized to reject materials or suspend the Work until any questions at issue can be referred to and decided by the Board or, in engineering matters, by the Engineer.

The Inspector is authorized to sample and test all materials to be incorporated into the Work. The Inspector may delegate this authority to sample materials and perform tests to the Department of General Services, Standards Division, or other approved agencies.

The Engineer may delegate street lighting matters to the Director of the Bureau of Street Lighting.

00202 INTENT OF CONTRACT DOCUMENTS (2/09/95)

The Contract Documents are complementary, and what is called for by one part shall be as binding as if called for by all. The intent of the Documents is to include all Work consistent therewith and reasonably inferable therefrom as being necessary for completion of the contract. Materials or Work described in words that indicate the proper execution and a well known technical or trade designation shall be held to refer to such recognized standards.

It is understood and agreed that the written terms and provisions of the Contract Documents represent the entire and integrated agreement between the parties hereto and supersede all prior negotiations, representations, or agreements, either written or oral. The Contract Documents shall not be construed to create any contractual relationship of any kind between the Engineer (or the Inspector) and the Contractor.

00203 NOT USED (9/18/07)

00204 PLANS AND SPECIFICATIONS (9/18/07)

As shown on the Plans or described in the Specifications, each element of the Work must be furnished complete, finished and functional. Whether shown or not, include all materials and ancillary equipment necessary to provide a complete installation. The Plans, Specifications and other Contract Documents are intended to be complementary and cooperative to describe and provide for a complete project. Anything in the Specifications and not on the Plans, or on the Plans and not in the Specifications, shall be as though shown or mentioned in both. Details shown for an item of Work are typical and shall apply to similar items of Work.

Do not deviate from the Plans and Specifications without written authorization from the Engineer.

The Engineer does not warrant the accuracy of scaled dimensions. Dimensions indicated by figures or numerals shall govern. Larger scale drawings shall take precedence over smaller scale drawings. Detailed drawings will take precedence over general drawings.

The Engineer may furnish additional details pertaining to the Work and the same shall be considered part of the Contract.

References made to other specifications and codes refer to the edition including amendments in effect and published at the time of advertising the project, unless specifically referred to by edition, volume, or date as noted in the Contract Documents.

00205 PRECEDENCE OF CONTRACT DOCUMENTS (9/18/07)

In resolving inconsistencies or ambiguities among two (2) or more components of the Contract Documents, the more stringent requirements shall prevail. The secondary priority will be based upon the precedence of the documents. The precedence shall be:

1. Permits from other agencies as may be required by law.

2. Bid Proposal

3. General Conditions

4. General Requirements

5. Technical Specifications

6. Plans

7. Geotechnical Baseline Report

8. Geotechnical Data Report

9. Brownbook

10. Greenbook

11. Standard Plans

12. Reference Specifications

13. Reference Plans

Supplemental Agreements, Change Orders, Engineer's written interpretations and clarifications, and Addenda, will take precedence over all other components of the Contract Documents.

00206 ACCURACY OF PLANS AND SPECIFICATIONS (12/6/01)

Omissions from the Plans and Specifications shall not relieve the Contractor from the responsibility of furnishing, making, or installing all items required by law or usually furnished, made, or installed in a project of the scope and character indicated by the Plans and Specifications.

The Plans show conditions as they are supposed or believed by the Engineer to exist, but it is not intended or to be inferred that the conditions as shown thereon constitute a representation or warranty, expressed or implied, by the City or its officers, that such conditions are actually existent, nor shall the City, or any of its officers, be liable for any loss sustained by the Contractor as a result of any variance between conditions as shown on the Plans, and the actual conditions revealed during progress of the Work or otherwise, except as indicated in "Differing Site Conditions" of these General Conditions.

00207 EXAMINATION OF COVERED WORK (12/6/01)

If any Work is covered without inspection, approval or consent of the Inspector, an examination may be required by the Inspector. The cost for uncovering the work, inspection, testing required by the Inspector, remedial work and restoring the work is at the Contractor's expense.

00208 UNNOTICED DEFECTS (10/17/01)

The Contractor is responsible for ensuring that all Work complies with the Contract Documents. Upon discovery, all defective or noncompliant Work must be immediately repaired or replaced by the Contractor. Failure by the Engineer or the Inspector to condemn or reject non-conforming Work shall not constitute acceptance or implied acceptance of such Work.

00209 CODES AND REGULATIONS (10/17/01)

The Contractor shall perform the Work in accordance with all applicable regulations, laws, and ordinances, even though such requirements may not be specifically mentioned in the Specifications or shown on the Plans.

It is not the responsibility of the Contractor to ensure that the Contract Documents comply with applicable laws, statutes, codes and regulations. If the Contractor believes that any part of the Contract Documents does not comply, the Contractor shall promptly notify the Engineer in writing. Do not proceed with those affected Work items until the Engineer issues written instructions to the Contractor.

If the Contractor proceeds with those Work items without written instruction from the Engineer, the Contractor will bear the costs and impacts of any corrective work.

00210 LENGTH OF WORKDAY AND WORK WEEK (9/18/07)

Eight (8) hours of labor shall constitute a calendar day's work for employees of the Contractor under this Contract. Said employees shall be paid not less than the prevailing wage rate for the first eight (8) hours work of each day.

Unless noted elsewhere in the Contract documents, a working day shall be Monday through Friday, and work shall be between 7:00 a.m. and 4:00 p.m., unless otherwise approved by the Engineer or the Board or revised by City Ordinance.

When work in excess of eight (8) hours per day, or forty (40) hours during any one (1) week is performed, wages for all hours over eight (8) hours in any day or over forty (40) hours during any one (1) week shall be paid at the prevailing wage rate, as required by City, state and federal requirements.

00211 PAYMENT OF EMPLOYEES (12/6/01)

The Contractor and each Subcontractor shall pay each employee engaged in Work on the project under this Contract in compliance with the Federal and State wage provisions indicated on the appropriate page of the Bid Proposal (General Instruction and Information for Bidders), and “Length of Workday and Work Week” of these General Conditions.

The certified payroll and the Statement of Compliance shall be submitted to the Inspector by the Contractor and all Subcontractors performing Work on the project, regardless of dollar amount or type of contract.

If there is a difference between the Federal and State minimum wage rates for similar classifications of labor, the Contractor and its Subcontractors shall pay not less than the higher wage rate. When the Contractor intends to use a craft or classification not shown on the general prevailing wage determinations, it will be required to pay the wage rate of that craft or classification most closely related to it as shown in the general prevailing wage determinations. In case of disagreement between the Contractor and the City, the Inspector shall make the final determination as to the prevailing wages for the Work.

00212 CONVICT-MADE MATERIALS (12/6/01)

Unless otherwise noted, no materials manufactured or produced in a penal or correctional institution shall be incorporated in the project under this Contract.

00213 SALES OR USE TAX / EXEMPTION FROM FEDERAL EXCISE TAX (10/17/01)

Purchases of materials and equipment which will be incorporated or installed permanently in the Work, or which will be used in the operation of the Contractor or Subcontractors, and not incorporated in the Work, are not exempt from City of Los Angeles and California State Sales or Use Taxes as applicable.

Purchase of materials and equipment which will be incorporated or installed permanently in the Work are exempt from Federal excise tax in effect at the time of purchase, as applicable. Prices included in the

Contract amount shall reflect such exemptions. A Federal Tax Exemption Certificate will be furnished by the City, on request, as acknowledgment that materials and equipment for which exemption is requested by the Contractor, is valid where provided for the exclusive use of the City. Lists of exempt articles provided by the Contractor and Subcontractor shall be submitted to the City by the Contractor. Purchases of materials and equipment which will be used in the operations of the Contractor or Subcontractors and not incorporated in the Work are not exempt from excise tax.

00214 NONDISCRIMINATION IN EMPLOYMENT (10/17/01)

The Contractor shall comply with all of the provisions of the Los Angeles Administrative Code, Mandatory Provision Pertaining to Nondiscrimination in Employment.

The Contractor shall submit Monthly Ethnic Composition of Work Force Reports to the Inspector indicating the number of employees in the various work categories and ethnic groups and gender on forms furnished by the City.

Nondiscrimination Clause: "The Contractor shall not discriminate during the performance of this Contract against any employee or applicant for employment because of employee's or applicant's race, religion, national origin, ancestry, sex, age, sexual orientation or physical handicap." The Contractor shall include the same Nondiscrimination Clause in all subcontracts awarded under this Contract.

If conflicts exist between these provisions and the Federal Rules and Regulations governing the same, the more stringent requirements shall prevail.

00215 APPRENTICE UTILIZATION (4/12/95)

Any Contract awarded hereunder will require the Contractor to comply with the provisions of the California Labor Code relating to apprentice employment and training; and will require the Contractor to assume full responsibility for compliance with said section with respect to all Apprenticing Occupations involved in the Project. (Compliance with said Apprentice Utilization provisions of the Labor Code is not required for Public Works contracts involving less than $30,000 or less than twenty (20) Working days in duration).

00216 LAWS AND REGULATIONS (9/18/07)

The Contractor shall observe and comply with all Federal, State, and local laws, ordinances, Codes, orders, and regulations which in any manner affect those engaged or employed on the Work, the materials used in the Work, or the conduct of the Work. If any discrepancy or inconsistency should be discovered in this Contract in relation to any such law, ordinance, Code, order, or regulation, the Contractor shall report the same in writing to the Engineer. The Contractor shall indemnify and hold harmless the City, and its officers, agents, and employees, against all claims or liability arising from violation of any such law, ordinance, Code, order, or regulation, whether by itself or by its employees or Subcontractors as stated in these Contract Documents. Any particular law or regulation specified or referred to elsewhere in these specifications shall not in any way limit the obligation of the Contractor to comply with all other provisions of Federal, State, and local laws and regulations.

00217 PERMITS AND CONSTRUCTION EASEMENTS (9/18/07)

The Contractor shall obtain and pay for all permits necessary for performance of the Work. Within thirty (30) calendar days after the Notice to Proceed, the Contractor shall obtain and pay all costs incurred and submit to the Engineer copies of all permits required for the construction and installation of all Work called for on this project.

When the Bid Proposal provides an allowance for “Permits”, only certain types of permits and certain permit fees are reimbursable. The reimbursable permit must be exclusively for permanent Work shown on

the Plans and reimbursement will be limited to the actual permit fee shown on the permit's receipt. The allowance for "Permits" cannot be used for any other costs such as those necessary to physically obtain the permit. The allowance for "Permits" also cannot be used for contractor-designed items, annual permits, temporary construction, or general permits that are useable for other projects. The Contractor will only be reimbursed for those permits that are included in the list below, unless otherwise specified:

1) Night Work, overload, grading, excavation, demolition, foundation, and building permits.

2) Electrical permits.

3) Mechanical permits.

4) Plumbing permits.

5) South Coast Air Quality Management District permits.

6) Fire sprinkler permit.

7) All Federal, State, County and City issued permits.

Rights of ways, easements, or rights of entry for the Work will be provided by the City. The Contractor shall make arrangements, pay for, and assume all responsibility for acquiring, using, and disposing of Work areas and facilities temporarily required which are necessary in addition to those provided by the City. The Contractor shall indemnify and hold the City harmless for all claims for damages caused by such actions.

00218 PARTIES EXCLUDED FROM FEDERAL PROCUREMENT AND NON PROCUREMENT PROGRAMS (10/17/01)

A list of individuals, firms and organizations which have been debarred, suspended or have voluntarily excluded themselves from Federal Procurement and Non Procurement Program is maintained by US General Services Administration. A copy can be obtained from Superintendent of Documents, US Government Printing Office, Washington, DC 20402, Tel: (202) 783-3238.

The City will not conduct business with an individual, firm or organization, and the Contractor shall not employ or otherwise utilize any Subcontractor, supplier or equipment vendor at any tier which is on the U.S. General Services Administration "List of Parties Excluded from Federal Procurement and Non Procurement Programs". The Contractor shall not utilize or otherwise employ any Subcontractors or suppliers on the list of nonresponsible bidders maintained by the City Bureau of Contract Administration.

00219 BUSINESS TAX REGISTRATION CERTIFICATES (11/21/01)

The Contractor represents that it has, or will obtain upon award, the Business Tax Registration Certificate(s) required by the Los Angeles City Business Tax Ordinance. The Contractor shall maintain, or obtain as necessary, all such Certificates required of it under said Ordinance and shall not cause or allow any such Certificate to be revoked or suspended.

The City requires all firms that have business activity within the City of Los Angeles to pay City business taxes.

Payments for goods or services will be withheld unless proof of tax compliance is provided to the City. All firms and individuals that do business with the City will be required to provide a Business Tax Registration

Certificate number or an exemption number as proof of compliance with Los Angeles City business tax requirements in order to receive payment for goods or services.

The Tax and Permit Division of the City Office of Finance has the sole authority to determine whether a firm is covered by business tax requirements.

00220 CONTRACTOR PROPOSED ALTERNATES AND "OR EQUALS" (12/6/01)

Unless otherwise noted, the Contractor may propose products, equipment, or materials to be an "or equal" to those specified in the Contract. These proposals must be submitted within thirty (30) days after Notice to Proceed along with sufficient substantiating data for the Engineer to determine equivalence. The substantiating data must demonstrate equivalence in terms of function, performance, reliability, quality, and general configuration to the items specified in the Contract Documents. The Engineer will be the sole arbiter of equivalence. Proposals that are submitted late or with incomplete substantiation are "Not Equal" and subject to summary rejection.

Contractor-proposed "or equals" that are accepted by the Engineer shall be coordinated with other items of Work and incorporated into the Work without time extensions and at no additional cost to the City.

00221 CONTRUCTION AND DEMOLITION WASTE MANAGEMENT (8/12/11)

The Contractor shall divert all Construction and Demolition (C&D) waste generated from the project in accordance with the City's C&D Waste Recycling Ordinance. Los Angeles Municipal Code requires that all mixed C&D waste material generated within the City of Los Angeles be taken to a City Certified C&D Waste Processor. Further, mixed C&D waste can only be legally collected, removed, or transported by City of Los Angeles Permitted Solid Waste Haulers. If the Contractor plans on collecting, removing, or transporting its own waste, it must first apply for and obtain a Solid Waste Hauler Permit from the Solid Resources Citywide Recycling Division of the Bureau of Sanitation.

Failure to meet the C&D waste recycling requirements as detailed above will result in the assessment of penalties up to $5,000 per each load of C&D waste not taken to City Certified Processors. Further, collecting, removing or transporting C&D waste within the City without a valid Solid Waste Hauler Permit is a criminal misdemeanor subject to fines and/or imprisonment.

Other sections of the Specification may require specific recycling rates in addition to the Los Angeles Municipal Code requirements.

00222 – 00299 NOT USED

00300 FINANCIAL LIABILITY (4/12/95)

The City's liability under this Contract shall not exceed the City's appropriation to fund the Contract at the time of Contract award. However, if the City shall appropriate funds for any successive years, the City's maximum liability shall not exceed the extent of such appropriation, subject to the terms and conditions of this Contract.

00301 CONTRACTOR'S OBLIGATIONS (3/21/14)

Only competent workers shall be employed on the Work.

Any person employed who is found by the Engineer or the Inspector to be incompetent, disorderly or otherwise objectionable, or who fails or refuses to perform Work properly, acceptably and as directed shall be immediately removed from the Work by the Contractor and not be reemployed on the Work.

The Contractor, at its sole cost and expense, shall perform all labor and services and furnish all the materials, tools, and appliances, except as hereinafter otherwise definitely provided, necessary or proper for performing and completing the Work required, in the manner and within the time stipulated in these specifications. The Contractor shall furnish, erect, maintain, and remove the construction plant and such temporary works as may be required. If, at any time before the commencement or during the progress of the Work or any part of it, the Contractor's methods or appliances appear to the Engineer or the Inspector to be unsafe, inefficient, or inadequate for securing the safety of the workers, the quality of the Work required, or the rate of progress stipulated, the Engineer or the Inspector may order the Contractor to increase their safety and efficiency or to improve their character, and the Contractor shall comply with such orders at its own expense. Neither the making of such demands by the Engineer nor the failure to make such demands shall relieve the Contractor of its obligation to secure the safe conduct of the Work, the quality of Work required, and the rate of progress stipulated in the Contract. The Contractor shall be fully responsible for the safety, efficiency, and adequacy of its plant, appliances, and methods, and for any damage which may result from their failure or their improper construction, maintenance, or operation.

All of the labor shall be performed and materials furnished pursuant to and in strict conformance with the Contract Documents, and in accordance with approved shop drawings. The Contractor shall complete the entire Work to the satisfaction of the Inspector and in accordance with the Specifications and Plans herein mentioned, at the prices fixed in the Contract.

Where articles or materials are especially manufactured or fabricated for delivery under these specifications, the Contractor shall at all times employ such workforce, plant, materials, and tools as will be sufficient to complete the performance of the Contract and every part thereof within the time limits stipulated herein. If the Contractor fails to employ sufficient workforce, plant, materials, tools, or to maintain adequate progress, the Engineer may require an increase in progress at any point or points or a modification of Plans and procedure in such a manner as to accelerate the Work. Failure to adequately staff the project shall be just cause for the City to terminate the Contract.

00302 CONTRACTOR'S REPRESENTATIVE AT THE SITE (1/30/03)

A technically qualified and English-speaking project representative shall be designated in writing as the Contractor's Representative at the job site, who shall supervise the Work and shall provide competent supervision of the Work until its completion. The Contractor's Representative shall be assigned full time and exclusively to this project. Alternate representatives with qualifications equal to or better than the previous representative may be designated. The Contractor's Representatives shall have at least five (5) years of verifiable experience as the person primarily responsible for supervision of the Work on projects of the same or similar size and nature as this project. Within five (5) days after the Notice of Award the Contractor shall provide a statement to the Engineer and the Inspector with the following:

1) Identification and resume, showing the qualifications and experience of the Contractor's Representative and the alternate appointed to act in the place of the Contractor's Representative.

2) References of not less than two (2) previous projects on which the Contractor's Representative and the alternate had supervisory responsibility on a project of a similar nature and at least one-half or more of the cost of this project. Such references shall include names, addresses, and telephone numbers of owner representatives who worked on the project as well as project information such as project type, size, location and duration.

The Engineer and the Inspector reserve the right to disapprove any candidate named as the Contractor's Representative or alternate who fails to meet the provisions set forth herein. The Engineer and the

Inspector reserve the right to remove, without any right to work on the project, either the Contractor's Representative or alternate, who in the sole opinion of the Engineer or the Inspector, has demonstrated incompetence, lack of ability, or other unsuitability to perform supervision of the Work.

If the Contractor's Representative or alternate leave the employ of the Contractor, the Contractor will be required to replace the individual(s) and fulfill the requirements of this Article within fifteen (15) calendar days. In no event shall any Work proceed in the absence of an approved representative.

The Contractor's Representative or alternate shall have full authority to act on behalf of the Contractor, including, but not limited to final approval of Change Orders and Supplemental Agreements. All directions given by the Engineer or the Inspector to said representative or alternate shall be considered as having been given to the Contractor. Such instructions given by the Engineer or the Inspector to the Contractor's Representative or alternate will be confirmed in writing. All instructions and directions given by the Engineer or the Inspector will be limited to matters properly falling within the Engineer's or the Inspector's authority as specified in "Authority of the Board, Engineer and Inspector" of these General Conditions.

The Contractor's Representative or alternate shall be present at the worksite at all times while Work is in progress. Failure to observe this requirement constitutes a suspension of the Work by the Contractor, until such time the Contractor's Representative or alternate is again present at the worksite. All Work performed while the Contractor's Representative or alternate is absent from the worksite is ineligible for payment. Work performed in violation of these provisions shall be removed and reconstructed, refabricated, or reinstalled under the required supervision. The Contractor is ineligible for time extensions or additional payment for costs or impact that directly or indirectly are caused by said suspension. Those ineligible costs and impacts include what the Contractor may incur for slowdown, delays, idled equipment, removals, reconstruction, refabricating, reinstalling and other. During such periods of noncompliance when the Contractor's Representative is not on site, written instructions issued by the Engineer or the Inspector to *any* employee of the Contractor is considered adequate notice to the Contractor.

Whenever the Work is defined as being suspended under the provisions of this Article, any such suspension in excess of ten (10) calendar days shall constitute just cause for the City to terminate the Contract under the provisions of "Termination of Contract by City (Contractor Default)" of these General Conditions.

00303 FAMILIARITY WITH PLANS AND SPECIFICATIONS (9/18/07)

It shall be the responsibility of the Contractor to be thoroughly familiar with all details of the Project, including the work of the Contractor's forces and all Subcontractors. The Contractor shall call the following to the attention of both the Engineer and the Inspector in writing within twenty-four (24) hours of discovery, before any Work is performed:

1) Errors and omissions in the Plans and Specifications, including, but not limited to, code violations, typographical errors and notational errors where ambiguity or inadequate description exists;

2) Work on the Plans or in the Specifications which, if so constructed, would result in a conflict or interference with other Work or the Work of other trades, including the location of fixtures and equipment;

3) Existing improvements visible at the job site, for which no existing disposition is made on the Plans or in the Specifications but which could reasonably be assumed to interfere with the satisfactory completion of the improvements contemplated by the Plans and Specifications.

Failure to notify shall constitute a waiver by the Contractor of any claim for delay or other damages occasioned by such defect. If the Contractor proceeds with the Work without instructions from the

Engineer, the incorrect Work shall be removed and corrections made to comply with the Engineer's instructions, at no cost to the City.

00304 JOB CONDITIONS (9/18/07)

The Contractor shall determine the nature and types of work to be performed, ascertain all conditions affecting construction procedure and sequencing of Work operations in the execution of the Work, including condition of available roads and streets, or clearances, restrictions and other limitations affecting transportation and ingress and egress to the job site. This determination must be made during the Bidding Period with any costs and impact included within the Bid.

The Contractor shall observe any "Site Security" restrictions described in the General Requirements or the Plans.

Whenever the Work requires entry into an operating plant, occupied building, working facility or other secured location, observe the following unless otherwise noted:

1) No vehicles are allowed except delivery trucks and Contractor's identified vehicles and equipment.

2) It shall be the Contractor's sole responsibility to arrange and pay for offsite employee parking and to provide transportation from the parking area to the Work site.

3) The Contractor shall fully cooperate with all authorities on the job site and other contractors not related to the Work of this Contract who might be at the job site.

4) The Contractor shall fully comply with all regulations in force at the job site.

00305 JOB BULLETIN BOARD (11/27/01)

When a Field Office is required, the Contractor shall provide and mount a Job Bulletin Board at the field office in a location where it can be readily seen by all of the Contractor employees. The bulletin board shall be substantially built to a minimum size of 900 mm high x 1200 mm wide (3' x 4') shall be fitted with a framed safety glass door and lock. The glass on the outside shall be protected with a 12 mm x 12 mm (½" x ½") galvanized wire mesh screen permanently attached to the frame. The bulletin board shall be finished inside and outside with two (2) coats of an exterior paint.

00306 RESPONSIBILITY FOR SITE (10/17/01)

The Contractor is in full charge of and responsible for the job site and the Work. The "Interface/ Coordination Requirements" of the General Requirements describe interfaces with other contractors working on the job site. No other operations of any nature shall be performed except as specifically authorized in the Contract Documents or as authorized by the Engineer.

The Contractor shall exercise care not to damage improvements and adjacent land. The Contractor shall correct any damage caused within seventy-two (72) hours by restoring the land and improvements damaged to their original condition and shall indemnify and hold the City harmless for any such damage as specified in "Indemnification" of these General Conditions.

00307 WORKMANSHIP AND MATERIALS (4/12/95)

All materials, parts and equipment furnished by the Contractor for the Work shall be new, high grade and free from defects. Materials and work quality shall be subject to the Inspector's approval.

00308 INJURY AND ILLNESS PREVENTION - SAFETY MEASURES (9/18/07)

Safety is the responsibility of the Contractor. The Contractor shall observe and comply with the safety provisions of all applicable laws, building and construction Codes, safety and health regulations of the California Code of Regulations, and with applicable City Safety Policies.

Every employer (Prime Contractor and/or Subcontractor) employed on the Project shall establish, implement, and maintain an effective Injury and Illness Prevention Program in accordance with Section 3203 of the General Industry Safety Orders.

Each Contractor/Subcontractor shall make the applicable Injury and Illness Prevention Program specific for site conditions and type of Work to be performed on the Project.

Each prime Contractor and Subcontractor working on the Project shall make its Injury and Illness Prevention Program available to the Inspector and the Engineer prior to beginning any Work on the Project.

If a work procedure or site condition exists that violates the Contractor's/Subcontractor's Injury and Illness Prevention Program or any other safety standard, the Engineer or Inspector may order the Contractor to immediately comply with said safety provisions, and the Contractor shall comply with such orders at its own expense. If the Contractor fails to act promptly, the Engineer or Inspector is authorized to suspend the Work. Failure of the Engineer or the Inspector to make such demands shall not relieve the Contractor of its obligations to secure the safe conduct of the Work.

If a work procedure or site condition creates an immediate hazard to the health or safety of the public, City employees, property, or a licensee, the City may suspend all work on the project. Without prior notice, the City may also correct such hazardous conditions using other forces or contractors, at the Contractor's sole expense. Any delays or impacts arising on the Work as a result of such an emergency shall be at the sole expense of the Contractor with no time extension, additional reimbursement for extended overhead, or interest on monies due, allowed for the Contractor.

First aid facilities and supplies shall be kept and maintained by the Contractor at the site of the Work.

The Contractor shall cause all persons within the construction area to wear protective helmets. In addition, all employees of the Contractor and its Subcontractors shall be provided with, and required to use, personal protective and life saving equipment set forth in California Construction Safety Orders and the OSHA Safety and Health Standards for Construction.

The Contractor shall provide safety equipment, material, and assistance to City personnel to properly inspect all phases of the Work, including final inspection. Such equipment, material and assistance shall include, but not be limited to testing for the presence of explosive or toxic gases and oxygen deficiency in confined spaces, blowers, ventilators, first aid supplies and equipment, ladders, scaffolds, shoring, and personnel for standby assistance as required. Personal safety devices such as harnesses, lanyards, and self-contained breathing apparatus will be provided by the Bureau of Contract Administration, unless otherwise noted. When the Work requires specialized safety equipment, the Contractor shall provide new sets of such equipment, the training deemed necessary by the Inspector, and maintenance of such equipment. When asbestos is being removed, the requirements of the CCR, Title 8, Div. 1, Chapter 4, Subchapter 4, "Construction Safety Orders," and Subchapter 7, "General Industry Safety Orders," shall be implemented.

In cases involving exposure of City personnel to toxic/hazardous materials and/or elements, the City Personnel Department, Occupational Safety Office, shall have field review authority over the Contractor's operations.

For additional requirements, refer to “Safety and Preconstruction Safety Conference” of the General Requirements.

00309 PROTECTION OF PERSONS AND PROPERTY AND RESTORATION OF EXISTING IMPROVEMENTS (1/05/10)

The Contractor shall not destroy, remove, or otherwise disturb any existing survey monuments or reference points without authorization from the Engineer. No pavement breaking or excavation shall be started until all survey monuments or other reference points that will be disturbed by the construction operations have been properly referenced by the Engineer. It shall be the Contractor’s responsibility to notify the Engineer and the Inspector of the time and location that Work will be done. Such notification shall be sufficiently in advance of construction so that there will be no delay due to waiting for survey points to be satisfactorily referenced for restoration. All survey monuments or reference points disturbed, without authorization by the Engineer, shall be accurately restored by the City at the Contractor’s sole expense after all street or roadway resurfacing has been completed.

Unless otherwise noted, all construction operations shall preserve existing drainage paths, vehicular and pedestrian access. The Contractor shall also regularly attend to dust, mud, trash, noise, debris, and etceteras, caused by their construction operations to prevent a public nuisance.

All paved areas including asphalt concrete berms cut or damaged as a result of construction shall be replaced with similar materials and of equal thickness to match the existing adjacent undisturbed areas, except where specific resurfacing requirements have been called for in the Contract Documents or in the requirements of the agency issuing the permit. All temporary and permanent pavement shall conform to the requirements of the affected pavement owner. All pavement which is subject to partial removal shall be neatly saw cut in straight lines.

In order to obtain a satisfactory junction with adjacent surfaces, the Contractor shall saw cut back and trim the edge so as to provide a clean, sound, vertical joint before permanent replacement of an excavated or damaged portion of pavement. Damaged edges of pavement along excavations and elsewhere shall be trimmed back by saw cutting in straight lines. All pavement restoration and other facilities restoration shall be constructed to finish grades compatible with adjacent undisturbed pavement.

Where sidewalks have been removed for purposes of construction, the Contractor shall place suitable temporary sidewalks, properly protected, promptly after backfilling and shall maintain them in satisfactory condition until the final restoration thereof has been made.

When existing planted areas are regraded, or removed and replaced because of the Contractor’s operations, the soil in these areas shall be prepared and the area replanted-in-kind. All landscape materials shall conform to the requirements of the owner of the affected planted area.

All utilities encountered along the line of the Work shall be maintained continuously in service during all the operations under the Contract, unless other arrangements satisfactory to the Engineer are made. Utilities shall include, but not be limited to, all above or below-ground conduit, pipes, ducts, cables, and appurtenances associated with oil, gas, water, steam, irrigation, process, sewer, storm drain, wastewater, air, electrical, power, instrumentation, communication, telephone, cable, TV, and lighting systems, whether or not owned by the City.

The Contractor shall protect all existing utilities and improvements not designated for removal. Potholing for utilities and structures shown or addressed on the drawings shall be accomplished at the Contractor’s expense. The Contractor shall determine the exact locations and depths of all utilities indicated on the Drawings. The Contractor shall make exploratory excavations of all utilities. The Contractor, in conformance with City Ordinance No. 150,478, shall pothole existing subsurface installations carrying unstable substances to determine their locations and elevations before commencing excavation. All such

exploratory excavations shall be performed as soon as practicable after award of the Contract and in any event, a sufficient time in advance of construction to avoid possible delays to the Contractor's Work. When such exploratory excavations show the utility location as indicated on the Drawings to be in error, the Contractor shall so notify the Inspector and the Engineer. The Contractor should not rely upon plan designation of location of underground utilities. The number of exploratory excavations and extent of potholing required shall be that number which is sufficient to determine the alignment and grade of the utility. These costs are a part of the Bid.

Prior to any excavation in the vicinity of any existing underground facilities, the Contractor shall notify the Inspector and the Engineer, and the respective authorities representing the owners or agencies responsible for such facilities, not less than three (3) Workdays, nor more than five (5) Workdays, of their intention to begin excavation. The Contractor shall make arrangements for and provide access such that a representative of said owners or agencies may be present during such Work. If the proposed excavation is within 10 feet of a high priority subsurface installation, as defined by Section 4216 of the California Government Code, the Contractor shall conduct an onsite meeting with the owner of the utility to determine actions or activities required to verify the location of the high priority subsurface installation before proceeding with any excavation activities.

Before commencing any excavation, the Contractor shall obtain an Underground Service Alert (USA) inquiry I.D. number. Two workdays, shall be allowed after the I.D. number is obtained and before the excavation work is started so that utility owners can be notified. If the utility owner is the City, a confirmation number indicating the City has been notified shall be obtained by USA and/or the Contractor from the appropriate City department. The I.D. number together with the date acquired shall be reported to the Inspector when calling for inspection. I.D. numbers will not be given more than ten (10) Workdays before starting excavation work.

Unless otherwise indicated on the Plans or Specifications, where the proper completion of the Work requires the temporary or permanent removal and/or relocation of an existing utility or other improvement, which is shown on the Plans, the Contractor shall, at its own expense, remove and, without unnecessary delay, temporarily replace or relocate such utility or improvement to a place and in a manner as directed by the Engineer, and the owner of the facility. In all cases of such temporary removal or relocation, restoration to former location shall be accomplished by the Contractor in a manner that will restore or replace the utility or improvement as nearly as possible to its former locations and to as good or better condition than found prior to removal. When utilities that are to be removed are encountered within the area of operations, the Contractor shall notify the Engineer not less than fifteen (15) days in advance for necessary measures to be taken to prevent interruption of service.

The Contractor shall notify the Engineer thirty (30) calendar days in advance of any proposed connection, and shall notify the Engineer and the Inspector twenty-four (24) hours prior to the actual connection, to any existing utility.

Any utility or improvement which is damaged by the Contractor shall be immediately repaired at the Contractor's expense, to a condition equal to, or better than, the condition it was in prior to such damage or temporary relocation. If the Contractor fails or refuses to promptly repair the utility or improvement, the City may perform the necessary Work at the Contractor's expense. The Contractor will also not be entitled to any time extension, additional reimbursement, extended overhead, or interest on monies due. The Contractor is not relieved of provisions of this Article even in the event such damage occurs after backfilling or is not discovered until after completion of backfilling.

All repairs to a damaged improvement shall be inspected and approved by the Inspector and an authorized representative of the improvement owner before being concealed by backfill or other Work. In case of damage, which in the opinion of the Engineer or the Inspector, threatens the safety of persons or property, the Contractor shall immediately make all repairs necessary for removal of the hazard. Should the Contractor fail to promptly take all necessary action, the City has the option to remove any hazard

resulting from damages caused by the Contractor at the Contractor's expense without waiving any other rights the City may have. The Contractor will also not be entitled to any time extension, additional reimbursement, extended overhead, or interest on monies due.

In the event that the Contractor damages any existing utilities that are not shown on the Plans or the locations of which are not made known to the Contractor prior to excavation, the Contractor shall immediately notify the Inspector and take all measures necessary to prevent further damage. The Contractor shall then immediately make a written report to the Engineer and shall make repairs as directed by the Engineer.

Notwithstanding that an existing utility or substructure is not shown on the original Plans and Specifications, if the existence and location thereof was made known to the Contractor prior to excavation, the utility or substructure constitutes an existing known condition, and the Contractor is responsible for protecting the utility or substructure.

Damage to a utility known to the Contractor shall be repaired at the Contractor's expense.

00310 NON-CONFORMING WORK (1/30/03)

Except as set forth in this Article, all non-conforming Work and materials, in place or not, shall be removed immediately from the site or corrected to conform to all requirements of the Contract Documents, by the Contractor, at the sole expense of the Contractor.

If the Contractor fails to remove, replace or correct any non-conforming Work or materials within seventy-two (72) hours of discovery, the Inspector or the Engineer may cause such Work or materials to be removed and replaced. Such removal and replacement shall be at the sole expense of the Contractor with no entitlement to time extensions, additional reimbursement, extended overhead, or interest on monies due. In addition, all such cost shall be deducted from any amounts that are due or may become due to the Contractor.

Failure of the Inspector or the Engineer to notify the Contractor of any non-conforming Work shall not constitute acceptance of any non-conforming Work. The Contractor's obligation to remove, replace or correct any non-conforming Work, whenever discovered, shall continue to the end of the guaranty-warranty period provided for in "Guaranty-Warranty" of the General Requirements. The City reserves and retains all rights and remedies at law against the Contractor and their Surety for correction of any and all latent defects discovered after the guaranty-warranty period.

Any delays or impacts arising on the Work as a result of construction, fabrication or delivery of non-conforming work or materials shall be at the Contractor's sole expense, with no time extension, additional reimbursement for extended overhead, or interest on monies due allowed.

Examination of covered Work may be ordered by the Engineer or the Inspector for any reason. The Work shall be uncovered by the Contractor and if such Work is found to be in accordance with the Contract Documents, the City will issue a Change Order authorizing payment for the cost of examination and replacement. If such Work is found to be not in conformance with the Contract Documents, the Contractor shall correct the non-conforming Work and the cost of examination and correction of the non-conforming Work shall be borne solely by the Contractor.

Failure of the Contractor to comply with the requirements of this Article shall constitute default of the Contract by the Contractor and the City may terminate the Contract as provided for in Termination of Contract by City (Contractor Default).

00311 SUBCONTRACTORS AND SUB-SUBCONTRACTORS (10/28/14)

The Contractor shall perform on the site and with its own organization not less than fifty percent (50%) of the total Contract Price, unless a different percentage is designated in the Bid Proposal. Any items designated "specialty items" in the Bid Proposal may be performed by subcontract and the amount of all such "specialty items" may be deducted from the Contract Price before computing the amount of Work required to be performed by the Contractor with its own organization. The dollar value included in the percentage performed by the Contractor shall include the value of labor, materials and equipment to be incorporated or used in the Work and directly purchased by the Contractor and shall not include the value of Work, including labor, materials and equipment, incorporated or used in the Work, performed or provided by Subcontractors.

To be eligible for award of this Project, the Board requires Bidders to subcontract a minimum of its total Bid to qualified Subcontractors, as discussed in the “Mandatory Subcontracting Minimum (MSM) Requirements” of the Bid Proposal. Failure to list Subcontractors and the subcontracted dollar amounts on the applicable pages of the Bid Proposal to satisfy the MSM is cause for the Bid to be declared nonresponsive and rejected by the Board.

Bidders must list all Subcontractors in the Bid, regardless of the dollar amount of the work to be performed, if the Bidder wishes to have the Subcontract amount credited toward meeting both the MSM and MBE/WBE levels of participation of the Project. Subcontractors added to the project following acceptance of the Bid and award of the Project will not be credited toward meeting the required MSM and/or MBE/WBE levels of participation for this Project.

MSM credit will not be given to a joint venture partner listed as a Subcontractor by a joint venture.

Listed vendors and/or Suppliers will be limited to 60% of their listed dollar value toward achieving both the MSM and the anticipated MBE/WBE levels of participation for this Project, unless the vendor and/or Supplier manufactures or substantially alters the materials/supplies.

The designated percentage of the total Contract Price the Contractor is to perform may not be reduced below that level by the addition of Subcontractor’s added after Award of the Project.

The Inspector, acting on behalf of the Board, will be responsible for approval of all Subcontractors, whether Bid-listed or not, and all Sub-subcontractors, at any level, employed on the Project.

Each Subcontractor who will perform Work or render services in an amount in excess of one-half of 1 percent of the Contractor’s total Bid or $10,000.00, whichever is greater, must be listed in the original Bid.

Subletting or Subcontracting of any portion of the Work in excess of one-half of 1 percent of the Contractor’s original total Bid or $10,000.00, whichever is greater, for which no Subcontractor was designated in the original Bid shall only be permitted in cases of public emergency or necessity, and then only after a finding reduced to writing as a public record of the Inspector setting forth the facts constituting the emergency or necessity.

If the Contractor fails to specify a Subcontractor, or if the Contractor specifies more than one Subcontractor for the same portion of Work to be performed under the Contract in excess of one-half of 1 percent of the Contractor’s total original Bid or $10,000.00, whichever is greater, the Contractor agrees that it is fully qualified to perform that portion of Work itself, and that it shall perform that portion itself.

The Contractor shall set forth in its Bid the following: The name, location of the place of business, telephone number, California State Contractor’s License Number and dollar amount of each Subcontractor who will perform Work, labor, service, supply specifically fabricated materials or equipment in an amount in excess of one-half of 1 percent of the Contractor’s total Bid, or $10,000.00, whichever is greater.

The Contractor shall list only one Subcontractor for each portion of Work as defined by the Contractor in its Bid.

Acceptance by the Board of its Bid is dependent upon each Bid listed Subcontractor, and all subsequently approved additional Subcontractors, performing the dollar value of Work listed or approved. Any reduction, increase, or other change to any Subcontract amount without prior approval is considered an Unauthorized Subcontractor Substitution and is subject to a penalty of ten (10) percent of the Subcontract amount, whether Bid-listed or not. A Subcontract dollar value increased or reduced as the result of a Change Order issued by the Engineer to add or delete from the original scope of Work shall not be subject to a penalty for an Unauthorized Subcontract Substitution.

Acceptance by the Board of its Bid shall not entitle Subcontractors to recognition for any direct or contractual relationship with the City, nor shall it constitute approval of the use of any materials other than those specified.

The Contractor shall be responsible for all acts of all Subcontractors at all tiers. The Contractor shall coordinate all work performed by subcontractors in the interest of the City.

All Subcontractors, at all tiers, who will be working on the Project shall be approved in writing by the Inspector prior to beginning Work, regardless of the dollar amount of Work to be performed, and whether or not they were listed in the original Bid.

Requests for approval of all Subcontractors, or request for substitution of a Subcontractor, shall be made in writing to the Inspector, and said request shall contain the following information for each Subcontractor:

1) Project Name

2) Project Work Order Number

3) Subcontractor's Name

4) Subcontractor's Address

5) Subcontractor's Phone Number

6) Subcontractor's Status (WBE, MBE, OBE)

7) Subcontractor's State of California Contractor License Number

8) Subcontractor's City Business Tax Registration Certificate Number (BTRC)

9) Dollar amount of Subcontract work to be performed

10) Description of Subcontract work to be performed

Failure to provide any of the information listed will result in denial of approval until such time as the information is provided.

Failure to obtain approval of the Inspector prior to each Subcontractor, at any level, performing Work on the Project may result in suspension of Work by that Subcontractor, removal of Work performed by unapproved Subcontractors, assessment of penalties, and possible sanctions against the Contractor. Failure to obtain approval of any Subcontractor or Sub-subcontractor at any level is subject to a penalty of ten (10) percent of the total amount of work performed by said Subcontractor.

Additional Subcontractors may be added after the time of original Bid. The value of Work to be performed by additional Subcontractors may not be greater than one-half of 1 percent of the Contractor's original total Bid or ten thousand dollars ($10,000.00), whichever is greater, unless the Subcontractor will be performing Work added by Change Order causing changes or deviations from the original Contract.

The Contractor shall provide the dollar amount of Work to be performed in all requests for additional Subcontractors and/or Sub-subcontractors. Failure to specify a dollar amount of Work to be performed will result in denial of additional Subcontractors until such time as the amount is provided.

Failure of the Contractor to request and obtain approval for a reduction in either a Bid-listed Subcontract amount or the Subcontract amount of a Subcontract added after the original Bid shall result in a penalty of ten percent of the Subcontract amount.

A Contractor whose Bid is accepted may not:

1) Substitute any person as Subcontractor in place of a Subcontractor listed in the original Bid, except that the Inspector, acting on behalf of the Board, may consent to the substitution of another Subcontractor for one of the following situations:

   A) When the Subcontractor listed in the original Bid or proposal after having had a reasonable opportunity to do so fails or refuses to execute a written contract, when that written contract, based upon the general terms, conditions, plans and specifications for the project involved or the terms of that Subcontractor's written bid, is presented to the subcontractor by the Contractor.

   B) When the listed Subcontractor becomes bankrupt or insolvent.

   C) When the listed Subcontractor fails or refuses to perform its subcontract.

   D) When the listed Subcontractor fails or refuses to meet the bond requirements of the Contractor as set forth herein.

   E) When the Contractor demonstrates to the Inspector's satisfaction that the name of the Subcontractor was listed as a result of an inadvertent clerical error.

   F) When the listed Subcontractor is not licensed pursuant to the State of California Contractor's License Law.

   G) When the listed Subcontractor refuses to obtain a City of Los Angeles Business Tax Receipt Certificate (BTRC).

   H) When the Inspector concurs with the Contractor that the Work being performed by the listed Subcontractor is unsatisfactory and not in substantial accordance with the Contract Documents, or the listed Subcontractor is delaying or disrupting the progress of the work.

   I) When the listed Subcontractor fails to submit an Affirmative Action Plan acceptable to the Inspector.

   J) When the Board determines that a listed Subcontractor is not a responsible contractor.

2) Permit a Subcontract to be voluntarily assigned or transferred or allow it to be performed by anyone other than the original Subcontractor listed in the original Bid, without the consent of the Inspector.

3) Other than in the performance of Change Orders causing changes or deviations from the original Contract, sublet or Subcontract any portion of the Work in excess of one half of 1 percent of the Contractor's total Bid as to which its original Bid did not designate a Subcontractor.

4) Reduce the dollar amount of a Bid-listed Subcontract without the written approval of the Inspector.

A request for substitution of any Subcontractor, at any level, whether Bid-listed or not, must be made in writing to the Inspector and must include letter(s) of explanation as to the reason for the requested substitution.

It is considered a substitution if anyone other than the Bid-listed and/or approved Subcontractor(s), including the Contractor, performs any portion of the Work designated to be performed by said Subcontractor.

Failure to obtain approval for a Subcontractor substitution may result in rejection of the affected Work, a penalty of ten (10) percent of the total amount of the Subcontract, and possible sanctions by the City.

All substitutions of Subcontractors, whether MBE/WBE or not, shall be approved in writing by the Board prior to any Work being performed by the substituting Subcontractor.

The Contractor shall conduct a Good Faith Effort prior to approval of any requested Subcontractor substitution, regardless of the status (WBE/MBE/OBE/DBE) of the contractor being substituted for. For MBE/WBE/OBE Subcontractor substitution requests, the Contractor shall comply with the Good Faith Effort requirements of Part III (F) (2) of the Bid Proposal. The Good Faith Effort for any requested Subcontractor substitution must be reviewed and approved by the Special Research and Investigation Section of the General Services Division of the Bureau of Contract Administration, whether the Subcontractor was Bid listed or approved after the Award of the Project.

There shall be no decrease in dollar value of Work to be performed by Subcontractors approved as a substitute for a Bid-listed Subcontractor without a change in scope of the Work to be performed by the originally Bid-listed Subcontractor. Written evidence of a change of scope must be provided by the Engineer prior to approval of a change in dollar value of a Bid-listed Subcontractor.

Prior to approval of the Contractor's request for substitution, the Inspector shall give notice in writing to the Subcontractor affected by the Contractor's request to substitute and of the reasons for the request. The notice shall be served by certified or registered mail to the last known address of the Subcontractor. The listed Subcontractor who has been so notified shall have five (5) Workdays within which to submit written objections to the substitution. Failure to file these written objections within five (5) Workdays of notification shall constitute the listed Subcontractor's consent to the substitution. Notification by the Inspector may be made by phone in lieu of written notification via certified or registered mail if agreed to by the listed Subcontractor and followed by written request. Upon notification by phone, the listed Subcontractor may file written objections within five (5) days of notification.

If written objections are filed, the Inspector shall give notice of at least five (5) Workdays to the listed Subcontractor of a hearing on the Contractor's request for substitution.

The Contractor, as a condition to assert a claim of Inadvertent Clerical Error in the listing of a Subcontractor, shall within two Workdays after the time of the original Bid opening by the Board give written notice to the Inspector and copies of such notice to both the Subcontractor he claims to have listed in error and the intended Subcontractor who had bid to the Contractor prior to Bid opening.

Written notice of an Inadvertent Clerical Error shall be forwarded within two (2) days after the time of the original Bid opening by every Contractor claiming such an error. Failure to forward such notice within the time prescribed shall make any such subsequent claim of Inadvertent Clerical Error invalid.

Any listed Subcontractor who has been notified by the Contractor of an Inadvertent Clerical Error shall be allowed six (6) Workdays from the time of the Bid opening to submit to the Inspector and to the Contractor written objection to the Contractor's claim of Inadvertent Clerical Error. Failure of such listed Subcontractor to file such written notice within the six (6) Workdays shall constitute agreement that an advertent clerical error was made.

The Inspector shall, in the absence of compelling reasons to the contrary, consent to the requested substitution based on an Inadvertent Clerical Error if:

1) The Contractor, the Subcontractor listed in error, and the intended Subcontractor each submit an affidavit to the Inspector along any additional information as the parties may wish to submit that an Inadvertent Clerical Error was in fact made, provided that the affidavits from each of the three parties are filed within eight (8) Workdays from the time of the original Bid opening, or

2) If such affidavits are filed by both the Contractor and the intended Subcontractor within eight days of the original Bid opening but the Subcontractor whom the Contractor claims to have listed in error does not submit within six (6) Workdays, to the Inspector and to the Contractor, written objection to the Contractor's claim of Inadvertent Clerical Error as provided in this article.

If such affidavits are filed by both the Contractor and the intended Subcontractor but the listed Subcontractor has, within six (6) Workdays from the time of the original Bid opening, submitted to the Inspector and to the Contractor written objection to the Contractor's claim of Inadvertent Clerical Error, the Inspector shall investigate the claims of all parties and schedule a public hearing before the Board to determine the validity of such claims. Any determination shall be based on the facts contained in the declarations submitted under penalty of perjury by all three parties and supported by testimony given to the Board. The Board may, on its motion or that of any other party, admit testimony of other Contractors, any Bid registries or depositories, or any other party in possession of facts, which may have a bearing on the decision of the Board. The findings of the Board shall be final.

The Contractor shall pay its Subcontractors, within seven (7) days of receipt of each progress payment, the respective amounts allowed the Contractor on account of the work performed by its Subcontractors, to the extent of each Subcontractor's interest therein. Payments to Subcontractors shall be made based on the payment estimate approved for payment by the Inspector.

The Contractor shall forward to the Inspector a monthly report indicating the date and amount of each payment made to its Subcontractors from the most recent progress payment. If the Contractor has a written agreement with any Subcontractor allowing for payment later than 7 days after receipt of each progress payment, the Contractor shall include the written agreement(s) in its monthly report.

00312 RESPONSIBILITY OF CONTRACTOR TO ACT IN EMERGENCY (11/21/01)

When an emergency arises creating an imminent hazard to persons or threatening the loss or damage to property, the Contractor shall take prudent action without instruction from the City. The Contractor shall immediately notify the Engineer and the Inspector of any emergency action taken. During such emergencies, if the Contractor fails to act, the Engineer or Inspector may instruct the Contractor to take action. Should the Contractor still fail to act, the Engineer or Inspector may respond to the emergency with other forces or contractors at the Contractor's sole expense. Claims for additional time, compensation or interest will be rejected if the Contractor's actions or inaction created the emergency.

Similarly, any Claims will be offset by the amount that the Contractor's actions or inaction aggravated the emergency.

00313 ASSIGNMENT (2/09/95)

The Contractor shall not assign, transfer, convey or otherwise dispose of this Contract or any of the proceeds thereunder unless written consent of the City has been obtained. No right under this Contract or claim for any proceeds due or to become due hereunder shall be asserted against the City, or persons acting for the City, by reason of any so-called assignment, transfer or conveyance of this Contract or any part thereof unless such assignment, transfer or conveyance has been authorized by the written consent of the City. The instrument of assignment, transfer or conveyance shall contain a clause subordinating the claim of the assignee, transfer or conveyor to all prior liens for services rendered or materials supplied for the execution of the Work.

00314 NOTIFICATION OF HAZARDOUS SUBSTANCES (10/17/01)

The existing facilities or Jobsite may contain asbestos, PCBs, corrosives, carcinogens, or other hazardous materials. Should the Contractor or any of its Subcontractors, while performing Work on or in the vicinity of existing facilities, unexpectedly encounter any material identified in the California Code of Regulations, Title 8, as a hazardous material not shown on the Plans or addressed in the specifications, or have reason to believe that any other material encountered may be a hazard to human health and safety and/or the environment, the Contractor shall stop the Work, cordon off the affected area to secure entry, and shall immediately notify the Inspector and the Engineer. Removal and disposal of the hazardous material not shown on the Plans or addressed in the specifications, if the Engineer deems it necessary, will be done by and at the expense of the City. The City will provide the Contractor, upon request, with copies of Material Safety Data Sheets (MSDS) covering hazardous materials identified by the Contractor that are encountered in existing facilities during the course of the Work and that are not removed by the City.

In the event that the Contractor is delayed in the completion of the Contract solely because of such hazardous materials or conditions not previously identified in the Contract Documents, the Contractor shall be entitled to an extension of time in accordance with "Unavoidable Delay" of these General Conditions.

For new construction Work and for all Contractor furnished supplies and equipment that may contain hazardous materials, the Contractor shall develop and implement a written Hazard Communication Program for its employees in accordance with the California Code of Regulations. The Contractor's basic written Hazard Communication Program shall be submitted to the Engineer and the Inspector prior to the start of Work at the site, and shall be revised and kept current as required by the continuing progress of the Work. The Contractor's Hazard Communication Program shall also include the MSDS for all hazardous materials the Contractor will be using at the facility. All provisions concerning MSDS for hazardous materials shall be met before the hazardous material is delivered to the site.

The Engineer shall be provided with three (3) copies and the Inspector with four (4) copies of the Contractor's written Hazard Communication Program, Contractor provided MSDS, and all revisions and modifications thereto.

The Contractor and Subcontractors shall comply with all State and Federal statutes and regulations on training, handling, storage, public notification, and disposal of hazardous materials and hazardous wastes. In the event that the Contractor or its Subcontractors spills or releases hazardous materials, the Contractor shall immediately notify the Inspector and the Engineer and any required agencies of the spill or release and the Contractor shall stop the Work, and cordon off the affected area to secure entry. Removal and disposal of the hazardous material, if the Engineer deems it necessary, will be done by the City at the Contractor's expense. Further, the Contractor shall notify the Engineer and the Inspector when

hazardous materials are brought on-site and when hazardous materials and hazardous wastes are removed from the site. Hazardous Materials brought on site shall be accompanied by four (4) copies of MSDS, which shall be provided to the Inspector before such materials are unloaded.

00315 INDEPENDENT CONTRACTOR (10/21/99)

The Contractor represents that it is fully experienced and properly qualified to perform the class of Work required for the Contract and that it is properly licensed, equipped, organized and financed to perform the Work. The Contractor shall be an independent contractor. The Contractor is not an agent of the City in the performance of the Contract, and shall maintain complete control over its employees and its Subcontractors and Suppliers of any tier. Nothing contained in the Contract or any Subcontract awarded by the Contractor shall create any relationship between any Subcontractor and the City. The Contractor shall perform the Work in accordance with its own methods, in compliance with the terms of the Contract.

00316 INDEMNIFICATION (10/17/01)

Except for the active negligence or willful misconduct of the City, the Contractor undertakes and agrees to defend, indemnify and hold harmless, through legal counsel acceptable to the City, the City, and any and all of the City's Boards, Officers, Agents, Employees, Assigns, and Successors in Interest from and against all suits and causes of action, claims, losses, demands and expenses, including, but not limited to, attorney's fees and cost of litigation, damage or liability of any nature whatsoever, arising out of or related to the performance or nonperformance by Contractor or its Subcontractors, Sub-Subcontractors, or Suppliers, of any tier, of any portion of the construction of the Project, including but not limited to Contractor's negligent acts, errors, omissions, breach of contract, breach of warranty (express or implied), or willful misconduct.

It is agreed that such defense and indemnity shall extend to the City's Architect/Engineer or other Design Consultant providing services under written agreement with the City covering any portion of the Project. Provided, however, that the Design Consultant shall be solely responsible for the enforcement of any request made by said Consultant for indemnification or defense by the Contractor. It is further provided that the City shall have no liability whatsoever for any failure of the Contractor to comply with any request from the consultant for indemnity or defense.

It is further agreed that the defense and indemnity obligations of the Contractor under this Article shall not extend to the liability of the Design Consultant or its agents, employees or subconsultants, arising as a result of such indemnitee's own active negligence, errors or omissions or from (1) the preparation or approval of maps, Plans, opinions, reports, surveys, change orders, designs or Specifications, or (2) the giving of or failure to give directions or instructions by the indemnitee provided that such giving or failure to give is the primary cause of the damage or injury.

00317 INSURANCE (1/05/10)

These provisions apply unless otherwise noted in the General Requirements.

A) GENERAL

During the term of this Contract and without limiting the Contractor's indemnification of the City, the Contractor shall provide and maintain at its own expense, insurance having the limits customarily carried and actually arranged by the Contractor but not less than the amounts and types listed on the Insurance Requirements Form in these Contract Documents, covering its operations hereunder subject to the following conditions as they may variously apply:

1) ADDITIONAL INSURED/ADDITIONAL INTEREST/LOSS PAYEE

The City, its Boards, Officers, Agents, and Employees shall be included as:

a) Additional Insureds in all required General Liability and Automobile Liability insurance.

b) Named Insureds in all required Owners and Contractors Protective Liability and Builder's Risk insurance policies.

c) Loss Payee As Its Interest May Appear in all required property, fidelity or Surety coverages.

2) INSURANCE APPROVAL

All insurance required hereunder shall conform to the City requirements established by Charter, ordinance or policy. Evidence of insurance shall be approved by the Office of the City Administrative Officer, Risk Management prior to commencement of any Work or tenancy under this Contract in accordance with the Los Angeles Administrative Code.

3) ALTERNATIVE PROGRAMS/SELF-INSURANCE

Alternative Risk Financing mechanisms such as Risk Retention Groups, Risk Purchasing Groups, off-shore carriers, captive insurance programs and self-insurance programs are subject to separate approval after the City has reviewed their financial statements.

4) ADMITTED CARRIER/LICENSED CALIFORNIA BROKER

All Insurance must be provided by an insurer admitted to do business in California or written through a California-licensed surplus lines broker or through an insurer otherwise acceptable to the City.

Non-admitted coverage must also contain a Service of Suit provision whereby the underwriters will submit as necessary to any court of competent jurisdiction in California and agree that all matters arising thereunder will be determined in accordance with the law and practice of such court. It must further give the name and address of the underwriter's agent for service of process located within California or must nominate the California Insurance Commissioner as such agent.

5) CONTRIBUTION NOT REQUIRED

The Contractor's insurance shall be primary and will not require contribution or shall be endorsed to effect these provisions.

6) CANCELLATION/REDUCTION IN COVERAGE NOTICE

With respect to the interest of the City, if an insurance company elects to cancel insurance before the stated expiration date, or declines to renew in the case of a continuous policy, or materially reduces the coverage period by changing the retroactive date (if any), or the extended discovery period (if any), or reduces the stated limits other than by impairment of an aggregate limit, or materially reduces the scope of coverage which affects the City's interest, the company will provide the City at least thirty (30) calendar days (ten (10) calendar days for non-payment of premium) prior written notice of such election. Notice will be addressed as follows: CAO-RISK MANAGEMENT, MAIL

STOP 132, CITY HALL EAST 1240, 200 NORTH MAIN STREET, LOS ANGELES, CA 90012-4190.

7) ACCEPTABLE EVIDENCE

Electronic submission via Track4LA™, the City's online insurance compliance system (http://track4la.lacity.org), is the preferred method for submitting evidence of insurance. Track4LA™ can be used by insurance brokers and agents to submit Contractor insurance certificates directly to the City using the ACORD 25 Certificate of Liability Insurance in electronic format. Insurance Industry Certificates of Insurance other than the ACORD 25 may also be accepted. However **all** Certificates must provide a thirty (30 days' notice provision (ten (10) days for non-payment of premium) AND an Additional Insured Endorsement naming the City an additional insured completed by Contractor's insurance company or its designee. If the policy includes an automatic or blanket additional insured endorsement, the Insurance Certificate must state that the City is an automatic or blanket additional insured. An endorsement naming the City as an insured is required on all Builder's Risk policies. An endorsement naming the City as Loss Payee as its Interest may appear is required on all property, fidelity or Surety coverages.

Alternatively, the Contractor may submit a copy of the full insurance policy containing language which complies with subparagraphs 1) through 6) above.

Additional Insured Endorsements DO NOT apply to the following:

- Indication of compliance with statute, such as Workers' Compensation Law.
- Professional Liability insurance.

8) SEPARATION OF INSUREDS

Except with respect to the insurance company's limits of liability, each liability insurance policy shall apply separately to each insured against whom a claim or suit is brought. The inclusion of any person or organization as an insured shall not affect any right which such person or organization would have as a claimant if not so included.

9) RENEWAL

Once the insurance has been approved by City, evidence of renewal of an expiring policy may be submitted on a manually signed renewal endorsement or certificate form. If the policy or carrier has changed, however, new evidence as specified in paragraphs 1) through 8) above, must be submitted.

B) AGGREGATE LIMITS/REDUCTION IN COVERAGE

If any of the required insurance coverages contain annual aggregate limits, the Contractor must give the City written notice of any pending claim or lawsuit which will materially diminish the aggregate within thirty (30) days of knowledge of same. Further, the Contractor must take appropriate steps to restore the impaired aggregate limits or provide replacement insurance protection within thirty (30) days of knowledge of same. The City may, at its option, specify a minimum acceptable aggregate for each line of coverage required.

The Contractor shall not make any substantial reductions in scope of coverage (e.g., elimination of contractual liability or reduction of discovery period) which may affect the City's protection without the City's prior written consent.

C) MODIFICATION OF COVERAGE

The City reserves the right at any time during the term of this Contract to change the amounts and types of insurance required hereunder by giving the Contractor ninety (90) calendar days advance written notice of such change. If such change should result in substantial additional cost to the Contractor, the City agrees to negotiate additional compensation.

D) FAILURE TO PROCURE INSURANCE

The Contractor's failure to procure or maintain required insurance or a self-insurance program during the entire term of this Contract shall constitute a material breach of this Contract under which the City may immediately suspend or terminate this Contract or, at its discretion, procure or renew such insurance to protect the City's interests and pay any and all premiums in connection therewith, and recover all monies so paid from the Contractor.

E) UNDERLYING INSURANCE

The Contractor shall be responsible for requiring indemnification and insurance as it deems appropriate from its consultants, agents and Subcontractors, if any, to protect the Contractor's and the City's interests, and for ensuring that such persons comply with any applicable insurance statutes. The Contractor should seek professional advice in this regard.

F) WORKERS' COMPENSATION

By signing this Contract, the Contractor hereby certifies that it is aware of the provisions of Section 3700 et seq., of the Labor Code which require every employer to be insured against liability for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that Code, and that it will comply with such provisions at all such times as they may apply during the performance of the Work pursuant to this Contract.

A waiver of subrogation in favor of the City will be required when Work is performed on City premises under hazardous conditions. The Contractor's Workers' Compensation and Employer's Liability insurance shall be endorsed accordingly.

G) ALL RISK BUILDER'S RISK/INSTALLATION FLOATER

During the course of construction, the Contractor shall secure and maintain an All Risk Builder's Risk Insurance policy covering loss, damage or destruction of property, including materials in transit and stored on and off site, in an amount equal to the value of the construction and materials on hand.

An Installation Risk or "Floater" Policy, written to cover only specific types of equipment during construction, may be provided to cover damage to Work or high valued equipment or materials.

Coverage shall remain in force until the Work is completed and accepted by the City. Acceptable evidence of coverage shall be in the form of an endorsement to the policy which names the City as a Named Insured and as Loss Payee As Its Interest May Appear.

H) TYPICAL COVERAGES REQUIRED

The coverages required in A above shall be at least as broad as:

1) General Liability: Insurance Services Office Commercial General Liability coverage (Occurrence Form CG 00 01) with an edition date prior to 2004. Coverage shall include

protection for the City as additional insured with regard to the completed operations hazard.

2) Automobile Liability: Insurance Services Office Form Number CA 00 01 covering Automobile Liability, code 1 (any auto).

3) Professional Liability: If applicable, errors and omissions liability appropriate to the consultant's profession, with a discovery period of not less than twelve (12) months after completion of Work or termination of Contract.

I) TYPICAL LIMITS OF LIABILITY

Unless otherwise specified in Form Gen. 146/IR, the Contractor shall maintain limits no less than:

1) General Liability: $1,000,000 per occurrence, $2,000,000 aggregate for bodily injury and property damage. A separate aggregate shall apply to completed operations.

2) Automobile Liability: $1,000,000 per accident for bodily injury and property damage.

3) Employer's Liability: $1,000,000 per accident for bodily injury or disease.

1) Professional Liability: $1,000,000 per claim.

K) CONTRACT BONDS

Before the execution of the Contract by the Board, the Bidder shall file with the Board Surety bonds satisfactory to the Board in the amounts and for purposes noted below. Bonds shall be duly executed by a responsible corporate Surety, authorized to issue such bonds in the State of California and secured through an authorized agent with an office in California. Bonds shall be issued by a Surety who is listed in the latest revision of U.S. Department of Treasury Circular 570, is authorized to issue bonds in California, and whose bonding limitation shown in said circular is sufficient to provide Bonds in the amount required by the Contract. The Bidder shall pay all Bond premiums, costs, and incidentals. On Contracts estimated by the Engineer to be less than $2 million, Bonds may be obtained from an insurance company with a Certificate of Authority from the California Insurance Commissioner authorizing the company to write Surety insurance within the State of California.

Each Bond shall be signed by both the Bidder and the Surety, and the signature of the authorized agent of the Surety shall be notarized.

The Bidder shall provide two good and sufficient surety bonds. The "Payment Bond" (Material and Labor Bond) shall be for not less than one hundred percent (100%) of the Contract Price, to satisfy claims of material suppliers and of mechanics and laborers employed by it on the Work. The bond shall be maintained by the Contractor in full force and effect until the Work is accepted by the Board, and until all claims for materials and labor are paid, and shall otherwise comply with the California Civil Code.

The "Performance Bond" shall be for one hundred percent (100%) of the Contract Price to guaranty faithful performance of all Work, within the time period prescribed, in a manner satisfactory to the Board, and that all materials and Workmanship will be free from original or developed defects, and comply with requirements and guaranty specified in “Guaranty-Warranty” of the General Requirements.

Should any Surety at any time be unsatisfactory to the Board, notice will be given the Contractor to that effect. No further payments shall be deemed due or will be made under the Contract until a new Surety shall qualify and be accepted by the Board.

Changes in the Work, or extensions of time, made pursuant to the Contract, shall in no way release the Contractor or Surety from its obligations. Notice of such changes or extensions shall be waived by the Surety. In addition to the bonds detailed above, the Contractor shall provide a guarantee bond as detailed in "Guaranty-Warranty" of the General Requirements.

Assistance in obtaining the City-required bid, payment and performance surety bonds is available through the City of Los Angeles Bond Assistance Program at (213) 258-3000 or http://cao.lacity.org/risk/BondAssistanceProgram.pdf.

00318 SERVICE OF NOTICE (2/09/94)

The delivering of any notice, instruction, claim or protest, or other written communication, personally to the Contractor or the Contractor's Representative or to the Engineer, the Inspector, or to the City Clerk of the City shall constitute service therefore upon the Contractor, the Engineer, the Inspector, or the City, respectively.

The depositing of a post-paid (Registered Mail) wrapper directed to the official address of the Contractor, the Engineer, the Inspector, or the City in any post office, of any notice, instruction, claim or protest, or written communication, shall be deemed sufficient service thereof upon the Contractor, the Engineer, the Inspector, or the City, respectively, and the date of said service shall be the day following the date of postmark.

The official address of the Contractor shall be the address given in the accepted Bid or such other address as the Contractor may subsequently designate in writing either to the Engineer or to the City. The official address of the Engineer, the Inspector, and the City will be supplied to the Contractor after the award.

00319 AGENT TO ACCEPT SERVICE (10/21/99)

The Contractor shall maintain within Los Angeles County a duly authorized agent as identified in the Article entitled Service of Notice to accept service of legal process on its behalf, and shall keep the City advised of such agent's name and address during the duration of the Contract and for three (3) years after the Final Payment, or as long as the Contractor has warranty obligations under the Article entitled "Guaranty-Warranty" of General Requirements, whichever period terminates later. In the event that no such duly authorized agent is on file with the City, the Contractor agrees that the Secretary of State of the State of California shall be the Contractor's agent for service of legal process.

00320 – 00399 NOT USED

00400 TEMPORARY SUSPENSION OR DELAY OF WORK (9/18/07)

If the Work of the Contract is suspended or delayed, the Contractor shall so notify the Engineer within twenty-four (24) hours after the start thereof. If the Contractor is entitled to reimbursement for such suspension or delay, as specified hereinafter, the Contractor shall submit a completely detailed statement of the costs thereof, to the Engineer, within twenty (20) calendar days after the termination thereof. Failure to submit such statement of costs or notification within the time specified shall be deemed a waiver of any claims for delay or damages or both by the Contractor.

If the Work of the Contract is suspended or delayed through no fault of the City, except as provided for in Unavoidable Delay of these General Conditions, all expenses and losses shall be borne by the Contractor

with no time extension, additional reimbursement for extended overhead, or interest on monies due, allowed to the Contractor.

If the Work of the Contract is suspended or delayed by an act of the City, or by failure of the City to furnish required information, and the Contractor thereby incurs expenses or sustains losses which could not have been avoided by the judicious handling of forces and equipment, and if by a diligent prosecution of the Work the Contractor could not have completed the Work before such suspension, the Contractor will be paid such amount as the Engineer may find to be a fair and reasonable compensation for such part of the Contractor's actual loss. In no case shall any compensation be made to cover any loss other than actual cash paid for wages, rental of equipment, and materials used in protection of the Work, all of which must be supported by satisfactory written evidence. Such wages shall not include the wages or salary of any individual not necessary for protection of the Work. The Contractor shall not be entitled to any mark-up for overhead or profit on damages or for extended duration or for interest on monies due for work satisfactorily completed prior to the suspension or delay.

The Contractor shall maintain complete and accurate daily records of all costs due to delay, clearly distinguishing them from the costs of other portions of the Work, and shall submit a detailed written report of such costs to the Engineer and the Inspector within twenty (20) calendar days of incurring the delay. Failure to comply shall result in waiver by the Contractor to any claims for additional payment and schedule change. In addition, the Contractor shall submit evidence of any cause of delay specified herein if it has not already done so.

As soon as practicable, following receipt of such report and evidence, if required, the Engineer will determine the nature and extent of such costs and will, if the Engineer finds that payment is due, issue a Change Order therefor, subject to the provisions in "Change Orders" of the General Requirements. If the Engineer determines that payment is not due, the Contractor will be so advised in writing. Should the Contractor disagree with such finding, Contractor may submit a notice of protest to the Engineer as provided in Claims and Protests. The Contractor shall provide the Engineer with access to its daily cost records or certified copies thereof as requested. All such records shall be retained by the Contractor and open to inspection and audit by the City and the Engineer. Except for the additional compensation provided hereinbefore, the Contractor shall have no claim for damage or compensation for any delay or hindrance whether or not contemplated by the Contract.

00401 UNAVOIDABLE DELAY (10/17/01)

Should the Contractor be obstructed or delayed in the completion of the Work from causes beyond its control and without its fault or negligence, and solely due to acts of God, acts of government in its sovereign capacity, riots, insurrections, wars, fires, floods, earthquakes, tidal waves, epidemics, quarantine restrictions, industry-wide strikes, freight embargoes, or unusually severe weather, it shall be entitled to a noncompensable extension of time.

The Contractor shall only be entitled to a noncompensable extension of time for Unavoidable delay in the Work which negatively impacts the critical path of the approved project schedule, and causes the Work of the project to extend beyond the approved Contract Completion date.

The Contractor shall be entitled to a noncompensable time extension only if it notifies the Engineer and the Inspector immediately at the time the Contractor is prevented from proceeding with the Work and follows with written notification of the causes of the delay within five (5) calendar days from the beginning of any delay. Also, the Contractor shall notify the Engineer and the Inspector immediately at the end of the delay and follow up with written notification of the cessation of delay within five (5) calendar days from the end of the delay.

Any claim for a time extension shall be made in writing within twenty (20) calendar days after the conclusion of the delay. The Engineer and the Inspector shall ascertain the facts and the extent of the

delay and extend the time for completing the Work if, in their judgement, the findings of fact justify such an extension. The Engineer's decision shall be final and conclusive, subject only to appeal as provided by Claims and Protests.

00402 ARCHAEOLOGICAL AND PALEONTOLOGICAL DISCOVERIES (9/18/07)

If items of archaeological or paleontological interest are discovered, the Contractor shall immediately cease excavation in the area of discovery and shall not continue until ordered by the Engineer. When resumed, excavation operations within the area of discovery shall be as directed by the Engineer.

Such discoveries include antiquated dwelling sites, stone implements or other artifacts, animal bones, human bones, fossils and the like. The Contractor shall be entitled to an extension of time and compensation in accordance with the provisions of Temporary Suspension or Delay of Work.

00403 COORDINATION WITH OTHER CONTRACTS (1/30/03)

The Board may allow other work at the site by the City's own forces, utility owners or other direct contracts. If such other work to be performed was not noted in the Contract Documents, written notice thereof will be given to the Contractor prior to starting any such other work; and, if the Contractor believes that such performance will involve additional expense to the Contractor or requires additional time and the parties are unable to agree as the extent thereof, the Contractor may make a claim therefor as provided under Claims and Protests.

Paving of roadway areas shall be withheld until planned utility changes or installations have been made under City permits and until verifications of completion of all such changes or installations have been received by the Inspector. The Contractor is responsible for assuring that verifications are submitted by the utilities. Underground final inspection and acceptance of sewer and storm drain installations shall precede paving operations.

The Contractor shall afford each utility owner and other contractor who is a party to such a direct contract (or the City, if the City is performing the additional work with City employees) proper and safe access to the site and a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such work, and shall properly connect and coordinate the Work with theirs. The Contractor shall do all cutting, fitting and patching of the Work that may be required to make its several parts come together properly and integrate with such other work. The Contractor shall not endanger any work of others by cutting, excavating or otherwise altering their work and will only cut or alter their work with the written consent of the Engineer and the others whose work will be affected. The duties and responsibilities of the Contractor under this Article are for the benefit of such utility owners and other contractors to the extent that there are comparable provisions for the benefit of the Contractor in said direct contracts between the City and such utility owners and other contractors.

If any part of the Contractor's work depends upon proper execution or results of the work of any such other contractor or utility owner or the City, the Contractor shall inspect and promptly report to the Engineer in writing any delays, defects or deficiencies in such work that renders it unavailable or unsuitable for such proper execution and results. The Contractor's failure to do so will constitute an acceptance of the other Work as fit and proper for integration with the Contractor's Work. The exception is latent defects in the other work.

00404 TERMINATION OF CONTRACT BY CITY (CONTRACTOR NOT AT FAULT) (9/18/07)

The Contract may be terminated, in whole or in part, at any time, by the City, at its sole discretion, without cause and for the City's convenience. Such termination will be accomplished by delivery of a written "Notice of Termination" to the Contractor, specifying the extent to which performance of the Work under

the Contract or portion of the Contract shall be terminated and the date upon which such termination shall become effective.

After receipt of a Notice of Termination, except as otherwise directed by the City, the Contractor shall:

1) Stop Work under the Contract on the date and to the extent specified in the Notice of Termination.

2) Notify the City in writing of all outstanding orders, Subcontracts and contracts entered into by Contractor for performance of the Work, including the (I) name and address of the vendor, supplier or Subcontractor; (ii) a copy of the complete contract, order or Subcontract; (iii) an accounting of the Work performed and compensation earned by the vendor, supplier or Subcontractor, and (iv) such other information as the City may request to assist it in determining whether to terminate or accept assignment of the order, Subcontract or contract.

3) Upon written notice by City, terminate all Subcontracts, orders and contracts, of any tier, related to the performance of the Work that the City determines shall be terminated and not assigned. Place no further orders or Subcontracts for Goods or services, except as may be necessary for completion of that portion of the Work that has not been assigned.

4) Place no further orders or Subcontracts for Goods or services, except as may be necessary for completion of that portion of the Work that has not been terminated.

5) Settle outstanding liabilities and Claims arising out of such termination of orders and Subcontracts, with the Acceptance of the City if required (which Acceptance shall be final for the purposes of this Article).

6) Assign to the City in the manner, at the times, and to the extent directed by the City all of the rights, titles, and interests of the Contractor under such orders, contracts and Subcontracts so terminated.

7) Transfer title and deliver to the City in the manner, at the times and to the extent directed by it, the fabricated or unfabricated parts, Work in process, completed Work, supplies, and other Goods procured as a part of, or acquired in connection with the performance of the Work terminated; and completed or partially completed plans, drawings, information and other items that would have been required (per the Specifications) to be furnished to the City if the Contract had been completed.

8) Use its best efforts to sell the property of the types referred to above in the manner, at the times, to the extent, and at the price(s) directed or authorized by the City, providing that the:

   A) Contractor is not required to extend credit to any purchaser;

   B) Contractor may acquire any such property under the prescribed conditions; and/or proceeds of any such transfer or disposition are applied or otherwise credited to reduce payments made by the City to the Contractor under the Contract.

9) Take any action that may be necessary, or that the City may direct, for the protection and preservation of the property related to the Contract that is in the possession of the Contractor and in which the City has or may acquire an interest.

10) Complete performance of that portion of the Work that has not been terminated by the Notice of Termination, as applicable and in accordance with the Contract.

After receipt of a Notice of Termination for the City's convenience, the Contractor shall submit its termination Claim to the City requesting payment of such sums as are permitted under the terms of this Article, in the form and with the certification(s) prescribed by the City for Claims and Protests. Such Claim shall be submitted promptly but in no event later than thirty (30) days from the effective date of termination, unless one or more extensions are granted in writing by the City upon written request by the Contractor during such six-month period or authorized extension thereof. However, the City may receive and act upon any termination Claim at any time after the thirty (30) days period or any extension thereof, if it determines that the facts justify such action. Upon failure of the Contractor to submit its termination Claim within the time specified, the City will determine the amount due the Contractor, if any, on the basis of information available, and will pay the Contractor the amount so determined. Such determination shall be final and binding and payment shall be in full settlement for the Work performed under the Contract.

Subject to the provisions of this Article, the Contractor and the City may agree upon the total or partial amount to be paid to the Contractor by reason of the total or partial termination pursuant to this Article. The agreed upon amount shall under no circumstances include any sum for lost profits on the terminated portion of the Work or for consequential damages, of any kind. If agreement is reached, the Contract will be amended by Modification accordingly and the Contractor will be paid the agreed upon amount.

In the event of failure of the Contractor and the City to agree on the total amount to be paid the Contractor by reason of the termination of Work pursuant to this Article, the City will pay the Contractor the amounts determined by the City as follows, exclusive of any amounts agreed upon in accordance with the preceding Paragraph:

The Contractor’s actual cost for the Work properly performed by the Contractor as of the date of termination, including a 5% allowance for profit on such costs; plus, the reasonable cost of preserving and protecting property; plus, other reasonable costs incidental to the termination of the Work under the Contract, including expense incurred to determine the amounts due; provided however, that the maximum payable or paid for any portion of the completed Work shall not exceed the values listed in the corresponding bid item of Schedule of Values.

The total sum to be payable or paid to the Contractor, exclusive of the settlement amounts described in the Paragraph immediately above, shall not exceed the total Contract Price less the:

1) Payments made previously by the City for the Work; plus

2) A prorated portion of the total Contract Price for the terminated portion of the Work as determined by the Engineer.

Except for normal spoilage and to the extent that the City will have otherwise expressly assumed the risk of loss, the fair value (as determined by the City) of property that is destroyed, lost, stolen, or damaged (so as to become undeliverable to the City or other buyer as described above) shall be excluded from the amounts paid to the Contractor.

In arriving at the amount due the Contractor under this Article, a deduction shall be made for the following:

1) Any claim that the City may have against the Contractor in connection with the Contract; and

2) The agreed upon price for and/or proceeds from the sale of goods or other items acquired or sold by the Contractor that have not been otherwise recovered by or credited to the City.

Under such terms and conditions as it may prescribe and at its sole discretion, the City may make partial payments against costs incurred by the Contractor in connection with terminated portion of the Contract whenever the City decides that the aggregate of such payments is within the amount to which the

Contractor is entitled hereunder. If the total of such payments is in excess of the amount finally agreed upon or determined to be due under this Article, such excess shall be payable by the Contractor to the City upon demand together with interest at a rate equal to that set forth in California Code of Civil Procedure, Section 685.010.

Under no circumstances shall the Contractor be entitled to anticipatory or unearned profits or consequential damages as a result of a termination of partial termination under this Article, or for any other termination by the City. The payment to the Contractor determined in accordance with this Article shall constitute the exclusive remedy of the Contractor for termination hereunder.

Anything contained in the Contract to the contrary notwithstanding, a termination under this Article shall not waive any right or claim to damages that the City may have; the City may pursue any course of action that it may have by law or under the Contract; and shall not relieve Contractor of its warranty obligations with respect to any Work performed prior to such termination.

If the termination hereunder is only for a part of the Work, the Contract Price shall be reduced by the amount of the Contract Price applicable to the portion of the Work which is terminated, including overhead and profit, on the basis of one or more of the following:

1) Unit prices stated in the Contract or agreed upon by the City and the Contractor.

2) A lump sum determined by the Engineer, based on the estimate costs including overhead and profit of the terminated portions of the Work.

00405 TERMINATION OF CONTRACT BY CITY (CONTRACTOR DEFAULT) (9/18/07)

In the event of conduct by the Contractor which is determined by the Engineer or the Inspector to constitute default, the City may either suspend the Work under the provisions of Temporary Suspension or Delay of Work of these General Conditions or, upon ten (10) calendar days' written notice to the Contractor, terminate the Contract as provided herein. Default by the Contractor shall occur whenever it shall declare bankruptcy; become insolvent or assign its assets for the benefit of its creditors; fail to provide materials, equipment, or workmanship meeting the requirements of the Specifications; disregard or violate provisions of the Contract Documents or the Engineer's or the Inspector's instructions; cause a material breach of the Contract; fail to prosecute the Work according to the approved progress schedule; or fail to provide a qualified representative, competent workers or Subcontractors. Upon request, the Contractor will be provided a hearing by the Board to contest the recommendation of the Engineer or the Inspector as to default by the Contractor.

In the event the Contract is terminated pursuant to this Article, the City may take possession of the Work and of all materials, tools, equipment, and property of the Contractor, which have been provided in connection with the Work, and may complete the Work by whatever method or means the City may select. The unpaid balance of the Contract cost for completing the Contract Work shall be used to complete the Work in accordance with the Contract Documents. If cost of completing the Work exceeds the unpaid balance, the Contractor shall pay the excess amount to the City. If such cost is less than the unpaid balance, the Contractor shall not have claim to the difference except to such extent as may be necessary, in the opinion of the Engineer, to reimburse the Contractor or the Contractor's sureties for any unpaid expense properly incurred for materials, tools, equipment, property, and labor devoted to the prosecution of the Work, or which the City shall have received the benefit. In computing such expenses, as it relates to equipment and property, the salvage value at completion of Work shall be deducted from the salvage value at the time the Contract was terminated, and the difference shall be considered as an expense. If after termination for failure of the Contractor to fulfill contractual obligations (Contractor Default), it is determined by a Court of competent jurisdiction that the Contractor had not failed to fulfill contractual obligations, the termination shall be deemed to have been for the convenience of the City. In

such an event, adjustment of the Contract Price shall be made as provided in Termination of Contract by City (Contractor Not at Fault)".

00406 PARTIAL ACCEPTANCE (9/18/07)

The City shall have the right to utilize or place into service any item of equipment or other usable portion of the Work prior to completion of the entire project. The Engineer will notify the Contractor in writing identifying the specific portion or portions of the Work to be so utilized or otherwise placed into service. Following inspection by the Bureau of Contract Administration's Final Inspector and completion of a Partial Final Inspection Correction List, a "Statement of Partial Completion" will be issued.

It shall be understood by the Contractor that until a "Statement of Partial Completion" is issued, all responsibility for care and maintenance of all items or portions of the Work to be placed in use shall be borne by the Contractor. Upon issuance of a "Statement of Partial Completion", the City will accept responsibility for the protection and maintenance of all such items or portions of the Work described in the written notice, and it is further understood that the manufacturer's warranties of any affected equipment will commence not later than the date for commencement of the warranties indicated on the "Statement of Partial Completion". However, the Contractor shall retain full responsibility for satisfactory operation of the total project and the Contractor's guarantee period shall commence only after the issuance of the Statement of Completion. Such guarantee of total systems operation shall include that portion or portions of work covered by the "Statement of Partial Completion".

The issuance of a "Statement of Partial Completion" for any part of the Work shall not relieve the Contractor of its obligation to promptly remedy any omissions and latent or unnoticed defects in the Work covered by the "Statement of Partial Completion". The City shall have the right to restrict the Contractor's use of the occupied portion of the Work but shall allow the Contractor reasonable access to complete or correct items required by the Contract Documents.

The City may, if the Work is progressing satisfactorily, release part of the retention on portions of the Work for which a "Statement of Partial Completion" has been issued, provided that the following conditions have been met:

1) Partial Final Inspection corrections have been completed to the satisfaction of the Inspector on the portions of work to be utilized or placed into service;

2) The Contractor submits a written request to the Inspector for release of retention which includes a verifiable valuation of the identified portions of the Work covered by the "Statement of Partial Completion";

3) Impacted Subcontractors, major suppliers and the Contractor's Surety all agree in writing to release of retention;

4) There are no Stop Notices on file with the Board against the Contractor involving any portion of the affected Work; and

5) Both the Engineer and Inspector agree that a portion of the retention should be released for the affected Work.

00407 FINAL ACCEPTANCE (02/21/08)

When all work has been completed to the satisfaction of the Inspector, the Inspector shall request in writing a Full Final Inspection be performed by the Final Inspector. The Full Final Inspection conducted by the Final Inspector may include the Contractor and the Engineer. A Final Inspection Correction List will be provided to the Contractor and the Engineer upon completion of the Final Inspection. All

corrections listed on the Final Inspection Correction List shall be completed within thirty (30) days of issuance of the Final Inspection Correction List. Failure to complete all corrections within thirty (30) days of issuance of the Final Inspection Correction List shall result in the Final Inspection being performed again.

The date of completion of the Project shall be the date of Final Field Acceptance of the Project when all physical corrections have been completed. The Final Inspector will issue the Statement of Completion indicating the date of Final Field Acceptance of the Project.

If there are no physical corrections to be completed following the Full Final Inspection, the Final Inspector will issue the Statement of Completion indicating the date of Final Field Acceptance of the Project.

Final Field Acceptance of the Project shall establish the following:

1) Start date of the Contractor's material and workmanship Guaranty-Warranty for the total Project.

2) Start date of any equipment or material warranties which had not previously been started.

3) Date the City assumes responsibility for maintenance, security, and safety of the Project.

Upon issuance of the Statement of Completion by the Final Inspector and completion of all administrative requirements of the contract, the Inspector of Public Works and City Engineer shall prepare a Joint Report which contains the recommendation of the Inspector of Public Works that the Board accept the Project. The Board will formally accept the project based on the information contained in the Joint Report.

00408 LIQUIDATED DAMAGES (9/18/07)

Time is of the essence in completing the Work required by the Contract. If the Contractor fails or refuses to complete the Work or any part thereof within the time fixed by the terms of the Contract, or any approved extension thereof, the actual damage to the City due to the delay will be difficult or impossible to determine. In lieu thereof, the Contractor shall pay to the City, as fixed and agreed, liquidated damages for each day of delay in completion, the sum or sums as set forth in the Contract Documents. The Contractor shall be liable for the amount thereof. The City reserves the right, however, to terminate the Contractor's completion of the Work, charging against the Contractor and its sureties any excess cost occasioned the City thereby, together with liquidated damages accruing until such time as the City may reasonably complete the Work.

Permitting the Contractor to continue and complete the Work, or any portion thereof, after the time fixed herein for completion, or after the expiration of any extensions of said time, shall in no way operate as a waiver on the part of the City of any of its rights under the Contract.

00409 – 00499 NOT USED

00500 CHANGES AND EXTRA WORK (9/18/07)

The Engineer may, at any time, without notice to the Sureties, by written order designated or indicated to be a Change Order, order performance of extra work or make any change, addition or deletion in the Work, including but not limited to changes in the Specifications including Plans and designs; in the time,

method or manner of performance of the Work; in the City furnished facilities, equipment, materials, services, or site; or directing acceleration in the performance of the Work.

Upon receipt of such Change Order, the Contractor shall promptly proceed with the Work covered thereby, which shall be performed in accordance with the provisions of the Contract Documents except as otherwise specifically provided.

In the event that Contractor receives any written order or direction by the Engineer or Inspector that is not so designated or indicated to be a Change Order, but which Contractor believes to constitute an extra, change, addition or deletion in the Work, then Contractor shall, prior to performance of any Work related thereto, give written notice to the Engineer and Inspector confirming Contractor's belief that such order or direction is believed to be a Change Order within one (1) working day of Contractor's receipt of such order or direction. Compensation for the extra, change, addition, or deletion in the Work will be in accordance with the provisions of "Change Orders" of the General Requirements.

Contractor conclusively waives any right to additional compensation, costs, expenses, damages or extension of time associated with an extra, change, addition or deletion to the Work that is performed by Contractor without either (i) a written order signed by the Engineer designated or indicated to be a Change Order and any change, addition or deletion, or (ii) a written notice issued by Contractor in accordance with the provisions of this Article.

During the progress of the Work, it may be necessary for the Engineer to issue written field orders in the form of an Emergency Change Order. Upon receipt, The Contractor shall immediately proceed with the Engineer's written directive to the limits described in Authority of the Board, Engineer, and Inspector.

Except as provided in this Article, no other order, statement, or conduct of the Engineer or Inspector shall be treated as a change under this Article or shall entitle the Contractor to an adjustment in the Contract Price or Contract Completion Date.

Except for claims based on defective Specifications, no Claim for any change under this Article shall be allowed for any costs incurred more than twenty (20) calendar days before the Contractor gives written notice as required. Except as otherwise provided in the Contract Documents, in the case of defective specifications for which the Engineer is responsible, the adjustment shall include any increased cost the Contractor reasonably incurred in attempting to comply with those defective specifications.

If the Contractor intends to assert a Claim for an adjustment in the Contract Price under this Article, it must, within twenty (20) calendar days after receipt of a written Change Order or the furnishing of a written confirmation notice as hereinbefore specified, submit a written statement to the Engineer setting forth the general nature and monetary extent of such claim and all factual grounds therefor, including documented actual costs. The Contractor may include the statement of claim in the written notice as hereinbefore specified. Failure to comply with the twenty (20) calendar day notice requirement shall be deemed a waiver of Claims by the Contractor.

No adjustment shall be made under this Article for any suspension, delay, interruption, change or any other cause, to the extent that an adjustment is provided for or excluded under any other provision of the Contract.

Recovery of compensation, costs, expenses or damages resulting from delay, disruption, hindrance, or interference in the performance of the Work (including without limitation interruption of schedules, extended, excess or extraordinary field overhead and indirect overhead costs, loss of productivity and the impact, ripple or cumulative effect on other Work), shall not be permitted, and all rights thereto are conclusively waived by Contractor.

No Claim by the Contractor shall be allowed if the Claim is made after final payment under this Contract.

00501 DIFFERING SITE CONDITIONS (9/18/07)

Upon discovery and before further disturbance of any differing site conditions, the Contractor shall immediately notify the Inspector and the Engineer, followed by a written notice to the Engineer within twenty-four (24) hours of subsurface or latent physical conditions at the site differing materially from those indicated in the Contract Documents; or unknown physical conditions at the site, of an unusual nature, differing materially from those ordinarily encountered and generally recognized as inherent in the Work of the character provided for in this Contract; or materially differing from that represented in the Contract Documents which the Contractor believes may be hazardous waste (as defined in the California Health and Safety Code and is required to be removed to a Class I, Class II or Class III disposal site in accordance with provisions of existing law).

The Engineer will promptly investigate the conditions. If the Engineer finds that conditions materially differ and will cause an increase or decrease in the Contractor's cost or the time required to perform any part of the Work, the Engineer will adjust the Contract by Change Order.

If the Contractor disagrees with the Engineer's determination the Contractor may request an adjustment to the Contract Price or Contract Completion Date. Within twenty (20) calendar days after it first discovered, or should have discovered in the exercise of diligence and extreme care, the existence of such Differing Site Condition, submit a written statement setting forth a detailed cost breakdown described in "Change Orders" of the General Requirements. The statement must include the Contractor's basis and calculation of the costs saved or incurred, detailed information demonstrating the effect on the Contractor's schedule of performance (in the same manner as required by the Contract Documents for requesting an extension of time), identification of the Escrow Bid Documents that formed the basis of the Contractor's Bid to perform the Work affected by such conditions, and a complete and detailed explanation of the factual basis for the request.

Failure by the Contractor to strictly comply with the requirements of this Article concerning the timing and content of any notice of Differing Site Conditions or of any request for adjustment in Contract Price or Contract Completion Date based on Differing Site Conditions shall be deemed a waiver of any Claim by the Contractor for increase in the Contract Price or extension of the Contract Completion Date by reason of such conditions.

No Claim by the Contractor for an adjustment hereunder shall be allowed if asserted after final payment under this Contract.

00502 – 00599 NOT USED

00600 CLAIMS AND PROTESTS (9/18/07)

A Claim that involves an extra, change, addition or deletion to the Work as set forth in Changes and Extra Work shall arise upon issuance of a final decision of the Engineer denying, in whole or in part, a request for adjustment in the Contract Price or Contract Completion Date; provided however, that failure to comply with the requirements of the articles for Changes and Extra Work or Differing Site Conditions shall be conclusively deemed to constitute grounds to deny such Claim.

A Claim that does not involve an extra, change, addition or deletion to the Work may be asserted only if the Contractor shall immediately and prior to performing the Work affected thereby give written notice to the Engineer and the Inspector of such circumstances and of Contractor's intention to file a Claim based thereon. Unless otherwise directed by the Engineer, the Contractor shall proceed without delay to

perform the Work and to conform to any order, instruction, or decision of the Engineer with respect thereto.

The Contractor shall, within twenty (20) calendar days after it first knew, or in the exercise of diligence and extreme care should have known, of the circumstances giving rise to the Claim, file a written Claim with the Engineer, stating in detail all objections, grounds and reasons therefor. The Contractor shall, upon instruction by the Engineer or the Inspector, provide, within ten (10) days or such other time as agreed to between the Engineer, and the Contractor, any and all documents, records or other materials identified by the Engineer or the Inspector as necessary for the resolution of the Contractor's Claim.

Claims seeking time extensions shall be accompanied by such documentation as is required by "Contractor's Construction Schedule and Reports" of the General Requirements. Claims seeking recovery of compensation or adjustments to the Contract Price, whether or not based on extras, changes, additions or deletions to the Work, shall be in the form of Change Order Cost Quotations prepared in accordance with and subject to all of the requirements of "Change Orders" of the General Requirements, including without limitation the prohibition on use of "total cost" and "modified total cost" methodologies.

Contractor waives all rights to assert any claims or seek any relief in the form of extensions of time or recovery of additional compensation, costs, expenses, damages from the City that are not presented as a Claim in the manner specified and within the time stated herein. Contractor further hereby agrees that in the interest of avoiding the additional expense and potential inequity of piecemeal resolution of Claims, all decisions by Engineer shall be final and binding not only as to all matters asserted in the Claim, but also as to all matters (including without limitation all rights to extensions of time and recovery of extra compensation, costs, expenses and damages) not asserted in the Claim that were known to Contractor, or that could have been reasonably discovered by Contractor in the exercise of diligence and extreme care, at the time of submission of the Claim and that are in any way related to the subject matter of the Claim. All orders, instructions and decisions of the Engineer or the Inspector will be limited to matters properly falling within their respective authority as specified in Authority of the Board, Engineer and Inspector.

The Contractor will be informed of the Engineer's or the Inspector's decision within thirty (30) days after the Contractor last submits data pertinent to the Claim previously mentioned. In the case of a Claim that involves an extra, change, addition or deletion to the Work as set forth in Changes and Extra Work, if the Contractor accepts the decision of the Engineer or Inspector, then the Contractor and City shall enter into a Change Order adjusting the Contract Price and Contract Completion Date in accordance with such decision. In case a Claim does not involve an extra, change, addition or deletion to the Work as set forth in Changes and Extra Work and the Contractor accepts the decision of the Engineer or Inspector, then the Contractor and City shall enter into a Change Order setting forth the terms of the decision and, if appropriate, its effect on the Contract Price or Contract Completion Date. If the Contractor does not accept the decision of the Engineer or Inspector, it is recommended that further appeal of the Engineer's decision be conducted in accordance with the Issue Resolution Ladder, as defined in "Opportunity to Partner" of the General Requirements. If the dispute cannot be settled, the Contractor must elevate the appeal to the Dispute Review Board (if provided for under the terms of the General Requirements) or to the Board of Public Works (if the Contract Documents do not provide for a Dispute Resolution Board) in writing within twenty (20) calendar days after receipt of the Engineer's decision. The Board shall afford the Contractor an opportunity to be heard and to offer evidence in support of its appeal. All determinations of the Board with respect to Claims shall be final and binding.

In all matters concerning the validity, interpretation, performance, effect or otherwise of the Contract, the Federal regulations (if and to the extent expressly incorporated by reference in the Contract Documents), the laws of the State of California, and the Charter of the City of Los Angeles shall govern and be applicable. Pending final disposition of a Claim, the Contractor shall proceed diligently with the performance of the Contract and in accordance with the previously mentioned decision.

Any Claim, including without limitation any Claim filed on behalf of or having its source in a claim by Subcontractor, Sub-Subcontractor, or Supplier, at any tier, which the Contractor chooses to make to the City, shall be accompanied by the certification language set forth below signed by a responsible managing officer of the Contractor's organization, who has the authority to sign Subcontracts or Purchase Orders on behalf of the Contractor, and who has personally investigated and confirmed the truth and accuracy of the matters set forth in such certification. Submission of certification in accordance herewith is a condition precedent to the City's consideration of or decision on the Claim and to the filing and maintenance of any legal action or proceeding to enforce or recover monies under such Claim. Failure to submit such a certification along with the Claim shall result in the Claim being returned to the Contractor without any decision, and shall waive the Contractor's right to pursue the Claim either on its own behalf or on behalf of such Subcontractor or Supplier.

I hereby certify under penalty of perjury that I am a managing officer of _____(Contractor's name) and that I have reviewed the Claim presented herewith on Contractor's behalf and/or on behalf of (Subcontractor's/Supplier's name(s)) and that the following statements are true and correct:

1) The facts alleged in or that form the basis for the Claim are true and accurate; and,

2) Contractor does not know of any facts or circumstances, not alleged in the Claim, that by reason of their not being alleged render any fact or statement alleged in the Claim materially misleading; and,

3) Contractor has, with respect to any request for money or damages alleged in or that forms the basis for the Claim, reviewed the job cost records (including those maintained by Contractor and by any Subcontractor or Supplier, of any tier, that is asserting all or any portion of the Claim) and confirmed with mathematical certainty that the losses or damages suffered by Contractor and /or such Subcontractor or Supplier were in fact suffered in the amounts and for the reasons alleged in the Claim; and,

4) Contractor has, with respect to any request for extension of time or claim of delay, disruption, hindrance or interference alleged in or that forms the basis for the Claim, reviewed the job schedules (including those maintained by Contractor and by any Subcontractor or Supplier, of any tier, that is asserting all or any portion of the Claim) and confirmed on an event-by-event basis that the delays or disruption suffered by Contractor and /or such Subcontractor or Supplier were in fact experienced for the durations, in the manner, and with the consequent effects on the time and/or sequence of performance of the Work, as alleged in the Claim; and,

5) Contractor has not received payment from City for, nor has Contractor previously released City from, any portion of the Claim.

Signature: _____

Name: _____

Title: _____

Company: _____

Date: _____

No Claim by the Contractor shall be allowed if made after final payment under this Contract.

00601 COMMENCEMENT OF STATUTE OF LIMITATIONS (11/21/01)

Any applicable statute of limitations shall commence to run and any alleged cause of action by the Contractor against the City arising out of or related to the Project shall be deemed to have accrued in any and all events no later than 30 days after Contractor's submittal of its last application for progress payment of Contract or Change Order Work satisfactorily performed.

00602 GOVERNING LAW (11/21/01)

The terms and conditions of this Contract shall be construed and interpreted under, and all respective rights and duties shall be governed by, the laws of the State of California. Wherever applicable each provision of these Contract Documents shall be interpreted in such a manner as to be effective and valid under applicable law, but if any provision of these Contract Documents shall be prohibited by or invalid under applicable law, such provision shall be ineffective to the extent of such prohibition or invalidity, without invalidating the remainder of such provision or the remaining provisions of these Contract Documents.

Unless otherwise provided in this Contract, all claims, counterclaims, disputes and other matters in question between the City and the Contractor arising out of or relating to this Contract or the breach of it will be decided by a Court of competent jurisdiction. It is understood that this Contract is executed and to be performed within the City and County of Los Angeles.

00603 VENUE (2/09/95)

This Contract will be executed and performed within the City and County of Los Angeles, California.

00604 NO WAIVER OF RIGHTS (4/12/95)

Neither the inspection by the City, nor any order by the City for payment of money, nor any payment for or acceptance of the whole or any part of the Work by the City, nor any extension of time, nor any possession taken by the City, shall operate as a waiver of any provision of this Contract, or any power herein reserved to the City, or any right to damages herein provided, nor shall any waiver of any breach in this Contract be held to be a waiver of any other or subsequent breach.

00605 ACCEPTANCE OF FINAL PAYMENT CONSTITUTES RELEASE (4/12/95)

The acceptance by the Contractor of final payment shall release the City, the Engineer, the Inspector, their officers, agents, representatives, or employees, as representatives of the City, from all claims and all liability to the Contractor for all things done or furnished in connection with the Work and every act of the City relating to or arising out of the Work.

00606 PATENTS AND COPYRIGHTS (10/17/01)

The Contractor shall include in its Bid the patent fees or royalties on any patented article or process which may be furnished or used in the Work. The Contractor shall indemnify and hold the City harmless from any legal action that may be brought for infringement of patents. The Contractor's attention is directed to "Notice of Patents, Data, and Copyright Regulations" of the Federal Labor Standards.

The Contractor shall bear all costs arising from the use of patented goods and /or processes used on and/or incorporated into the Work. When use of these goods and/or processes is judged to be an infringement and their use is banned, the Contractor, at its own expense, shall, with concurrence of the Engineer, do one of the following:

1) Secure for the City the right to continue using goods and/or processes by suspension of the injunction or by procuring a license(s);

2) Replace said goods and/or processes with non-infringing goods and /or processes;

3) Modify said goods and/or processes so that they become non-infringing; or

4) Remove said goods and/or processes and refund the sum paid therefor without prejudice to any other rights of the City.

The preceding shall not apply to any goods manufactured to the detailed design of the City contained in the Contract Documents.

00607 PUBLIC RECORDS ACT (4/06/00)

All records, documents, Plans, specifications and all other information relating to the conduct of the City's business, including information submitted by the Contractor, shall become the exclusive property of the City and except as provided by law shall be deemed public records. Said information shall be subject to the provisions of the California Public Records Act (Government Code Sections 6250 et seq.).

Under no circumstances will the City be responsible or liable to the Contractor, submitter or any other party for the disclosure of any records or information submitted to the City, regardless of whether such records or information are labeled "Trade Secret", "Confidential", or "Proprietary" (or words to similar effect) and regardless of whether the disclosure is required by law or a court order or occurs through inadvertence, mistake, or negligence on the part of the City or its officers, employees, and/or contractors.

The City will not advise as to the nature or content of documents entitled to protection from disclosure under the California Public Records Act", including interpretations of the Act or the definition of "Trade Secret". The submitting party shall be solely responsible for all determinations made under the Act, and where appropriate for clearly and prominently marking each and every page or sheet of information with "Trade Secret", "Confidential", or "Proprietary". Each submitting party is advised to contact its own legal counsel concerning the California Public Records Act and its applicability to the submitting party's own circumstances.

In the event of litigation concerning the disclosure of any information submitted by the submitting party, the City's sole involvement will be as a stakeholder, retaining the information until otherwise ordered by a court. The submitting party, at its sole expense and risk, shall be responsible for any and all fees and costs for prosecuting or defending any action concerning the information, and shall indemnify and hold the City harmless from all costs and expenses including attorneys' fees, in connection with such action.

ABBREVIATIONS AND REFERENCE STANDARDS

1.1 ABBREVIATIONS

A. The abbreviations herein, together with others in general use, are applicable to this Project Manual, Contract Drawings, and other Contract Documents.

All abbreviations and symbols used on Contract Drawings for structural steel construction shall conform to those given by the "Manual of Steel Construction" published by the American Institute of Steel Construction, Inc.

B. Common Usage: Whenever the following abbreviations are used, they shall have the meanings indicated:

ABAN	Abandon
ABAND	Abandoned
ABUT	Abutment
ABS	Acrylonitrile – butadiene – styrene
AC	Asphalt concrete
ACP	Asbestos cement pipe
ACWS	Asphalt concrete wearing surface
ADA	Americans with Disabilities Act
AGB	Alley grating basin
AL	Allowance
ALT	Alternate
AMER STD	American Standard
AQMD	Air Quality Management District
ARHM	Asphalt-rubber hot-mix
ATSAC	Automated Traffic Surveillance and Control System
AT&T	Local and long distance telephone company (formerly SBC and Pacific Bell)
AWG	American Wire Gage (nonferrous wire)
BAGR	Bridge approach guard railing
BB	Beginning of Bridge
BC	Beginning of curve
BCR	Beginning of curb return
BDRY	Boundary
BF	Bottom of footing
BM	Bench mark
BMP	Best Management Practice
BPW	Board of Public Works
BSJ	Bell and spigot joint
BSL	Bureau of Street Lighting
BVC	Beginning of vertical curve
B/W	Back of wall
C/C	Center to center
CAB	Crushed aggregate base
CAC	California Administrative Code
CAP	Corrugated aluminum pipe
CASQA	California Storm Water Quality Association
CB	Catch Basin
Cb	Curb
CBP	Catch Basin Connection Pipe

CBR	California Bearing Ratio
CCR	California Code of Regulations
CCTV	Closed Circuit TV
CF	Curb face or Cubic foot
C&G	Curb and gutter
CGB	Curbside grating basin
CFR	Code of Federal Regulations
CIDH	Cast-in-drilled-hole
CIP	Cast iron pipe or Cast-in-place
CIPP	Cast-in place pipe
CL	Clearance, center line
CLF	Chain link fence
CLSM	Controlled Low Strength Material
CMB	Crushed miscellaneous base
CMC	Cement mortar-coated
CML	Cement mortar-lined
CMP	Corrugated Metal Pipe
CO	Cleanout (sewer)
COL	Column
CONC	Concrete
CONN	Connection
CONST	Construct, Construction
COORD	Coordinate
CQC	Contractor Quality Control
CSP	Corrugated steel pipe
CTB	Cement treated base
CV	Check valve
CY	Cubic yard
D	Load of pipe
dB	Decibels
DBE	Disadvantaged Business Enterprise
DBL	Double
DF	Douglas fir
DFT	Dry Film Thickness
DIA	Diameter
DIP	Ductile iron pipe
DL	Dead load
DMBB	Double metal beam barrier
DT	Drain Tile
DWG	Drawing
DWPPS	Los Angeles Department of Water & Power, Power System
DWPWS	Los Angeles Department of Water & Power, Water System
DWY	Driveway
DWY APR	Driveway approach
EA	Each
EB	End of bridge
EC	End of curve
ECR	End of curb return
EF	Each face
EG	Edge of gutter
EGL	Energy grade line
El	Elevation
ELC	Electrolier lighting conduit
ELT	Extra long ton
ENGR	Engineer, Engineering

EP	Edge of pavement
EPA	Environmental Protection Agency
ESA	Environmentally Sensitive Area
ESAL	Equivalent Single Axle Load
ESRP	Emergency Spill Response Plan
ESMT	Easement
ETB	Emulsion-treated base
EVC	End of vertical curb
EXC	Excavation
EXP JT	Expansion joint
EXST	Existing
F	Fahrenheit
F&C	Frame and cover
F&I	Furnish and install
FAB	Fabricate
FAS	Flashing arrow sign
FD	Floor drain
FDN	Foundation
FED SPEC	Federal Specification
FG	Finished grade
FH	Fire hydrant
FL	Flow line
FRP	Fiberglass reinforced plastic
FRPM	Fiberglass reinforced plastic mortar
FS	Finished surface
FTA	Fully traffic actuated
FT-LB	Foot-pound
FTG	Footing
FW	Face of wall
GA	Gauge
GALV	Galvanized
GC	Grade change
GCASP	State General Construction Activity Stormwater Permit
GIP	Galvanized iron pipe
GL	Ground line or grade line
GM	Gas meter
GP	Guy pole
GR	Grade
GRTG	Grating
GSP	Galvanized steel pipe
GTE	General Telephone Company
H	High or height
HB	Hose bib
HC	House connection
HDPE	High density polyethylene
HDWL	Headwall
HGL	Hydraulic grade line
HORIZ	Horizontal
HP	Horsepower
HPG	High pressure gas
HPS	High pressure sodium (Light)
HS	High strength
HYDR	Hydraulic
ID	Inside diameter
INCL	Including

INSP	Inspection
INV	Invert
IP	Iron pipe
IPW	Inspector of Public Works
JC	Junction chamber
JCT	Junction
JS	Junction structure
JT	Joint
L	Length
LAAC	Los Angeles Administrative Code
LAB	Laboratory
LADBS	Los Angeles Department of Building and Safety
LADGS	Los Angeles Department of General Services
LADOT	Los Angeles Department of Transportation
LACDPW	Los Angeles County Department of Public Works
LAMC	Los Angeles Municipal Code
LARWQCB	Los Angeles Regional Water Quality Control Board
LAT	Lateral
LB	Pound
LD	Local depression
LF	Linear foot
LH	Lamp hole
LL	Live load
LOL	Layout line
LONG	Longitudinal
LP	Lamp post
LPS	Low pressure sodium (Light)
LS	Lump sum
LTS	Lime treated soil
MA	Mast Arm
MAINT	Maintenance
MAX	Maximum
MB	Metal beam
MBB	Metal beam barrier
MBGR	Metal beam guard railing
MBE	Minority Business Enterprise
MCR	Middle of curb return
MEAS	Measure
MED	Median
MH	Manhole, maintenance hole
MIL SPEC	Military Specification
MISC	Miscellaneous
MOD	Modified, modify
MON	Monument
MSM	Mandatory subcontracting minimum
MTA	Metropolitan Transportation Authority (of LA County)
MTH	Month
MTL	Material
MULT	Multiple
MUTCD	Manual on Uniform Traffic Control Devices
MVL	Mercury vapor light
MWD	Metropolitan Water district
NOI	Notice of Intent
NPDES	National Pollutant Discharge Elimination System
NRCP	Nonreinforced concrete pipe

OBE	Other Business Enterprise
OBS	Obsolete
OC	On center
OD	Outside diameter
OE	Outer edge
OH	Overhead
OPP	Opposite
ORIG	Original
OSA	Office of the State Architect
OSHA	Occupational Safety and Health Administration (Dept. Of Labor)
PACBELL	Pacific Bell (Pacific Telesis Group)
PAV	Pressure Aging Vessel
PB	Pull box
PC	Point of curvature
PCC	Portland cement concrete or Point of compound curvature
PCVC	Point of compound vertical curve
PE	Polyethylene
PG	Performance Graded
PI	Point of intersection
PL	Property line
PMB	Processed miscellaneous base
POC	Point on curve
POT	Point on tangent
PP	Power pole
PRC	Point of revere curve
PRVC	Point of reverse vertical curve
PSI	Pounds per square inch
PT	Point of tangency
PVC	Polyvinyl chloride
PVMT	Pavement
PVT R/W	Private right-of-way
Q	Rate of flow in cubic feet per second
QA	Quality Assurance
QC	Quality Control
QUAD	Quadrangle, Quadrant
R	Radius
R&O	Rock and oil
R/W	Right-of-way
RA	Recycling agent
RAC	Recycled asphalt concrete
RAP	Reclaimed asphalt pavement
RBAC	Rubberized asphalt concrete
RC	Reinforced concrete
RCB	Reinforced concrete box
RCC	Rail Construction Corporation
RCE	Registered civil engineer
RCP	Reinforced concrete pipe
RCV	Remote control valve
REAS	Rubberized Emulsion-Aggregate Slurry
REF	Reference
REINF	Reinforced or reinforcement
RES	Reservoir
RGE	Registered geotechnical engineer
RR	Railroad
RSE	Registered structural engineer

RTE	Registered traffic engineer
RTFO	Rolling Thin Film Oven
S	Slope
SCAQMD	South Coast Air Quality Management District
SCCP	Steel cylinder concrete pipe
SCG	Southern California Gas Company
SCHED	Schedule
SCRRA	Southern California Regional Rail Authority
SD	Storm drain
SDR	Standard thermoplastic pipe dimension ratio (ratio of pipe O.D. to minimum wall thickness)
SE	Sand Equivalent
SEC	Section
SF	Square foot
SI	International System of Units (Metric)
SOCB	Side opening catch basin
SPEC	Specifications
SPPWC	Standard Plans for Public Works Construction
SR	Standard ratio
SRJ	Steel ring joint (for RCP)
SS	Sanitary sewer
SSB	Select sub-base
SSPWC	Standard Specifications for Public Works Construction
ST HWY	State highway
STA	Station
STD	Standard
STR	Straight
STR GR	Straight grade
STRUC	Structural/Structure
SW	Sidewalk
SWD	Sidewalk drain
SWMP	Storm Water Management Plan
SWPPP	Storm Water Pollution Prevention Plan
SWRCB	State (of California) Water Resources Control Board
SY	Square yard
TAN	Tangent
TC	Top of curb
TCP	Traffic control plan
TEL	Telephone
TF or T/F	Top of footing
TH	Test hole
TOPO	Topography
TR	Tract
TRANS	Transition
TS	Traffic signal or transition structure
TSC	Traffic signal conduit
TSS	Traffic signal standard
TW	Top of wall
TYP	Typical
USA	Underground Service Alert
V	Volt
VAR	Varies, Variable
VB	Valve box
VC	vertical curve
VCP	Vitrified clay pipe

VECP	Value Engineering Change Proposal
VERT	Vertical
VOL	Volume
VT	Variable thickness
W	Wider or width
WATCH	Work Area Traffic Control Handbook
WBE	Women Business Enterprise
WDID	Waste Discharge Identification Number
WI	Wrought iron
WM	Water meter
WPCP	Water Pollution Control Plan
WPJ	Weakened plane joint
WUT	Western Union Telegraph
WWECP	Wet Weather Erosion Control Plan
XCONN	Cross connection
XSEC	Cross section

C. Institutions: Wherever the following abbreviations are used they shall have the meanings indicated:

AASHTO	American Association of State Highway and Transportation Officials
ACI	American Concrete Institute
ACRI	Air Conditioning and Refrigeration Institute
ADA	Americans with Disabilities Act
AGA	American Gas Association
AGMA	American Gear Manufacturers' Association
AI	Asphalt Institute
AISC	American Institute of Steel Construction
AISI	American Iron & Steel Institute
AITC	American Institute of Timber Construction
AAMA	American Architectural Manufacturer’s Association
AMCA	Air Movement and Control Association
ANSI	American National Standards Institute
APA	American Plywood Association
API	American Petroleum Institute
APWA	American Public Works Association
AQMD	Air Quality Management District
AREA	American Railway Engineering Association
ASCE	American Society of Civil Engineers
ASHRAE	American Society of Heating, Refrigerating, and Air Conditioning Engineers
ASME	American Society of Mechanical Engineers
ASQC	American Society for Quality Control
ASTM	American Society for Testing and Materials
AWPA	American Wood Preservers Association
AWPI	American Wood Preservers Institute
AWS	American Welding Society
AWWA	American Water Works Association
BHMA	Building Hardware Manufacturer’s Association
CAC	California Administrative Code
CAL/ABL	State of California/Architectural Barriers Laws
CAL/OSHA	State of California/Occupational Safety and Health Administration
CALTRANS	California Department of Transportation

CASQA	California Stormwater Quality Association
CBM	Certified Ballast Manufacturers
CITY	City of Los Angeles
CRSI	Concrete Reinforcing Steel Institute
CSI	Construction Specifications Institute
EIA/TIA	Electronic Industries Association
EPA	Environmental Protection Agency
ETL	Department of Building & Safety Electrical Test Laboratory
FCI	Fluid Control Institute, Inc.
FIA	Factory Insurance Association
FM	Factory Mutual Association
FS	Federal Specifications
GA	Gypsum Association
GRI	Geosynthetic Research Institute
ICBO	International Conference of Building Officials
ICEA	Insulated Cable Engineers Association
IEEE	Institute of Electrical and Electronics Engineers
ISA	Instrument Society of America
LA	City of Los Angeles
LABC	City of Los Angeles Building Code
LAMC	City of Los Angeles Municipal Code
NAAMM	National Architectural Association of Metal Manufacturers
NEC	National Electrical Code
NECA	National Electrical Contractors Association
NEMA	National Electrical Manufacturers Association
NFC	National Fire Code

1.2 REFERENCE STANDARDS

A. Applicable Publications: Whenever in these Specifications / Project Manual references are made to published specifications, codes, standards, or other requirements, it shall be understood that wherever no date is specified, only the latest specifications, standards, or requirements of the respective issuing agencies which have been published as of the date that the Work is advertised for bids shall apply; except to the extent that said standards or requirements may be in conflict with applicable laws, ordinances or governing codes. No requirements set forth herein or shown on the Drawings shall be waived because of any provision of, or omission from, said standards or requirements.

B. Specialists' Assignments: In certain instances, specification text requires (or implies) that specific work is to be assigned to specialists or expert entities, who must be engaged for the performance of that work. Such assignments shall be recognized as special requirements over which the CONTRACTOR has no choice or option. These requirements shall not be interpreted so as to conflict with the enforcement of building codes and similar regulations governing the Work; also they are not intended to interfere with local union jurisdiction settlements and similar conventions. Such assignments are intended to establish which party or entity involved in a specific unit of work is recognized as "expert" for the indicated construction processes or operations. Nevertheless, the final responsibility for fulfillment of the entire set of contract requirements remains with the CONTRACTOR.

C. Codes and Safety Standards: Without limiting the generality of other requirements of the Specifications, all work specified herein shall conform to or exceed the applicable requirements of the following Codes and Safety Standards.

1. Applicable Codes:

- City of Los Angeles Building Code
- City of Los Angeles Mechanical Code
- City of Los Angeles Plumbing Code
- City of Los Angeles Fire Code
- City of Los Angeles Electrical Code

References herein to "Building Code" shall mean City of Los Angeles Building Code. Similarly references to "Mechanical Code," "Plumbing Code," "Fire Code," and "Electric Code" shall mean City of Los Angeles Mechanical Code, City of Los Angeles Plumbing Code, City of Los Angeles Fire Code, and City of Los Angeles Electric Code respectively.

2. Applicable Safety Standards:

- OSHA Regulations for Construction
- OSHA Standard

- Cal-OSHA

References herein to "OSHA Regulations for Construction" shall mean Title 29, Part 1926, Construction Safety and Health Regulations, Code of Federal Regulations (OSHA), including all changes and amendments thereto.

References herein to "OSHA Standards" shall mean Title 29, Part 1910, Occupational Safety and Health Standards, Code of Federal Regulations (OSHA), including all changes and amendments thereto.

References herein to "Cal-OSHA" shall mean State of California, Department of Industrial Relations, as amended to date, and all changes and amendments there to which are effective as of the date of construction.

The latest edition of the codes as approved and adopted for use by the CITY as of the date of award shall apply to the Work herein, including all addenda, modifications, amendments, or other lawful changes thereto.

D. Standard Specifications: References in the Contract Documents to "Standard Specifications" shall mean the Standard Specifications for Public Works Construction, including all current supplements, addenda, and revisions thereof.

E. Standard Plans: References herein to "Standard Plans" shall mean the Standard Plans issued by the City of Los Angeles which drawings are hereby incorporated in and made a part of these Contract Documents, and copies of which are available for a fee.

F. Conflict between Codes, Safety Standards, Reference Standards, Drawings and other Contract Documents: In case of conflict between codes, reference standards, drawings and other Contract Documents, the most stringent requirements shall govern. All conflicts shall be brought to the attention of the ENGINEER for clarification and directions prior to ordering or providing any materials or labor. The CONTRACTOR shall bid for the most stringent requirements.

END OF SECTION

SECTION 01112
DESCRIPTION OF WORK

PART ONE -- GENERAL

1.1 SUMMARY

A. The work to be done under this Contract includes the furnishing of project management, labor, materials, tools and equipment for the construction of the David M. Gonzales Recreation Center Stormwater Capture Project for the City of Los Angeles, all in accordance with the Contract Documents, including the GENERAL CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS and other Sections of the Project Manual.

1.2 GENERAL SCOPE OF WORK

A. Work In This Contract: Work in this Contract includes all labor, materials and equipment necessary for construction of the David M. Gonzales Recreation Center Stormwater Capture Project as noted on the Contract Drawings and in the Project Manual and all other Contract Documents including the GENERAL CONDITIONS and GENERAL REQUIREMENTS.

B. Work Not In This Contract: “Work not in this Contract,” “Work by others” and “Work by others but arranged and paid for by CONTRACTOR” are listed as follows:

1. Department of Water and Power shall furnish and install electric service conductors from street utility line to new transformers or switchboards, and electric meters; furnish and install current transformers for switchboards (to be installed by CONTRACTOR) and service connections to current transformers and meters in accordance with Division 16. CONTRACTOR shall make all necessary arrangement and pay for all fees and charges.

C. Related Work:

1. Documents affecting work of this Contract include, but are not limited to, the GENERAL CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS, and other Sections of the Project Manual

1.3 PROJECT IDENTIFICATION

A. General:

1. The Project Name is David M. Gonzales Park Stormwater Capture Project, 10943 Herrick Ave., Pacoima, CA 91331.

2. The following project names used in the Specifications and Drawings all refer to this same Project:
David M. Gonzales Park Stormwater Capture Project
David M. Gonzales Recreation Center Stormwater Capture Project

3. Contract Documents have been prepared by CDM Smith Inc., 600 Wilshire Blvd Suite 750, Los Angeles, CA 90017.

4. Project Manual and Contract Drawings are dated October 17, 2022.

B. The extent of Contracted Work is indicated on the Contract Drawings and in the following Sections of the Project Manual.

1. Division 1 – General Requirements
2. Division 2 - Sitework
3. Division 3 – Concrete
4. Division 5 – Metals
5. Division 6 – Wood and Plastics
6. Division 7 – Thermal and Moisture Protection
7. Division 9 – Finishes
8. Division 10 – Specialties
9. Division 11 – Equipment
10. Division 13 – Special Construction
11. Division 15 – Mechanical
12. Division 16 – Electrical
13. Division 17 – Instrumentation and Control

C. In addition to provisions noted in Section 01112 – DESCRIPTION OF WORK in Division 1 GENERAL REQUIREMENTS, the following listed drawings of Plan No. G102 DRAWING INDEX are, but not limited to, a part of the Contract Documents:

1.4 SUMMARY OF REFERENCES

A. Contracted Work can be summarized by references to the Contract General Conditions, Sections in the Project Manual, Contract Drawings, Addenda, Notice to Bidders and Modifications to the Contract Documents.

B. It is recognized that the Contracted Work may also be unavoidably affected or influenced by other governing codes and Regulations, natural phenomenon, including weather conditions and other forces outside the Contract Documents.

1.5 SUPPLEMENTAL INFORMATION

The following supplemental information is provided for use by the CONTRACTOR:

A. Soil Investigation:
   1. Geotechnical Evaluation Report (Appendix).
   2. Methane Gas Survey (Appendix).

B. Draft Stormwater Pollution Prevention Plan (Appendix)

C. Grading Permit Plan Check correction from Department of Building and Safety, (to be added later)

D. First Notice Replies (Appendix) 1) SoCal Gas plans; 2) LADOT, 3) City of Los Angeles Bureau of Street Lighting, 4) LADWP Power, and 5) LADWP watermain relocation estimate.

1.6 GROUND BREAKING CEREMONY

The Ground Breaking Ceremony for this project may be requested and may occur before the Notice-to-Proceed is issued. The CONTRACTOR shall include in the contract cost and verify with the ENGINEER the ceremony schedule after the award of the contract. The CONTRACTOR shall prepare, after the award of the contract, all submittals for the construction sign and secure all necessary approvals. The CONTRACTOR shall provide necessary coordination for the Ground Breaking Ceremony, occurring before or during the construction at no additional cost to the CITY.

1.7 CONSTRUCTION COMPLETION

A. Construction shall be completed in 730 calendar days starting once the Notice to Proceed is received from the City. If construction exceeds calendar days, liquidated damages will be assessed.

B. Liquidated damages will be $4,000 per day.

PART TWO – PRODUCTS (NOT APPLICABLE)

PART THREE - EXECUTION

3.1 ADMINISTRATION OF CONSTRUCTION

All work of this Contract will be administered by the Consulting Engineer or Architect. References to “ENGINEER” or to "City Engineer" shall be considered as meaning "Consulting Engineer or Architect" where those references concern any phase of Construction Administration. Other references to "ENGINEER" which concern the legal and financial aspects of the Contract including provisions for time for commencing and

completing Contracted Work, suspensions of Contract, payments, etc. shall be understood as meaning the “City Engineer.”

END OF SECTION

SECTION 01113
DIVISIONS OF TECHNICAL SECTIONS OF PROJECT MANUAL

1.1 THE REQUIREMENT

A. The Technical Section of the Project Manual, including the General Conditions and General Requirements, are arranged into the Construction Specifications Institute (C.S.I.) sixteen (16) Divisions - Section format with an additional Division 17 for Instrumentation and Controls. Each "Section" constitutes a unit of work and related "Sections" are grouped under broad generic headings called Divisions.

B. The organization of the Technical Sections of the Project Manual into Division, Sections, and articles shall not control or limit the CONTRACTOR in dividing the work among Subcontractors, a Sub-subcontractor, or to establish the extent of work to be performed by any trade. The CONTRACTOR shall be solely responsible for all subcontract arrangements of work regardless of the Project Manual organization.

END OF SECTION

This page intentionally left blank

SECTION 01114
ISSUANCE OF DRAWINGS AND THE PROJECT MANUAL

1.1 THE REQUIREMENT

A. Unless otherwise provided in the Contract Documents, the ENGINEER will furnish to the CONTRACTOR one (1) set and one (1) CD containing each of the Drawings, Project Manual and, where applicable, Geotechnical Data Report (GDR) without charge. Additional sets desired by the CONTRACTOR or Subcontractors will be furnished upon request, but at the CONTRACTOR'S expense.

B. All Drawings, Specifications, Special Provisions, and copies thereof are the property of the CITY. They are not to be used on other work. All necessary bid documents will be available to prospective bidders via the City of Los Angeles Regional Alliance Marketplace for Procurement (www.rampla.org).

END OF SECTION

This page intentionally left blank

SECTION 01115
MANDATORY PROVISIONS

1.1 THE REQUIREMENT

A. Any mention in the Divisions of this Project Manual which follow the General Requirements or indication on drawings of articles, materials, operations, or methods requires that the CONTRACTOR provide each item mentioned or indicated, of quality or subject to qualifications noted; perform according to conditions stated, each operation the same prescribed; and provide therefore all necessary labor, equipment, and incidentals, even though such mention of articles, materials, operations, methods, quality, qualifications, or conditions is not expressed in complete sentences.

END OF SECTION

This page intentionally left blank

SECTION 01116
ELECTRONIC DOCUMENT CONTROL

1.1 USE OF ELECTRONIC DOCUMENT CONTROL SYSTEM

A. The CONTRACTOR shall use a web based document control system to submit and receive all construction related documentation on this project. The system used is “e2020” and costs associated for the use of the software have been paid for by the City. The website address to be used will be provided by the ENGINEER after award of the contract. The CITY will provide training to the CONTRACTOR on the use of the system. As coordinated with other sections of these project specifications, the information to be generated, transmitted and tracked by the e2020 document control system shall include, but not be limited to the following:

1. Correspondence (including Engineer’s Communication).

2. Plan Clarifications.

3. Request for Information (RFI’s).

4. Submittal and Shop Drawings.

5. Change Orders.

6. Allowance Orders.

7. Progress Photos.

8. Project Schedules.

9. Meeting Minutes.

10. Permits.

11. Partnering (Issue Resolution Ladder, Charter).

12. Claims Resolution.

13. Building Information Modeling Coordination.

B. When hard copies of drawings or product samples are required to be submitted that cannot be submitted through e2020, the CONTRACTOR shall:

1. Upload a transmittal sheet for the submittal in e2020,

2. Submit six (6) full-size hard copies,

3. Submit one half-sized hard copy (not exceeding 11x17 inches),

4. Transmit electronic files to the ENGINEER in Adobe Acrobat (.PDF) format.

C. The CONTRACTOR shall be responsible for the installation of its own computer system and scanner. In addition, the CONTRACTOR shall be responsible for the procurement of an Internet Service Provider (ISP) with a high-speed broadband internet connection for its own use, as well as the ENGINEER's/INSPECTOR's use at the site offices to access the document control system.

D. At the request of the ENGINEER, the CONTRACTOR must provide a hard copy of approved submittals to the INSPECTOR, at no additional cost to the CITY.

END OF SECTION

SECTION 01120
INTERFACE / COORDINATION REQUIREMENTS

1.1 THE REQUIREMENT

A. Traffic and Access

1. The CONTRACTOR'S operations shall cause no unnecessary inconvenience. The access rights of the public shall be considered at all times. Unless otherwise authorized, traffic shall be permitted to pass through the Work, or an approved detour shall be provided.

2. Safe and adequate pedestrian and vehicular access shall be provided and maintained to: residences; fire hydrants; commercial and industrial establishments; churches, schools and parking lots; service stations and motels; hospitals; police and fire stations; and establishments of similar nature. Access to these facilities shall be continuous and unobstructed unless otherwise approved by the ENGINEER.

3. The CONTRACTOR shall provide and install steel plates to bridge any excavation in the public right-of-way. Such bridging shall be in accordance with the provisions of the latest edition of the Work Area Traffic Control Handbook (WATCH), and in addition, shall have a nonskid surface with coefficient of friction of 0.35 per California Test 342 for all steel plates within the traveled roadway of streets and alleys. When required by the INSPECTOR, the CONTRACTOR shall certify in writing to the INSPECTOR that steel plates to be used in the Work meet the required static coefficient of friction. Also, when required by the INSPECTOR, the CONTRACTOR shall have steel plates to be used in the Work tested in accordance with the above standards for the verification of required static coefficients of friction. Testing shall be done by an independent laboratory approved by the INSPECTOR. The CONTRACTOR shall pay for any costs associated with the testing of steel plates.

4. At least ten (10) days before the start of construction, the CONTRACTOR is required to notify, in writing, abutting property occupants of the proposed construction start date. A copy of said written notification shall be provided to the INSPECTOR.

5. The CONTRACTOR shall notify the MTA Special Events Desk at (213) 922-4632, (213) 922-4692(Fax) at least forty-eight (48) hours before any work that will affect normal bus operations. If no answer, call MTA Dispatch at any time, (213)-922-4634.

6. Safe and adequate pedestrian zones and public transportation stops, as well as pedestrian crossings of the Work at intervals not exceeding 90m (300 feet), shall be maintained unless otherwise approved by the ENGINEER. If required by the construction, the CONTRACTOR may close only one crosswalk at a time at intersections having four crosswalks. If construction requires closure of two or more crosswalks at an intersection, the CONTRACTOR shall obtain LADOT approval before implementation of the closure. LADOT approval is required prior to

closing of any crosswalk at intersections having fewer than four crosswalks.

7. Vehicular access to residential driveways shall be maintained to the property line except when necessary construction precludes such access for reasonable periods of time. If backfill has been completed to the extent that safe access may be provided, and the street is opened to local traffic, the CONTRACTOR shall immediately clear the street and driveways and provide the maintained access.

8. The CONTRACTOR shall cooperate with the various parties involved in the delivery of mail and the collection and removal of trash and garbage to maintain existing schedules for these services.

9. Grading operations, roadway excavation and fill construction shall be conducted by the CONTRACTOR in a manner to provide a reasonably satisfactory surface for traffic. When rough grading is completed, the roadbed surface shall be brought to a smooth, even condition satisfactory for traffic.

10. Work shall be performed in only one-half of the roadway at one time. One-half of the roadway shall be kept open and unobstructed until the opposite side is ready for use by traffic. The CONTRACTOR shall phase the removal operations so as to maintain the specified traffic lanes on the existing pavement until sufficient new pavement is constructed to accommodate the traffic requirements. If one-half of a street is only being improved, a smooth, even surface and a condition satisfactory for traffic shall be maintained on the other one-half.

11. Where no pavement exists in a roadway, and traffic is to be maintained through the Worksite, the CONTRACTOR shall conduct its operations in a manner to provide a smooth, even surface satisfactory for traffic, reasonably free of mud and dirt.

12. The CONTRACTOR shall include in its Bid all costs for the above requirements.

B. Street Closures, Detours, Barricades

1. The CONTRACTOR shall comply with all applicable State, County and CITY requirements for closure of streets. The CONTRACTOR shall provide barriers, guards, lights, signs, temporary bridges, flagpersons, and watchpersons. The CONTRACTOR shall be responsible for compliance with additional public safety requirements that may arise. The CONTRACTOR shall furnish and install signs and warning devices and promptly remove them upon completion of the Work.

2. The CONTRACTOR shall obtain and pay for all permits for closure of streets, alleys or sidewalks, as required by the Bureau of Street Services (800) 996-2489 and LADOT (213) 972-4990.

3. At least forty-eight (48) hours in advance of closing, partially closing, or reopening any street, alley, or other public thoroughfare, the CONTRACTOR shall notify the Police, Fire, Traffic, and Engineering

Departments, and comply with their requirements. Deviations must first be approved in writing by the ENGINEER.

2. When specified on the Plans or permit, the CONTRACTOR shall install advance construction notice signs per Standard Plan S-791, not less than seven (7) days before the start of construction. The CONTRACTOR shall maintain the signs for the duration of construction, removing them only after completion of the work. All costs incurred in furnishing, installing, maintaining and removing the signs shall be included in the CONTRACTOR'S Bid.

3. The CONTRACTOR shall secure approval, in advance, from authorities concerned with the use of temporary bridges proposed by the CONTRACTOR for public use. Temporary bridges shall be clearly posted as to load limit, with signs and posting conforming to current requirements covering "signs" as set forth in the California Manual of Uniform Traffic Control Devices (MUTCD). (The California MUTCD is available on the internet a https://dot.ca.gov/programs/traffic-operations/camutcd/camutcd-rev4 . This manual shall also apply to street closures, barricades, detours, lights, and other safety devices that may be required.

4. The CONTRACTOR shall comply with the requirements of the latest adopted edition of the "Work Area Traffic Control Handbook", obtainable from Building News, Inc., 10801 National Blvd., Los Angeles, CA 90064, (800) 873-6397 or the LADOT Worksite Traffic Control Plan (S-488.0) available from LADOT, 100 S. Main Street, 9th Floor, Los Angeles, CA 90012.

5. A street with local traffic crossing a street in which Work is being performed may be closed to traffic, providing the adjacent cross streets are kept open. The CONTRACTOR shall notify the Police and Fire Departments whenever such a street is to be closed to traffic. A similar notification shall then be made at the time the street is again opened to traffic. If the closing is to be of short duration or different sections of the street are to be closed at different times, the notification to the Police and Fire Departments shall be on a day-by-day basis, giving information regarding the conditions expected to prevail on the next working day. The CONTRACTOR shall notify the INSPECTOR which streets are to be closed, duration of closures, and person(s) and telephone numbers contacted in the Fire and Police Department.

6. All signs, including offsite detour signs, lights, or devices installed by the CONTRACTOR shall conform to the California Manual of Uniform Traffic Control Devices (MUTCD), and be approved by LADOT before use. Offsite detour signs shall be installed, maintained, and removed by the CONTRACTOR. "No Parking" signs shall be posted and removed only by LADOT upon request from the CONTRACTOR. LADOT will charge and collect its actual cost for each temporary sign installed and for each sign replaced during the authorized period. To be enforceable, temporary "No Parking" signs shall be installed by LADOT twenty-four (24) hours before the time when needed. Their removal by LADOT shall take place as the Work progresses to restore parking spaces. See Section 01313 – WORK BY CITY OR OTHERS of the GENERAL REQUIREMENTS.

7. The CONTRACTOR shall include in its Bid all costs for the above requirements.

C. Work Performed Within an Operating Facility

1. As approved by the ENGINEER, all or portions of the existing facility may be taken out of service for short periods of time corresponding with expected instances of minimum impact. The CONTRACTOR shall notify the ENGINEER on forms [(see Attachment [01120-A1 through 01120-A2)] provided by the ENGINEER not less than thirty calendar (30) days in advance to determine the feasibility of taking a utility/operation including storm drain out of service. If the ENGINEER determines that the utility/operation or storm drain can be taken out of service, the CONTRACTOR shall then request the shutdown on standard forms provided by the ENGINEER. Such requests shall be submitted to the ENGINEER not less than fifteen (15) calendar days before the requested date of the shutdown and shall include: dates, times, locations, procedures, and drawings showing materials proposed to be used and work to be performed. If any of the information changes, an additional fifteen (15) calendar days may be required after such changes are reported to the ENGINEER. Approval when granted will always be conditional. If granted, approval of the request, including date and time, will be given three (3) calendar days before the proposed shutdown. Additionally, all preparations outlined in the submitted procedures shall be demonstrated to the ENGINEER and shall be completed twenty-four (24) hours before the shutdown. This shall include, but not be limited to, all tools, equipment, materials, excavations, operation of fans, pumps, etc. Should the CONTRACTOR fail to meet this requirement, the ENGINEER shall reserve the right to cancel such scheduled shutdown at no cost to the CITY and, furthermore, the CONTRACTOR shall reimburse the CITY for preparation costs incurred.

2. Vehicular and pedestrian traffic adjacent to the laydown area and/or within the jobsite must be maintained. If an existing street in the CONTRACTOR'S Work area is to be demolished or obstructed, the CONTRACTOR shall be responsible for providing access through or around the effected area, including signs, barricades, and lights, as approved by the ENGINEER and any local agencies having jurisdiction over any public access areas. The CONTRACTOR shall follow WATCH standards and the California Manual of Uniform Traffic Control Devices (MUTCD), for all traffic, including a minimum traffic lane of ten (10) feet for vehicles and four (4) feet for pedestrians. (The California MUTCD is available on the internet at http://www.dot.ca.gov/hq/traffops/signtech/mutcdsupp/ ca_mutcd.htm).

3. The CONTRACTOR shall not park any vehicles (including concrete, hauling and delivery trucks) in any facility street at any time unless approved by the ENGINEER. Access must be maintained at all times for emergencies, sampling, equipment operations, maintenance, and like items.

4. Before altering any vehicular or pedestrian access, the CONTRACTOR shall notify the ENGINEER thirty (30) calendar days in advance on forms

provided by the ENGINEER. The CONTRACTOR shall then request the alteration on forms provided by the ENGINEER. Requests shall include reasons for the alteration, times, boundary limits, special safety measures, proposed traffic rerouting with widths of such route, and a map detailing the above. Such requests shall be submitted to the ENGINEER not less than fifteen (15) calendar days before the requested date of the access alteration. If any of the information changes, an additional fifteen (15) calendar days may be required after the changes are brought to the attention of the ENGINEER. Approval when granted will always be conditional. Final approval of the request, including date and time, will be given three (3) calendar days in advance. The CITY retains the right to ticket and impound vehicles blocking traffic.

5. At no time shall security of the site be compromised. If for any reason the CONTRACTOR finds it necessary to breach any existing perimeter fences or walls, permission of the ENGINEER shall first be obtained. The CONTRACTOR shall then request the alteration on forms provided by the ENGINEER. Requests shall include reasons for the alteration, times, boundary limits, special safety measures, proposed traffic rerouting with widths of such route, and a map detailing the above. The request shall also set forth details of repair of the wall or fences and shall establish a timetable for completion of the repairs. The repaired wall or fence shall be the same height as, and of comparable quality and appearance to the previously existing construction. Such requests shall be submitted to the ENGINEER not less than fifteen (15) calendar days before the requested date of the access alteration. If any of the information changes, an additional fifteen (15) calendar days may be required after the changes are brought to the attention of the ENGINEER. Approval when granted will always be conditional. Final approval of the request, including date and time, will be given three (3) calendar days in advance. The CONTRACTOR shall provide interim security over the duration of the breach.

6. The following shall be taken into consideration in preparing the proposed schedule of construction operation:
   a. Impacts to storm drainage service through the existing 45” storm drain.
   b. Impacts to the electrical easement property being used as an active storage area for large vehicles.

SECTION 01140
CONTRACTOR'S USE OF THE PREMISES

1.1 THE REQUIREMENT

A. General

1. This Section applies to all situations in which the CONTRACTOR or his representatives, including but not necessarily limited to, suppliers, Subcontractors, employees and field engineers, who enter upon the CITY'S property.

2. CONTRACTOR shall commence the Contract Work and provide security and protection to existing facility and job site within 5 days from the issuance of Notice-To-Proceed letter, unless noted otherwise.

B. Access to the Job-site

1. As instructed by the ENGINEER, the CONTRACTOR shall restrict CONTRACTOR'S employees to the immediate Work areas on the job-site and in no way go beyond the Work limits noted on the Contract Drawings or as otherwise directed by the ENGINEER.

a. Deliver materials, tools and equipment to the Parking Lot Area, via the Norris Avenue entrance, as directed by the ENGINEER.

b. CONTRACTOR and his employees shall enter the Allegheny Street and Remick Avenue entrances for access to Work areas as directed by the ENGINEER and shall not go beyond the Work area limits noted on the Contract Drawings.

2. CONTRACTOR shall in no way block such entrance(s) to the job-site when Contracted Work occurs at an existing CITY facility. At any time, the CONTRACTOR shall not block any other entrance/exit/fire doors, corridor or lobby door, etc. All fire and smoke doors, including the elevator/lobby doors, shall remain in operation at all times. CONTRACTOR shall provide all required exit at all times.

3. Use of such accesses to the job-site will only be for the purpose of parking, delivery and/or removal of materials equipment, tools, vehicles and removal of rubbish and debris, and shall be kept free of obstructions and in a safe condition at all times during extent of Contracted Work.

4. Use existing stairs to transport materials, equipment, supplies and CONTRACTOR'S personnel to the Work areas. Use of such stairs shall be kept clear of materials, equipment, tools and debris and shall not create any hazardous conditions or interfere with use of such stairs by CITY Employees and the Public. Use of stairs to transport materials, equipment or supplies by the CONTRACTOR'S personnel shall be in conformance with the California State OSHA requirements.

5. Use of crane, equipment and/or man lift, catwalk/platform to transport materials, equipment, supplies and the CONTRACTOR'S personnel to

the Work area shall be in conformance with the requirements of the local governing agencies. The CONTRACTOR shall furnish the CITY with a duplicate copy of the operating permit of the equipment prior to its use.

6. If any of the crane, equipment and/or man lift, catwalk platform is attached to the existing structure specified to remain, CONTRACTOR shall provide shop drawings, including the equipment data, the attachment details, structural calculation and erection plans to the ENGINEER for approval.

7. The ENGINEER may furnish the CONTRACTOR keys to the existing rooms in the building. If the key is not available, the CONTRACTOR shall gain access to the room without damaging the room and door. The CONTRACTOR shall return all temporary and existing keys to the ENGINEER after the completion of the Contract.

8. For existing electrical transformer, which are maintained by the Department of Water and Power, the CONTRACTOR shall arrange and obtain the permission for access and to do work from the Department of Water and Power.

9. The CONTRACTOR shall not change any existing occupied room or door key without the approval of the ENGINEER. The CONTRACTOR shall provide a duplicate key to the ENGINEER for CITY employee access.

C. City Occupation of the Premises

The CITY will occupy the existing premises (structures) at the Recreation Center during construction operations, and will need periodic access to maintenance are adjacent to Allegheny Street parking lot area as indicated in the GENERAL REQUIREMENTS Section 01313 – WORK BY CITY OR OTHERS, and in Section 00406 – PARTIAL ACCEPTANCE of the GENERAL CONDITIONS.

D. Contractor’s Use of the Premises

1. Do not interfere with operations or maintenance of the Recreation Center during Contracted Work operations, as directed by the ENGINEER.

2. Exercise care during Contracted Work operations not to interfere with or damage the following listed facilities:

   a. Recreation Center and Associated Parking Lot off Herrick Avenue.

   b. Playground, picnic area and other associated facilties located to the southwest of the Recreation Center.

3. All items, materials and equipment remaining in the existing structures and on the premises (job site), which are not specified to be salvaged in Item C above or elsewhere, shall become the property of the CONTRACTOR and shall be removed from the job site. The CITY makes no claims or assumes any value in any of these items, materials

and/or equipment if they are removed from the structures or the job site or vandalized prior to and/or during the Contract period. The CITY assumes no responsibility for any additional operation or works as a result of the conditions described herein.

E. Parking

1. No parking of CONTRACTOR'S vehicles will be allowed on the job-site except for the purposes of unloading and/or loading as directed by the ENGINEER. CONTRACTOR shall not use new paved areas for loading or unloading. All traffic controls in the Work area shall conform to the Work area Traffic Control Handbook (WATCH), latest edition, and the California Manual of Uniform Traffic Control Devices (MUTCD). (The California MUTCD is available on the internet at https://dot.ca.gov/programs/traffic-operations/camutcd/camutcd-rev4).

2. CONTRACTOR'S employees are advised to park on adjacent CITY streets and shall observe CITY parking restrictions posted on such streets.

3. CONTRACTOR shall obtain and pay for a "Street Use Permit" in order to park his vehicles, equipment and CONTRACTOR'S Field Office at Street Division, Bureau of Street Services, 1149 S. Broadway, Suite 400, (800) 996-2489. Such "Street Use" shall be fenced off from street traffic as required. Upon completion of Contracted Work, such street area shall be left in a clean and safe condition ready for use by the public. Wherever CONTRACTOR and CONTRACTOR'S employees' vehicles are located on the street or "Street Use" area or on the job-site, all such vehicles shall be kept locked at all times.

4. Unless specified otherwise, the existing parking area for the Recreation Center shall remain in operation as long as possible, if the existing building is occupied by CITY employees and existing parking area is being utilized, or if the INSPECTOR'S Job Office is located in existing parking area. Any new improvement in the parking including restriping shall be performed in the final phase of the Contract. CONTRACTOR shall coordinate and schedule their operations to allow sufficient time to notify the ENGINEER for parking relocation and to relocate the INSPECTOR'S temporary job office and complete the new improvements. Unless specified otherwise CONTRACTOR shall not perform any demolition or install any new paving or parking stripping sixty (60) days before the Contract completion date, with the exception of major utility installation. CONTRACTOR shall not use the newly paved area for parking, loading or unloading.

F. Security

1. Restrict the access of all persons entering upon the CITY'S property in connection with the Contracted Work to the Access Route and to the actual site of the work.

2. All employees of the CONTRACTOR who will be engaged in the construction of this project will be screened by the CITY for proper identification and good behavior. Candidates of good standing will be issued a temporary pass. CONTRACTOR shall furnish the CITY, a list of employees for approval prior to start of this project.

3. In addition to the responsibilities specified in other Sections of these GENERAL REQUIREMENTS, and the GENERAL CONDITIONS, the CONTRACTOR shall be responsible for the security of all its construction equipment, materials, tools, facilities, and vehicles (personal, private, or contractual) while performing the work of this Contract. This requirement shall be effective twenty-four (24) hours per day for the duration of the Contract.

4. CONTRACTOR shall furnish and maintain approved type site security protection between the Work areas and other areas. All such site security protection shall remain for the duration of this Contract.

5. The CONTRACTOR is responsible for the security of the parking lot or parking area and all CITY property that is stored in the parking lot or area.

6. CONTRACTOR shall furnish and maintain adequate site security protection, as directed by the ENGINEER, INSPECTOR or other authorities having jurisdiction, at no additional cost to the CITY.

G. Protections

1. Required: Where necessary for the safety of the public and the protection of the adjacent street improvements and adjacent properties, provide and maintain adequate protection, fences and gates and barricades to separate Work areas from areas outside the job-site limits**.** Such protections shall comply with provisions of Section 01120 – INTERFACE / COORDINATION REQUIREMENTS and Section 01721 – MOBILIZATION of the GENERAL REQUIREMENTS, and shall remain in place during extent of this Contract or as otherwise directed by the INSPECTOR.

2. CONTRACTOR shall provide protections, barricades, signs, etc., as necessary so that persons will be protected from the Work areas where trenching and excavations occur for foundations, underground utilities, underground desilting and infiltration galleries etc. on the job-site. Upon completion of such work operations, such protections shall be removed.

3. All equipment, material, soil, debris and any heavy loaded object shall not be stock piled in adjacent area to create any surcharging to the trench or excavation.

4. Protection of Existing Building and Site Conditions:

   a. Construct and maintain a suitable type partition, approved by the ENGINEER, to prevent dust, noise and any other nuisance to

occupants within areas adjacent to the Work area(s) of this Project.

b. Protect existing surfaces in areas where work of this Contract is being performed or passed through for access to the Work areas from damage in a manner approved by the ENGINEER. Take all necessary precautions to protect and preserve the integrity of all existing work. Any damage will be subject to requirements hereinafter specified. Submit protection plans or details as required by the ENGINEER.

H. Repair of Damages

1. Required: Repair or replace any damage to existing Recreation Center and equipment located inside or outside the building under CONTRACTOR'S protection.

2. Methods: Repair or replace damaged work with new materials as necessary to restore the damaged areas or surfaces to a condition equal to and matching such conditions existing prior to damage or start of Work of this Contract, to the full satisfaction of the ENGINEER, and at no added cost to the CITY. Submit repair method for approval as required by the ENGINEER.

I. Interruption of Services

1. CONTRACTOR shall make all provisions to accomplish Contracted Work without undue interference with the CITY operations of the existing facilities on the job-site premises. Any necessary interruptions to existing plumbing, mechanical and/or electrical facilities shall be done only after 48 hours advance consultation with the ENGINEER and at such time and duration as instructed by the ENGINEER. Provide an uninterruptive power source if necessary to ensure that there is no power interruption. CONTRACTOR shall verify existing loading and any possible load increase during construction prior to ordering. Any required new circuit or repair of existing circuit in the CITY'S occupied area to maintain continuous operation shall be done by CONTRACTOR at no additional cost to the CITY.

J. Non-interference With Others

1. CONTRACTOR shall confine Contracted Work operations to the immediate boundaries of the job-site and shall execute work operations in a manner to minimize interference with CITY operations and/or work operations of other CONTRACTORS working on the premises; as directed by the ENGINEER.

2. CONTRACTOR shall provide and maintain adjacent pedestrian and vehicular accesses in accordance with Work area Traffic Control Handbook (W.A.T.C.H.), latest edition, and the California Manual of Uniform Traffic Control Devices (MUTCD).

3. CONTRACTOR shall obtain approval of ENGINEER and local authorities having jurisdiction such as Department of Transportation, Police Department, Bureau of Street Services, etc. prior to any street, alley or sidewalk closure.

K. Underground Service Alert

1. Before commencing any excavation, the CONTRACTOR shall obtain an underground service alert inquiry I.D. Number by calling 1 (800) 422-4133. Two (2) working days shall be allowed after the I.D. Number is obtained and before the excavation work starts so that utility owners can be notified. The I.D. Number must be reported to the Bureau of Contract Administration when calling for inspection. I.D. Numbers will not be given more than ten (10) calendar days prior to starting excavation work.

L. Job Safety

1. CONTRACTOR shall observe all safety rules and regulations of the Los Angeles City Building Code and CAL/OSHA as applicable to the safety of the CONTRACTOR, CONTRACTOR'S personnel and CITY employees during Contracted Work operations and especially during asbestos removal operations.

END OF SECTION

SECTION 01150
STORAGE OF MATERIALS AND EQUIPMENT

1.1 THE REQUIREMENT

A. All materials and equipment shall be stored and protected in accordance with the manufacturer's instructions, with seals and labels intact and legible. Store sensitive products in weatherproof, climate controlled enclosures. Where indoor storage is required, the equipment shall be stored inside a completely enclosed building, with the temperature controlled between 60 degrees Fahrenheit and 100 degrees Fahrenheit (60°F – 100°F) and a maximum relative humidity of ninety percent (90%) noncondensing.

B. For exterior storage of material or equipment, the materials or equipment shall be placed on sloped supports above ground. Material or equipment subject to deterioration shall be covered with an impervious covering. Where necessary ventilation and heating shall be provided to avoid condensation.

C. The CONTRACTOR shall exercise all measures necessary to ensure preservation of the quality, quantity, and fitness of the materials or equipment and shall perform the manufacturers recommended maintenance of the material or equipment.

D. The CONTRACTOR shall inspect the material and equipment, and submit a written monthly report to the INSPECTOR listing all the equipment stored, the results of their inspection, and the maintenance performed.

E. The materials and equipment shall not show signs of pitting, rust, decay or other deleterious effects of storage when incorporated in to the work.

F. Pumps, motors, electrical equipment, and other equipment with anti-friction or sleeve bearings shall be stored in weather tight structures maintained at a temperature above sixty degrees Fahrenheit (60°F). Electrical equipment, controls, and insulation shall be protected against moisture and water damage. All space heaters furnished in electrical equipment shall be immediately energized and operated continuously until the equipment is placed into service.

G. The CONTRACTOR shall grant the INSPECTOR and ENGINEER access to the storage facility at any time and assist the INSPECTOR and ENGINEER in conducting a full view, piece by piece, inventory of all such material or equipment.

H. The CONTRACTOR shall absorb any and all cost incurred to store, protect, and maintain the materials and equipment without modification to the Contract amount.

I. For CITY furnished equipment delivered to the site, the CONTRACTOR shall take all necessary measures to protect the equipment from damage due to the CONTRACTOR's activities. The CONTRACTOR shall also ensure that all measures required by the CITY's vendor to preserve and protect their equipment are maintained and are not disturbed including, but not limited to, providing for the continuous operation of space heaters furnished in electrical equipment.

END OF SECTION

SECTION 01211
ALLOWANCE FOR EQUIPMENT SUBSTITUTIONS FOR COMPATIBILITY PURPOSES

PART 1 -- GENERAL

1.1 THE REQUIREMENT

A. An allowance for equipment upgrade purposes has been established in the Proposal for this Contract. In the event that the CITY determines that items of equipment proposed for use by the CONTRACTOR do not meet the needs of the CITY, and the CITY directs the CONTRACTOR to substitute other pieces of equipment, then this allowance may be used. The substitution of equipment must be directed by the CITY in writing and must specifically be identified as substitutions due to compatibility of equipment. In this event, and provided that the CONTRACTOR can clearly document an increase in cost, then such cost increase may be paid for from this allowance through the issuance of an Allowance Order; provided that there is a specific written approval of the CITY. Any monies paid from this allowance shall not result in the need to issue a Change Order. It is agreed that this allowance shall only be used to pay for direct cost differences in the cost of equipment. If the CITY rejects a piece of equipment proposed for use by the CONTRACTOR because the equipment, in the sole judgment of the ENGINEER, does not meet the requirements of the Contract Documents, the CONTRACTOR shall not have any claim against this allowance. This bid item is an allowance and is subject to an upward or downward adjustment by a Change Order, at the end of the project, to reflect the actual costs expended. Such adjustment is not subject to markup (overhead, profit, bonds, insurance, etc.).

END OF SECTION

This page intentionally left blank

SECTION 01212
FIXED CASH ALLOWANCE ITEMS

1.1 THE REQUIREMENT

A. A fixed cash allowance has been allocated to each of the following items of the Bid Breakdown (see Bid Proposal). Requirements for each Fixed Cash Allowance Item are specified in the GENERAL REQUIREMENTS (GR) section referenced below. Overhead and Profit, at the rates listed below, shall be added to the actual invoiced amount.

Bid Item No.	Description	Overhead and Profit
2.	Allowance for Engineer's and Inspector's Field Office Supplies (GR Section 01212)	5%
3.	Allowance for Differing Site Conditions (GR Section 01252, 01253, & 01254)	Per Sec. 01254
4.	Allowance for Payment for Permits (GR Section 01212, 01280, 1292, & 01721)	0%
5.	Allowance for Opportunity to Partner (GR Section 01212 & 01353)	5%
6.	Allowance for Start Up Assistance (GR Section 01750)	Per Sec. 01254
7.	Allowance for Disturbed Control System Irrigation	5%
8.	Allowance for Community Impact Mitigation (GR Section 01212 & 01280)	5%
22.	Allowance for Differing Site Conditions (GR Section 01252, 01253, & 01254)	Per Sec. 01254

B. If these items are not executed, or are only partially executed, or the allowance for any item is not expended or partially expended, then a deductive Change Order shall be issued for the amount that is not expended. If, however, these items are over expended (with ENGINEER'S prior approval), then an appropriate Change Order shall be executed in accordance with the provisions of the GENERAL REQUIREMENTS Section 01254 –- CHANGE ORDERS, except for Overhead and Profit wherein the above listed rates shall apply.

C. The ENGINEER'S AND INSPECTOR'S field office supply allowance is to be used at the ENGINEER'S and/or INSPECTOR'S discretion to purchase office supplies and/or office equipment, perform repairs to field offices or equipment owned or leased by the City, pay field office utility bills, purchase reference documents, etc. The items covered by this allowance are in addition to those required to be furnished by the CONTRACTOR under GR Section 01721-Mobilization. The CONTRACTOR shall be reimbursed the actual invoice amount plus the markup allowed by Section A, above.

(END OF SECTION)

SECTION 01251
CHANGE ORDER REQUESTS

1.1 THE REQUIREMENT

A. All quotations for preliminary change orders for extras, changes, additions, or deletions to the Work as described in CHANGES AND EXTRA WORK of the GENERAL CONDITIONS shall be submitted to the ENGINEER, in writing, on the Change Order Cost Quotation Form provided by the ENGINEER, and in conformance with the requirements of CHANGE ORDERS of the GENERAL REQUIREMENTS (See Attachment 01251-A1). The quotation shall be firm for a period of not less than sixty (60) calendar days from the date of receipt of the quotation by the ENGINEER. The CONTRACTOR shall submit its written cost quotation and Time Impact Analysis not later than fifteen (15) days after being requested to provide such quotation, unless the ENGINEER allows more time. Delays in submitting quotations beyond the fifteen (15) days set forth herein, which cause a delay in the issuance of a Change Order or a delay to the completion date of the project, shall not be cause for a claim or a time extension under the Contract.

B. The ENGINEER'S request for quotation on a preliminary change shall not be considered authorization to proceed with the changed work prior to the issuance of a final Lump Sum or Time & Material Change Order, unless directed otherwise, in writing, by the ENGINEER, nor shall such request constitute justification for a delay to the existing Work or a time extension under the Contract.

SECTION 01252
CONSTRUCTION INCENTIVE CHANGE PROPOSAL

1.1 PURPOSE

A. This Article defines a "Construction Incentive Change Proposal" (CICP) and establishes policies and procedures for the application of CICP's.

1.2 DEFINITIONS

A. A CICP is a formally written proposal for a Change Order during the construction of this Project. A CICP shall be initiated, fully designed and developed, and identified as such by the CONTRACTOR. A CICP must result in a net capital savings of one-hundred-thousand dollars ($100,000) or more. However, if, in the sole judgement of the ENGINEER, a disproportionate amount of the net capital savings are offset due to the CITY's development and implementation costs, the ENGINEER will decline to approve and pursue the CICP.

B. Net capital savings are defined as the total savings proposed by the CONTRACTOR, and accepted by the ENGINEER, less the CITY's added development and implementation costs. The CONTRACTOR's development and implementation costs accepted or rejected, shall be borne solely by the CONTRACTOR and shall not be included in the calculation of savings herein.

C. A CICP must result in a net capital saving while causing no increase in the total life cycle cost of the Project and must also meet the following conditions.

1. The required quality, function, reliability, and safety of the Project shall be maintained.

2. There shall be no impact to cost or increase in difficulty of the facility/system operation and maintenance.

3. The proposed change will not result in any Contract rebidding.

4. The proposed change shall not be solely based on a reduction in end item quantities. Reductions in specified end item quantities or quantities necessary to complete the Work as specified or shown shall not be considered CICP's and shall be addressed as deductive Change Orders.

5. The proposed change shall not be solely based on a change in material quality. Reductions in specified material quality shall not be considered CICP's and shall be addressed as deductive Change Orders.

6. The proposed change shall not cause undue interruption of the Work of the Contract.

7. The proposed change shall be in full compliance with all applicable codes, permits, and regulations.

8. The proposed change shall not result in a substitution of material or equipment only.

1.3 CONTENT

A. A CICP shall contain all pertinent information and supporting documentation for evaluation by the ENGINEER. As a minimum, the following information shall be included.

1. Name(s) of the individual(s) associated with the development and preparation of the CICP.

2. A detailed description with duly signed Plans and Specifications of the present design and the proposed change(s).

3. A written discussion and clear identification of all advantages and disadvantages for each change proposed.

4. A detailed design, procedure, and schedule for implementing the proposed change. This shall include all necessary CONTRACT amendments, Plans, sketches, Drawings, design calculations, etc. (stamped by a California Registered Professional Engineer, as applicable) and the latest date the CICP must be approved for implementation without any impact to the construction progress. Such submittal shall be provided to the ENGINEER no later than ninety (90) calendar days prior to the proposed date of implementation.

5. A summary of the estimated costs shall include the following:

   a. Construction costs before and after the CICP for the proposed change. This shall be a detailed estimate identifying the following items for each trade involved in the CICP including:

      (1) Quantities of materials and equipment

      (2) Unit prices of materials and equipment

      (3) Labor hours and rates for installation

      (4) Subcontractor and CONTRACTOR mark-ups.

   b. If applicable, operation and maintenance costs before and after the CICP.

   c. CONTRACTOR’s share of the savings based on the paragraph entitled "Sharing Provisions" contained herein.

   d. Time required for executing the proposed change.

   e. Prices for items or products shown or specified shall form the basis for cost comparison for alternatives or equals that the CONTRACTOR may choose to employ under a CICP.

6. The CONTRACTOR may not restrict the CITY’s use of any CICP or the supporting data submitted.

1.2 SHARING PROVISIONS

A. Sharing of Net Capital Savings

1. Upon acceptance of a CICP, the CONTRACTOR shall share the net capital savings based on the Sharing Formula below.

2. Net Capital Savings = (Initial Construction Costs - Revised Construction Costs) -(CITY CICP Implementation Costs)

3. The CONTRACTOR's CICP development costs shall not be included in this formula. The CONTRACTOR shall bear such costs exclusively.

4. Sharing Formula

   a. When the total cumulative net savings based on the formula set forth above is $1 million ($1,000,000) or less, the CONTRACTOR shall receive fifty percent (50%) of the savings.

   b. When the total cumulative net savings based on the formula set forth above exceeds $1 million ($1,000,000) the CONTRACTOR's share will be computed based on the following formula:

      y = .2x + $300,000

      where:

      y = CONTRACTOR's share in dollars

      x = Total net savings in dollars

      For example, if the total net savings is $1,200,000

      y = .2($1,200,000) + $300,000 = $540,000

1.3 GENERAL PROVISIONS

A. Any CICP may be accepted, in whole or in part, by the ENGINEER's issuance of a Change Order to this CONTRACT citing this Article and referencing the CONTRACTOR's CICP. The ENGINEER may accept a CICP even though an agreement on price reduction has not been reached, by issuing a Notice-To-Proceed with the CICP to the CONTRACTOR. Until a Notice-To-Proceed is issued, or a Change Order applies a CICP to this CONTRACT, the CONTRACTOR shall perform in strict accordance with the existing CONTRACT requirements.

B. If the CICP is not accepted, the ENGINEER shall notify the CONTRACTOR, in writing, setting forth the reasons for rejection.

C. The ENGINEER's decision to accept or reject all or a part of any CICP shall be final and conclusive of the matter and shall not be subject to appeal under the CLAIMS AND PROTESTS Section of the GENERAL CONDITIONS.

D. In recognition of the fact that the CONTRACTOR is the originator and the designer of all CICP's, the CONTRACTOR shall be responsible for the installation, implementation, and performance of any CICP and shall guaranty and warranty the CICP in accordance with the provisions of the GUARANTY-WARRANTY Section of these GENERAL REQUIREMENTS. The

CONTRACTOR shall indemnify the ENGINEER and all its agents from any claims or damages arising directly or indirectly out of any CICP in accordance with the provisions of the INDEMNIFICATION of the GENERAL CONDITIONS. The CONTRACTOR shall be solely responsible for any and all impacts (both time and costs) and delays arising either directly or indirectly out of the implementation of any CICP.

(END OF SECTION)

SECTION 01253
DIFFERING SITE CONDITIONS

1.1 THE REQUIREMENT

A. During the course of construction, the CONTRACTOR may encounter existing utilities, structures, etc. that are not shown on the contract drawings or are not specified and which may interfere with or may impact construction activities. In the event of this occurrence, the ENGINEER may direct the CONTRACTOR to proceed with necessary exploratory or corrective work to alleviate the situation. The cost for such directed work shall be paid for under the bid item DIFFERING SITE CONDITIONS of the SCHEDULE OF WORK AND PRICES. Costs shall be calculated in accordance with Section 01254 CHANGE ORDERS, subsection TIME AND MATERIALSWORK, of the GENERAL REQUIREMENTS.

B. If the total cost of the Work directed under the DIFFERING SITE CONDITIONS clause is different from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order. The adjustment shall be the difference between the total actual cost and the amount included in the Bid, as either an additional amount due the CONTRACTOR or as a credit to the CITY, as appropriate.

C. The Geotechnical Baseline Report (GBR) presents the geotechnical basis for the effect of geologic and geotechnical conditions upon the construction. The GBR is to be considered as establishing the only geotechnical baseline for all anticipated subsurface and physical conditions for the purposes of the construction. If actual subsurface or latent conditions physical conditions differ materially from those indicated in the GBR, and are of such a nature as to cause an increase or decrease in the cost of performance of the Work, or a change in the construction methods required for performance of the Work, which results in an increase or decrease in the cost of the Work, the City shall make an adjustment in the Contract Price and Contract Completion Date and the Contract Documents shall be modified accordingly. It is understood by the parties hereto that the GBR is the only standard that is to be applied for determining CONTRACTOR'S rights to an adjustment of the Contract Price or Contract Completion Date by reason of unforeseen or unexpected subsurface or latent physical conditions. All other geotechnical data, reports, and other information provided to the CONTRACTOR are not included in or made a part of the Contract Documents, nor are such other data, reports or information warranted, impliedly or expressly, as to accuracy, completeness or use.

D. The CONTRACTOR shall notify the ENGINEER, in writing, within twenty-four (24) hours of any subsurface latent conditions or physical conditions encountered which CONTRACTOR believes, or should have suspected in the exercise of diligence and extreme care, to constitute Differing Site Conditions as described in this Section. Such written notice shall include a detailed statement of the following facts concerning such conditions: (i) their location; (ii) their nature and extent; (iii) the baseline conditions described the GBR that formed the basis of the CONTRACTOR'S expectations regarding the conditions that would be encountered. The ENGINEER shall promptly investigate the conditions. If the ENGINEER finds that conditions materially differ and will cause an increase or decrease in the CONTRACTOR'S cost or the time required to perform any part of

the Work under this Contract, whether or not changed as a result of such conditions, the ENGINEER shall, after receipt of the CONTRACTOR'S written statement, make an equitable adjustment and modify the Contract in writing.

E. If the CONTRACTOR intends to assert a claim for an adjustment in the Contract Price or Contract Completion Date under this Article, it must, within twenty (20) calendar days after receipt of such determination as to whether a Differing Site Condition exists, submit a written statement setting forth a detailed cost breakdown in the form required by GENERAL REQUIREMENTS Section 01254 (CHANGE ORDERS) setting forth the basis of CONTRACTOR'S calculation of the costs saved or incurred, detailed information demonstrating the effects on the Contractor's schedule of performance in the same manner as required by the Contract Documents for obtaining approval of extensions of time, identification of the portions of the Escrow Bid Documents (including without limitation the GBR baseline statements referred to in the Escrow Bid Documents as required by Section 01351 (Escrow Bid Documents) of the General Requirements) that formed the basis of CONTRACTOR'S bid estimate to perform the Work affected by such conditions, and a complete and detailed explanation of the factual basis for the CONTRACTOR'S request.

F. Failure by CONTRACTOR to strictly comply with the notice requirements of this Section concerning the timing and content of any notice of Differing Site Conditions or of any request for equitable adjustment based on Differing Site Conditions or any failure to comply with the requirements of Section 01351 (Escrow Bid Documents) pertaining to clear identification of GBR baseline statements used in preparation of CONTRACTOR's bid shall be deemed waiver of any claim by the CONTRACTOR for increase in the Contract Price or extension of the Contract Completion Date by reason of such conditions.

G. CONTRACTOR'S rights to compensation for (i) delay, disruption, hindrance, interference, schedule compression, and the impact, ripple or cumulative effect thereof; or (ii) additional supervision, administration, excess, extended or extraordinary overhead, loss of productivity, or similar costs, expenses or damages incurred as a result of or related to any claim of Differing Site Conditions shall be limited to such sums as are allowable under TEMPORARY SUSPENSION OR DELAY OF WORK of the GENERAL CONDITIONS.

H. No claim by the CONTRACTOR for an adjustment hereunder shall be allowed if asserted after final payment under this Contract.

END OF SECTION

SECTION 01254
CHANGE ORDERS

1.1 The Requirement

Payment to the Contractor, or credit to the City, for any change, addition, deletion or extra to the Work, or settlement of any Claim, covered by any Change Order, shall be determined by the methods set forth herein. The Engineer may change the Plans and Specifications, character of the Work, or quantity of Work provided the total net dollar value of all such changes, taking into consideration both additive and deductive changes, does not exceed twenty-five percent (25%) of the original Contract Price. (The total net dollar value requires that additive and deductive changes offset each other, and only after the total net dollar value of the changes exceeds 25% of the original Contract Price, will a Supplemental Agreement be required). Should it become necessary to exceed this limitation, the change shall be by written Supplemental Agreement between the Contractor and the City, which shall be executed by a Change Order.

Unless otherwise stipulated, “Unit Prices” and “Stipulated Prices” include all costs necessary to furnish, install and complete the Work. The “Unit Prices” and “Stipulated Prices” include all direct costs for labor, equipment and materials, all insurance and bond costs, all field and office supervisors and assistants, all onsite project administration, security costs, the cost of small tools and consumables, incidental job burdens, and all general home office expenses and no separate allowance will be made therefor. Assistants to field and office supervisors include all clerical, stenographic, and general office help. Incidental job burdens include, but is not limited to, office equipment and supplies, temporary toilets, telephone, utilities, safety equipment, warning devices, personal protective equipment, and conformance to OSHA requirements. Project administration includes, but is not limited to, review and coordination, estimating, engineering, scheduling, and expediting relative to Change Orders, and updating and furnishing Record Drawings to incorporate changes, schedule update, supervision not applied solely to the Work of the Change Order, home office salaries and expenses, and City of Los Angeles Business Tax.

A. Unit Prices

Unit prices stipulated in the Schedule of Work and Prices (Bid) or itemized in the approved Schedule of Values shall be utilized, where they are applicable and determined reasonable by the Engineer. In the event that the Change Order results in a change in the Bid quantity of more than twenty-five percent (25%), either increase or decrease, then either the Engineer or the Contractor may request a review of the unit price to determine if a new unit price shall be mutually determined by negotiation. Any new unit price mutually determined under this Subsection shall only apply to the units in excess of one hundred twenty five percent (125%) of the Bid quantity for overruns. In case of underruns, the new mutually determined unit price shall only apply to the units up to seventy-five percent (75%) of the Bid quantity. When the final quantity is less than 75% of the Bid quantity, the total payment for that item shall not be more than 75% of the Bid quantity times the Bid unit price.

At the City’s option, payment for Unit Price Work in excess of 125% of the Bid quantity, or less than 75% of the Bid quantity, will be made on a Time and Materials basis as provided in Subsection C if a new unit price cannot be agreed upon.

Renegotiated unit prices or unit prices for new items added to the Contract by Change Order shall be determined in accordance with Subsections B through G. Whether stipulated in the Bid, itemized in the approved Schedule of Values or renegotiated, the unit prices used for payment constitute the total adjustment with no further costs owed for overhead, impact, profit, delay or impact to unchanged portions of the Contract, or any

other reason. The unit price shall be full and final compensation as described in Subsection D.

The cost proposals for renegotiated unit prices shall be presented in accordance with the provisions of Subsections B through G. Should any Bid Item be deleted in its entirety, the amount bid for that Bid Item shall be subtracted from the total Contract amount. The Contractor shall be paid only for the actual cost incurred prior to the notification of such deletion for that Bid Item.

B. Lump Sum

The Engineer may initiate a change in the Work by issuing a Preliminary Change Order (PCO). A PCO will include a detailed description of the proposed additions, deletions, or revisions with supplementary sketches or revised Contract Drawings and/or Specifications and will request from the Contractor a lump sum cost quotation and time impact analysis for the proposed Change Order Work. The Contractor shall submit its PCO cost quotation and time impact analysis, if applicable, to the City within 14 calendar days after receipt of a PCO. The Contractor shall summarize the total cost and furnish a breakdown of the proposed lump sum costs satisfactory to the Engineer in accordance with Subsections B through G. Such lump sum costs shall be full and final compensation as described in Subsection D. The Contractor's quotation shall conform to the requirements of Section 01251- Change Order Requests and be submitted in the Change Order Cost Summary Form provided (see Attachment 01251-A1). The Change Order Cost Summary Form cannot be used to nullify or supersede any specification or contractual provision.

If the method or amount of payment cannot be agreed upon prior to performing the Change Order Work, the Engineer may issue a Unilateral Change Order in the amount determined reasonable by the Engineer for the Change Order Work and direct the Contractor to proceed immediately. The Engineer also has the option to issue a Time and Materials Change Order directing the Change Order Work be performed on a time and materials basis with the Contractor providing all labor, equipment, and materials necessary to complete the Change Order Work in a satisfactory manner and within a reasonable period of time. Estimates for lump sum quotations and accounting for Time and Materials Work shall be limited to direct expenditures necessitated specifically by the subject Change Order Work, and shall be segregated as follows:

1. Labor: The cost of labor shall include all employees of the Contractor or Subcontractor(s), up to and including working foremen, who are used in the actual and direct performance of the Change Order Work. Employees identified as superintendents or non-working foremen shall not be charged as labor on the Change Order Work. The labor rates used to price the Change Order Work shall be those listed on the Bureau of Engineering's website at http://eng.lacity.org/contractors/**.** The Change Order Labor Rates include State of California Prevailing Wages, Fringe Benefits (health & welfare, pension, vacation, training and other payments) as established by negotiated labor agreements, Payroll Taxes (FICA, Federal and State unemployment taxes) as established by law, and Insurance costs (Worker's Compensation and General Liability Insurance, but shall not include Automobile Liability Insurance, Umbrella or any other insurance costs). No other subcomponents of labor costs shall be considered, unless approved in writing by the Engineer.

   The Change Order Labor Rates are calculated using the most current published prevailing wage and fringe benefits determination, applicable to the Los Angeles County and the particular labor classification, from the State of California Director

of Industrial Relations. To the Total Base Hourly Wage Rate (Column D), will be added Payroll Taxes at 8.65% (Column E), and Worker's Compensation & General Liability Insurance at 13% (Column F) of the base wages (Columns A+B), respectively.

Copies of the prevailing wage and fringe benefit determinations are available on the internet at http://www.dir.ca.gov/OPRL/PWD/. Payment to a craft of classification not shown on the prevailing wage rate determinations shall comply with the rate of the craft or classification most closely related to it.

The Engineer may approve a higher markup for insurance by review of current invoice(s) of insurance premium, as prepared by insurance companies for the Contractor or its Subcontractors at all tiers, to be submitted by the Contractor within ten (10) working days after issuance of the Notice to Proceed.

Except when provided otherwise by specific labor agreements, the overtime compensation will be at 1.5 times for more than 8 hours per day and Saturday work (Column H) and 2 times for Sunday and Holiday work (Column I).

The labor cost is not allowed to be increased by using labor classifications with paygrades higher than necessary to accomplish the Change Order Work. Owners, business partners, stock holders, corporate officers, next of kin, relatives and other stake holders of the contracting company (whose classifications are directly chargeable to the project) may be chargeable to the Change Order Work, provided that these personnel/workers perform direct labor in accordance with their classification and have the approval of the Inspector. The rates shall not exceed the prevailing wage rate for the classification they are performing. Foreman/General Foreman classification shall include a premium not exceeding the allowable premium in the Master Labor Agreement over the highest prevailing wage he is supervising. All labor classifications considered for the work shall be presented to the City, via a submittal, for review and approval before change order work is performed.

Reimbursement at the computed Change Order Labor Rates is subject to verification by certified payroll.

2. Materials: The cost of materials used in performing the Change Order Work will be the direct cost, including sales tax and freight, to the purchaser, whether Contractor, Subcontractor or other forces, from the supplier thereof, except as follows:

   a. Cash or trade discounts available to the purchaser shall be credited to the City notwithstanding the fact that such discounts may not have been taken by the Contractor.

   b. For materials secured by other than a direct purchase and direct billing to the purchaser, the cost shall be deemed to be the price paid to the actual supplier as determined by the Engineer. Supplier markup, except for actual costs incurred in the handling of such materials, will not be allowed.

   c. Payment for materials from sources owned wholly or in part by the purchaser shall not exceed the price paid by the purchaser for similar materials from said sources on contract items or the current wholesale price for such materials delivered to the Jobsite, whichever price is lower.

d. If, in the opinion of the Engineer, the cost of materials is excessive, or the Contractor does not furnish satisfactory evidence of the cost of such materials, then the cost shall be deemed to be the lowest current wholesale price for the quantity concerned, delivered to the Jobsite less cash or trade discount. The City reserves the right to furnish materials for the Work and no claim shall be made by the Contractor for costs and profit on such materials.

e. For the purposes of this Section, a "Supplier" is defined as any person or persons, firm or business, who supplies materials of construction and/or permanent equipment, but who does not perform any portion of the Work of the Contract on site, for the Contractor, except that labor or labor supervision which may be required by some manufacturers as part of their equipment installation for warranty or other purposes.

3. Equipment: The cost of equipment shall include ownership, lease or rental costs, as well as operating costs, for individual equipment units whose replacement value is in excess of $1,000. Transportation and set up costs shall be included, but only if the equipment is imported to the worksite solely to perform work on the Changed/ Extra Work described in the Change Order and the Contractor can demonstrate that the changed work cannot or could not be performed economically with equipment already at the site. Equipment costs shall be determined in accordance with the requirements set forth in Subsection G.

4. Small tools, equipment, consumables and incidental costs: No separate payment will be made for the use of small tools or equipment with a replacement value of $1,000 or less. This applies to tools and equipment owned by the Contractor or its Subcontractors, at any tier. Also, no separate payment will be made for fuel, lubricants, tool or equipment repairs, tool or equipment maintenance, consumables, drinking water, sanitary facilities or other incidentals. These costs are already included as a part of Markup.

5. Subcontractor Costs, including their overhead and profit, provided that such costs are direct costs to the Contractor for performing the Change Order Work as set forth in Subsections B through G.

C. Time and Materials Work

The costs of all Changed/Extra Work submitted under the Time and Materials (T&M) method shall be formulated in accordance with the provisions of Subsections B through I.

Unless otherwise stipulated on the Change Order, the “Not-to-Exceed” amount for all T&M Change Orders is $25,000. The Contractor is responsible for tracking costs and for notifying the Engineer in writing when costs approach 50% and 75% of the “Not-to-Exceed” amount. In addition, if the Changed/Extra Work cannot be completed within the “Not-to-Exceed” limit, the Contractor shall notify the Engineer in writing, and in a timely manner, that the limit requires an increase. The City will only reimburse eligible costs up to the “Not-to-Exceed” amount.

The Contractor shall notify the Inspector at the beginning of each day when T&M Change Order Work is being performed. The Contractor shall notify the Inspector of the T&M Change Order Work being performed and describe the personnel involved, whether by Contractor forces or by its Subcontractors, at any tier. Failure to notify the Inspector prior

to the start of T&M Change Order Work serves as the Contractor's waiver to claim for compensation on that day.

For each day work is performed on the T&M Change Order, the Contractor shall submit a "Daily Report of Time and Material Work" to the Inspector. The "Daily Report" consists of Bureau of Contract Administration Form BCA-165 for labor supplied, and Form BCA-166 for equipment and materials supplied. The Inspector will only consider Forms that are properly completed as described below.

1. Separate forms must be used for labor and for equipment/materials.

2. Labor, equipment, material or expenditures that are not included on Bureau of Contract Administration Forms BCA-165 and/or BCA-166 are ineligible for payment. There will be no exceptions to this requirement. It is the responsibility of the Contractor to include any and all items of labor, equipment, or material for which it requests compensation for each day's work completed.

3. Information required on the Labor form shall include name of personnel, personnel classification, and only the number of hours worked on T&M Change Order Work for the day being reported. Since the overhead allowance already includes all necessary supervision, any hours for additional supervision or non-working foremen are ineligible for additional payment. The premium pay for a general foreman is eligible for payment only if the general foreman is a working foreman and a general foreman was required by a Union Labor Agreement or otherwise approved by the Inspector. The general foreman rate is eligible for payment only during the time that a general foreman was required for the T&M Change Order Work.

4. Information required on the Equipment/Material form shall include Contractor-owned equipment and/or tools, and rented equipment or tools for which compensation is requested. Information shall include the type of equipment, size of equipment, equipment identification number, appurtenances, and only the number of hours worked on the T&M Change Order Work.

5. The only allowable materials are materials delivered to the job site and/or incorporated only into the T&M Change Order Work. The allowable materials shall be listed on the Equipment/Material form for the day that they are delivered to the job site and/or incorporated into the T&M Change Order Work.

6. Delivery ticket(s) and/or bill(s) of lading for rental equipment and/or tools delivered to the site and/or material incorporated into the T&M Change Order Work for the day being reported must be attached with the T&M sheet for that day. No payment will be allowed for materials and/or rented equipment unless receipt(s) or bill(s) of lading is attached. If the request for payment is not substantiated by original vendor/supplier invoices, acceptable copies of original invoices, or other documentation acceptable to the Inspector, the City may establish the cost of the item(s) at the lowest possible wholesale price or rental rate applicable while the T&M Change Order Work was being performed.

7. Failure to submit the required "Daily Report of Time and Material Work" by the close of the next working day shall waive all rights for that day unless otherwise approved by the Inspector. Any T&M Change Order Work that cannot be substantiated by a "Daily Report", approved and signed by the Inspector, is ineligible for payment.

8. The Contractor is responsible for preparing the “Daily Report” for the T&M Change Order Work performed by its Subcontractors and submitting the forms to the Inspector on time.

9. The Contractor must have each “Daily Report” verified by the Inspector. After the “Daily Report” is approved by the Inspector, both the Contractor and Inspector sign the report. The original “Daily Report” is retained by the Inspector with a copy provided to the Contractor.

10. When the “Daily Report” is signed by the Inspector and the Contractor, it is binding on the Contractor and its Subcontractors.

11. When agreed to by the Inspector, the Contractor may submit a supplemental “Daily Report” for labor, materials, or equipment for which the Contractor requests compensation, but failed to list on the original daily report.

    a. These supplemental forms shall be marked “SUPPLEMENTAL”.

    b. Unless otherwise approved by the Inspector, the supplemental forms may only be submitted for approval up to two (2) working days following the date when the work was performed.

No payment will be allowed for labor, materials, or equipment included on T&M sheets not signed by the Contractor and the Inspector. Payment will not be allowed for labor, materials, or equipment included on T&M sheets signed by anyone other than the Inspector or the Inspector’s immediate supervisor.

D. General

It is the intent of the City to settle all Change Orders full and final at the time the Change Order is issued. Therefore, the following paragraph will be incorporated, in writing, on all Change Orders:

> “The compensation (time and cost) set forth in a Change Order comprises the total compensation due the Contractor, all Subcontractors, and all Suppliers, for the Work or change defined in the Change Order, including impact on unchanged work. By signing the Change Order, the Contractor acknowledges and agrees on behalf of himself, all Subcontractors, and all Suppliers, that the stipulated compensation includes payment for all work contained in the Change Order, plus all payment for the interruption of schedules, extended field overhead costs, delay, and all impact, ripple effect or cumulative impact on all other work under this Contract. The signing of the Change Order indicates that the Change Order constitutes full mutual accord and satisfaction for the change, and that the time and/or cost under the Change Order constitutes the total equitable adjustment owed the Contractor, all Subcontractors, and all Suppliers as a result of the change. The Contractor, on behalf of himself, all subcontractors, and all Suppliers, agrees to waive all rights, without exception or reservation of any kind whatsoever, to file any further claim related to this Change Order. No further claim or request for equitable adjustment of any type for any reasonably foreseeable cause shall arise out of or as a result of this Change Order or the impact of this Change Order on the remainder of the Work under this Contract.”

Costs which shall not be paid in Change Orders under this Contract include, but are not limited to, interest costs of any type; claim preparation or filing costs; legal expenses; the costs of preparing or reviewing proposed Change Orders or Change Order proposals;

lost revenue; lost profits; lost income or earnings; rescheduling costs; costs of idled equipment when such equipment is not at the site or has not yet been employed on the Work; lost earnings or interest on unpaid retainage; claims consulting costs; and the costs of corporate officer or staff visiting the site; any compensation due to the fluctuation of foreign currency conversion or exchange rates; loss of other business; changes in taxes or increased tax rates of any kind or any costs identified as unallowable under the provisions of the Federal Acquisition Regulations.

Extensions of time shall be based solely upon the effect of delays to the Work as a whole. Extensions of time shall not be granted for delays to the Work, unless the Contractor can clearly demonstrate, through analysis of the current updated schedule, that the delay to the Work as a whole arose or will arise from causes other than normal weather, beyond the control and without fault or negligence of the Contractor, or any Subcontractor, at any tier, and that such delays will, in fact, delay the progress of the Work as a whole. The Contractor shall not be entitled to a time extension unless it submits a Time Impact Analysis which is a calculation of the extent of the delay to the end date of the Work and which shows that the Work will be extended beyond the current Contract completion date. A Time Impact Analysis is a scheduling procedure which utilizes the networking techniques (fragnets) and a written analysis of the facts associated with the alleged delay to demonstrate the effect of the alleged delay on the critical path of the schedule. A "fragnet" is defined as a sequence of new activities and/or activity revisions that are proposed to be added to the existing current updated schedule to demonstrate (mathematically and graphically) the influence of the alleged delay on the end date of the Work and shall be the sole method for incorporating delays and impacts into the schedule. The objective of a Time Impact Analysis is to pinpoint, isolate, and quantify all time impact associated with a specific issue and determine its time relationship to current or future delays. Time extensions shall not be allowed for delays to parts of the Work that are not on the critical path of the currently approved monthly updated project schedule. Time extensions shall not be granted, nor delay damages of any kind whatsoever paid to the Contractor, until all available float, slack, or contingency time on the project is used and the end date of the Work is moved beyond the current, adjusted Contract completion date.

The cost summary, cost breakdowns and requests for cost reimbursement submitted by the Contractor (for delay, disruption, hindrance and interference associated with the changes, additions, deletions or extras) shall be itemized in a manner that, with mathematical certainty and without reliance upon probabilities or inferences, segregates the direct, actual reimbursable costs associated with each individual, change, addition, deletion, extra and (on an event-by-event basis) each individual delay or disruption event. Such cost summaries, breakdowns or requests shall not be based, in whole or in part, upon any methodology (such as “total cost” or “modified total cost” methodologies) that purports to calculate the Contractor’s additional costs of performance of the extra, change, addition or deletion (including without limitation the additional costs of delay, disruption or other impact) based on the difference between Contractor’s total actual Project or line item costs (with or without fee) and its original bid estimate for the Project or any original bid estimate line item. In connection with the foregoing, Contractor represents and warrants that it has the ability to generate and maintain complete and accurate cost accounting records that will reflect (i) the actual costs incurred or saved for each individual item of Extra Work, change, addition, deletion (including without limitation any costs of associated delay, disruption, interference, hindrance and the cumulative impact of each extra, change, addition, deletion on other parts of the Work); and, (ii) on an event-by-event basis, the effect of each delay or disruption that forms the basis of each request for extension of time, regardless of their scope, number, complexity, cumulative effect, or time of issuance or occurrence.

Except as provided in “Temporary Suspension or Delay of Work” of the General Conditions, Contractor shall have no right to recovery of any compensation, costs, expenses or damages resulting from delay, disruption, interference, or hindrance in the performance of the Work (including without limitation interruption of schedules, excess or extraordinary extended field and indirect overhead costs, loss of productivity and the impact, ripple or cumulative effect on other Work).

Contractor waives any claim or rights and remedies based on abandonment, quantum merit, rescission or other similar legal theory by reason of any of the following circumstances, which the Contractor acknowledges and agrees are within the reasonable contemplation of the parties: (i) changes, additions, deletions and extras to the Work after execution of the Contract and issued from time to time throughout the period of construction, regardless of their scope, number, cumulative value, or complexity, to correct errors, omissions, conflicts, and ambiguities in the Contract Documents, or to implement discretionary changes to the scope of Work requested by the City; (ii) the issuance and performance of changes, additions, deletions and extras in a manner that is not in sequence with the as-built or as-planned progress of the Work; (iii) changes due to Differing Site Conditions; (iv) suspensions of the Work or parts thereof, or limitations on access to portions or all of the Work, for the convenience of City or in the interests of the Project; (v) delay or disruption to the Work due to failure of the City, Engineer or Inspector to timely perform any contractual obligation.

E. Markups – Overhead and Profit

1. In addition to the direct expenditures specified for labor, materials and equipment in Subsection B, a fixed markup percentage will be paid for all overhead and profit, including: All insurance costs other than specifically mentioned in this Section, all field and office supervisors and assistants, all onsite project administration, security costs, the cost of small tools and consumables, incidental job burdens, and all general home office expenses and no separate allowance will be made therefor. Assistants to field and office supervisors include all clerical, stenographic, and general office help. Incidental job burdens include, but is not limited to, office equipment and supplies, temporary toilets, telephone, utilities, safety equipment, warning devices, personal protective equipment, and conformance to OSHA requirements. Project administration includes, but is not limited to, review and coordination, estimating, engineering, scheduling, and expediting relative to Change Orders, and updating and furnishing Record Drawings to incorporate changes, schedule update, supervision not applied solely to the Work of the Change Order, home office salaries and expenses, and City of Los Angeles Business Tax. The following maximum markup percentages shall be applied to the total amount of direct expenditures of the Contractor and Subcontractors, as noted in the Change Order Cost Summary Form.

Table A

Changed/Extra Work – Direct Costs	Markup Percentage
Contractor Direct Labor	20%
Contractor Direct Materials, Equipment, Other Items	15%
Subcontractor (of any tier) Direct Labor	20%
Subcontractor (of any tier) Direct Materials, Equipment, Other Items	15%
Contractor Administrative Fee for Subcontractor's (of any tier) Direct Labor, Materials, Equipment, Retail Rental Equipment, Other Items	5%

2. Bonds and Insurance

An additional allowance of one percent (1%) of all direct costs (less markup) is allowed.

3. Add/ Deduct Changes

The overhead rates determined above shall be applied to all additive Change Orders, except those utilizing as-bid Unit Prices or Stipulated prices listed in the Bid Proposal.

Any change in the Work involving both extras and credits shall show a net total cost, including subcontracts. Allowances for overhead and profit to the net total cost, as specified herein above, shall be applied if the net total cost is an extra; overhead and profit allowances shall not be applied if the net total cost is a credit. When the credit is due to a reduction in unit price quantity, the Contractor shall not be entitled to retain the markups in E.1 above for the reduced quantity. The estimated cost of deductions shall be based on labor and material prices on the date the Contract was signed.

F. City Furnished Materials, Equipment and Services

The Engineer reserves the right to furnish materials, equipment and services deemed expedient for use on the Change Order Work. The Contractor shall have no claim for profit or overhead on the cost of such materials, equipment and services.

G. Equipment Costs

The rates for rental or leased equipment shall not exceed the rates listed in the Retail Rental Rates as listed in Equipment Watch, Randall Reilly Data Division, 1509 Orchard Lake Drive Charlotte, North Carolina 98270, as adjusted to the regional area of the Work under this Contract. For T&M Change Orders, the rates are established by the actual paid invoice(s) that comply with the requirements of Subsections G.1 and G.3. Owned equipment costs shall not exceed the rates established by Subsection G.2. The most recent published edition in effect at the commencement of actual equipment use on Change Order Work shall be used.

The rates paid for any rented or leased equipment or tools shall include, oil, lubrication, supplies, small tools, necessary attachments, repairs and maintenance of any kind, depreciation, storage, insurance, profit and all incidental costs associated with the operation of the equipment or tools.

It is the responsibility of the Contractor to include any appurtenances added to equipment which would increase the basic rate for said equipment (i.e., hoe-ram, oversize bucket, etc.) as established in the acceptable rental rate guide. All equipment and/ or tools shall be acceptable to the Inspector, in good working condition, suitable for the purpose for which it is to be used, and necessary to complete the Change Order Work. Payment will be based on the manner in which the equipment was actually powered, operated and modified per the equipment manufacturer's recommendations.

1. Rented or Leased Equipment

For equipment rented or leased (including lease with purchase option) in arm's length transactions from outside vendors, the Contractor shall be paid the actual invoiced, rented or leased rates provided that the invoiced lease or rental rates do not exceed the rates set forth in the Equipment Watch retail rental rates. Arm's length rental or lease transactions are those in which the firm involved in rental or lease of such equipment is not associated with, owned by, have common management, directorship, facilities, or stockholders with the firm renting the equipment. Submittal by a Contractor of a retail rental or leased invoice from the lessor will be prima facie proof of compliance with the above. However, such invoices are not conclusive proof; if questioned, the burden of proof remains with the Contractor. In no event shall the leased equipment rate billed to the City be at rates exceeding those prescribed in the following table:

Actual Usage (Change Order & Contract Work Combined)	Payment Category
Less than 8 hours	Hourly Rate
8 or more hours but less than 7 days	Daily Rate
7 or more days but less than 30 days	Weekly Rate
30 calendar days or more	Monthly Rate

a. When in Use:

Actual equipment use time documented by the Inspector shall be the basis that the equipment was utilized on the changed work and paid for under the T&M Change Order. In addition to the lease or rental rate, equipment-operating costs shall not exceed the estimated hourly operating rate as set forth in the Blue Book. The hours of operation shall be based upon actual equipment usage on the T&M Change Order Work as recorded by the Inspector. For multiple shift work sequences, the allowable equipment rate shall not exceed fifty percent (50%) of the base rate, for second or third shifts.

b. When Idle:

Idle equipment is equipment on site and necessary to perform the T&M Change Order Work, but periodically not in actual use due solely to the impact of the changed work. Equipment operating costs due to idle time, documented by the Inspector, shall be paid at the rate determined in "G" (1) above. The "ESTIMATED OPERATING COST $/HR" will not be paid when the equipment is idle. Idle time shall include a reasonable time allowance to and from the project site. Payment for equipment necessary to be on the site to complete the Work, but not in actual use due solely to the impact of the T&M Change Order Work, shall be paid per Caltrans

Standard Specifications Section 8-1.07C, provided that its presence and necessity on the site has been documented by the Inspector, and further provided that the equipment was idled solely by actions of the City.

Payment for equipment or tools shall be limited to hours actually used on the T&M Change Order Work if the equipment or tool is already on site for Work under the original Contract. No “standby” time will be paid for equipment already on site for Work under the original Contract. Mark Up for retail rental equipment will be per Table A in Section E.1.

If equipment or tools are used intermittently and, when not in use, could be returned to the rental source at less expense than holding it at the work site, it shall be returned, unless the Contractor elects to keep it at the work site at no expense to the City.

2. Owned and Other Equipment

Equipment rates for owned equipment or equipment provided in other than arm's length transactions shall not exceed the total hourly costs as set forth in the Caltrans “Labor Surcharge and Equipment Rental Rates” effective at the time the T&M Change Order Work is performed. (The Caltrans equipment rental rates are available on the internet at http://www.dot.ca.gov/hq/construc/equipmnt.html.) If the equipment is not listed in Caltrans, then the Owned Rental Rate in Equipment Watch shall be used. When using Equipment Watch, the hourly rate for any period less than 7 days shall be the weekly rate divided by 40, plus the Operating Cost. Except as noted herein below, this equipment hourly rate plus the estimated operating cost per hour from Equipment Watch will be paid for each hour the equipment actually performs the T&M Change Order Work. Daily records listing the equipment units and their respective operators, identification code, and actual usage on the T&M Change Order Work, as certified at the end of each work day (or work shift if the Work is being performed in multiple work shift sequence) by the Inspector shall be the record upon which actual equipment use shall be based. For multiple shift work sequences, the Caltrans overtime factor shall be applied. When using the Blue Book, one-half the Non-Operating Cost will be deducted for second and third shifts. The Non-Operating Costs are the Blue Book monthly or weekly/40 rates, as applicable. It is agreed that this rate shall represent payment in full for all the Contractor’s and Subcontractor’s direct costs.

a. When Idle:

Payment for equipment necessary to be on the site to complete the Work, but not in actual use due solely to the impact of the changed work, shall be paid per Caltrans Standard Specifications Section 8-1.07C, provided that its presence and necessity on the site has been documented by the Inspector, and further provided that the equipment was idled solely by actions of the City. (When using the Blue Book the payment for idle time shall not exceed fifty percent (50%) of the Non-Operating Cost.) Idle equipment time will only be paid as a function of delays specifically directed or caused by the City's actions. In no event shall the idle time claimed in a day for a particular piece of equipment exceed the normal work schedule established for the project - usually eight (8) hours per day or forty (40) hours per week, and excluding Saturdays, Sundays, and holidays. For multiple shift work sequence, the allowable idle equipment rate shall not be allowed, for second or third shifts. It is agreed that this

rate shall represent payment in full for all the Contractor's and Subcontractor's direct costs.

3. Equipment Haulage and Set-up Costs

Documented and actual equipment haulage and set-up costs shall be paid for, if applicable as set forth in Subsection B.3.

4. Other Equipment Cost Guides

In the event that an owned piece of equipment used on a Change Order is not listed in Caltrans or Equipment Watch, costs may be derived from the Associated General Contractor's of America Equipment Ownership Guide, the Associated Equipment Dealers Guide, or the Equipment Rate Guide published by the U.S. Army Corps of Engineers as adjusted appropriately for the type of work and use and the regional area of the Work under this Contract.

H. Records

At any time should the Contractor deviate substantially from the schedule, method and sequence of operation, equipment, cost or pricing data furnished by the Contractor and agreed to by the City in connection with the Change Order or should the City determine that any price negotiated in connection with the Change Order is defective due to such deviation or the fault of the Contractor, the City reserves the right to reduce the Change Order cost and reissue the Change Order at the amount in which the City determines to be the actual costs to complete the Change Order Work.

Whenever any material or process is indicated or specified by patent or a proprietary name, or by name of a manufacturer in the Change Order, such direction shall not relieve the Contractor's responsibility or obligation to perform Work in accordance with the Contract requirements. The Contractor shall be solely responsible for, and have control over construction means, methods, techniques, sequences and procedures, coordination of all portions of the Contract and Change Order Work.

The Contractor shall on a weekly basis submit an approximate accounting of the amount expended on the T&M Change Order Work to date and an estimate of the Impact to the time of performance of the Contract Work.

I. Partial Payments for Time and Materials Change Order Work.

Progress payments for T&M Change Order Work shall only be made if the anticipated cost of the changed work is in excess of $100,000 and/or the time to perform the changed work will exceed two (2) months duration. To receive payments for T&M Change Order Work, the Contractor shall submit to the Engineer an invoice of the daily reports which were verified by the Inspector, with details and documents, verifying the Contractor's and Subcontractor's actual costs incurred for the T&M Change Order Work as set forth in Subsections B through H. Costs shall be submitted within thirty (30) calendar days after the T&M Change Order Work has been satisfactorily completed unless an extension of time for submittal is authorized in writing by the Inspector.

J. Field Office Overhead - Rate Per Day:

Subject to the provisions of this Subsection and "Temporary Suspension or Delay of Work" of General Conditions, for each day of approved time extension due solely to extras, changes, and additions to the Work, Contractor shall be entitled to compensation

for additional Daily Field Office Overhead as set forth herein. As a further condition to the Contractor's right to such additional compensation, the Contractor shall submit a detailed listing of the Daily Field Office Overhead cost components which are time related. The individual cost components shall represent costs which have been or will be incurred or increased as a sole or direct result of the time extension. This listing may include, but is not limited to, onsite project management, supervision, engineering, and clerical salaries; onsite office utilities and rent; onsite company vehicles and their operating expenses; site maintenance and security expenses. Daily Field Office Overhead costs which are unaffected by the increased time or time extension in the Change Order shall not be allowable costs of the Daily Field Office Overhead rates. These cost components include, but are not limited to, acquisition and installation of plant, stationary equipment, temporary construction facilities, utilities and office furnishings (unless such items are rented or leased); the preparation of the site including clearing, grubbing, grading, and fencing; and mobilization and demobilization expenses. The listing of the Daily Field Office Overhead cost components described above must be based on the Contractor's actual Field Office Overhead costs. This listing must be submitted with the first Change Order proposal that includes a time extension request per Subsection D. If the Contractor's time related Daily Field Office Overhead cost changes for subsequent compensable delays, then the Contractor shall submit a new Daily Field Office Overhead rate based on the Contractor's time related Daily Field Office Overhead costs at the time of the subsequent delay. If change order work is performed during a compensable delay, any Daily Field Office Overhead costs paid by that change order shall be deducted from the compensation owed for additional Daily Field Office Overhead during the same time period.

The Daily Field Office Overhead rate shall be multiplied by the number of days the Contract is to be extended in the Change Order, and shall then be added to the agreed upon costs of the Change Order. No markup for overhead costs and no profit allowance shall be allowed on the Extended Daily Field Office Overhead cost component of the Change Order. The derivation of an extended home office overhead rate and its application to Contract time extensions shall not be allowed.

The information submitted above shall be submitted in sufficient detail to allow review and shall be prepared in accordance with generally accepted accounting principles and applicable portions of the Federal Acquisition Regulations. The Engineer shall have the right to have an audit of the Contractor's costs performed, at the Contractor's sole expense, if the costs submitted are considered by the Engineer to be excessive, questionable, or unsupported. The overhead rates determined above shall be applied to all additive Change Orders, except those utilizing original as-bid unit prices under Subsection A.

END OF SECTION

SECTION 01255
PRICE REDUCTION FOR DEFECTIVE COST OR PRICING DATA

1.1 THE REQUIREMENT

A. If the ENGINEER determines that any price, including profit or fee, negotiated in connection with any Change Order under this Contract, or any cost reimbursable under this Contract, was increased because:

1. the CONTRACTOR furnished cost or pricing data which was not accurate, complete, and current as certified in the CONTRACTOR'S Certificate of Current Cost or Pricing Data;

2. a Subcontractor or prospective Subcontractor furnished cost or pricing data was submitted in support of a subcontract cost estimate furnished by the CONTRACTOR but which was not accurate, complete, and/or current as of the date certified in the CONTRACTOR'S Certificate of Current Cost or Pricing Data; or,

3. the CONTRACTOR or a Subcontractor or prospective Subcontractor, at any tier, furnished any data not within subsection 1.1A(1) or 1.1A(2),above, which was not accurate as submitted;

then the price shall be reduced accordingly, and the Contract shall be modified in writing as may be necessary to reflect such reduction. However, any reduction in the Contract price due to defective subcontract data of a perspective Subcontractor, when the subcontract was not subsequently awarded to such Subcontractor, will be limited to the amount (plus applicable overhead and profit allowances) by which the actual subcontract or actual cost to the CONTRACTOR if there was no subcontract, was less than the prospective subcontract cost estimate submitted by the CONTRACTOR; provided that the actual subcontract price was not affected by defective cost or pricing data.

The following certification from the CONTRACTOR is required to be provided on all Change Order quotations or requests for equitable adjustment in excess of ten-thousand dollars ($10,000).

CERTIFICATION OF CURRENT COST
AND PRICING DATA

This is to certify that, to the best of my knowledge and belief, cost or pricing data submitted in writing, or specifically identified in writing if actual submission of the data is impracticable, to the CITY in support of **[CONTRACTOR is to insert appropriate identification such as Change Order quotation, proposal quotation, price adjustment, etc.]** are accurate, complete, and current as of **[CONTRACTOR to insert date].**

SECTION 01270
MEASUREMENT OF QUANTITIES FOR UNIT PRICE WORK

1.1 THE REQUIREMENT

A. General

1. Unless otherwise specified, quantities of work shall be determined from measurements or dimensions in horizontal planes. However, linear quantities of pipe, piling, fencing and timber shall be considered as being the true length measured along longitudinal axis.

2. Unless otherwise provided in Specifications, volumetric quantities shall be the product of the mean area of vertical or horizontal sections and the intervening horizontal or vertical dimension. The planimeter shall be considered an instrument of precision adapted to measurement of all areas.

B. Methods of Measurement

1. Materials and items of Work which are to be paid for on basis of measurement shall be measured in accordance with methods stipulated in the particular sections involved.

C. Certified Weights

1. When payment is to be made on the basis of weight, the weighing shall be done on certified platform scales or, when approved by the ENGINEER, on a completely automated weighing and recording system. The CONTRACTOR shall furnish the ENGINEER with duplicate licensed weighmaster's certificates showing actual net weights. The CITY will accept the certificates as evidence of weights delivered.

D. Units of Measurement

1. Measurements shall be in accordance with Section 01420 – UNITS OF MEASURE of the GENERAL REQUIREMENTS. A metric ton or "tonne" is equal to 1,000 kilograms and the unit of liquid measure is a Liter (in U.S. Standard Measures, a pound is an avoirdupois pound; a ton is 2,000 pounds avoirdupois; and the unit of liquid measure is a gallon).

(END OF SECTION)

SECTION 01280
MEASUREMENT AND PAYMENT

PART 1 - GENERAL

1.01 PAYMENT

A. Upon Contract award, the accepted Schedule of Work and Prices shall become the Payment Schedule. Payment for Work under the Contract shall be made at the unit prices listed in the Payment Schedule. For lump sum bid items, payment shall be made in accordance with Section 01298.

B. Payment for the measured quantities of Work performed shall be considered full compensation for all of the CONTRACTOR's costs associated with the performance of the Work. These costs comprise direct labor, materials, tools, equipment, transportation, supplies, incidentals, and subcontract Work; and indirect costs such as field and home office overhead, consulting and design services, establishment, operation and removal of general plant, taxes, insurance, permits, bond, profit, and contingencies for the performance of all Work specified.

C. The costs for conforming to the requirements for measuring quantities shall be considered included in the fixed, unit, or lump-sum prices paid for the quantities being measured, and no additional compensation will be made therefore.

D. Except for items subject to the Variation in Quantities clause, the unit prices listed in the Payment Schedule shall be applicable for calculating the amount payable under each item of the Schedule. Estimated quantities indicated in the Payment Schedule are for bidding purposes only. Payment will be determined by actual measured quantities of the Work installed/performed as verified by the INSPECTOR.

E. Work specified or shown on the drawings for which the Payment Schedule does not provide a separate lump sum or unit price is considered incidental and is not separately paid. The cost for such Work is compensated in the prices bid for other Work items and no additional compensation shall be allowed.

1.02 MEASUREMENT OF QUANTITIES

A. Measure quantities in accordance with standard industry practice and as specified herein. The CITY will verify measurements. Measure quantities to the nearest whole number of units. Round down fractional units less than one-half; round up fractional units one-half or greater.

1. Measure sewer debris volumes by weight as described herein.

2. Measure areas in two mutually perpendicular axes in the plane of the surface being measured.

3. Measure linear quantities along the longitudinal centerline of the item, except as otherwise specified.

B. Measurement of a lump sum item shall be for the entire item, unit of Work, structure, or combination thereof, as listed or indicated in the Payment Schedule, except as otherwise specified. Progress payments for lump sum items in the Payment Schedule shall be made in accordance with Section 01298.

C. Determine quantities of Work performed for payment purposes and submit them to the INSPECTOR for approval. Assist the INSPECTOR in the taking of measurements by providing equipment, workers, and survey crews as required to verify quantities in accordance with the provisions for measurement specified herein.

1.03 REJECTED, EXCESS, AND WASTED MATERIALS

A. The following shall not be measured for payment:

1. Quantities of material wasted or otherwise disposed.

2. Rejected loads of material, including material rejected after it has been placed for failure to comply with specified requirements.

3. Material remaining on the transporting vehicle or in the pipeline.

4. Muck material not removed from designated location.

5. Material placed outside specified or indicated lines or limits.

6. Material not incorporated into the Work.

7. Material remaining on hand after completion of the Work.

B. No payment will be made for loading, hauling, and disposing of rejected material.

1.04 PAYMENT SCHEDULE FOR DAVID M. GONZALES RECREATION CENTER STORMWATER CAPTURE PROJECT

A. **BID ITEM 1: Mobilization**

1. The amount payable under this item is fixed at the bid price. This bid price for costs of work in advance of construction operations. This Bid Item is not included and attributable directly to any other specific Bid Items. For progress payments, the amount payable under this item shall be determined in accordance with Section 01292.

2. The Work shall include:

a. The movement of personnel, equipment, supplies and incidentals to the project sites.

b. Temporary laydown area and obtaining all permits and clearance requirements to secure and utilize the laydown area

c. The establishment of field offices, parking, utilities and other facilities at the Work Area Sites for the CITY and the CONTRACTOR, as specified in Section 01721.

d. Applying for permits and coordinating work with other agencies such as USACE, LADOT, AQMD, LADBS, LADWP, SCG and other utility companies and public agencies.

e. Work, such as handling homeless encampment within and/or adjacent to work site

CONTRACTOR shall coordinate with Public Affair Office (PAO) of BOS for any related issues mentioned above:

Heather Johnson
(213) 978-0325 (office)
(213) 798-8714 (cell)
Heather.Johnson@lacity.org

In addition, contact LA – Homeless Services Authority at (213) 225-6581 to handle any homeless issues

CONTRACTOR shall comply with all instructions and requirements of the PAO and the Mayor's office regarding homeless encampment issues. In addition, the CONTRACTOR shall comply with all instructions and requirements by the PAO, LADOT, LA County, and Mayor's office regarding any construction/bypass activities. All the costs related and associated with these issues shall be included in the Bid Item 1 "Mobilization".

B. **BID ITEMS 2 through 10: Allowance Items**

1. Allowance items have been established in the Bid Schedule to compensate the CONTRACTOR for the cost of performing such items as the CITY may require for the construction of the Work, but for which it is impracticable to ascertain the scope prior to bid. If the total cost compensable under each allowance item differs from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order for the difference between the total actual costs and the allowance amount as an additional amount due the CONTRACTOR or a credit to the CITY, as appropriate.

2. Reimbursement for all allowance items shall be as determined by GR-Section 01212.

3. The allowance items are as follows:

a. **Bid Item 2: Allowance for Engineer's and Inspector's Field Office Supplies per the GR, Section 01212**

Reimbursement for CONTRACTOR's expenses for furnishing, installing, and maintaining field office facilities for CITY construction management staff beyond specified requirements in the Section 01721 of these GENERAL REQUIREMENTS. As determined by the Section 01212 of these GENERAL REQUIREMENTS.

b. **Bid Item 3: Allowance for Differing Site Conditions per the GR, Sections 01212, 01253, and 01254**

This allowance will compensate the CONTRACTOR the additional expenses and measures taken to address and to mitigate Differing Site Condition(s) as defined and approved by the CITY per conditions set forth in Section 01253 of the specification in addition to abandoning and/or relocation of site utilities encountered during construction but not shown on the current project plans as directed by the CITY or the ENGINEER.

This allowance will compensate the CONTRACTOR in the event of an omission of an existing utility in the contract, or if an existing utility needs to be relocated due to its location in the field differing significantly from that shown in the contract drawings, and in the opinion of the ENGINEER that the utility relocation is necessary to avoid impacting the Work. If actual utilities are within 2 feet off

location shown on the drawings (centerline to centerline), there will be no compensation provided under this bid item. This allowance shall not compensate the CONTRACTOR to relocate existing utilities shown on the contract drawings proposed or specified for relocation by others.

c. **Bid Item 4: Allowance for Payment for Permits per the GR, Sections 01212, 01280, 01292 and 01721**

Reimbursement for CONTRACTOR's expenses for permits fees without compensation for any mark-ups. The CONTRACTOR shall include in the Bid the amount stipulated under PERMITS in the SCHEDULE OF WORK AND PRICES in the Bid Proposal as ana allowance for the costs of all required permits.

Costs shall be limited to the actual fees paid to the agencies and will be reimbursed based on original receipts only. No overhead, profit, or mark-ups shall be added to the cost of the permits. The CONTRACTOR shall deliver to the ENGINEER with each permit the original receipt. After all permits have been obtained and delivered, the actual costs of all permits shall be reviewed by the CONTRACTOR and the ENGINEER.

d. **Bid Item 5: Allowance for Opportunity to Partner per the GR, Sections 01212 and 01353**

Reimbursement of 100 percent of the expenses for partnering, as determined by Section 0153 of these GENERAL REQUIREMENTS. There shall be no mark-ups for overhead or profit.

e. **Bid Item 6: Allowance for Startup Assistance per the General Requirements Section 01750**

This bid item allows compensation for startup assistance per GR Section 01750. This allowance shall be used to reimburse the CONTRACTOR for this work per section 01212.

f. **Bid Item 7: Allowance for Additional Potholing**

This bid item allows compensation for exploratory excavations by potholing to verify or to discover the actual locations and size of existing underground utilities or improvements. This allowance shall also be used to reimburse the CONTRACTOR for potholing utilities not shown on the plans. For further details refer to section 01732.

g. **Bid Item 8: Allowance for Community Impacts Mitigation**

This allowance bid item shall be used solely to reimburse any/all CONTRACTOR's costs associated with performance of extra work related to community relations at the direction of the ENGINEER.

(1) Compensation for noise, vibration and other mitigation measures beyond the requirements indicated and specified in Sections 01561, "Environmental Control,"" and 01562, "Environmental Mitigation or Conditions," of these GENERAL REQUIREMENTS.

C. **Bid Item 9: Demolition**

This lump sum price bid shall compensate the CONTRACTOR for:

a. The cost of furnishing all labor, materials, equipment, and disposal fees for the demolition and disposal required including clearing and grubbing, trees, walkways, irrigation signs, benches, baseball field facilities, etc. as defined on the Contract Drawings. Refer to Section 01572.

D. **Bid Item 10: Stormwater Pollution Prevention Plan (SWPPP), Spec Section 01571**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials and equipment to prepare the permit to implement the Stormwater Pollution Prevention Plan (SWPPP), obtain the permit approval and implement the Plan throughout construction.

E. **Bid Item 11: Earthwork**

This lump sum price shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment to prepare for excavation, shoring, soil export, soil import, backfill, compaction, etc. Refer to Section 02310.

F. **Bid Item 12: Underground Infrastructure**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment for constructing the underground infrastructure including the storm drain piping, flow meter manholes, side gate structures, desilting basins, infiltration gallery, ventilation manholes and piping, etc. and all remaining underground infrastructure included in the Contract Drawings and Specifications that are not included in other Bid Items.

G. **Bid Item 13: Landscaping**

The lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment for landscaping including planting, soil preparation, trees, shrubs, groundcovers, bioswales, boulders, and irrigation, and all remaining landscape facilities and requirements included in the Contract Drawings and Specifications. Additionally, there will be a designated maintenance period for the landscaping to ensure the proper establishment and care of all installed plants and materials.

H. **Bid Item 14: Lighting**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment for the site lighting including MUSCO sports lighting, path lighting, security lighting, electrical wiring and conduits, etc.

I. **Bid Item 15: Electrical Service**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials and equipment for the electrical service and components, all remaining electrical facilities and requirements included in the Contract Drawings and Specifications that ae not included in other Bid Items.

J. **Bid Item 16: Instrumentation**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing **all** labor, materials and equipment for site furnishings including flow meter, level sensors, intrusion alarms, and Programmable Logic Controller cabinets, and all remaining instrumentation facilities and requirements included in the Contract Drawings and Specifications that are not included in other Bid Items that are onsite.

K. **Bid Item 17: Site Furnishings**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment for site furnishings the including bollards, rhino gates, benches, hydration stations, trach/recycling receptacles, educational signage and all

remaining site furnishings included in the Contract Drawings and Specifications that are not included in other Bid Items.

L. **Bid Item 18: Maintenance Access Road**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment for maintenance access road including asphalt paving, concrete paving for new roadway and repaving the existing Recreation Center parking lot adjacent to Herrick Ave.

M. **Bid Items 19: Baseball Field and Appurtenances**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials and equipment for the baseball fields and appurtenances including fencing, dugout, equipment, storage, bleachers, pitching areas, batting cages, and all remaining baseball field and appurtenances included in the Contract Drawings and Specifications that are not included in other Bid Items.

N. **Bid Items 20: Pavement Parking Lot**

This lump sum bid price shall compensate the CONTRACTOR for the cost of furnishing all labor, material and equipment for the parking lot within the Recreation Center including asphalt paving, concrete paving, pavement striping, marking stop signs, and wheel stops.

O. **Bid Items 21: Traffic Control**

This lump sum price shall compensate the CONTRACTOR for the cost of furnishing, implementing, monitoring and removing the temporary traffic control requirements on Drawings TR-1 through TR-2.

P. **Bid Items 22: TPL Allowance for Differing Site Conditions**

Refer to Bid item 3b, section 01280.

Q. **Bid Items 23: TPL Site Preparation**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials and equipment for site preparation including site demolition, rough and fine grading, topsoil stockpiling of soil removed from underground infrastructure excavation to be used as necessary import soils, erosion control and storm water pollution prevention and all remaining site preparation included in the Contract Drawings and Specifications that are not included in other Bid Items.

R. **Bid Items 24: TPL Landscaping**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials, and equipment for landscaping including planting, soil preparation, trees, shrubs, groundcovers, bioswales, boulders and irrigation, and all remaining landscape facilities and requirements included in the Contract Drawings and Specifications that are not included in other Bid Items. Contract Drawings and Specifications that are not included in other Bid Items.

S. **Bid Items 25: TPL Site Furnishings**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, materials and equipment for site furnishings including benches picnic tables, bike racks, trash/recycling receptacles, hydration stations, educational signage, park monument signage, park monument signage and all remaining site furnishings included in the Contract Drawings and Specifications that are not included in other Bid Items.

T. **Bid Items 26: TPL Hardscape**

This lump sum price bid shall compensate the CONTRACTOR for the cost of furnishing all labor, material and equipment for concrete paving around the Recreation Center Park site including walkway paving and mowcurbs, excluding maintenance access road.

(END OF SECTION)

SECTION 01291
NOTICE TO WITHHOLD AND/OR STOP NOTICE

1.1 THE REQUIREMENT

A. When a "Notice to Withhold" or "Stop Notice" is served upon the CITY, or the Board, pursuant to the lien statutes of the State of California, to withhold sufficient funds from payments to the CONTRACTOR in support of a claim resulting from default by the CONTRACTOR in payment for labor or materials used in prosecution of the Contract, the CITY shall withhold from payment due the CONTRACTOR an amount of money equal to the amount of the claim stated in the "Notice to Withhold" or "Stop Notice," and an additional amount equal to twenty-five percent (25%) of the amount of said claim, to defray the costs of litigation in the event of court action on the claim, for a total withholding of one and one quarter (1-1/4) times the stated amount of the claim. At the discretion of the CITY, the CITY may allow the CONTRACTOR to file with the CITY the bond referred to in the Civil Code of the State of California after which said monies will not be withheld on account of such "Notice to Withhold" or "Stop Notice."

B. In the event the Contract is terminated for CONTRACTOR default, any funds due the CONTRACTOR and retained by the CITY in accordance with SECTION 01292 -PAYMENTS of these GENERAL REQUIREMENTS, shall become the property of the CITY to the extent necessary to repay to the CITY any excess in the Contract Price above the cost of the Work completed at the time of termination. After issuance of Notice To Discontinue Work, no further payments will be made to the CONTRACTOR for the Work covered by the notice until completion of work and final settlement has been made.

END OF SECTION

This page intentionally left blank

SECTION 01292
PAYMENTS

1.1 PAYMENT FOR MOBILIZATION

A. Payment for mobilization shall be limited to those items of work described in MOBILIZATION of these GENERAL REQUIREMENTS. Whether Mobilization is included as a Contract Bid Item in the Bid Proposal Form or specified as part of the lump sum in the Contract Documents, the amount shall include full compensation for furnishing the labor, materials, tools, equipment and incidentals for all of the Work involved in mobilization in advance of construction operations. The CONTRACTOR shall submit to the ENGINEER for approval the Contract Price Breakdown with the amount established for mobilization.

B. The CONTRACTOR shall submit to the INSPECTOR for approval a breakdown of the amount established for mobilization. Total payment (100%) for obtaining insurance and bonds will be made upon proof of payment for those items. The payment for all other items of mobilization will be made when those items of mobilization have been completed and as specified below:

1. When the monthly partial payment estimate of the amount earned, not including the amount earned for mobilization, is five percent (5%) or more of the original Contract amount, the total amount earned for mobilization may be up to fifty percent (50%) of the Contract item price for mobilization. This amount will be included in the said estimate for payment.

2. When the monthly partial payment estimate of the amount earned, not including the amount earned for mobilization, is ten percent (10%) or more of the original Contract amount, the total amount earned for mobilization may be up to seventy-five (75%) of the Contract item price for mobilization. This amount will be included in the said estimate for payment.

3. When the monthly partial payment estimate of the amount earned, not including the amount earned for mobilization, is twenty percent (20%) or more of the original Contract amount, the total amount earned for mobilization may be up to ninety-five percent (95%) of the Contract item price for mobilization. This amount will be included in the said estimate for payment.

4. When the monthly partial payment estimate of the amount earned, not including the amount earned for mobilization, is fifty percent (50%) or more of the original Contract amount, the total amount earned for mobilization may be up to one hundred percent (100%) of the Contract item price for mobilization. This amount will be included in the said estimate for payment.

C. The adjustment provisions in CHANGE ORDERS of these GENERAL REQUIREMENTS, and the retention of funds provisions in this Section, shall not apply to the Contract lump sum item for Mobilization.

D. When other Contract items are adjusted as provided in CHANGE ORDERS of these GENERAL REQUIREMENTS, if the costs applicable to such item of work include mobilization costs, such mobilization costs will be deemed to have been recovered by the CONTRACTOR by the payments made for mobilization and will be excluded from consideration in determining compensation under said Article.

E. When the Contract does not include a Contract pay item for mobilization as specified above, full compensation for any necessary mobilization required shall be considered as included in the prices paid for the various Contract items of work involved and no additional compensation will be allowed.

1.2 PAYMENT FOR PERMITS

A. The Contractor shall obtain and pay for all permits necessary for performance of the Work in accordance with the provisions of PERMITS AND CONSTRUCTION EASEMENTS of the GENERAL CONDITIONS. If the Bid Proposal provides an allowance for Permits, the CONTRACTOR shall include in the Bid the amount stipulated under PERMITS in the SCHEDULE OF WORK AND PRICES in the Bid Proposal as an allowance for the costs of all required permits. Costs shall be limited to the actual fees paid to the agencies and will be reimbursed based on original receipts only and no overhead or profit shall be added to the cost of the permits. The CONTRACTOR shall deliver to the ENGINEER with each permit the original receipt. After all permits have been obtained and delivered, the actual costs of all permits shall be reviewed by the CONTRACTOR and the ENGINEER. If the total costs differ from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order for the difference between the total actual costs and the amount included in the Bid, as an additional amount due the CONTRACTOR or a credit to the CITY, as appropriate.

1.3 MONTHLY PROGRESS PAYMENTS

A. General

1. The quantities listed in the Bid schedule will not govern final payment. Payment to the CONTRACTOR will be made only for actual quantities of Contract items constructed in accordance with the Plans and Specifications. Upon completion of construction, if the actual quantities show either an increase or decrease from the quantities given in the Bid schedule, the Contract Unit Prices will prevail subject to the provisions of CHANGE ORDERS of these GENERAL REQUIREMENTS.

2. The unit and/or lump sum prices to be paid shall be full compensation for the items of work and all appurtenant work, including furnishing all materials, labor, equipment, tools, and incidentals.

3. Payment will not be made for materials wasted or disposed of in a manner not called for under the Contract. This includes rejected material not unloaded from vehicles, material rejected after it has been placed, and material placed outside of the Plan lines. No compensation will be allowed for disposing of rejected or excess material.

4. Payment for work performed or materials furnished under an Assessment Act Contract will be made as provided in particular proceedings or legislative act under which such Contract was awarded.

5. Whenever any portion of the Work is performed by the CITY at the CONTRACTOR'S request, the cost thereof shall be charged against the CONTRACTOR, and may be deducted from any amount due or becoming due from the CITY.

6. Whenever immediate action is required to prevent injury, death, or property damage, and precautions which are the CONTRACTOR'S responsibility have not been taken and are not reasonably expected to be taken, the CITY may, after reasonable attempt to notify the CONTRACTOR, cause such precautions to be taken and shall charge the cost thereof against the CONTRACTOR, or may deduct such cost from any amount due or becoming due from the CITY. CITY action or inaction under such circumstances shall not be construed as relieving the CONTRACTOR or its Surety from liability.

7. Guarantee periods shall not be affected by any payment, but shall commence on the date equipment or material is placed into service at the direction of the CITY. In the event such items are not placed into service, prior to partial or final completion of the project, the guarantee period will commence on the date of completion.

8. If the Contract comprises two or more major units of work readily separable and divisible, and for which separate prices are stipulated in the Contract, the CONTRACTOR may make separate requests for progress payment on each such unit, and the CITY will make such progress payments, statement of completion, acceptance, retention, and final payment in accordance with the procedure specified above for the entire Contract.

9. The making of any payment to the CONTRACTOR under this Contract shall not relieve the CONTRACTOR of any obligations hereunder. The CONTRACTOR is obligated to complete the Contract in its entirety and to deliver to the CITY such acceptably completed work, finished product or structure as is specified in the Contract, at the time or times specified. Until this Contract is fully performed by the CONTRACTOR, and the Work, product, or structure produced thereby is accepted by the CITY, the CONTRACTOR shall also be obligated to repair, replace, restore, or rebuild any fully or partially completed work or structure, or any materials or equipment required to be provided under the Contract which may be damaged, lost, stolen, or otherwise injured in any way. This particular obligation of the CONTRACTOR, with respect to any major unit of the type mentioned in this Section, will terminate upon the completion by the CONTRACTOR and acceptance by the CITY of such major unit.

B. Monthly Request for Payment

1. Unless otherwise prescribed by law, three (3) working days prior to the last work day of each month, or other such date mutually agreed upon by the CONTRACTOR and the INSPECTOR, the CONTRACTOR shall prepare and submit to the INSPECTOR, an estimate of the cumulative

amount and value of acceptable Work performed by the CONTRACTOR at the Jobsite up to that date. The value of the completed Work shall be based on the approved Schedule of Values in accordance with the provisions of SCHEDULE OF VALUES/CONTRACT PRICE BREAKDOWN of these GENERAL REQUIREMENTS. Said amount shall also include the value of all acceptable materials and equipment for the Contract that have been delivered and suitably stored but not yet used in the Work, subject to the requirements of this Section.

2. The CONTRACTOR will be required to make all monthly requests for payment on the CITY'S Contract Payment Request Form. CONTRACTOR shall submit Contract Payment Request Form with the approved Payment Request estimate of work to the INSPECTOR. That form requires that the CONTRACTOR certify, under penalty of perjury, to the following:

   a. No workers were required or permitted to work more than eight (8) hours in any one calendar day, except in cases of emergency, and except as provided by law.

   b. Not less than the prevailing rates of wages, as set forth in the Contract for this Work, have been paid all laborers, workers, and mechanics employed to perform this Work.

   c. There were no substitutions of Subcontractors, no assignment or transferences of Subcontractors or Sub-Subcontractors, except as approved by the Board of Public Works.

   d. All of the provisions of Los Angeles Administrative Code, Section 10.8, pertaining to non-discrimination in employment have been complied with.

C. Payments for undelivered equipment, specifically manufactured equipment to be incorporated into the Work, excluding "off the shelf" or catalog items, will be made when all of the following conditions exist:

   1. The equipment must be specifically designated in the Technical Specifications for partial payment prior to delivery,

   2. The equipment to be specifically manufactured for the Project could neither be readily utilized on, nor diverted to, another job; and,

   3. A fabrication period of more than six (6) months is anticipated.

D. On lump-sum Contracts the INSPECTOR'S estimate of the monthly payment due the CONTRACTOR is an estimate of work acceptably completed and will not be required to be made by strict measurement.

E. Upon verification and approval by the INSPECTOR, the progress payment estimate shall be forwarded to the Payment Section of the Bureau of Contract Administration for processing.

F. Payment to the CONTRACTOR shall be made within 30 days after an undisputed and properly submitted payment request is received from the CONTRACTOR by the Bureau of Contract Administration Payment Section.

F. The CITY shall retain a portion of the amount otherwise due to the CONTRACTOR, as follows:

1. Retention of five percent (5%) will be held on the original Contract value on each approved payment claim until the amount paid of the original Contract equals fifty percent (50%). The INSPECTOR may then, at its sole discretion, discontinue further retention on the original Contract value for all subsequently approved payment claims.

2. At any time during the course of the Contract, the INSPECTOR may, at its sole discretion, reinstate the five percent (5%) retention.

3. In the event the Contract is terminated for CONTRACTOR default, any funds due the CONTRACTOR and retained by the CITY in accordance with these provisions, shall become the property of the CITY to the extent necessary to repay to the CITY any excess in the Contract Price above the cost of the Work completed at the time of termination. After issuance of Notice To Discontinue Work, no further payments will be made to the CONTRACTOR for the Work covered by the notice until completion of work and final settlement has been made.

G. Additional deductions will be made from each monthly payment request for amounts due the CITY as follows:

1. Equipment or materials furnished by the CITY.

2. Services rendered to the CONTRACTOR by the CITY.

3. Amounts due the CITY for liquidated damages under the terms of the Contract.

4. Amounts required to be deducted by federal, state, or local governmental authority or other provisions of these Contract Documents.

H. From the balance thus determined will be deducted the amount of all previous payments, and the remainder shall constitute the monthly payment due the CONTRACTOR.

I. The monthly payments may be withheld or reduced, for the following reasons:

1. If the CONTRACTOR is not diligently or efficiently complying with the express intent of the Contract;

2. If there are unresolved Notices of Non-Compliance;

3. If Technical Manuals are not submitted;

4. If Record Drawings are not kept up-to-date;

5. If progress photographs are not submitted;

6. If construction schedules are not submitted in accordance with these General Requirements; or

7. If the Solid Waste Diversion and Disposal Report is not submitted with progress payment estimate.

8. Failure of the CONTRACTOR to maintain insurance as required by the CONTRACT.

9. Upon written request of the ENGINEER.

J. The CONTRACTOR shall promptly submit the following in response to requests by the INSPECTOR:

1. All information and records necessary to determine the cost of the Work for purposes of estimating monthly payment.

2. All itemized statements, in a form satisfactory to the INSPECTOR, of the actual cost of all acceptable materials delivered by the CONTRACTOR to the site.

K. The making of any payment to the CONTRACTOR shall not relieve the CONTRACTOR from Contractual obligations. These payments shall not be construed as the transfer of ownership of any equipment or materials to the CITY.

L. Responsibility of ownership shall remain with the CONTRACTOR who shall be obligated to store, protect, repair, replace, rebuild or otherwise restore any fully or partially completed work or structure for which payment has been made. The CONTRACTOR shall replace any materials or equipment required to be provided under the Contract which may be damaged, lost, stolen, or otherwise degraded in any way prior to acceptance of the Work under the Contract.

M. Escrow Account for Retention Payments

1. Under Section 22300 of the Public Contract Code, the CONTRACTOR has the option to deposit securities with an Escrow Agent as a substitute for the CITY withholding the required five percent (5%) retention from progress payments to ensure performance of any contract entered into between the CITY and the CONTRACTOR. Provided adequate value of securities is on deposit with the Escrow Agent, retention payments are then made directly to the CONTRACTOR by the CITY. As an option, Section 22300 also permits the CONTRACTOR to have retention payments made directly to the Escrow Agent, with no requirement for the CONTRACTOR to deposit securities with the Escrow Agent. If the CONTRACTOR requests neither of the above alternatives, the retention funds will be retained by the CITY and invested by the City Treasurer, in which case, interest earned will accrue to the benefit of the CITY.

2. Under the terms of the Escrow agreement, the CONTRACTOR has the option to arrange to deposit securities up front for up to the full five percent (5%) of the total amount of the Contract **(Option "A")**, or to have

the CITY make payments directly to the Escrow Agent for the amount the CITY withholds for the required retentions with no requirement for the CONTRACTOR to deposit securities in advance **(Option "B")**. These arrangements are set forth in the Escrow Agreement.

3. At the CONTRACTOR'S request, the Bureau of Accounting will provide the necessary paperwork to establish the Escrow Account. For information contact:

Ester Paras; Senior Accountant II

1.4 PAYMENT FOR MATERIALS OR EQUIPMENT DELIVERED AND STORED ON THE JOBSITE

A. Materials and/or equipment are eligible for partial payment when delivered and stored at the Worksite as follows:

1. Each individual piece of the material or equipment must be valued at $5,000 minimum.

2. The materials and equipment are intended for permanent installation.

3. The materials or equipment are specifically delineated in the Contract, specially manufactured for this project and not readily useable on other projects.

4. The CONTRACTOR shall store the materials and equipment as required in STORAGE OF MATERIALS AND EQUIPMENT in these GENERAL REQUIREMENTS.

5. Living, perishable, degradable or standard stocked items are ineligible.

B. The partial payment is limited to the lesser of 1) Ninety-five percent (95%) of the invoice cost, or 2) The bid item amount less an estimate by the City for installation.

C. The CONTRACTOR shall include cost-loaded scheduling activities for items of material and equipment that the CONTRACTOR intends to request "Partial Payment for Materials or Equipment Delivered and Stored on the Job Site".

D. The CONTRACTOR shall provide all documentation necessary to establish the cost of such materials and equipment for the "Schedule of Values".

E. Prior to start of Work, the CONTRACTOR shall provide the INSPECTOR with a list of all materials or equipment proposed to receive partial payment under the provisions of this Article, along with its supplier, fabricator or manufacturer.

F. Change orders and/or time extensions will not be issued for any costs or impacts related to compliance with this section, including documentation, special handling, or special storage.

1.5 PAYMENT FOR MATERIALS OR EQUIPMENT STORED OFF THE JOBSITE

A. Partial payment for materials or equipment stored off the Jobsite shall be subject to the following conditions:

3. Payment will not be made for any materials or equipment unless each individual piece of the material or equipment becomes a permanent part of the Work and has a value of more than $5,000.

4. The materials and/or equipment are required by the Specifications, and are specifically manufactured for the Project and could not readily be utilized or diverted to another job.

5. No payment will be made for living or perishable plant material, or for degradable materials such as rock, sand, cement, or for reinforcing steel, miscellaneous piping, off the shelf and catalog items, or similar items, until they are incorporated into the Work.

6. Payment for the materials or equipment stored shall not exceed sixty percent (60%) of the invoice cost of the materials or equipment. Percent of the invoice paid shall be at the discretion of the CITY. The amount paid shall not exceed the total amount of the Bid item less an amount estimated for installation.

B. The CONTRACTOR shall include cost loaded activities for the materials and equipment, for which payment will be requested, in the Schedule of Values. The CONTRACTOR shall provide all documentation necessary to establish the cost of the materials or equipment.

C. All suppliers, fabricators, or manufacturers who intend to furnish materials or equipment to the CITY must file a notice with the CITY in accordance with the State of California lien laws.

D. Each supplier, fabricator or manufacturer shall file a list, with the INSPECTOR, indicating the materials or equipment to be furnished to the Project. They shall also provide a notarized declaration from their company indicating the employees authorized to sign an unconditional release for the company. The persons signing the declaration and the unconditional release shall be identified by name and title.

E. Each request for payment shall include a notarized Unconditional Release that conforms to the California Civil Code for no less than 60% of the invoice cost of the materials or equipment. The release shall be signed by an authorized employee identified in the corporate declaration. The request shall include the suppliers invoice for the materials or equipment.

F. The CONTRACTOR shall store the materials and equipment as required in STORAGE OF MATERIALS AND EQUIPMENT of these GENERAL REQUIREMENTS, in a bonded warehouse or facility approved by the INSPECTOR. The storage site shall be located within fifty (50) miles of the geographic limits of the CITY. The materials and equipment shall be physically segregated from all other materials or equipment within the facility and shall be identified as being the "PROPERTY OF THE CITY OF LOS ANGELES". The CONTRACTOR shall exercise all measures necessary to ensure preservation of the quality, quantity, and fitness of such materials or equipment and shall perform the manufacturers' recommended maintenance of the materials or equipment. The CONTRACTOR shall inspect the materials and equipment, and submit a monthly written report to the INSPECTOR listing all the equipment stored, results of their inspection, and the maintenance performed.

G. The CONTRACTOR shall grant the INSPECTOR and the ENGINEER access to the storage facility at any time and assist the INSPECTOR and the ENGINEER in conducting a full view, piece by piece, inventory of all such material or equipment.

H. The CONTRACTOR shall provide all additional insurance necessary to insure the materials or equipment against loss of damage. The insurance provided shall be provided as stated in INSURANCE of the GENERAL CONDITIONS. The insurance shall cover the material or equipment, while stored at the approved site, while in transit to the Jobsite, while being off-loaded at the site and until the material or equipment is incorporated into the Work and the CONTRACT is accepted by the BOARD.

I. The CONTRACTOR shall be responsible for any damage to, defects therein, mis-fabrication thereof, or loss of the materials or equipment.

J. The CONTRACTOR shall be responsible for any resulting project delays or consequential damages as if the CONTRACTOR were the owner of the material or equipment until it is incorporated in the Work and accepted by the CITY.

K. The CONTRACTOR shall absorb any and all cost incurred to meet the requirements of this article without modification in the Contract amount.

L. The CONTRACTOR shall present the storage arrangements in writing and sign a Security Agreement, which shall be submitted to the INSPECTOR for approval by the City Attorney. This agreement shall set forth the terms of ownership, storage and insurance necessary to insure the material or equipment against damage or loss.

1.6 FINAL PAYMENT

A. Final Payment of all monies owed the CONTRACTOR shall be made within 60 days of the date of Final Field Acceptance by the Final Inspector after deducting all prior payments and all amounts to be withheld under the provisions of the Contract, including the following items:

1. Liquidated damages, as applicable;

2. "Disputed Funds" including, but not limited to, the following:

a. Penalty and/or restitution for failure of the CONTRACTOR to pay prevailing wages as required by the contract.

b. Penalty for failure of the CONTRACTOR to receive approval of all Subcontractor(s) prior to said Subcontractor working on the project.

c. Penalty for failure of the contractor to receive approval for Subcontractor substitution(s).

d. Penalty for failure of the contractor to receive approval for a reduction in the dollar amount paid a bid-listed and/or approved Subcontractor;

3. Lien claims or Stop Notices filed on behalf of suppliers, Subcontractors, and labor performed in connection with the project; except, that upon submittal of a Stop Notice Release Bond issued by an approved Surety Company executed in favor of the CONTRACTOR, the CITY will release such portion of the retained funds to said CONTRACTOR that is being held solely to cover Stop Notice Claims.

B. No claim of the CONTRACTOR under this Article shall be allowed unless the CONTRACTOR has given the required written notice. Nor shall a claim by the CONTRACTOR for an equitable adjustment hereunder be allowed if asserted after final payment under this Contract.

C. The acceptance by the CONTRACTOR of final payment and retention shall release the CITY, its officers, agents, representatives or employees, as representatives of the CITY, from all claims and all liability to the CONTRACTOR for all matter in connection with the Work and all acts of the CITY relating to or arising out of the Work.

END OF SECTION

SECTION 01298
SCHEDULE OF VALUES / CONTRACT PRICE BREAKDOWN

1.1 THE REQUIREMENT

A. The Schedule of Values shall be used as a basis for determining progress payments on a lump sum contract or any designated lump sum bid item. The Schedule of Values shall be a schedule of cost loaded construction activities equal, in total, to the lump sum bid and shall be in such form and sufficient detail to correctly represent a reasonable apportionment of the lump sum. Prior to submitting an invoice for payment, the CONTRACTOR shall have submitted a detailed Schedule of Values and obtained approval from the INSPECTOR.

B. Each lump sum bid item on the Schedule of Work and Prices, as set forth in the Bid must be broken down separately. The breakdown of each lump sum bid item must cover the cost of construction required by the Drawings and Project Manual for that item. The sum of the values for the construction activities, within a bid item, must equal the total bid amount for that item. The breakdown shall include subcontract amounts which shall not deviate from the amounts submitted in the Bid Proposal. The CONTRACTOR shall provide certification from the Subcontractors certifying the subcontract amounts.

C. Each activity in the Schedule of Values shall delineate one construction activity. For example, the placement of concrete between construction joints, the construction of an electrical duct bank or pipeline between points A & B. The costing for each activity should include all costs for the labor and materials or equipment required to complete the activity. For example, concrete construction activities should include all costs for the forming, placing of reinforcement, placing concrete and curing. The cost for pipeline construction activities should include materials, equipment and installation including pipeline supports or thrust blocks. The excavation and backfill for a pipeline or structure may be separate activities. The Contract Price breakdown shall include the itemized costs for the plant establishment and any maintenance services to be performed before the final project acceptance is made. No non-construction activity shall be cost loaded.

D. The CONTRACTOR shall use cost loaded construction activities from the Construction Schedule as a Schedule of Values. Each construction activity shall be encoded to its bid item and a sort provided for each bid item totaling the cost loaded amount. The total of the Cost Loaded amounts for each bid item shall equal the amount bid for that item. The total of the Schedule of Values shall equal the current Contract value at all times. At any time during the progress of the Work of the Contract the INSPECTOR reserves the right to review the cost loading of the Schedules of Values and direct necessary revisions. When requested by the INSPECTOR, the CONTRACTOR shall provide all information necessary to substantiate the cost loading.

SECTION 01311
PRE-CONSTRUCTION SAFETY CONFERENCE

1.1 THE REQUIREMENT

A. The CONTRACTOR's Project Manager, Project Engineer, Safety Coordinator and Superintendent(s) shall attend a Pre-Construction Safety Conference conducted by the INSPECTOR and the ENGINEER. The CONTRACTOR will be informed of the date, time, and location of the Pre-Construction Safety Conference by the ENGINEER. The Pre-Construction Safety Conference shall take place within twenty-one (21) calendar days after Notice of Award and prior to the start of any Work at the site. The CONTRACTOR shall select additional personnel from its field staff, vendors, suppliers, and manufacturers, and from every Subcontractor, at any tier, to attend the Pre-Construction Safety Conference.

B. The CONTRACTOR shall provide to the ENGINEER and the INSPECTOR, at the Pre-Construction Safety Conference, the following documents.

1. Injury and Illness Prevention Program (IIPP) which shall address site specific concerns and shall also Include the following, as a minimum:

a. Occupational Injury and Illness Investigation and Reporting System, including a system for providing all injury reports to the INSPECTOR and the ENGINEER.

b. Safety Inspection System

c. Hazard Communication Program.

d. Methods of identifying hazards including a procedure for notifying the INSPECTOR and the ENGINEER when a hazard is identified.

e. Training Documentation System.

f. Safety Communication and Remediation Procedures.

2. During periods of Pandemic/Epidemic of infectious diseases, as declared by the local and/or State health officials, the Contractor may be required to modify his/her attendance to the Pre-Construction Safety Conference and all other meetings by teleconference.

a. Following the guidelines from local and/or State health officials, the Contractor shall modify the IIPP to include these additional requirements:
   i. Personal Protective Equipment (PPE) for all workers.
   ii. Social distancing.
   iii. Hygiene maintenance.
   iv. Quarantine of infected workers and those who have come in contact.
   v. Testing requirements as prescribed by the State/Local health officials.

vi. Any other requirements as prescribed by State/Local health officials as they become available.

b. Additionally, the Contractor shall follow these guidelines as required for construction inspection:

i. Los Angeles Department of Building and Safety Announcement No. 5 “Covid-19 Safety Guidance for Construction Sites”.
ii. Bureau of Contract Administration Job Memorandum “Covid-19 Safety Guidelines for Construction Sites”.

3. Identification of person(s) responsible for safety of this site, who will be assigned to the site during the performance of the work, for the CONTRACTOR and all Subcontractors at any tier.

4. Emergency Action and Fire Prevention Plan.

5. Hazardous Materials Procurement, Storage, Handling, Waste Control and Disposal Procedures.

a. The CONTRACTOR’s Lock Out/Tag Out, Confined Space Entry, Hazardous Materials/Waste Control and all other site specific safety programs shall meet or exceed the Bureau of Sanitation’s standards for this site. These standards are available to the CONTRACTOR upon request from the ENGINEER.

6. It shall be the CONTRACTOR’s responsibility to assure that all field forces know and obey all safety and emergency procedures to be maintained at the job site. The CONTRACTOR shall further assure that a supervisor is present at all times during any field work who is knowledgeable of and responsible for the enforcement of the CONTRACTOR’s required safety procedures.

END OF SECTION

SECTION 01312
PROJECT MEETINGS

PART ONE - GENERAL

1.1 DESCRIPTION

A. Work Included:

1. Required to enable orderly review during pre-installation conference and progress of Contracted Work, and to provide for systematic discussion of installation problems and other construction problems arisen, the ENGINEER will conduct project meetings throughout the construction period. Conform to the Pre-Construction Scheduling Conference and Project Schedule Review Meeting provisions in Section 01321 – CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS of the GENERAL REQUIREMENTS.

B. Related Work:

1. Documents affecting work of this Section include, but are not necessarily limited to, GENERAL CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS

2. The CONTRACTOR'S relations with his Subcontractors and materials suppliers, and discussions relative thereto, are the CONTRACTOR'S responsibility and normally are not part of project meetings content.

3. Pretesting Procedural Conference in Section 01453 – SAMPLING, TESTING AND FABRICATION INSPECTION of the GENERAL REQUIREMENTS.

4. CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS in Section 01321 of the GENERAL REQUIREMENTS.

1.2 SUBMITTALS

A. Conform to provisions of Section 01330 – SHOP DRAWINGS / SUBMITTALS of GENERAL REQUIREMENTS.

B. Agenda Items:

1. To the maximum extent practicable, advise the ENGINEER at least twenty-four (24) hours in advance of project meetings regarding items to be added to the agenda or requesting the cancellation of any Meeting.

C. Minutes:

1. The ENGINEER will compile minutes of each project meeting and will furnish one copy to the CONTRACTOR, INSPECTOR and all other involved parties.

2. Recipients of copies may make and distribute such other copies as they wish.

3. Special denotation mutually agreed by all parties shall be used in Meeting Minutes to identify old and new business, to distinguished new discussion/statement made in subsequent meeting from previous meetings, or any revision to any part of the minutes.

1.3 QUALITY ASSURANCE

A. For those persons designated by the CONTRACTOR to attend and participate in project meetings, provide required authority to commit the CONTRACTOR to solutions agreed upon in the project meetings. Refer to provisions indicated in Section 00302 - CONTRACTOR'S REPRESENTATIVE AT THE SITE of the GENERAL CONDITIONS.

PART TWO - PRODUCTS (NOT APPLICABLE)

PART THREE - EXECUTION

3.1 MEETING SCHEDULE

A. Except as noted below for Preconstruction Meeting, project meetings will be held bi-weekly or as otherwise directed by the ENGINEER.

B. Coordinate as necessary to establish mutually acceptable schedule for additional meetings.

3.2 MEETING LOCATION

A. The ENGINEER will establish the meeting location. To the maximum extent practicable, meetings will be held in CONTRACTOR'S job office at the Jobsite.

3.3 PRECONSTRUCTION MEETING

A. Preconstruction Meeting will be scheduled to be held within fifteen (15) working days after the City has issued the Notice to Proceed.

1. Provide attendance by authorized representatives of the CONTRACTOR and major Subcontractors.

2. The ENGINEER will advise other interested parties.

B. Minimum Agenda: Data will be distributed and discussed on at least the following items.

1. Organizational arrangement of CONTRACTOR'S forces and personnel, and those of the subcontractors, and materials suppliers.

2. Organizational arrangement of the CITY'S forces and personnel, such as the User's Agency, Project Manager, ENGINEER, CITY'S Scheduler, CITY'S Abatement Consultant, Soil Engineer, CITY'S Surveyor, INSPECTOR and other authorized representatives.

3. Channels and procedures for communication.

4. Construction schedule, including sequence of critical work.

5. Contract Documents, including distribution of required copies of original Documents and revisions.

6. Processing of Shop Drawings and other data submitted to the ENGINEER for review.

7. Processing of Bulletin, addenda, field decisions, Requests for Information and Change Orders.

8. Rules and regulations governing performance of the Work.

9. Procedures for site security, Project quality control, housekeeping, and related matters.

10. It is the responsibility of the CONTRACTOR for Job Site Safety & First Aid, however, it shall be on the agenda.

11. Procedures to request air monitoring services, soil inspection, survey, etc. if specified, shall be provided by the CITY.

12. Emergency Information: The name, addresses, telephone and fax numbers of the CONTRACTOR, and Subcontractors, or their representatives, shall be filed with the ENGINEER prior to start of Contracted Work.

3.4 PROJECT MEETINGS

A. Attendance:

1. To the maximum extent practicable, the Project Superintendent and other representatives who have full knowledge of the project and full authority to act for the CONTRACTOR shall represent the CONTRACTOR at Project Meetings throughout the progress of the Work. All representatives must conform to the provisions indicated in Section 00302 - CONTRACTOR'S REPRESENTATIVE AT THE SITE of the GENERAL CONDITIONS.

2. Subcontractors, materials suppliers, and others may be invited to attend these Project Meetings in which their aspect of the Work is involved.

3. CONTRACTOR may not cancel or be absent from any meeting without advanced approval from the ENGINEER. The CONTRACTOR must submit a written request with reason to the ENGINEER twenty-four (24) hours before the scheduled meeting. If approved, the CONTRACTOR shall notify all parties of the cancellation.

B. Minimum Agenda:

1. Review, revise as necessary, and approve minutes of previous meeting.

2. Review progress of the Work since last meeting. Review actual starts and finish dates of activities.

3. Review status (total complete and outstanding) of submittal for approval, Request-for-Information and Change Orders.

4. Identify old and new problems, which impede planned progress**,** identify responsible party for the follow-up actions. Mutually agree to a common solution and date of correction.

5. Develop corrective measures and procedures to regain lost time on the planned schedule.

6. Review Weekly Progress Reports including the forecasts as required in Section 01321 – CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS of the GENERAL REQUIREMENTS.

7. Status of Record drawings and the Record Project Manual.

8. Jobsite Walk-Through. Record all discussion and follow-up actions.

9. Any Jobsite health and/or accident or safety issues.

C. Revisions to Minutes:

1. Unless published minutes are challenged in writing prior to the next regularly scheduled progress meeting, they will be accepted as properly stating the activities and decisions of the meeting.

2. Persons challenging published minutes shall reproduce and distribute copies of the challenge to all indicated recipients of the particular set of minutes.

3. Challenge to minutes shall be settled as priority portion of "old business" at the next regularly scheduled meeting.

3.5 SITE MEETINGS

A. Required when necessary to enable orderly review and discussion of site conditions and problems requiring solution during the progress of the contracted work. Notify the ENGINEER of the need for additional site meetings as early as possible to resolve the problem without any impact to the Project Schedule.

B. Provide necessary labor, tools, and equipment such as shoring, scaffolding, ladder, etc. to gain access to the site.

C. CONTRACTOR or CONTRACTOR'S authorized representative shall be present at all times.

D. All discussion and follow-up actions shall be recorded by ENGINEER and the minutes shall be distributed at the next meeting or at earliest time.

END OF SECTION

This page intentionally left blank

SECTION 01313
WORK BY CITY OR OTHERS

1.1 THE REQUIREMENT

A. The CONTRACTOR shall be responsible for ascertaining the nature and extent of any simultaneous, collateral and essential work by others. The CITY, its employees and contractors, and others, shall have the right to operate within or adjacent to the worksite to perform such work.

B. The CITY, the CONTRACTOR, their employees, Subcontractors and others, shall coordinate their operations and cooperate to hold interference to a minimum.

C. The CONTRACTOR shall include in its Bid and schedule all costs and time involved as a result of coordinating its work with others. The CONTRACTOR shall not be entitled to additional compensation from the CITY for damages resulting from such simultaneous, collateral and essential work. The CONTRACTOR'S coordinating efforts shall include redeployment of his work forces to other parts of the Work.

D. Should the CONTRACTOR be delayed by the CITY, and such delay could not reasonably have been foreseen and prevented by the CONTRACTOR, the ENGINEER will determine the extent of the delay, the effect of the delay on the project as a whole, and any commensurate extension of time.

E. The CONTRACTOR is required to notify affected CITY offices of Work to be done as specified in the following table:

Item	Office of LADOT to be notified	Cost to be borne by	Required Notice (working days)
Work on signal – controlled intersection	Traffic Signal Inspector: Central Area: (213) 485-1071 Western Area: (213) 485-6834 Valley Area: (818) 779-9433 ATSAC Project Engineer: (213) 972-8664	Contractor	3
Traffic Signal and Interconnect damage	Signal Superintendent: Daytime: (213) 473-8465 After Hours: (818) 374-4823		Immediate
Parking meter damage	Parking Meter Supervisor: (213) 473-0644		
Parking meter removal and replacement	Parking Meter Planning Supervisor: (213) 473-0644	City**	5
Material and labor by LADOT	For Scheduling of: Sign/Striping: (213) 485-9331 Signal: (213) 485-6818		
Traffic Sign removal, relocation and replacement	Appropriate District Transportation Engineer*:		
Parking restrictions, changes relating to temporary striping	Central District: (213) 972-4990		10
Final traffic striping and pavement marking	East Valley District: (818) 374-4688	Contractor	5
Temporary Traffic Control Plan	Hollywood District: (323) 957-6843		30
Temporary striping installation mark out	West Valley District: (818) 774-4306		2
Offsite Detour Signs	Western District (310) 575-8138 Southern District: (310) 732-4599		5
Placement of temporary “No Parking” signs	Special Traffic Control Section: (213) 485-2298		4

***** For B-Permit projects, notify citywide investigations (213) 972-8687.

******On B-Permit projects, the costs shall be charged to the permittee as required by Section 62.110 of the Los Angeles Municipal Code.

END OF SECTION

SECTION 01321
CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS

1. THE REQUIREMENT

A. Progress of the Work

1. It is expressly understood and agreed that the time of beginning, the rate of progress, and the time of completion of the Work are of the essence of this Contract. The Work shall be executed with such progress as required to prevent any delay to other CONTRACTORS that may be working on other contracts at the site, the Contract milestones, and the general completion of the Contract.

B. CONTRACTOR'S Construction Scheduler

1. The CONTRACTOR shall continuously employ or retain the services of a Construction Scheduler. The Construction Scheduler shall have at least three (3) years of verifiable experience as the person primarily responsible for preparing and maintaining detailed project schedules on projects of the same or similar size and nature as this project. The Construction Scheduler is required to attend all meetings pertaining to scheduling and progress of the Work. If the Construction Scheduler leaves employment of the CONTRACTOR, the CONTRACTOR must fulfill the requirements of B.2 a and b within thirty (30) days.

2. Within five (5) calendar days after the Notice of Award the CONTRACTOR shall provide a statement to the ENGINEER with the following:

a. Identification, qualifications, and experience of the CONTRACTOR’S Construction Scheduler and all other members of the CONTRACTOR’S scheduling staff.

b. References of not less than two (2) previous projects on which the CONTRACTOR’S Construction Scheduler has utilized CPM scheduling.

(As used in this Section, "days" mean consecutive calendar days unless otherwise noted.)

The ENGINEER and the INSPECTOR reserve the right to disapprove any scheduling candidate or scheduling system proposed for the project. The ENGINEER and the INSPECTOR reserve the right to remove, without rights to work on the project, any member of the CONTRACTOR’S scheduling staff, that is, in the ENGINEER’S or INSPECTOR’S opinion, incompetent in scheduling.

C. General

1. Schedule Methodology

The scheduling method to be used shall be a Critical Path Method schedule in the form of an activity on node Precedence Diagram Network (PDN) with capabilities of identifying the critical path. The principles and definitions of the terms used herein shall be as set forth in the Associated General CONTRACTOR’S publication "CPM in Construction", latest

edition. To the extent there are any conflicts between the Associated General CONTRACTOR'S publication and the Specifications, the Specifications shall govern.

2. Work Breakdown Structure

   a. The CONTRACTOR shall submit to the ENGINEER for approval, at the Preconstruction Scheduling Conference, the following:

      (1) A Work breakdown structure.

      (2) The associated alphanumeric coding structure to implement the Work breakdown structure.

      (3) The activity identification system for labeling all Work activities.

3. The first code field shall designate the bid item. The second code field shall identify the type of activity. (Types of activities shall be defined as "submittal", "review/approval", "procurement/fabrication", "delivery", and "construction/installation" or "Change Order".) The third code field shall identify which Specification section the activity shall be paid under. The fourth code field shall identify who is responsible to perform the activity (i.e., CONTRACTOR, Subcontractor(s), Supplier, etc.). The fifth code field shall identify the area being worked in or the facility, if appropriate. The sixth code field shall identify the construction phase or project element (if phasing of Work or project elements are identified in the Contract.) All Change Orders and Notices of Non-Compliance shall be included as separate code fields.

4. Scheduling System

   The CONTRACTOR shall use Primavera P6 (latest edition) and a hardware system commensurate with the size of the program. This shall be referred to as the Scheduling System. The Scheduling System shall be capable of handling, processing, printing, and plotting data to satisfy all requirements of this Section.

D. Preconstruction Scheduling Conference

1. The ENGINEER will schedule and conduct a Preconstruction Scheduling Conference with the CONTRACTOR'S Project Manager and Construction Scheduler within seven (7) calendar days after Notice of Award, to commence development of the required Schedule. At this meeting, the requirements of this Section, as they apply to the Contract, will be reviewed with the CONTRACTOR. The CONTRACTOR shall be prepared to review and discuss its methodology for developing the Schedule, its proposed sequence of operations, and cost, manpower, and equipment loading methodology.

   The Contractor shall include the effects of adverse weather in the Schedule in terms of working days (wds). The number of wds, Monday through Friday, excluding any day designated as a holiday by the City or in a Master Labor Agreement binding the Contractor, of normal adverse weather per month is as follows: January-3 wds, February-2 wds, March-

3 wds, April-1 wd, October-1 wd, November-2 wds, December-2 wds. Unusually severe weather (see GC 00401 – Unavoidable Delay) is defined as the number of working days over what is normal adverse weather, as defined in the previous sentence. For partial months, the aforementioned numbers shall be prorated and rounded to the nearest whole number. There shall be no extension of time for adverse weather unless the Contractor is prevented from working during the first five (5) hours of a workday with at least sixty percent (60%) of the normal work force on more days per month than listed above. Even if there is unusually severe weather, a non-compensable extension of time will not be granted unless the other conditions required by GC 00401 are met, including negative impact to the critical path and delay beyond the current Contract Completion Date.

E. CONTRACTOR'S Construction Schedules

1. CONTRACTOR'S Preliminary Schedule

a. Within fifteen (15) calendar days after the Preconstruction Scheduling Conference, the CONTRACTOR shall submit to the ENGINEER the detailed plan of operations for the first ninety (90) calendar days of Work after Notice to Proceed, as well as a general approach for the remainder of the Work. The initial submittal of the Preliminary Schedule shall include the time scaled network diagram covering at least the first 90 days after Notice to Proceed. The network diagram shall be based on the "early" schedule dates. The network diagram shall list activity I.D. number, description, original duration and early dates. The submittal shall include a predecessor/successor report which matches the network diagram. The predecessor/successor report (sorted by activity ID) shall list (as a minimum) activity ID number, original duration, description, early dates and detailed predecessor/successor listing. The Preliminary Schedule submittal shall include electronic files uploaded to e2020 containing the CPM file matching the network diagram and predecessor/successor report. Any resubmittals of the Preliminary Schedule shall be the same detail and quantity as the initial submittal.

b. The ENGINEER, the INSPECTOR, and the CONTRACTOR shall meet within seven (7) calendar days after submittal of the Preliminary Schedule to review and make any necessary adjustments or revisions. The Preliminary Schedule, when revised, will represent the CONTRACTOR'S planned means, methods, and sequences for performance of the Work during the first ninety (90) calendar days after Notice to Proceed and is to be incorporated as the first ninety (90) calendar days of the CONTRACTOR'S Construction Baseline Schedule (the Schedule).

c. The CONTRACTOR shall submit the revised Preliminary Schedule within seven (7) calendar days after the meeting, for approval by the ENGINEER and the INSPECTOR.

d. At the same time, and as part of the submittal of the Preliminary Schedule, the CONTRACTOR shall submit to the ENGINEER and the INSPECTOR, for approval, a schedule of manpower and costs assigned to each activity on the Preliminary Schedule. Costs assigned will generally conform to the CONTRACTOR'S bid item unit prices and such lump sum bid item breakdowns as the INSPECTOR shall approve. The schedule of manpower and costs shall be realistic and level so as to not have any unusual manpower requirements.

e. The resultant Preliminary Schedule, when approved by the ENGINEER and the INSPECTOR, shall be the sole basis of partial or progress payments made for Work performed during the first ninety (90) calendar days after Notice to Proceed.

f. Submittal and approval of the Preliminary Schedule is a condition precedent to the issuance and payment of progress payments. Therefore, no progress payments will be made until the Preliminary Schedule has been approved by the ENGINEER and the INSPECTOR.

g. The Preliminary Schedule shall be updated monthly during the first ninety (90) calendar days after Notice to Proceed as a part of the payment application process. All appropriate reports and network diagrams required by H of this Section shall be submitted, as agreed upon between the ENGINEER, the INSPECTOR, and the CONTRACTOR.

2. CONTRACTOR'S Construction Baseline Schedule

a. Fifteen (15) calendar days after approval of the Preliminary Schedule, the CONTRACTOR shall provide to the ENGINEER an update on the progress in the development of the Schedule. The CONTRACTOR shall prepare and submit to the ENGINEER the Contractor's Construction Baseline Schedule (the Schedule) within forty-five (45) calendar days after approval of the Preliminary Schedule.

b. The Schedule shall show the sequence and interdependence of activities required for complete performance of the Work, beginning with the date of the Notice to Proceed and concluding with the Contract Completion Date based on the completion time (calendar days) allowed in the Contract.

c. Pursuant to the float sharing requirements of the Contract, use of float suppression techniques such as preferential sequencing, special lead/lag logic restraints, extended activity times or imposed dates shall be cause for rejection of the Schedule and any revisions or updates. The use of float time disclosed or implied by the use of alternative float suppression techniques shall be shared as directed by the ENGINEER.

d. If the CONTRACTOR submits a Baseline Schedule showing completion of the Work more than thirty (30) calendar days in advance of the Contract Completion Date, the Schedule shall

show the time between the early completion date and the current Contract Completion Date as "project float". The CONTRACTOR agrees that the ENGINEER may, at no cost to the CITY, decrease the Contract duration by issuance of a Change Order which will change the appropriate Milestone Date(s) and the Contract Completion Date to the completion date reflected on the Schedule. Any approved Schedule, revision, or update having an early completion date shall show the time between the early completion date and the current Contract Completion Date as “project float”.

e. The ENGINEER will review and make comments on the Schedule. Meetings will be held between the ENGINEER, the CONTRACTOR, and all Subcontractors and Suppliers whom the CONTRACTOR may desire to invite or whom the ENGINEER may request be present.

f. Comments made by the ENGINEER on the Schedule, during review, will not relieve the CONTRACTOR from compliance with requirements of the Contract Documents. To the extent that there are any conflicts between the approved Schedule and the requirements of the Contract Documents, the Contract Documents shall govern.

g. If requested by the ENGINEER at any time during the project, the CONTRACTOR shall provide highly detailed, a short-term schedule for specific crucial items (work-around, start-up, etc.).

F. Network Details

1. The Schedule shall include time-scaled network diagrams, based on calendar days, as well as computer tabulations. It shall be constructed to show the order in which the CONTRACTOR proposes to carry out the Work, to indicate restrictions of access and to show availability of Work areas, and availability and use of manpower, materials and equipment. The CONTRACTOR shall utilize the Schedule in planning, scheduling, coordinating, and performing the Work under the Contract (including all activities of Subcontractors, equipment vendors, and Suppliers). The CONTRACTOR will provide the ENGINEER with written confirmation of the concurrence of all major trade Subcontractors and Suppliers with the Schedule. (The term "major Subcontractors and Suppliers" as used in this Section, shall include any Subcontractor or Supplier with five (5) percent or more of the value of the Contract.) The logic shall be determined by which activity must be completed before a successor can start; maximum concurrent work; and manpower or equipment constraints which prevent concurrent work.

2. The Schedule shall provide the ENGINEER with a tool to monitor and follow the progress of all phases of the Work. The Schedule submitted to the ENGINEER shall comply with all limits imposed by the scope of Work, with all contractually specified intermediate milestone and completion dates, and with all constraints, restraints or sequences included in the Contract. The degree of detail shall include factors to the satisfaction of the ENGINEER, including, but not limited to:

a. Physical breakdown of the project.

b. Contract milestones and completion dates, substantial completion dates, constraints, restraints, sequences of Work shown in the Contract, the planned substantial completion date, and the final completion date.

c. Type of Work to be performed, the sequences, and the labor trades involved.

d. All purchases, submittals, submittal reviews, manufacturing, tests, delivery, and installation activities for all major materials and equipment, and a separate list of all major material items or items of equipment for which the CONTRACTOR intends to seek payment prior to installation.

e. Deliveries of CITY furnished equipment and/or materials in accordance with the dates or schedule windows of such items set forth in the Contract or furnished by the ENGINEER, or items to be salvaged and delivered to the CITY.

f. Preparation, submittal and approval of Shop and/or Working Drawings and material samples showing Twenty-one (21) day minimum time specified for the ENGINEER'S review of normal or routine submittals and a forty five (45) day review time for all major submittals, so identified in the technical specifications, and the same time frame shall be allowed for at least one (1) resubmittal on all major submittals so identified in the Contract Documents.

g. Approvals required by regulatory agencies or other third parties notifications to utility companies, and request of services.

h. Plans for all subcontract Work, concrete placement sequence, structural steel, plumbing, electrical, etc.

i. Assignment of responsibility for performing specific activities, notifications to utility companies and request of services.

j. Access to and availability of Work areas including all anticipated plant shutdowns, if applicable.

k. Identification of interfaces and dependencies with preceding, concurrent and follow-on CONTRACTORS and utilities as shown on the Plans or called out in the Specifications.

l. Resource loading for cost, manpower, material, and equipment.

m. Actual tests by the CONTRACTOR and the CITY, submission of test reports, and approval of test results.

n. All start up, testing, training, and assistance required under the Contract.

o. Planning for phased or total takeover by the CITY.

p. Punchlist and final cleanup.

q. Identification of any manpower, material, or equipment restrictions, as well as any activity requiring unusual shift work, such as two shifts, six (6) day weeks, specified overtime, or work at times other than regular days or hours, shall be clearly identified in the Schedule.

3. The activities included in the Schedule shall be analyzed in detail to determine activity durations in units of project working days. Durations shall be based on the labor, equipment, and materials required to perform each activity on a normal Workday basis. No on-site activity shall have a duration over fifteen (15) working days except non-construction activities such as submittals, submittal reviews, procurement and delivery of materials or equipment, and concrete curing. Only on-site construction activities will be shown in their resource loaded state to reflect cost, manpower, materials and equipment except for those activities specifically identified under 1.1F.2d of this Section. The manpower and equipment, by item designation, shall be shown for each construction activity for the network on a tabular listing, and in information furnished in accordance with O and P of this Section.

4. Critical or near critical paths resulting from the use of manpower or equipment restraints shall be kept to a minimum. Near critical paths shall be defined as those paths having fifteen (15) working days or less of total float at the time of initial submission. Restraints related to resource loading must be identified as “For resource loading only”.

5. The estimated cost to perform each work activity shall be noted for each activity in the network on a tabular listing. The sum of the costs assigned to all activities shall equal the Contract value. No activity costs shall be assigned to submittals or submittal reviews. The accepted cost loaded Project Schedule shall constitute the Schedule of Values in accordance with the SCHEDULE OF VALUES / CONTRACT PRICE BREAKDOWN of these GENERAL REQUIREMENTS, from which monthly progress payments will be made in accordance with the provisions of PARTIAL PAYMENTS in these GENERAL REQUIREMENTS. Acceptance of the Cost Loaded Schedule by the CITY does not relieve the CONTRACTOR’S responsibility to submit any cost information or data as requested by the ENGINEER for verification of cost.

6. The network diagram shall be prepared on (E) size sheets (28 inches by 40 inches), shall have a title block in the lower right-hand corner, and a timeline on each page. Exceptions to the size of the network sheets and the use of computer graphics to generate the networks shall be subject to the approval of the ENGINEER.

7. All networks shall be drafted time scaled to show a continuous flow of information from left to right. The primary path(s) of criticality shall be clearly and graphically identified on the network(s).

G. Schedule Reports

1. The Schedule submitted to the ENGINEER shall include the time scaled network diagram. Network diagrams shall be based on early start and

early finish dates of activities shown. The network diagrams submitted to the ENGINEER shall also be accompanied by a computer-generated mathematical analysis for each activity included in the Schedule. Such mathematical analysis shall be submitted to the ENGINEER and shall include at a minimum, the following:

a. A list of all activities sorted by Activity I.D. Number with predecessor and successor activity numbers and descriptions;

b. Activity number and description.

c. Activity code(s).

d. Schedule and actual/remaining duration for each activity.

e. Earliest start date (by calendar date).

f. Earliest finish date (by calendar date).

g. Actual start date (by calendar date).

h. Actual finish date (by calendar date).

i. Latest start date (by calendar date).

j. Latest finish date (by calendar date).

k. Float in work days.

l. Monetary value and cost-to-date of each activity.

m. Percentage of activity complete and remaining duration for incomplete activities.

n. Cumulative value of Work completed based on the CONTRACTOR'S reported portion of activities complete and accepted.

o. Imposed constraints.

2. The following printed computer outputs shall be required as part of the Schedule submittal and each revision or update thereafter as a condition precedent to receipt of progress payments:

a. Activity listing sorted by I.D. number showing predecessor and successor activities in numerical order, with original and remaining duration, early start, early completion, late start, late completion and total float.

b. A sublisting of materials and equipment sorted by Specification Section number. The sublisting of materials and equipment shall include the following activities: preparation of Shop Drawings, submittal to the ENGINEER, review by the ENGINEER, and fabrication, testing, and/or delivery of material and equipment

which shall be interfaced with the earliest start date that the material or equipment is to be installed on the project.

c. Activity sort(s) by organizational responsibility, including submittals to the ENGINEER for all major items or material and equipment, the number of shifts, crew sizes of each craft and construction equipment to accomplish the activity;

3. Outputs 1 and 2, above, shall show all activities, including restraints, for the duration of the project.

4. The CONTRACTOR shall also prepare and submit a time-scaled Master Bar Chart Summary Schedule on a single sheet that shows the total project in approximately 25-100 activities, as agreed to by the CONTRACTOR and the ENGINEER. This schedule will accurately summarize the current Project Schedule and shall have common events for correlating the two levels of schedule indenture. All Contract milestones shall be shown. The Master Summary Schedule shall be updated monthly.

H. Approval Of The Baseline Schedule

1. The Schedule network diagram and computer tabulations, the Cash Flow Projection, and the Manpower and Equipment Requirements Forecast shall be submitted to the ENGINEER for approval on e2020:

a. The Network Diagram and Master Bar Chart Summary Schedule.

b. Computer tabulations, Predecessor/Successor Report.

c. Manpower Requirements.

d. Cash Flow Projection.

e. All required reports specified in F and G of this Section.

f. Written confirmation of concurrence of all major trade Subcontractors and Suppliers.

2. Approval Process:

a. The ENGINEER shall approve or disapprove, in writing, the CONTRACTOR'S submission within twenty-one (21) calendar days after receipt of all required information. The Schedule, once approved, becomes the Baseline Schedule which shall be used for monitoring and evaluating all facets of Contract performance including, but not limited to, progress, changes, and delays.

b. The CONTRACTOR, the CONTRACTOR'S Construction Scheduler, and those major trade Subcontractors and Suppliers, as required by the ENGINEER, shall be required to participate in all meetings necessary to reach mutual agreement and approval of the Baseline Schedule, the Manpower Requirements Forecast, and the Cash Flow Projection.

c. The CONTRACTOR shall revise the Baseline Schedule, as required by the ENGINEER, to reflect project construction. If any of the required submissions are returned to the CONTRACTOR for corrections or revisions, they shall be resubmitted along with a new CD and a hard copy listing of each change (Claim Digger report) for approval within seven (7) calendar days after receipt. Resubmittals shall be as required in H.1 and H.2 of this Section. Review and response by the ENGINEER shall be given within seven (7) calendar days after receipt of each new submission.

d. Should the Baseline Schedule, submitted for approval, show variances from the requirements of the Contract, the CONTRACTOR shall make specific mention of such variations in the letter of transmittal, in order that, if accepted, proper adjustments to the Baseline Schedule can be made. Otherwise, the CONTRACTOR will not be relieved of the responsibility for executing the Work in strict accordance with the requirements of the Contract Documents.

e. Submittal and approval of the Baseline Schedule, the Manpower Requirements Forecast, the Cash Flow Projection, major trade Subcontractor and Supplier confirmation in writing, or CD(s), within the time prescribed, or revisions thereof within the required time, is a condition precedent to the issuance and payment of progress payments.

f. Failure of the CONTRACTOR to submit the Baseline Schedule, or any required resubmittals, in a timely, accurate manner and in accordance with the requirements of this Section will result in costs to the CITY which are difficult if not impossible to determine; therefore, the CONTRACTOR shall pay the CITY liquidated damages in the amount of $1,000.00 per calendar day, for every work day the schedule submittal, revision, or resubmittal is late. This amount shall be subtracted from any monies due and shall be forfeited by the CONTRACTOR.

I. Revisions To Approved Baseline Schedule

1. The CONTRACTOR shall execute the Work in accordance with the approved Baseline Schedule. Out of sequence construction, defined as a change in the Baseline Schedule, requires prior approval of the ENGINEER as defined below.

2. Upon approval of a Time Impact Analysis the change shall be reflected in the next schedule submittal by the CONTRACTOR.

3. No change (except for resubmittals) to the approved Baseline Schedule shall be made without the prior written approval of the ENGINEER. If the CONTRACTOR desires to make a change to the approved Baseline Schedule, the CONTRACTOR shall request permission from the ENGINEER in writing, stating the reasons for the change as well as the specifics, such as revisions to activities, logic, durations, etc. The ENGINEER will provide a response within five (5) calendar days. Actual status and/or forecast dates for revised submittals shall be added without

prior acceptance by the ENGINEER. They are still subject to review by the ENGINEER.

4. If the ENGINEER considers a change to the Baseline Schedule to be of a major nature, the ENGINEER may require the CONTRACTOR to revise and submit for acceptance all of the affected portion(s) of the Baseline Schedule including an analysis to show the effect on the entire project. The proposed revision and analysis shall be submitted to the ENGINEER within fifteen (15) calendar days after the ENGINEER notifies the CONTRACTOR the revision is of a major nature. A change will be considered to be of a major nature if the time estimated for an activity or sequence of activities is varied from the original plan to the degree that there is reasonable doubt that the Contract completion date will be met, or if the change impacts the Work of other CONTRACTORS at the Jobsite. Changes to activities having adequate float shall be considered as minor changes, except that an accumulation of minor changes may be considered a major change when such changes affect the Contract completion date. (Activities having adequate float are activities which are not critical after the change is made.).

5. Only upon approval of a change by the ENGINEER shall it be reflected in the next Schedule update submitted by the CONTRACTOR.

J. Updates To Approved Baseline Schedule And Progress Payments

1. Monthly Updates:

a. All updated or revised Schedules shall be submitted in the same detail as the original submittal, unless modified in writing by the ENGINEER. Written confirmation of the major trade Subcontractors and Suppliers shall be required quarterly.

b. The initial Schedule update shall be submitted within fourteen (14) calendar days after approval of the Baseline Schedule. The Schedule update shall be cost loaded. Subsequent Schedule updates shall be submitted at the beginning of each month thereafter for the duration of the Contract. The data date shall be the first working day of the month unless otherwise directed by the ENGINEER. The Schedule and computer tabulations shall be reviewed by the CONTRACTOR'S Construction Scheduler at a joint update meeting with the ENGINEER and the INSPECTOR.

2. Monthly Schedule Updates:

a. The CONTRACTOR shall submit the Monthly Schedule Update to the ENGINEER each month, on a date assigned by the ENGINEER. The proposed Monthly Schedule Update prepared by the CONTRACTOR shall include all information available as of the cutoff date established by the ENGINEER. A detailed list of all proposed schedule changes (logic, duration, status, additions, and deletions) shall be submitted with the update (Claim Digger report). Prior to the monthly update review meeting, the CONTRACTOR shall obtain from his Subcontractors, Suppliers, and staff the necessary information as required to reflect progress to date. A proposed Monthly Schedule Update containing the

information set forth below shall be available for review at the meeting.

(1) For activities started and/or completed during the previous period: Actual start and actual completion dates, and number of shifts used to accomplish the activity.

(2) For activities begun but not yet complete to date: Remaining duration of the Work, estimated percent complete, and estimated completion date. The schedule shall be calculated using remaining durations and retained logic.

(3) For activities not yet started: Estimated start dates, revised durations, and estimated completion dates, as necessary.

(4) For authorized Change Orders, including Emergency Change Orders, Time and Material Change Orders, and Unilateral Change Orders: Revised and original activities, number of shifts, crew sizes by craft, construction equipment required, cost, and durations, and status of all outstanding Notices of Non-Compliance, where required.

(5) The monthly update of the Network Diagram shall be for the whole project. The previous month's activities shall be reported as they actually took place and designated as complete, if actually completed, on the network diagram update.

(6) The electronic file of the submitted Network Diagrams and the related reports shall constitute a clear record of progress of the Work from Notice to Proceed to final completion.

(7) The monthly submittal to the ENGINEER shall be accompanied by the Schedule Narrative Report. The Schedule Narrative Report shall describe the physical progress during the report period. Plans for continuing the Work during the forthcoming report period, actions planned to correct any negative float predictions, and an explanation of potential delays and/or problems and their estimated impact on performance and the overall project completion date. In addition, alternatives for possible schedule recovery to mitigate any potential delay and/or cost increases shall be included for consideration by the ENGINEER The report shall follow the outline set forth below:

CONTRACTOR’S Schedule Narrative Report Outline:

a) CONTRACTOR’S Transmittal Letter.

b) Description of problem areas.

c) Current and anticipated delays:
   1) -Cause of the delay.
   2) -Corrective action and schedule adjustments to correct the delay.
   3) -Impact of the delay on other activities, milestones, and completion dates.

d) Changes in construction sequences.

e) Pending items and status thereof:
   1) -Permits.
   2) -Change Orders.
   3) -Time extensions.
   4) -Non-Compliance Notices.

f) Contract Completion Date(s) status:
   1) Ahead of schedule and number of working days.
   2) Behind schedule and number of working days.

g) Other project or scheduling concerns including any plant shutdowns, duration of each shutdown, and analysis of any Work to be performed during the shutdown period.

h) Include reviewed and updated Network Diagram and Reports.

i) Include revised Cost Loading and Cash Flow Information of this Section.

j) Include substantial revisions to manpower and equipment requirements

(8) The CONTRACTOR shall provide to the ENGINEER, the Network Diagram, the Predecessor/Successor Report sorted by activity number, the list of all changes made to the previously approved Schedule, and the Schedule Narrative Report. The data required to provide all other scheduling reports called for in of this Section shall be provided on e2020.

3. The CONTRACTOR'S Construction Scheduler and representatives from major Subcontractors and Suppliers (as requested by the ENGINEER shall attend the monthly update meetings with the above data prepared in advance for each meeting to provide, as of the end of the updating period, a complete and accurate report of the current procurement schedule (in accordance with the requirements of CONSTRUCTION STATUS REPORTS of the GENERAL REQUIREMENTS), construction progress, and a depiction of how the CONTRACTOR plans to continue the Work of the project to meet all Contract Completion Dates. All network changes and status dates agreed to during each update meeting shall be considered as acceptable by all parties unless written notice of exception is given by an objecting party within five (5) calendar days after the update

meeting. For major network changes that cannot be agreed to during an update meeting, the CONTRACTOR shall submit, in writing, such revisions for the ENGINEER'S approval prior to inserting such changes into the network. Submissions may be in the form of marked-up networks, fragnets, or schedule abstracts provided they are submitted with a letter of transmittal. The submission and approval procedures for this information shall follow the same timetable described in H.2 of this Section.

4. Predicated on the results of the ENGINEER'S review of Monthly Schedule Update submittals and accompanying reports, the CONTRACTOR may be required to revise the Monthly Schedule Update. Conditions under which a revision will be made are as follows:

    a. When a delay in the completion of any Work item or sequence of Work items results in an indicated extension of the project completion or interim milestone dates detailed herein by thirty (30) calendar days.

    b. When delays in submittals or deliveries or Work stoppages are encountered which make replanning, rescheduling, or resequencing of the Work necessary.

    c. When the schedule does not represent the actual execution and progress of the project.

5. Required revisions of the Monthly Schedule Update are due within five (5) calendar days of notice by the ENGINEER that a revision is required. All revisions and additions to the Schedule are subject to the review of the ENGINEER. No changes (except resubmittal cycles) are to be implemented in the Schedule by the CONTRACTOR without the prior approval of the ENGINEER. When the Monthly Schedule Update or its required revision is approved by the ENGINEER, it then becomes the Current Schedule Update. The Current Schedule Update will be used for the period from which it is approved until its successor is submitted and approved.

6. The Schedule Narrative Report, the updated Project Schedule (networks, and computer computations), the Cash Flow Projection, the updated network diagram, and one (1) copy of the updated CD reflecting the status of the project agreed to at the updating meeting, shall be submitted to the ENGINEER within five (5) calendar days after each updating meeting.

7. The update report shall show the activities or portions of activities completed during the reporting period and their total value as the basis for the CONTRACTOR'S request for partial payment. Payments made pursuant to PARTIAL PAYMENTS of these GENERAL REQUIREMENTS will be based on the total value of such activities completed or partially completed after verification by the INSPECTOR. The report shall state the percentage of the Work actually complete as of the report date. If the project is behind schedule, progress along other paths with negative float shall also be reported.

8. Failure of the CONTRACTOR to submit the Monthly Schedule Updates in a timely, accurate manner and in accordance with the requirements of this Section will result in costs to the CITY which are difficult, if not impossible

to determine; therefore, the CONTRACTOR shall pay the CITY liquidated damages in the amount of $1,000.00 per calendar day for every work day the submittal is late or not in full compliance with the requirements of this Section. This amount shall be deducted from any monies due and forfeited by the CONTRACTOR. In addition to the liquidated damages, if the CONTRACTOR fails to submit any of the Monthly Schedule Update deliverables, or to meet any of the other updating requirements, progress payments will be withheld until such time as the required update information is submitted.

K. Weekly Progress Reports

1. Once each week, on a day established by the ENGINEER, the CONTRACTOR shall submit:

   a. A progress schedule listing the activities completed and in progress for the previous week and the activities scheduled for the succeeding two (2) weeks. The activity designations shall be consistent with the activity designations in the Current Schedule Update. A bar chart shall be used to display the information in pictorial form. The appropriate schedule activity number shall be listed for each bar.

L. Cost Loading and Cash Flow

1. With the initial Baseline Schedule submittal, each Monthly Schedule Update, and each revision, the CONTRACTOR shall also submit a schedule of cost loading and cash flow to the ENGINEER. There shall be a strict correlation between the sum of individual activity costs and the total values indicated for bid items. That is, each individual activity within the Schedule shall employ a code, which in summary, attaches its cost, if any, to the appropriate bid items. The sum of activity costs within a specific code shall equal the cost of its corresponding bid items and approved Change Orders.

2. Expected payment requests for each month shall be included with proposed updates. The cash flow shall show the net payment requests for each month. The cumulative payment requests to date shall also be shown after deducting retainage and any other monies withheld. The cash flow shall be shown in tabular format and in graphic format.

3. The CONTRACTOR, at the Preconstruction Scheduling Conference, shall explain in detail the procedure to be used to develop the Schedule activity cost loading and cash flow. This procedure is subject to the review and approval of the ENGINEER and the INSPECTOR. Receipt and approval of the Schedule Cost Loading and Cash Flow Summary is a condition precedent to the making of any payments under the Contract. Therefore, failure to submit an acceptable schedule cost loading and cash flow summary shall be cause for withholding any progress payments due or that may become due under this Contract, until such time as an acceptable cost loading and cash flow summary is received.

4. In accordance with the updating procedures, when an activity is deemed substantially complete by the ENGINEER, then such activity will no longer be treated as an activity affecting the critical path or successor activities

on the project. The cost of correction of any punchlist items associated with substantially completed activities will be covered by amounts deemed by the ENGINEER and the INSPECTOR to be adequate to cover such costs.

M. Responsibility For Completion

1. Whenever it becomes apparent from the current Monthly Schedule Update that phasing, milestone, constraint, restraint, or Contract Completion Date will not be met, the CONTRACTOR shall submit a plan to recover the delay using some or all of the following remedial actions;

   a. Increase construction manpower in such quantities and crafts as necessary to eliminate the backlog of work and meet the current Contract Completion Date.

   b. Increase the number of working hours per shift, shifts per working day, working days per week, the amount of construction equipment, or any combination thereof to eliminate the backlog of Work.

   c. Reschedule the Work in conformance with the Specification requirements.

2. Prior to implementing any of the above actions, the CONTRACTOR shall notify the ENGINEER and obtain approval from the ENGINEER. If such actions are approved, the Schedule revisions shall be incorporated by the CONTRACTOR into the Network Diagram before the next Monthly Schedule Update is due.

3. Under no circumstances will the addition of equipment or construction forces, increasing the Working hours or any other method, manner, or procedure to return to the contractually required Contract Completion Date be considered justification for a Change Order or be treated as acceleration where the need for a recovery schedule has been caused by the CONTRACTOR and/or its Subcontractors or Suppliers, at any tier.

4. The ENGINEER may elect to withhold progress payments until the CONTRACTOR'S progress indicates that the milestone date(s) and/or the Contract Completion Date will be met.

N. Schedule Time Extensions

1. When Change Orders or delays are experienced by the CONTRACTOR and a time extension is requested, the CONTRACTOR shall submit to the ENGINEER, a written Time Impact Analysis illustrating the influence of all changes or all delays on the current Contract Completion Date. The Time Impact Analysis shall be based on an As-Built Schedule Analysis approach. The As-Built Schedule that will be created will incorporate all Actual Start and Finish dates, actual durations of activities, and actual sequences of construction. This Time Impact Analysis shall incorporate all delays (including CITY, CONTRACTOR, and Third Party delays without exception) in the time frame they occurred with actual logic ties. The As-Built Schedule data shall be obtained from the most recent accepted Baseline Schedule or Monthly Schedule Update as of the time the

Preliminary Change Order, Emergency Change Order, Unilateral Change Order, or Allowance Order was issued to the CONTRACTOR. The As-Built Schedule shall be created as an early start schedule. The As-Built Schedule shall use the original activity durations for all incomplete work and the actual logic driving all activities. All requests for time extensions shall be based upon an analysis of this As-Built Schedule. The critical path will be established, and all CITY caused delays on the critical path will be identified. The time extension will be based solely upon the cumulative duration of all CITY and Third Party caused delays (as set forth in UNAVOIDABLE DELAY of the GENERAL CONDITIONS) which are on the critical path. Any time extensions to the project Interim Milestone Dates shall be non-compensable time extensions only.

2. Time extensions will be granted only to the extent that equitable time adjustments for the activity or activities affected exceed the total or remaining float along the critical path of activities at the time of actual delay, or at the time the Preliminary Change Order, the Emergency Change Order, the Unilateral Change Order, or the Allowance Order was issued to the CONTRACTOR. Float or slack time is not for the exclusive use or benefit of the ENGINEER or the CONTRACTOR but is an expiring resource available to all parties as needed to meet Contract milestones and the Contract Completion Date. Time extensions shall not be granted nor delay damages paid until;

    a. A delay occurs which is beyond the control and without the fault or negligence of the CONTRACTOR and its Subcontractors or Suppliers, at any tier; and

    b. Which extends actual performance of the Work beyond the applicable current Contract Completion Date and the most recent date predicted for completion of the project on the approved Monthly Schedule Update, current as of the time of the delay or as of the time of issuance of the Preliminary Change Order, the Emergency Change Order, the Unilateral Change Order, or the Allowance Order was issued to the CONTRACTOR.

3. Each Time Impact Analysis shall be submitted in triplicate, within fifteen (15) calendar days after a delay occurs, or issuance of the Preliminary Change Order, Emergency Change Order, Time and Materials Change Order, or Unilateral Change Order. <u>If the CONTRACTOR does not submit a Time Impact Analysis for a specific Change Order or delay within the specified period of time, the CONTRACTOR shall be deemed to have irrevocably waived any rights to additional time and cost.</u>

4. Since float time within the Schedule is jointly owned, it is acknowledged and agreed by the CONTRACTOR that CITY caused delays on the project may be offset by CITY caused time savings (including, but not limited to: critical path submittals returned in less time than allowed for in the Contract, approval of substitution requests which result in a savings of time along the critical path for the CONTRACTOR, etc.). In such an event the CONTRACTOR shall not be entitled to receive an extension of time or delay damages until all CITY caused time savings are exceeded and the Contract Completion Date is also exceeded.

5. Approval or rejection of each Time Impact Analysis by the ENGINEER shall be made within fifteen (15) calendar days after receipt of each Time Impact Analysis, unless subsequent meetings and negotiations are necessary. Upon approval, a copy of a Time Impact Analysis signed by the ENGINEER shall be returned to the CONTRACTOR for incorporation into the next Monthly Schedule Update.

6. Upon mutual agreement by both parties, fragnets illustrating the influence of Change Orders and delays shall be incorporated into the Schedule during the first update after agreement is reached.

7. In the event the CONTRACTOR does not agree with the decision of the ENGINEER regarding the impact of a change or delay, it shall be resolved in accordance with CLAIMS AND PROTESTS of the GENERAL CONDITIONS.

O. Manpower

The CONTRACTOR shall submit with the initial Baseline Schedule a histogram depicting total project manpower for its own forces and for each of its Subcontractors for each month. The histogram shall be based upon and shall be in substantive agreement with the number of shifts and crew sizes in the Schedule and shall be updated monthly and submitted with the Monthly progress report. The update shall show actual manpower for each month during the construction period to date and required manpower for both base scope and Change Order Work each month, necessary to complete all remaining activities to insure timely project completion.

P. Construction Equipment

1. The CONTRACTOR shall submit with the initial Baseline Schedule a tabular report listing each major piece of construction equipment for itself and each of its Subcontractors for each month. This major equipment is the equipment that is or will be used at the Worksite. Each major piece of the CONTRACTOR'S and the Subcontractor's equipment shall be separately described, identified, and numbered in the report. The tabular report shall be based upon and in substantive agreement with the number of shifts and crew sizes by craft in the Schedule and shall be updated monthly and submitted with the monthly progress report. The update shall show actual construction equipment for each month during the construction period to date and the required construction equipment for each month necessary to complete all remaining activities including the Change Order Work, on the early finish date.

Q. Submittal Of "As-Built" Schedule

1. As a condition precedent to any release of retention, the last update to the Schedule submitted shall be identified by the CONTRACTOR as the "As-Built Schedule". The "As-Built Schedule" shall reflect the exact manner in which the project was actually constructed (including start and completion dates, activities, sequences, and logic) and shall be signed and certified by the CONTRACTOR'S Project Manager and Construction Scheduler as being a true reflection of the way in which the project was actually constructed.

(END OF SECTION)

SECTION 01322
CONSTRUCTION PROGRESS PHOTOGRAPHY

PART ONE - GENERAL

1.1 SUMMARY

A. Required**:** Provide photographs taken at the Jobsite at the specified stages of Contracted Work in accordance with provisions of this Section.

1. Take three views of each structure and other major improvement; and three views of each 1,000 sq ft of desilting and infiltration gallery or other feature being constructed as directed by the ENGINEER at thirty (30) day intervals during the period of Contracted Work.

2. Take first photographs just before CONTRACTOR starts any work operations at the Jobsite.

3. Take final photographs when all Contracted Work has been completed, regardless of time interval since previous photographs were taken. These photographs shall be suitable for use in City presentations and publications.

B. Related Work:

1. Documents affecting work of this Section include, but are not necessarily limited to, GENERAL CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS and other Sections of the Project Manual.

1.2 SUBMITTALS

A. Comply with pertinent provisions of Section 01330 **–** SHOP DRAWINGS / SUBMITTALS of the GENERAL REQUIREMENTS.

B. Except as otherwise directed by the ENGINEER, submit three color prints of each view.

1.3 QUALITY ASSURANCE

A. Secure the services of a full-time professional photographer who is skilled and experienced in construction photography and whose work samples are acceptable to the ENGINEER.

B. Do not replace the photographer without the ENGINEER'S written approval.

C. Do not permit prints to be issued for any other purpose without specific written approval from the ENGINEER.

D. Photographs and prints to be of professional quality; clear, in focus, with high resolution and sharpness, and with minimum distortion. Prints to be with contrast, detail and finish for acceptable reproduction by half-tone cut.

PART TWO - PRODUCTS

2.1 CONSTRUCTION PHOTOGRAPHS

A. Provide Color digital files uploaded to e2020.

B. Identify the following:

1. Job name and address;

2. Location from which photographed;

3. Date of photograph;

4. Photographer's name and address, and the photograph number.

PART THREE - EXECUTION

3.1 CONSTRUCTION PHOTOGRAPHY

A. View Locations: As directed by the ENGINEER**.** Location(s) to provide diversified overall view of the Work from a position that is expected to remain accessible throughout progress of the Contracted Work for added photography.

Continue to take photographs at same view position of the Works to show continuous progress of the Works until the Works are completed or as directed by the ENGINEER**.**

B. Notifications: Notify the ENGINEER seven (7) days in advance of proposed day of photography.

C. Weather Conditions: When inclement weather is anticipated, consult with the ENGINEER to determine acceptable alternate arrangements.

D. Timing of Photography: To the maximum extent practicable, take photographs at the same time of day throughout progress of the Contracted Work. Timing shall be approved by the ENGINEER**.**

E. On Contract Drawing: Photographer to identify each photograph location or by such other means as acceptable to the ENGINEER, to enable future photographs to be taken from the same location and position.

F. Change of Locations: When so directed by the ENGINEER because of construction, change one or more of the locations inside or outside of the building(s).

END OF SECTION

SECTION 01323
CONSTRUCTION STATUS REPORTS

1.1 THE REQUIREMENT

A. Weekly Status Report

During the construction phase of the Work, the CONTRACTOR shall submit weekly written status reports to the ENGINEER and the INSPECTOR. The report shall contain a record of inspections and tests, not performed by CITY forces, for all Work accomplished subsequent to the previous report and shall include the following information:

1. Type of work under way during the time frame of the report (e.g., earthwork, concrete work, structural steel erection, equipment manufacturing, component installation).

2. Inspections and tests, and location of inspections and tests that were made.

3. Results of inspections.

4. Reports of tests performed, including those specified, with the results of the tests, and acceptance criteria, including failures and remedial action to be taken. Test results, including all computations, shall be attached to the report form. Where test results cannot be completed by the time the report is submitted, a notation shall be made that the test was performed, including the approximate expected date that test results will be reported.

5. Report of any nonconforming items/activities. Nonconformance report forms designed solely for this purpose shall be utilized.

6. Results of inspections of material and equipment done upon their arrival at the Jobsite and prior to their incorporation into the Work. This includes, but is not limited to, compliance with approved submittals, damage, and proper storage requirements.

7. Offsite quality control activities.

8. Instructions received from the ENGINEER or INSPECTOR.

9. In all cases, the report must be verified and signed by the CONTRACTOR'S representative. The verification is to contain the statement that all supplies and materials incorporated in the Work are in compliance with the terms of the Contract except where noted.

B. Monthly Procurement and Delivery Status Report

1. The CONTRACTOR shall prepare and submit to the INSPECTOR and the ENGINEER a comprehensive Monthly Procurement and Delivery Status Report covering the procurement and delivery of equipment and materials to the Jobsite. This report shall outline the purchasing status of

all material, equipment and contracts. The purchasing status report shall include the following information:

a. Specification, purchase order, and Contract number;

b. Submittal Number;

c. Item or service description;

d. Required job site date; and

e. Project Delivery Date.

In addition, this report shall contain a three (3) month "Look Ahead Projection" of all factory tests, shipments to be inspected, or any other supplier activity which the CONTRACTOR, the ENGINEER, or the INSPECTOR, has the right to witness and accept. The report shall detail arrangements which are planned for meeting the witnessing and acceptance requirements, and for recording tests passed.

2. The CONTRACTOR shall obtain a submittal schedule for technical data, Shop Drawings, material and test certificates, O&M manuals, spare parts lists, and other submittals, from each supplier. This schedule shall be monitored and updated on a monthly basis and shall be submitted to the INSPECTOR and the ENGINEER with the Monthly Procurement and Delivery Status Report.

C. Miscellaneous Submittals

Required: CONTRACTOR shall prepare a Daily Construction Report recording the following information concerning events at the job-site and submit duplicate copies to the Consultant or ENGINEER at weekly intervals:

1. List of Subcontractors and Sub-Subcontractors at the site**,** types of works and job location.

2. Approximate count of CONTRACTOR'S personnel at the site**,** name, type of work and job location.

3. Construction equipments at the site.

4. High and low temperatures, general weather conditions.

5. Accidents and unusual events.

6. Meetings and significant decisions.

7. Stoppages, delays, shortages, losses.

8. Meter readings and similar recordings.

9. Emergency procedures.

10. Inspection, Orders and requests of governing authorities**,** type of work.

11. Change Orders received, implemented.

12. Services connected, disconnected.

13. Notice of Non-Compliance, Notice-To-Correct, and Job-Memorandum received.

14. Equipment or system tests and start-ups.

15. Preparation of Record Drawings and Project Manual.

16. Equipment or material delivered to site.

17. Partial completions, occupancies

18. Substantial completions authorized.

END OF SECTION

This page intentionally left blank

SECTION 01330
SHOP DRAWINGS / SUBMITTALS

1.1 THE REQUIREMENT

A. The CONTRACTOR shall prepare, approve, sign and submit to the ENGINEER any and all Shop Drawings, Manufacturers' Project Data, Job References, Certificates, Wiring Diagrams, Operation and Maintenance Manuals and Samples required by the Contract Documents on “e2020” (the City’s web-based construction management application.)

NOTE: All references in the Technical Sections under "Shop Drawings" or “Submittal” to the words "approval of" shall mean "reviewed by".

B. The CONTRACTOR, by preparing, reviewing, approving and submitting the Shop Drawings, Manufacturers' Product Data, Job References, Certifications, Wiring Diagrams, Operation and Maintenance Manuals and Samples, represents that the CONTRACTOR has determined and verified all materials, field measurements and filed construction criteria related thereto, and has checked and coordinated the information contained within such submittals with the requirements of the Work, the Project and the Contract Documents.

C. The CONTRACTOR shall inform the ENGINEER, in writing, of any and all deviations and/or questions regarding the Contract Documents, and shall properly identify these areas of concern in the transmittal of the Shop Drawings, Manufacturers' Product Data, Job References, Certification, Wiring Diagram and Samples for proper written disposition respectively by the ENGINEER. The CONTRACTOR shall provide Shop Drawings in accordance with Specification Section 01116 of the General Requirements.

D. Transmittal sheets for all Shop Drawings, Manufacturers' Product Data, Wiring Diagrams, Job References, Certifications, Operation and Maintenance Manuals and Samples shall be uploaded in e2020 in accordance with Specification Section 01116 of the General Requirements.

E. The CONTRACTOR is not relieved of the responsibility for any deviation from the requirements of the Contract Documents, by virtue of CONTRACTOR’S approval and submittal of the Shop Drawings, Manufacturers' Product Data, Wiring Diagrams, Operation and Maintenance Manuals and Samples to the ENGINEER. All deviations and/or interpretations of the Contract Documents must be approved in writing by the ENGINEER.

F. The review of the Shop Drawings, Manufacturers' Product Data, Job References, Certifications, Wiring Diagrams, Operation and Maintenance Manuals; and Samples by the ENGINEER does not relieve the CONTRACTOR of its responsibility from any requirements of the Contract Document, or any errors or omissions in such submittals, or for any failure to perform the requirements and intent of Contract Documents.

G. The Shop Drawings shall include such fabrication, erection, and setting drawings; manufacturer's standard drawings or catalog cuts, performance and test data; Job References, Certifications, wiring and control diagrams; schedules; samples; and descriptive data pertaining to material, machinery and methods of construction as may be necessary to carry out the intent of contract Drawings and Project Manual and shall not relieve the CONTRACTOR from the responsibility for proper fitting and construction of the Work, nor from furnishing materials and Work required by the Contract, which may or may not be indicated on the Shop Drawings.

The CONTRACTOR shall perform no portion of the Work requiring submittal and review of Shop Drawings, Product Data, Job References, Certifications**,** samples, etc. until such submittals have been reviewed by the ENGINEER.

H. Shop Drawings shall show in detail the size, sections and dimensions of all the members, the arrangement and construction of all connections and joints and other pertinent details; also, all holes, straps and other fittings required by other CONTRACTORS for attaching their work. When required, by the ENGINEER or by Standard Practice of the CONTRACTOR, engineering computations shall be submitted for the record. The CONTRACTOR shall be responsible to coordinate with other trades, collect all necessary data or information for preparation of shop Drawings and deliver approved copies of Shop Drawings to all others whose work is dependent thereon.

I. At all times, the CONTRACTOR shall maintain at the site of the project, a complete file of Shop Drawings and Manufacturers' Data of its own and all Subcontractors. All Shop Drawings and Manufacturers' Data shall be reviewed and by the CONTRACTOR.

J. Submittals shall be made within the times specified in the various Divisions, of the Project Manual. If time is not specified, they shall be made within a period which will cause no delay in the work. The CONTRACTOR shall allow twenty-one (21) calendar days on the project construction schedule for each item submitted for the review by the ENGINEER.

K. In the event the ENGINEER finds the submittal to be incomplete, it will be returned to the CONTRACTOR for required revised drawings. The CONTRACTOR will revise the drawings and resubmit as directed on original submittals. Any delay resulting from the need for resubmittals shall be the CONTRACTOR'S responsibility.

L. In the event, the Contract Documents are prepared by a Consultant Architect or ENGINEER, the pertinent requirements of this Section will be effective, except as follows or as otherwise modified in the Divisions that follow:

1. All references in the Contract Documents to the Consultant shall mean the Consultant Architect or Consultant Engineer

2. Submittals shall be uploaded in e2020 in accordance with Specification Section 01116 of the General Requirements.

3. If submittal is found to be incomplete and revised drawings are required, CONTRACTOR will be notified by the ENGINEER.

4. When Shop Drawings are required in accordance with the Contract, due to “substitutions” or for "or equal" determination or review as indicated hereinbefore, after final check, said drawings, reviewed and signed by Consultant shall be forwarded to the ENGINEER, Bureau of Engineering for final review and distribution electronically, through e2020.

5. Unless otherwise specified for Operation and Maintenance Manuals, four (4) copies are required and all copies should be delivered to the Consultant Architect for review. After reviewed and signed by the Consultant, scan and electronically upload in e2020 for final review.. Once approved by the ENGINEER on e2020, four (4) copies shall be forwarded to the ENGINEER for distribution to the CITY maintenance staff. The CONTRACTOR will receive a transmittal of acceptance of Operation and Maintenance Manual Submittal.

M. In the event the Contract Documents are prepared by CITY personnel, four (4) copies of each Operation and Maintenance Manuals, shall be sent to the ENGINEER by the CONTRACTOR for review and final distribution. Distribution requirements described in Items K(4) and K(5) hereinbefore remain effective.

N. CONTRACTOR’S Coordination:

1. The ENGINEER will return and will not review unrelated submittals.

2. The CONTRACTOR may be required to provide drawings, setting diagrams and similar information necessary for proper coordination of Contracted Work. Such data shall remain between the CONTRACTOR and CONTRACTOR’S Subcontractor and will not be reviewed by the Consultant or ENGINEER unless specifically called for in the Contract Documents.

3. Consultant or ENGINEER will not review any required Structural Shop Drawings, Structural Calculations, etc., not prepared or signed by a State of California licensed ENGINEER.

4. The ENGINEER will return and will not review any submittal requiring coordination with other submittals until such other submittals or required information are received by the ENGINEER.

O. CONTRACTOR’S Submittals: CONTRACTOR’S submittals required for performance of Contracted Work shall be electronically submitted in e2020 construction subsections 8.1 through 8.22, and shall include, but are not limited to, the following:

1. Contract Price (Cost Breakdown)

2. Construction Schedule and Notification to ENGINEER of completion of each milestone or percentage increment of the Work as required.

3. Submittal Schedule

4. Daily Construction Reports

5. Shop Drawings and Structural Calculations.

6. Manufacturer's Data and Specifications.

7. Samples

8. Templates

9. Certificate of Compliance

10. Construction Photographs

11. Substitutions

12. Record Drawings and Record Project Manual

13. Operation & Maintenance Manuals

14. Stock Materials, Spare parts, tools

15. Material Testing Results

16. Daily Statements of cost-plus percentage Change Order

17. Survey grade sheets

18. Copies of Notice-To-Correction or Notice of Non-Compliance from governing authorities.

19. Maintenance Logs and Maintenance Schedule.

P. Administrative Submittals include, but are not limited to the following:

1. Permits

2. Request for Payments

3. Performance and Payment Bonds

4. Insurance Certificates

5. List of Subcontractors and proof of qualifications

6. Hazardous Communication Program.

7. Certified weekly payroll records.

8. Ethnic Composition of Work Force Report.

9. Third Party Testing Agency

Q. CONTRACTOR shall conform to the provisions of the Contract Document and may be specifically directed by the Consultant or ENGINEER.

1. Preparation and processing of submittals shall be coordinated with Contracted Work operations, which includes fabrication, purchasing and delivery of work items so as not to delay Contracted Work operations.

2. In each Submittal, mark every applicable material, product, equipment, manufacturer's data, product information, color samples, rating or values, part and model numbers, etc. by red color circle. Each of the submittal items must be clearly distinguishable from other unrelated or similar items listed in the Manufacturer's Catalog or Technical Specifications, Manuals, etc.

R. Coordination and Submittals:

1. Carefully review and coordinate all aspects of each item being submitted.

2. Carefully review contract drawings and technical sections, verify all work as laid out or indicated meeting the applicable codes and standards.

3. Ensure ample time for reviewing and processing of the submittals by the CITY or other authorized agencies, delays resulting from improper and untimely submittals shall be the responsibility of the CONTRACTOR.

4. Verify that all such submittal items conform to the Project Manual requirements noted in the Technical Sections.

5. Verify all site conditions and provide all required dimensions and measurements in Shop Drawings.

6. Where necessary, review the CITY'S comments, make changes and resubmit to local governing agencies for approval. Upload the approved plans or drawings for review on e2020 and furnish copies of said drawings at the ENGINEER'S request.

S. CONTRACTOR shall affix to each submittal, the CONTRACTOR'S electronic signature certifying that required coordination has been performed and include on an attached label for processing and recording action taken, noting the following:

1. Name and address of the Subcontractor(s)

2. Name and address of the Supplier

3. Name and address of the Manufacturer

4. Reference to Specification Section Number and Title

5. Reference to Drawing Sheet Number and detail(s)

6. Priority Number and expected return date.

T. CONTRACTOR shall, verify on e2020 that the CONTRACTOR has met the following CITY requirements:

1. Conformance in all respect to the Contract Document requirements.

2. Has reviewed and coordinated all aspects of each submitted item relative to manufacturer's product data, Specifications, etc.

3. Has verified with site conditions and all dimensions.

4. That all questions and/or comments prepared by the Consultant or ENGINEER have been reviewed and answered.

5. CONTRACTOR is not relieved from responsibilities for errors, omissions and any deviation in the required submittals as revealed resulting from the CITY'S or Consultant's review of such submittals.

6. In each Section of the Project Manual, all required lists of material, product or equipment; manufacturer's data; and etc., shall be appropriately grouped and submitted to the CITY for review as one submittal. Piece meal submittals will not be accepted.

   Any submittal with outstanding product data, manufacturer's specification or any required information shall deem to be incomplete and subject for rejection without any review. Subsequent submittal shall be considered as second submission.

7. All Shop Drawings shall be provided with dimensions and measurements verified at the site as stated hereinbefore. If the CONTRACTOR decides to submit the dimensions and measurements at a later time, the CONTRACTOR must state the reason, for the ENGINEER'S approval, why the dimensions and measurements cannot be taken. If approval is granted, the CONTRACTOR shall re-submit the approved submittal with the final dimensions and measurements after the Works are completed. The CONTRACTOR is not relieved from the responsibilities of error and omission, or any problem that may arise during the fabrication or installation.

8. It is considered reasonable that the CONTRACTOR shall make a complete and acceptable submittal to the ENGINEER or Consultant by the second submission of a submittal item. The CITY reserves the right to withhold moneys due to the CONTRACTOR to cover additional costs of the ENGINEER or Consultant's review beyond the second submittal. On the third submittal by CONTRACTOR, the CONTRACTOR will be charged $150 per hour of CITY'S or Consultant's review time and no additional Contract time shall be allowed.

U. Comply with pertinent provisions of the GENERAL CONDITIONS and GENERAL REQUIREMENTS as applicable**,** but not limited**,** to the following:

1. Record Drawings, Record Project Manual, Record Product Data, Record Sample and Record Submittals.

2. Operation and Maintenance Manuals.

3. Manufacturer's Reference Data.

4. Qualification of CONTRACTOR.

5. Certification of Warranty and Guarantee.

6. Manufacturer's Recommended Installation Procedures.

7. Materials List of items proposed to be provided as specified in the Technical Sections of the Project Manual.

8. Samples, illustrating assembly details, workmanship, fabrication techniques, connections, color selection to be submitted as specified in the Technical Sections of the Project Manual.

9. Regarding Concrete Work, submit Portland Cement Mill Certificates, Concrete Mix and Curing Designs, Load Tickets and Product Data.

10. Regarding shop-Inspected fabricated items, submit Shop INSPECTOR Tag, copy of the billing of lading, delivery receipt for materials or equipment.

V. The CONTRACTOR shall comply with all submittal requirements in the Contract Documents. For convenience, a checklist of submittals required in all the Technical Sections is included, but is not necessarily limited to the following:

SECTION OF PROJECT MANUAL	SUBMITTAL
02810 – IRRIGATION, 02932 LANDSCAPE PLANTING	• Product Data • Materials List • Written evidence that Landscape Irrigation System has been inspected • Soils Agriculture Suitability Test Report
03100 – CONCRETE FORMWORK	• Shop Drawing]
03300 – CAST-IN-PLACE-CONCRETE	• Product Data • Samples • Laboratory Test Reports • Portland Cement Mill Certificates • Concrete Mix and Curing Design • Load Tickets • (ETC.)

W. CONTRACTOR shall submit requests for changes in products, materials, equipment and methods of construction required by the Contract Documents, and all submittals shall conform to the provisions of Section 01630 – SUBSTITUTIONS AND “OR EQUAL” SUBMITTAL of the GENERAL

REQUIREMENTS of the Project Manual immediately after the issuance of Notice-To-Proceed.

1. All substitution requests shall be made by the CONTRACTOR and shall imply the CONTRACTOR'S approval of such substitutions.

X. The Following Are Not Considered As Substitutions:

1. Substitutions requested by Bidders during the bidding period or prior to award of contract will not be considered or accepted.

2. Revisions to Contract Documents requested by the ENGINEER or the Consultant.

3. Specified options of products and construction methods included in Contract Documents.

4. The CONTRACTOR'S determination of and compliance with governing regulations and orders issued by governing authorities.

Y. CONTRACTOR shall perform no portion of the Contracted Work requiring submittal and review of Shop Drawings, Product Data, Samples, etc. until such submittals have been reviewed by the Consultant or ENGINEER. All work not shown on Shop Drawings or not conforming to Contract shall be removed without additional cost to the CITY.

Z. CONTRACTOR shall be responsible for procurement and installation of equipment or material without deviation upon receipt of the reviewed submittal from the ENGINEER or Consultant bearing the designation of "A" No Exception Taken". Be responsible for the coordination with other trade, proper fitting and construction of the work, furnishing other material and work required which may not be indicated on the Contract Drawings or Submittals. All submittals shall be reviewed by the CITY for general design or compliance. CONTRACTOR will be responsible for deviation from the drawings or Project Manual, and for errors or omissions of any sort in the Submittals.

AA. CONTRACTOR shall review and attend to all "Note Markings" and/or "Comments Attached" as noted by the ENGINEER or the Consultant on the Submittal. Make corrections or modifications to equipment or material as required.

AB. CONTRACTOR shall omit any article disapproved or noted "Reject" by the ENGINEER, or any article not conforming to the contract, or not of proper quality or grade and provide suitable articles, in lieu thereof in conforming with the Contract.

AC. CONTRACTOR shall resubmit all submittals with corrections as noted by the ENGINEER or the Consultant or as required in timely manner without delay or impact to the contract.

END OF SECTION

SECTION 01350
AUDIT AND ACCESS TO RECORDS

1.1 THE REQUIREMENT

A. The CONTRACTOR shall maintain books, records, estimates, communications, payroll documents and other evidence directly pertinent to performance of Work under this Contract in accordance with generally accepted accounting principles and practices consistently applied for a period of no less than four (4) years from the date of the Project acceptance by the Board of Public Works. The CONTRACTOR shall also maintain the financial information and data used by the CONTRACTOR in the preparation or support of any cost submissions required for this Contract, or any Modifications or claims, and a copy of the cost summary submitted to the CITY. The CITY authorized representatives shall have access, at all times during normal business hours, to such books, records, documents and other evidence for the purpose of inspection, audit and copying. The CONTRACTOR will provide proper facilities for such access and inspection.

B. The CONTRACTOR agrees to make A through G of this Article applicable to this Contract and all Modifications or claims affecting the Contract price. The CONTRACTOR agrees to include A through G of this Article in all his contracts and all tier subcontracts in excess of $10,000, and to make A through G of this Article applicable to all Modifications and claims related to project performance.

C. Audits conducted under this Article shall be in accordance with generally accepted auditing standards and established procedures and guidelines of the reviewing or audit agency.

D. The CONTRACTOR agrees to the disclosure of all information and reports resulting from access to records under A and B of this Article, to the CITY and affected agencies.

E. Records under A and B of this Article shall be maintained and made available during performance of Work under this Contract within the time period specified in A of the Article. In addition, those records which relate to any portion of this Contract, to any Modification, to any dispute, to litigation, to the settlement of claims arising out of such performance, or to costs or items to which an audit exception has been taken, shall be maintained and made available within the time period specified in A of the Article.

F. This right of access Article applies to financial records pertaining to this Contract and all Contract Modifications. In addition this right of access applies to all records pertaining to all contracts, contract modifications, and contract amendments:

1. To the extent the records pertain directly to Contract performance;

2. If there is any indication that fraud, gross abuse or corrupt practices may be involved; or

3. If the Contract is terminated for default or for convenience.

G. Access to records is not limited to the required retention periods. The authorized representatives designated in A of this Article shall have access to records at any reasonable time for as long as the records are maintained.

H. Provided that CITY has made demand for access or audit, pursuant to this Section, CONTRACTOR'S compliance with provisions A through G of this Section shall be a condition precedent to maintenance of any legal action or proceeding by the CONTRACTOR against the CITY and to CONTRACTOR'S right to Progress or Final Payment. Without limitation to the foregoing, or to any other provisions for withholding set forth in the Contract Documents, CITY shall have the right, in its sole discretion and in addition to any right of withholding of retention, to further withhold from any payment to CONTRACTOR a sum of up to ten percent (10%) of the total amount set forth in CONTRACTOR'S current, unpaid Application(s) for Payment, until CONTRACTOR has complied with any outstanding and unsatisfied request by CITY for audits under this Section. Upon CONTRACTOR'S compliance with this Section, any monies withheld pursuant to this Paragraph solely due to CONTRACTOR'S failure to permit an audit requested by CITY shall be released to CONTRACTOR.

I. CONTRACTOR hereby consents and agrees that any failure by CONTRACTOR to provide access to records as provided in A through G of this Section shall be specifically enforceable by issuance of a preliminary and/or permanent mandatory injunction by a court of competent jurisdiction based on affidavits submitted to such court, without the necessity of oral testimony, to compel CONTRACTOR to permit access and inspection of the records or to require delivery of the records to CITY for inspection.

END OF SECTION

SECTION 01351
ESCROW BID DOCUMENTS

1.1 THE REQUIREMENT

A. Scope

1. This Article requires that the three (3) low bidders submit, within the specified time after receipt of bids, one (1) copy of all documentary information including, but not limited to, electronic files generated in preparation of bid prices for this project. This material is hereinafter referred to as "Escrow Bid Documents". The Escrow Bid Documents of the CONTRACTOR will be held in escrow for the duration of the Contract.

2. The successful Bidder agrees, as a condition of the award of the Contract, that the Escrow Bid Documents constitute all of the information used in preparation of the Bid, and that no other bid preparation information shall be considered in resolving disputes or claims. The successful bidder also agrees that nothing in the Escrow Bid Documents shall change or modify the terms or conditions of the Contract Documents.

B. Ownership

1. The Escrow Bid Documents are, and shall always remain, the property of the CONTRACTOR, subject to joint review by the CITY and the CONTRACTOR as provided herein. The Escrow Bid Documents are proprietary and secret information belonging to the CONTRACTOR and exempt from the Federal Freedom of Information Act, California Public Records Act, and the Los Angeles CITY Freedom of Information Act.

2. The CITY stipulates and expressly acknowledges that the Escrow Bid Documents, as defined herein, constitute trade secrets. This acknowledgment is based on the CITY'S express understanding that the information contained in the Escrow Bid Documents is not known outside the Bidder's business, is known only to a limited extent and only to a limited number of employees of the Bidder, is safeguarded while in the Bidder's possession, is extremely valuable to the Bidder and could be extremely valuable to the Bidder's competitors by virtue of it reflecting the Bidder's contemplated techniques of construction. The CITY acknowledges that the Bidder expended substantial sums of money in developing the information included in the Escrow Bid Documents and further acknowledges that it would be difficult for a competitor to replicate the information contained therein. The CITY further acknowledges that the Escrow Bid Documents and the information contained therein are made available to the CITY only because such action is an express prerequisite to award of the Contract. The CITY acknowledges that the Escrow Bid Documents include a compilation of information used in the Bidder's business, intended to give the Bidder an opportunity to obtain an advantage over competitors who do not know of or use the contents of the documentation. The CITY further agrees to safeguard the Escrow

Bid Documents, and all information contained therein, against disclosure to the fullest extent permitted by law.

C. Purpose

1. The purpose of the Escrow Bid Documents procedure is intended to create a spirit of cooperation in an atmosphere of honesty and candor between the CITY and the CONTRACTOR.

2. Escrow Bid Documents will be used to assist in the negotiation of price adjustments and Change Orders and in the settlement of disputes and claims. They will not be used for pre-award evaluation of the CONTRACTOR'S anticipated methods of construction or to assess the CONTRACTOR'S qualifications for performing the WORK.

D. Format and Contents

1. Bidders may submit Escrow Bid documents in their usual cost estimation format; a standard format is not required. It is not the intention of this Article to cause the Bidder extra work during the preparation of the Bid, but to ensure that the Escrow Bid Documents will be adequate to enable complete understanding and proper interpretation for their intended use. The Escrow Bid Documents shall be in English.

2. It is required that the Escrow Bid Documents clearly itemize the estimated costs of performing the WORK of each Bid item contained in the Bid schedule. Bid items should be separated into sub-items as required to present a complete and detailed cost estimate and allow a detailed cost review. The Escrow Bid Documents shall include all quantity takeoffs, crew, equipment, calculations of rates of production and progress, copies of quotations from Subcontractors and Suppliers, and memoranda, narratives, add/deduct sheets, and all other information used by the Bidder to arrive at the prices contained in the Bid. Estimated costs should be broken down into the Bidder's usual estimate categories such as direct labor, repair labor, equipment ownership and operation, expendable materials, permanent materials, and subcontract cost, as appropriate. Plant and equipment and indirect costs should be detailed in the Bidder's usual format. The CONTRACTOR'S reallocation of indirect costs, contingencies, markup and other items to each bid item shall be identified.

3. All estimates for items of Work that are based in whole or in part upon any baseline statements or information in the Geotechnical Baseline Report (GBR), shall clearly reference the baseline statements used. CONTRCTOR shall have no right to an adjustment in the Contract Price or the Contract Completion Date (due to Differing Site Conditions of the General Conditions) unless such baseline statements have been clearly identified in the Escrow Bid Documents.

4. All cost shall be identified. For bid items amounting to less than $10,000, estimated units costs are acceptable without a detailed cost estimate, provided that labor, equipment, materials, and subcontracts, as applicable, are included and provided that indirect costs, contingencies,

and markups, as applicable, are allocated. Bid documents provided by the CITY need not be included in the Escrow Bid Documents unless needed to comply with the following requirements.

E. Submittal

1. The Escrow Bid Documents shall be submitted to the Board of Public Works Office, by the three (3) low Bidders, in sealed containers, within forty-eight (48) hours after the time for receipt of Bids. The containers shall be clearly marked on the outside with the Bidder's name, date of submittal, project name and the words "Escrow Bid Documents".

2. The Escrow Bid Documents shall be accompanied with the certification (a sample is included), signed by an individual authorized by the Bidder to execute Bids, stating that the material in the Escrow Bid Documents constitutes all the documentary information used in preparation of the Bid and that the Bidder has personally examined the contents of the Escrow Bid Documents container and has found that the documents in the container are complete.

BID DOCUMENTATION CERTIFICATION

THE UNDERSIGNED HEREBY CERTIFIES THAT THE BID DOCUMENTATION CONTAINED HEREIN CONSTITUTES ALL OF THE INFORMATION USED IN PREPARATION OF THE BID AND THAT I HAVE PERSONALLY EXAMINED THESE CONTENTS AND HAVE FOUND THAT THIS BID DOCUMENTATION IS COMPLETE.

SIGNATURE: _____

NAME: _____

TITLE: _____

FIRM: _____

DATE: _____

3. Within 14 Calendar days following the receipt of bids, the Escrow Bid Documents of the apparent successful Bidder will be examined, organized and inventoried by representatives of the CITY, together with members of the CONTRACTOR'S staff who are knowledgeable of how the Bid was prepared. This examination is to ensure that the Escrow Bid Documents are legible and complete. It will not constitute approval of proposed construction methods, estimating assumptions, or interpretations of Contract Documents. Examination will not alter any condition or term of the Contract.

4. If all the documentation required in Section D, "Format and Contents", has not been included in the original submittal, additional documentation shall be submitted, at the CITY'S sole discretion, within twenty four (24) hours after the original inventory and examination of the Escrow Bid

Documents and prior to award of the Contract. The detailed breakdown of estimated costs shall be reconciled and revised, if appropriate, by agreement between the CONTRACTOR and the CITY before making the award. If the Contract is not awarded to the apparent successful Bidder, the Escrow Bid Documents of the Bidder next to be considered for award shall be processed as described above.

5. Submission of complete Escrow Bid Documents is an essential element of the Bidder's responsiveness and a prerequisite to a Contract award. Failure to provide the necessary Escrow Bid Documents within the forty-eight (48) hour time limit, may render the Bid non-responsive. Escrow Bid Documents of the unsuccessful Bidders will be returned following award of the Contract.

6. If any Bidder's Bid is based on subcontracting any part of the WORK, each Subcontractor, whose total subcontract price exceeds five percent (5%) of the total Contract price bid by the Bidder, shall provide separate Escrow Bid Documents to be included with those of the Bidder. Such documents shall be opened and examined in the same manner and at the same time as the examination described above for the apparent successful Bidder.

7. If the CONTRACTOR wishes to subcontract any portion of the WORK after award, the CITY retains the right to require the CONTRACTOR to submit Escrow Bid Documents from the Subcontractor before the subcontract is approved.

F. Storage

1. The Escrow Bid Documents will be placed in lockable container, with provisions for the Contractor and the City to provide separate locks,, for the life of the Contract, and stored in a mutually agreeable location at or near the jobsite. The cost of storage will be paid by the CITY.

G. Examination

1. The Escrow Bid Documents shall be examined by both the CITY and the CONTRACTOR, at any time deemed necessary by either the CITY or the CONTRACTOR, to assist in the negotiation of price adjustments and Change Orders or the settlement of disputes and claims.

2. Examination of the Escrow Bid Documents is subject to the following conditions:

a. As trade secrets, the Escrow Bid Documents are proprietary and confidential.

b. The CITY and the CONTRACTOR shall each designate, in writing to the other party and within ten (10) days after execution of the Contract, representatives who are authorized to examine the Escrow Bid Documents, with the exception of the initial reviewers as specified in section 1.1.E.3 above. No other person shall have access to the Escrow Bid Documents.

c. Access to the Escrow Bid Documents may take place only in the presence of duly designated representatives of both the CITY and the CONTRACTOR.

3. The Escrow Bid Documents at all times remain the property of the CONTRACTOR and the CITY will take all reasonable steps necessary to protect confidentiality.

H. Final Disposition

1. The Escrow Bid Documents will be returned to the CONTRACTOR at such time as the following conditions have been satisfied.

a. The Contract has been completed.

b. Final payment has been issued by the CITY.

c. All litigation has been completed, and a written agreement has been executed between the CITY and the CONTRACTOR that no further litigation will be made.

d. The Board of Public Works has accepted the project.

2. The Escrow Bid Documents will be sealed and promptly returned to the CONTRACTOR by the party in charge of the Escrow Bid Documents. Reproduction of any portion of the Escrow Bid Documents will not be permitted at any time without the written permission of the CONTRACTOR.

END OF SECTION

SECTION 01353
OPPORTUNITY TO PARTNER

1.1 THE REQUIREMENT

A. The successful bidder will have the opportunity to enter into a cooperative partnership agreement with the CITY for the contract. Participation in Partnering is highly encouraged. Partnering will create a framework for conflict resolution, improved communications, reduced litigation, and cost containment. During the partnering session, all parties will participate in developing an Issue Resolution Ladder, which will help establish and communicate the chain of command in each organization (See Attachment 01353–A1). Each level of the organization is expected to work cooperatively to resolve issues. However, if issues cannot be resolved in a timely manner or are beyond the authority granted that level, each party understands that the issue must be elevated to the next level.

B. The objective of this Partnering agreement would be effective completion of the Work on time and to achieve a standard of quality that would be a source of pride to both the CITY and the CONTRACTOR. Partnering is intended only to establish an environment of cooperation between the parties and will not affect the terms of this contract.

C. An initial one (1) day training session is recommended to initiate the partnership agreement. The cost of this training, excluding staff labor charges, will be paid from a fixed cash allowance that has been allocated as the bid item Opportunity to Partner in the SCHEDULE OF WORK AND PRICES. No Overhead and Profit shall be added to the cost of the training. If the total cost of the partnering training differs from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order for the difference between the total actual cost and the amount included in the Bid, as an additional amount due the CONTRACTOR or a credit to the CITY, as appropriate.

D. The third party partnering moderator shall be chosen jointly by the Engineer and the Contractor. The City or Contractor may suggest the use of certain moderator, however each party shall have the right to agree or deny the use of the suggested moderator.

SECTION 01410
REGULATORY REQUIREMENTS

PART ONE - GENERAL

1.1 SUMMARY OF WORK

A. Building Codes and Regulations:

1. The CONTRACTOR shall perform the Contracted Work in accordance with the requirements of **the latest edition of the** Los Angeles City Building Codes and Amendments and all other regulations, laws, and ordinances, even though such requirements are not specifically mentioned in the Project Manual or shown on the Contract Drawings.

2. When the Work required by the Drawings and Project Manual are in conflict with any such law or ordinance, the CONTRACTOR shall notify the ENGINEER. The CONTRACTOR shall comply with the more stringent requirements, unless notified by the ENGINEER and the CONTRACTOR shall not proceed with the Work until the ENGINEER has so ordered.

3. This Section specifies procedural and administrative requirements for compliance with governing regulations, codes, and standards imposed upon the Contracted Work. These requirements include obtaining permits, licenses, inspections, releases, and similar documentation, as well as payments, statements, and similar requirements associated with the regulations, codes, and standards.

B. Related Documents:

1. Contract Documents: Work of this Section shall comply with all the Contract Documents, including General Conditions and Supplementary Conditions and other Sections, DIVISION 1 - GENERAL REQUIREMENTS.

1.2 CODES AND REGULATIONS

A. The design and construction of this Project have been selected and depicted on the Contract Documents in compliance with all applicable codes, which govern the various work, materials, devices, equipment, systems, and procedures in effect at the time the permits for the Projects are issued by the governing agencies. These include, but are not limited to, the following:

1. CITY of Los Angeles Building Code and Amendments, latest edition.

2. Los Angeles CITY "Standard Specifications for Public Works Construction", (The Green Book).

3. CAC Title 24.

4. California Building Code (CBC).

5. CAL/OSHA (Occupational and Safety Code).

6. California State Architectural Barrier's Law (CAL/ABL).

7. California State Fire Marshall requirements.

8. California Electrical, Plumbing and Mechanical Codes.

9. Los Angeles CITY Fire Code.

10. State Energy Standards Title 24.

11. Americans with Disabilities Act (ADA).

12. Los Angeles CITY Electrical, Plumbing and Mechanical Codes and Amendments, latest editions.

13. Los Angeles CITY Elevator Code, C.A.C. 3041 and Barclay's California Code of Regulation (Sub-article E620)

14. Los Angeles CITY Municipal Code, latest edition.

15. Uniform Building Code (UBC).

16. All other Codes and Regulations that may be noted in the Technical Sections of the Project Manual.

B. The procedure followed by the ENGINEER has been to contact governing authorities, where necessary, to obtain information needed for the purpose of preparing Contract Documents, recognizing that such information may or may not be of significance in relation to the CONTRACTOR'S responsibilities for performing the Work. Direct contact, by the CONTRACTOR, with such governing authorities can be made for necessary information and decisions that have a bearing on the performance of the Work, if necessary.

C. CONTRACTOR shall be familiar with all codes, regulations and all necessary procedures to obtain and pay for all permits, arrange all inspections, and secure necessary releases or sign-offs, which are prerequisite to any utility service connection work.

D. When conflict or violation of law or codes are found during any inspection by the governing agencies, the CONTRACTOR shall request such allegation of code conflict or violation, or Request of Correction to be on a written form from the governing agencies. The CONTRACTOR shall furnish the ENGINEER and the INSPECTOR each a duplicate copy of such written notice for review.

PART TWO - PRODUCTS (NOT APPLICABLE)

PART THREE - EXECUTION

3.1 PERMIT INFORMATION

A. CONTRACTOR shall contact the ENGINEER to obtain the proper CITY **(**owner**)** information to be used in the manifest or notification prior to start of any abatement work.

B. All information used by the CONTRACTOR including the CITY'S (Owner's) and CITY authorized representative's names, addresses and telephone numbers shall be consistent with the information shown on the building permit and plan-check applications obtained by the CITY.

END OF SECTION

This page intentionally left blank

SECTION 01411
CONFINED SPACE ENTRY

1.1 THE REQUIREMENT

A. Confined Space Entry Program

1. The CONTRACTOR shall be responsible for implementing, administering and maintaining a confined space entry program (CSEP) in accordance with Sections 5156, 5157 and 5158, Title 8, CCR.

2. Prior to starting the Work, the CONTRACTOR shall prepare and submit its comprehensive CSEP to the ENGINEER. The CSEP shall address all potential physical and environmental hazards and contain procedure for safe entry into confined spaces, including, but not limited to, the following:

a. Training of personnel

b. Purging and cleaning the space of materials and residue

c. Potential isolation and control of energy and material inflow

d. Controlled access to the space

e. Atmospheric testing of the space

f. Ventilation of the space

g. Special hazards consideration

h. Personal protective equipment

i. Rescue plan provisions.

3. The CONTRACTOR'S submittal shall include the names of its personnel, including Subcontractor personnel, assigned to the project, who will have CSEP responsibilities, their CSEP training, and their specific assignment and responsibility in carrying out the CSEP.

B. Permit-Required Confined Spaces

1. Entry into permit-required confined spaces, as defined in Section 5157, Title 8, CCR, may be required as a part of the Work. All maintenance holes, tanks, vaults, pipelines, excavations, or other enclosed or partially enclosed spaces shall be considered permit-required confined spaces until the pre-entry procedures demonstrate otherwise. The CONTRACTOR shall implement a permit space program prior to performing any Work in a permit-required confined space. A copy of the permit shall be available at all times for review by CONTRACTOR and CITY personnel at the Worksite.

C. Payment

1. Payment for implementing, administering, and providing all equipment and personnel to perform the CSEP shall be included in the bid items for which the CSEP is required.

END OF SECTION

SECTION 01420
UNITS OF MEASURE

1.1 THE REQUIREMENT

A. General

1. The International System of Units, also referred to as SI or the metric system, is the principal measurement system in these specifications and shall be used for construction, unless otherwise stated in the Contract documents. U.S. Standard Measures, also called U.S. Customary System, are included in parenthesis. SI units and U.S. Standard Measures in parenthesis may or may not be exactly equivalent. If U.S. Standard Measures are specified for use in the contract documents, then all values used for construction shall be U.S. Standard Measures shown in parenthesis. However, certain material specifications and test requirements contained herein use SI units specifically and conversions to U.S. Standard Measure have not been included in these circumstances. When U.S. Standard Measures are not included in parenthesis, then the SI units shall control.

2. Reference is also made to ASTM E 380 for definitions of various units of the SI system and a more extensive set of conversion factors.

B. Units of Measure and Their Abbreviations (abbreviations noted within parentheses):

U.S. Customary Unit (Abbreviations)	Equal to	SI Unit (Abbreviations)
1 mil (= 0.001 in)	=	25.4 micrometer (µm)
1 inch (in)	=	25.4 millimeter (mm)
1 inch (in)	=	2.54 centimeter (cm)
1 foot (ft)	=	0.3048 meter (m)
1 yard (yd)	=	0.9144 meter (m)
1 mile (mi)	=	1.6093 kilometer (km)
1 square foot (ft^2)	=	0.0929 square meter (m^2)
1 square yard (yd^2)	=	0.8361 square meter (m^2)
1 cubic foot (ft^3)	=	0.0283 cubic meter (m^3)
1 cubic yard (yd^3)	=	0.7646 cubic meter (m^3)
1 acre	=	0.4047 hectare (ha)
1 U.S. gallon (gal)	=	3.7854 Liter (L)
1 fluid ounce (fl. oz.)	=	29.5735 milliliter (mL)
1 pound mass (lb) (avoirdupois)	=	0.4536 kilogram (kg)
1 ounce mass (oz)	=	0.0283495 kilogram (kg)
1 Ton (= 2,000 lb avoirdupois)	=	0.9072 Tonne (= 1,000 kg)
1 Poise	=	0.1 pascal · second (Pa · s)
1 centistoke (cs)	=	1 square millimeters per second (mm^2/s)
1 pound force (lbf)	=	4.4482 Newton (N)
1 pound per square inch (psi)	=	6.8948 Kilopascal (kPa)
1 pound force per foot (lbf/ft)	=	1.4594 Newton per meter (N/m)
1 foot-pound force (ft-lbf)	=	1.3558 Joules (J)
1 foot-pound force per second ([ft-lbf]/s)	=	1.3558 Watt (W)
1 part per million (ppm)	=	1 milligram/liter (mg/L)

C. Temperature Units and Their Abbreviations (abbreviations noted within parentheses):

Degree Fahrenheit (Abbreviation: °F)	Degree Celsius (Abbreviation: °C)
°F = (1.8 x °C) + 32	°C = (°F – 32)/1.8

D. SI Units Commonly Used in Both Systems and their Abbreviations (abbreviations noted within parentheses):

1 Ampere (A)
1 Volt (V)
1 Candela (cd)
1 Lumen (lm)
1 second (s)

E. Common Metric Prefixes and Their Abbreviations (abbreviations noted within parentheses):

kilo (k)	10^{3}
centi (c)	10^{-2}
milli (m)	10^{-3}
micro (μ)	10^{-6}
nano (n)	10^{-9}
pico (p)	10^{-12}

END OF SECTION

This page intentionally left blank

SECTION 01421
SYMBOLS

1.1 THE REQUIREMENT

A. The symbols as shown shall mean:

Symbol	Definition
Δ	Delta, the central angle or angle between tangents
∠	Angle
%	Percent
'	Feet or minutes
"	Inches or seconds
#	Number
/	Per or (between words)
°	Degree
℄	Property line
℄	Centerline
℄	Survey line or station line

END OF SECTION

This page intentionally left blank

SECTION 01430
MANUFACTURER'S FIELD SERVICES

1.1 THE REQUIREMENT

A. Prior to the startup of the facility, an experienced, competent, and authorized representative of the manufacturer of each item of equipment incorporated into the Work, for which field services are indicated in specified equipment sections, shall visit the site of the Work and inspect, check, adjust if necessary, and approve the equipment installation. In each case, the representative shall revisit the Jobsite as often as necessary until all trouble is corrected and the equipment installation and operation are satisfactory in the opinion of the ENGINEER. Each manufacturer's representative shall furnish to the ENGINEER and the INSPECTOR a written report certifying that the equipment has been properly installed, and lubricated; is in accurate alignment; is free from any undue stress imposed by connecting piping or anchor bolts; and has been operated under full load conditions and that it operated satisfactorily. All costs for these services shall be included in the CONTRACTOR'S Bid.

END OF SECTION

This page intentionally left blank

SECTION 01452
INSPECTION OF THE WORK

1.1 THE REQUIREMENT

A. Whenever the CONTRACTOR intends to carry on the Work of this Contract on a Saturday, Sunday, or holiday, or more than eight (8) hours a day on Monday through Friday, or any variation in the time of the workday as set forth in the GENERAL CONDITIONS, length of the workday and work week, notification shall be given to the INSPECTOR and the ENGINEER of such intention at least forty-eight (48) hours in advance so that inspection may be arranged. No Work shall be allowed during these times without the approval of the INSPECTOR and no demolition will be permitted on Saturdays, Sundays, or holidays without the prior approval of the Board. All CITY inspection required by the CONTRACTOR on holidays, weekends and overtime for the sole convenience of the CONTRACTOR shall be accomplished at the sole expense of the CONTRACTOR by issuance of a deductive Change Order.

B. The Work shall be conducted under the general observation of the ENGINEER and shall be subject to inspection by the INSPECTOR to ensure compliance with the requirements of the Contract Documents. Such inspection may include mill, plant, shop or field inspection, as required. The INSPECTOR shall be permitted access to all parts of the Work, including plants where materials or equipment are manufactured or fabricated. All materials and articles furnished by the CONTRACTOR shall be subject to inspection and no materials or articles shall be used in the Work until they have been inspected and accepted by the INSPECTOR.

C. No Work shall be backfilled, buried, cast in concrete, hidden or otherwise covered until it has been inspected by the INSPECTOR, and other Agencies for which a permit is required. Whenever the CONTRACTOR is ready to backfill, bury, cast in concrete, hide, or otherwise cover any Work under the Contract, the CONTRACTOR shall notify the INSPECTOR not less than forty-eight (48) hours in advance to request inspection before beginning any such Work of covering. Failure of the CONTRACTOR to notify the INSPECTOR at least forty-eight (48) hours in advance of any such inspections shall be cause for the INSPECTOR to require a sufficient delay in the progress of Work to allow time for such inspections and any remedial or corrective work required, and all costs of such delays, including its effect upon other portions of the work, shall be borne by the CONTRACTOR. Any Work so covered in the absence of inspection shall be subject to uncovering at the sole expense of the CONTRACTOR. Where uninspected Work cannot be uncovered, such as in concrete cast over reinforcing steel, all such Work shall be subject to demolition, removal, and reconstruction under proper inspection, and no additional payment will be allowed therefor.

D. The presence of the ENGINEER or the INSPECTOR shall not relieve the CONTRACTOR of the responsibility for the proper execution of the Work in accordance with all requirements of the Contract Documents. Compliance is a duty of the CONTRACTOR, and said duty shall not be avoided by any act or omission on the part of the ENGINEER or the INSPECTOR. If the

CONTRACTOR fails to replace any defective or damaged Work or material after reasonable notice, the ENGINEER may withhold progress payment for the Work or material, reserve the right to notify the CONTRACTOR'S Bond and Insurance Companies, and/or may cause such Work or materials to be replaced. The replacement shall be deducted from the amount to be paid to the CONTRACTOR, otherwise the CONTRACTOR shall pay the CITY if there remains insufficient or no amount to be paid by the CITY to the CONTRACTOR.

E. The INSPECTOR shall have the right, at all times and places, to reject any articles or materials to be furnished hereunder which, in any respect, fail to meet the requirements of these specifications, regardless of whether the defect in such articles or materials are detected at the point of manufacture or after completion of the Work at the site. If the ENGINEER or the INSPECTOR, through an oversight or otherwise, has not rejected materials or work which is defective or which is contrary to the specifications, such material, no matter in what stage or condition of manufacture, delivery, or erection, may be rejected by the INSPECTOR upon discovery. The CONTRACTOR shall promptly remove rejected articles or materials from the site of the Work after notification of rejection. All costs of removal and replacement of rejected articles or materials as specified herein shall be borne by the CONTRACTOR.

F. At the completion of Work, after completion of all corrections, a final inspection will be made by the INSPECTOR, the ENGINEER, and the CONTRACTOR, as applicable. The INSPECTOR will provide a Final Inspection Correction List itemizing all work necessary to complete the Project satisfactorily.

G. When the correction work is found to be in compliance with the Contract Documents, the construction Work will be considered complete and the Contract time will stop. The CONTRACTOR shall proceed with the maintenance work if required by the Contract. If the correction work is found to be non-compliant with the Contract Documents, the Contract time shall be continued to be assessed until the correction is satisfactorily made and accepted by the CITY.

END OF SECTION

SECTION 01453
SAMPLING, TESTING AND FABRICATION INSPECTION

1.1 THE REQUIREMENT

A. General

1. All materials and fabricated articles furnished by the CONTRACTOR shall be subject to inspection and testing and no materials or fabricated articles shall be incorporated into the Work until they have been inspected and accepted by the INSPECTOR. The CONTRACTOR shall ensure that all items requiring shop inspection are inspected at their source by the INSPECTOR or by an independent inspection or testing laboratory (IITL) that has been approved by the INSPECTOR.

2. Fabrication shall be subject to inspection by the INSPECTOR, to ensure strict compliance with the requirements of the Contract Documents. Such inspection shall include mill, plant, shop or field inspection, as required. The INSPECTOR shall be permitted access to all parts of the Work, including plants where materials or equipment are manufactured or fabricated. When a third party INSPECTOR is approved, monthly meetings may be scheduled with the INSPECTOR at the manufacturing facility to review the progress of the Work and the inspection activities. The INSPECTOR will determine the number of trips based on the manufacturing schedule for the material or fabricated article(s). The CONTRACTOR shall include in the Bid all costs associated with these inspections, except for the costs for CITY personnel as set forth herein which shall be reimbursed under the Bid Item ALLOWANCE FOR CITY INSPECTION, if provided in the SCHEDULE OF WORK AND PRICES.

3. All fabricated items shall be fabricated from Shop Drawings, which have been submitted to the ENGINEER and approved in accordance with SUBMITTALS of the GENERAL REQUIREMENTS. Shop inspection shall be provided on all materials and/or equipment so designated on the CONTRACTOR'S approved Shop Drawings or Contract Documents. The CONTRACTOR shall provide approved Shop Drawings and the corresponding Contract Specification to the INSPECTOR or IITL for use in the inspection and testing of the items to be fabricated.

4. Any item requiring inspection that is delivered to the job site without having been inspected and approved by the Bureau of Contract Administration or an approved third party inspection agency will be rejected by the Project Inspector. The BCA Materials Control Group will not perform any inspection at the job site. It is the Prime CONTRACTOR'S responsibility to ensure that all items requiring shop inspection are inspected at their source by the BCA Materials Control Group, or by an inspection or testing laboratory that has been approved by the BCA Materials Control Group. The City shall be held harmless for any delays resulting from the CONTRACTOR'S or fabricator's failure to obtain the required inspections.

5. Prior to any fabrication, there shall be a Prefabrication Meeting either at the fabricator's location or via telephonic conference. A representative of the CITY and the IITL, if retained, the Prime CONTRACTOR, the fabricator's plant superintendent and the fabricator's quality control person, shall be present at the Prefabrication Meeting. The items to be discussed are the required inspections, tests and reports, based on the approved Shop Drawings and the corresponding Contract Specifications. The IITL shall take minutes of the pre-fabrication meeting and distribute the same to the individuals in attendance. The IITL shall submit an inspection plan to the INSPECTOR for approval two (2) weeks prior to the Prefabrication Meeting. The CONTRACTOR is directed to notify the INSPECTOR and the ENGINEER three (3) weeks in advance of the date and time of the Prefabrication Meeting. The CONTRACTOR shall include in the Bid all costs associated with these meetings except for the costs for CITY personnel as set forth herein which shall be reimbursed under the Bid Item ALLOWANCE FOR CITY INSPECTION, if provided in the SCHEDULE OF WORK AND PRICES.

6. If a Bid Item ALLOWANCE FOR CITY INSPECTION has been included in the SCHEDULE OF WORK AND PRICES in the Bid Proposal, this allowance shall only be used to reimburse the CONTRACTOR for the cost of CITY inspection and travel requirements, as set forth herein, and shall not be used for any portion of the costs of the CONTRACTOR'S independent third party INSPECTOR or inspection laboratory. Reimbursement of approved expenses shall be made on the basis of original invoices and are not subject to markup for overhead and profit. If at the end of the Project, the total costs differ from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order for the difference between the total actual costs and the amount included in the Bid, as an additional amount due the CONTRACTOR or a credit to the CITY, as appropriate.

7. The CONTRACTOR shall coordinate all sampling, testing and fabrication inspections with the INSPECTOR and is responsible for maintaining the inspection schedules. Subject to the terms contained herein, costs for CITY personnel travel will be paid from the Bid item ALLOWANCE FOR CITY INSPECTION. In the event that the scheduled inspection is postponed or delayed by the CONTRACTOR, through no fault of the CITY, and CITY personnel are required to extend their travel duration resulting in additional travel costs, these increased costs, including per diem travel allowances, shall be borne by the CONTRACTOR and are not eligible for payment from the Bid item ALLOWANCE FOR CITY INSPECTION.

8. In addition to the approval of the Bureau of Contract Administration, approval may be required from the Department of Building and Safety, Materials Control Section, for certification of both the manufacturer of structural items/materials and/or the testing laboratory/inspection company. For certification information, contact:

Senior Building Inspector
Materials Control section
Dept. of Building and Safety
Telephone: (213) 482-0388

B. Samples And Test Specimens

1. Samples and test specimens required under these Specifications shall be furnished, prepared for testing, and delivered, at no cost to the CITY, in ample time for the completion of the necessary tests and analysis before said article or materials are to be used. The time and location of the delivery shall be designated by the INSPECTOR.

2. In addition to any other inspection or quality assurance provisions that may be specified, the ENGINEER or the INSPECTOR shall have the right to independently select, test, and analyze, at the expense of the CITY, additional test specimens of any or all of the materials to be used. Whenever any portion of the Work fails to meet the requirements of the Specifications, as shown by the results of independent testing or investigation, all costs of such independent inspection and investigation, and all costs of removal, correction, and reconstruction or repair of any such Work, shall be borne solely by the CONTRACTOR.

3. The INSPECTOR may allow the manufacturer, fabricator, supplier, or Subcontractor to provide the results of tests from samples taken at the mill, factory, or warehouse. The INSPECTOR will accept the test reports provided that the following conditions are met:

   a. The Testing Agency was approved by the INSPECTOR prior to performing the tests, and that all necessary certifications were valid at the time the tests were performed.

   b. The tests were performed in conformity with the Specifications for the specified materials or items.

   c. The reports are made in the form of an affidavit specified hereinafter.

4. Whenever the approved independent testing laboratory or INSPECTOR takes samples of materials other than at the site, the deliveries to the site of materials represented by such samples shall be identified as specified for the specific material. The results of such tests shall be reported to the INSPECTOR in the form of affidavits attested to by the testing agency. Such affidavits shall furnish the following information with respect to the material sampled:

   a. Manufacturer's name and brand.

   b. Place of sampling.

c. Sufficient information to identify the lot, group, bin, or silo from which the samples were taken.

d. Amount of material in the lot sampled.

e. Statement that the material has passed the requirements.

f. Notarized signature and title of the person making the affidavit and the date of execution of the affidavit.

C. Shop Inspection And Testing

1. Shop Inspection and/or Material Sampling and Testing are the sole jurisdiction and responsibility of the Inspector of Public Works through the Bureau of Contract Administration's Materials Control Group. Shop Inspection and/or Material Sampling and Testing cannot be approved, waived, or otherwise altered by any other City Department, Bureau, Division, or individual. Shop Inspection required by this section is in addition to any inspections required by applicable building codes.

2. The CONTRACTOR is responsible for coordinating shop inspection with the INSPECTOR. The CONTRACTOR is to estimate the time required for Shop testing of the fabricated article(s) or equipment, and so inform the INSPECTOR. The Contractor is responsible for contacting the Bureau of Contract Administration, Materials Control Group, regarding scheduling for all Shop Inspection and/or Material Sampling and Testing. Please contact the Materials Control Supervisor at (213) 847-2442.

3. A final inspection by the INSPECTOR may be required prior to shipment. No fabricator or CONTRACTOR shall deliver fabricated materials to the project site without the approval of the BCA Materials Control Group.

4. Where the CONTRACTOR is specifically required by the Technical Specifications to demonstrate performance of major equipment prior to delivery, a testing procedure must be developed by the manufacturer and approved by the ENGINEER prior to scheduling the shop performance testing. Both the INSPECTOR and the ENGINEER are required to witness the performance testing. The ENGINEER will evaluate performance-testing data and notify the INSPECTOR whether the equipment meets the performance requirements of the Contract. The INSPECTOR will be responsible for releasing the equipment for delivery to the Jobsite. This procedure will also apply to field performance testing required as a condition precedent to acceptance of the equipment as described under the PARTIAL ACCEPTANCE and FINAL ACCEPTANCE provision of the Contract.

5. Inspection at Locations Within Thirty (30) Miles from CITY

a. When the CONTRACTOR intends to purchase materials, fabricated products, or manufactured equipment from sources located within thirty (30) miles (48 km) of the geographical limits

of the CITY, the CONTRACTOR shall notify the INSPECTOR at least 24 hours prior to the scheduled date of tests at all stages of manufacture to allow for arrangements specified herein.

b. Except as otherwise provided in these Specifications, performance of the required sampling and tests will be under the direction of the INSPECTOR, from samples provided by the CONTRACTOR, and the cost of performing the test(s) will be borne by the CITY, except for the costs of any retests which show unsatisfactory results which shall be borne by the CONTRACTOR.

6. Inspection at Locations More Than Thirty (30) Miles From the CITY

a. When the CONTRACTOR intends to purchase materials, fabricated products, or equipment from sources located more than thirty (30) miles (48 km) outside the geographical limits of the CITY, an IITL approved by the INSPECTOR, shall be engaged by the CONTRACTOR, at the CONTRACTOR'S sole expense, to inspect the materials, equipment and/or process, unless the City elects to perform the inspection with BCA Materials Control Personnel. Approval of the IITL shall be obtained from the BCA Materials Control Group before producing any material or equipment. The IITL shall judge the materials and fabricated articles by the requirements of the Plans and Specifications and approved submittals. The IITL shall be accountable to the BCA Materials Control Group and shall provide written records of all inspections performed to the Group in a format approved by that Group. No equipment or material shall be shipped nor shall any processing, fabrication and/or treatment of such equipment or materials be done without the required inspection and approval by IITL. Approval by IITL shall not relieve the CONTRACTOR of its responsibility to comply with the Contract requirements. The City retains the right to perform inspection or testing at any remote site with City personnel. If the City exercises this right, the contractor will be required to pay for all costs associated with this inspection and testing, except the Inspectors' wages, unless reimbursement is provided under the bid item ALLOWANCE FOR CITY INSPECTION as listed in the SCHEDULE OF WORK AND PRICES.

b. The CITY retains the right to perform inspection or testing at such remote sites with CITY personnel in lieu of a third party inspector. In the event the CITY exercises this right, the CONTRACTOR shall administer travel arrangements as specified herein Paragraph C.10, CITY PERSONNEL TRAVEL REQUIREMENTS.

7. Inspection Outside Continental United States

a. Requirements and procedures for inspection and testing of materials, fabrication of products and equipment from sources

outside the continental United States shall be the same (including the requirement for an accredited inspection agency and/or testing laboratory pre-qualified by the CITY Department of Building and Safety and approved by the INSPECTOR) as provided in the Paragraph C.7 SHOP INSPECTION & TESTING of this Section. In addition to the requirements of Paragraph C.10, City Personnel Travel Requirements, of this Section, the CONTRACTOR shall provide the following, the cost of which shall be reimbursed out of the ALLOWANCE FOR CITY INSPECTION item, if provided in the SCHEDULE OF WORK AND PRICES.

(1) A minimum of five (5) calendar days hotel accommodation shall be required for each shop inspection visit made by the INSPECTOR.

(2) A minimum advance notice of ten (10) working days shall be required for all hold points (mandatory) inspection.

(3) The approximate rates for allowances given as a guideline in Paragraph C.10, City Personnel Travel Requirements, of this Section, shall be adjusted to match the rates in the foreign locality for similar types of facilities and amenities.

8. Third Party Inspection Requirements

a. The proposed third party inspection and/or testing company must gain approval by the INSPECTOR after award. This approval shall be obtained before producing any material or manufacturing any product or equipment. The approved inspection and/or testing agency shall not sublet or assign its work to any other agency.

b. The approved third party inspection and/or testing agency shall take direction from, and be responsible to, the INSPECTOR.

c. The CONTRACTOR shall also comply with requirements regarding the Prefabrication Meeting as contained herein.

d. The Work and activities of the third party inspection and/or testing agency shall be monitored by the INSPECTOR during monthly meetings to ensure compliance with the Contract Documents.

9. Third Party Testing and Inspection Laboratory Approval Procedures

a. The INSPECTOR will approve third party inspection and/or testing agencies/laboratories. The City of Los Angeles has a contract only with the Prime CONTRACTOR. The City of Los

Angeles has no Third Party agreement with any subcontractor, plant, manufacturer, or fabricator. All are considered employees of the Prime CONTRACTOR and the Prime CONTRACTOR shall be responsible for their work. The Supervisor of the Materials Control Group of the Bureau of Contract Administration acts on behalf of the INSPECTOR of Public Works Therefore, all requests for the approval of a third party inspection or testing company shall be from the Prime CONTRACTOR, typewritten on the Prime CONTRACTOR'S letterhead, addressed to the Supervisor of the BCA Materials Control Group (213) 847-2442 as follows:

Bureau of Contract Administration
General Services Division
Materials Control Group
1149 S. Broadway, Suite 300
Los Angeles, CA 90015

One (1) duplicate copy of the request shall be sent to the ENGINEER.

b. The letter requesting approval of a third party test lab or private inspection company shall contain all of the following information:

PROJECT DATA

(1) Complete title of the project.
(2) The project work order number.
(3) The approved submittal number(s) and a brief description of the item(s) to be inspected tested with their Specification Division and Section number.

PROPOSED INSPECTION

(1) Names of two (2) proposed testing laboratories or inspection companies.
(2) Addresses and telephone numbers of the proposed test labs/inspection companies.
(3) Contact person at the proposed test labs/ inspection companies.
(4) Description and history of the proposed test laboratories/inspection companies.
(5) Resumes of at least two (2) or more inspectors (primary and alternate) who will perform the physical inspections.
(6) Samples of all inspection reporting documents utilized by the provider and a written description of the reporting methodology.

FABRICATOR DATA

(1) Company name, address, and telephone number of the actual production site for each fabricator.
(2) Contact person at each fabricator.
(3) Fabrication schedule.

c. The INSPECTOR will notify the CONTRACTOR by letter if the testing laboratory/inspection agency has been approved.

d. The Materials Control Group may order modifications of the inspection reporting procedure utilized by the provider prior to approval.

10. CITY Personnel Travel Requirements

a. The CONTRACTOR shall administer the travel and furnish the following services for CITY personnel who are attending Prefabrication Meetings and performing inspection services.

(1) Purchase airline tickets (Coach Class only).

(2) Make hotel reservations and prepay for the planned number of nights. (Three Star or American Automobile Association (AAA) Three Star approved.)

(3) Make rental car reservations and prepay for the planned number of days if the manufacturer's or fabricator's facility is greater than one (1) mile from the departing and arrival airport or hotel.

(4) The estimated per diem travel allowance will be at least fifty U.S. dollars ($50.00) per day for meals, en route expenses, and other miscellaneous expenses. CITY personnel will submit an expense statement to the CITY for approval of actual expenses incurred.

(5) For CITY paid advances, the CONTRACTOR shall reimburse the CITY for these actual expenses by deductive Change Order to be deducted from the Bid item, ALLOWANCE FOR CITY INSPECTION.

(6) When requested by the ENGINEER or the INSPECTOR, the CONTRACTOR shall provide an advance check, for the estimated costs of all travel allowance costs, to the ENGINEER or the INSPECTOR, no later than forty eight (48) hours prior to the departure time. Failure to provide all accommodations described herein in such a manner to adequately facilitate the travel activity will cause the inspection visit to be canceled, and any costs or delays

owing to such rescheduling shall be born by the contractor.

b. As the basis for cost reimbursement under SCHEDULE OF WORK AND PRICES of the Bid Proposal, the CONTRACTOR shall submit receipts or invoices for payment to the ENGINEER with a cover letter referencing the following:

(1) INSPECTOR'S or ENGINEER'S name.

(2) Project title.

(3) Project Work Order Number.

(4) CONTRACTOR'S:

(a) Name

(b) Address

(c) Telephone Number.

(d) CONTRACTOR'S contact person and telephone number(s)

(5) Reference Technical Specification and submittal number.

(6) Purpose of inspection.

(7) Address and location of inspection:

(8) Country

(9) State

(10) City.

(11) Date(s) of inspection.

(12) Description of items enclosed as set forth herein

11. Shop Inspected Equipment/Materials:

a. Without waiving any specific requirement of the Contract Documents, the following items of equipment and/or material are examples of, but not limited to those items that are subject to shop inspection as noted herein below.

Equipment/ Materials	Spec. Sect.	Insp. Req'd	Product Identification	See Notes
Aluminum Fabrication	05530/08410/08416/08520	YES	Inspector Witness – Yellow Tag	G.N.1
Aluminum Railings	05520	YES	Yellow Tag	G.N.5
Anodizing	05035/09800	YES	Yellow Tag	G.N.18
Asphalt Material	02710	YES	Batch Plant Insp. Report #1101	G.N.8
Base Material	02310	NO	Standards Div. Approves Source	
Bearing Pads	05120	YES	Yellow Tag	G.N.31
Bolting	05120	YES	Inspector Witness - Yellow Tag	G.N.2
Bitumen	07160	YES	Insp. Witness & meas. thickness	G.N.18
Boilers	11915	YES	Yellow Tag	G.N.7

Wood Paneling	06200	NO		G.N.17
Wood Trusses-Engineered		NO	Provide Manufacturer's Certification	

NOTES:

1. Fabrication of ferrous materials, which may include welding, high strength bolting or non-destructive testing shall be shop inspected.

2. Bolting with ASTM A-325 bolts, ASTM A-490 bolts or other alternate fasteners shall require shop inspection. Bolting with ASTM A-307 bolts does not require shop inspection.

3. Reinforcing steel is normally sampled at the Jobsite, but for expediency, the sampling will be performed at the point of fabrication by the CITY'S Standards Division.

4. All forging and castings made at the foundry shall be shop inspected, approved and stamped prior to delivery to the Jobsite.

5. Steel stairways and handrails (ferrous) require shop inspection for welding and specified coatings.

6. Metal door and frame fabrication requires shop inspection.

7. Pressure vessels, tanks, boilers and related equipment do require inspection of fabrication, welding, and testing.

8. Concrete, asphalt concrete and mix designs are inspected at the batch plant. These products are shop inspected for conformance to Specifications and verification by the INSPECTOR.

9. Both pre-cast and pre-stressed concrete are subject to shop inspection and approval before delivery to the Jobsite.

10. Street lighting standards of either steel, aluminum or concrete are required to be shop inspected.

11. Reinforced concrete vaults catch basins, and reinforced pipe are required to be shop inspected. (See Note 9.) Maintenance hole shafts and grade rings without reinforcement or linings do not require shop inspection. Gaskets used for reinforced concrete pipe require testing.

12. FGRC and FGRG (Fiberglass Reinforced Concrete and Fiberglass Reinforced Gypsum) should be manufactured in an approved shop and be shop inspected.

13. Mortar, grout and gypsum shall be inspected at the batch plant, unless the products are mixed at the Jobsite from approved packages under the inspection of the INSPECTOR.

14. Concrete Masonry Units (CMU) shall be inspected and sampled at the Jobsite.

15. Lining and coating of ductile iron pipe and fiberglass pipe, as well as welded supports, are subject to shop inspection. Vitrified Clay Pipe (VCP) is exempt, as are non-welded pipe supports which can be classified as standard or catalog items. The CITY'S Standards Division will provide the inspection and testing for VCP.

16. Shop inspection is not required for lumber, unless it is treated lumber. Glue-laminated products do not require shop inspection. Each "Glue Lam" shall come with an individual Certificate of Compliance.

17. Millwork and wood products are not required to be shop inspected, unless the Specifications call for equivalency or inspection by the Woodworking Institute of California (W.I.C.).

18. Specified coatings including, but not limited to, anodizing, bitumen, epoxy, galvanizing, polyvinylidene fluoride, and pipe linings and coatings shall be shop inspected.

19. Conveying equipment, such as elevators, escalators, or conveyors are exempt from shop inspection. However, the structural framework of the escalators, hoists, cranes and lifts do require inspection.

20. Mechanical equipment, such as compressors, pumps, motors and valves, require shop inspection for fabrication, tests of windings, and any specified coating. Pumps, valves and motors may be exempt if they are standard or catalog items.

21. Fabrications of sluice gates and slide gates are subject to shop inspection for fabrication, welding and coating.

22. Transformers rated at 600 volts and higher, transformers rated at 100 KVA and higher, generators, switchgear motor drives and complex wired panel boards require shop inspection.

23. Lighting fixtures and lamps are considered standard or catalog items and are exempt from shop inspection.

24. Electrical wiring and testing, performed in the shop, requires inspection to verify conformance with applicable Specifications.

25. Shop tests specified in the Specifications including, but not limited to, voltage, grounding, loads, performance, installation, temperature, or noise levels will require shop inspection.

26. HVAC (heating, ventilation and air conditioning) are subject to shop inspection for fabrication and welding. Each component will be evaluated for possible inspection.

27. Sheet metal ductwork is not shop inspected. Flexible ductwork is considered a standard or catalog item and no shop inspection is required. Ductwork made of aluminum, stainless steel, or fiberglass will require shop inspection.

28. Storefronts and wall systems are shop inspected. Fixed windows are standard items and have no need of inspection.

29. Plastic pipe, such as ABS or PVC does not require shop inspection. The pipe will be inspected and sampled for testing at the Jobsite. (a) Extruded plastic liner plate and PVC Liner will require shop inspection.

30. Fiberglass products, because of the resins and the fiber reinforcement, do require shop inspection.

31. Elastomeric bearing pads shall be tested according to Cal-Trans Standard Specification Section 51-1.12H. Sampling will be done by the INSPECTOR.

(END OF SECTION)

SECTION 01454
WEIGHING AND METERING EQUIPMENT

1.1 THE REQUIREMENT

A. It is the CONTRACTOR'S responsibility to ensure that all scales and metering equipment used for proportioning materials shall be inspected for accuracy and certified within the past twelve (12) months by the State of California Bureau of Weights and Measures, by the County Director or Sealer of Weights and Measures, or by a scale mechanic registered with or licensed by the County.

B. The accuracy of the work of a scale service agency, except as stated herein, shall meet the standards of the California Business and Professions Code and the California Code of Regulations pertaining to weighing devices. A certificate of compliance shall be presented, prior to operation, to the ENGINEER for approval and shall be renewed whenever required by the ENGINEER at no cost to the CITY.

C. All scales shall be arranged so they may be read easily from the operator's platform or area. They shall indicate the true net weight without the application of any factor. The figures of the scales shall be clearly legible. Scales shall be accurate to within one percent (1%) when tested with the plant shut down. Weighing equipment shall be so insulated against vibration or moving of other operating equipment in the plant area that the error in weighing with the entire plant running will not exceed two percent (2%) for any setting nor one-and-one-half percent (1.5%) for any batch.

SECTION 01455
CALIBRATION OF TESTING EQUIPMENT

1.1 THE REQUIREMENT

A. It is the CONTRACTOR'S responsibility to ensure that testing equipment such as, but not limited to, pressure gages, metering devices, hydraulic systems, force (load) measuring instruments, and strain-measuring devices shall be calibrated by a testing agency acceptable to the ENGINEER at intervals not to exceed twelve (12) months and following repairs, modification, or relocation of the equipment. Calibration certificates shall be provided when requested by the ENGINEER.

END OF SECTION

This page intentionally left blank

SECTION 01561
ENVIRONMENTAL CONTROL

1.1 THE REQUIREMENT

A. Explosives for Blasting

1. The use of explosives for blasting purposes on the work shall not be permitted.

B. Fugitive Dust and Smoke Control

1. The CONTRACTOR shall furnish all labor, equipment, and means required and shall carry out effective measures wherever and as often as necessary to prevent its operation from producing dust in amounts damaging to property, cultivated vegetation, or domestic animals, or causing a nuisance as defined by the ENGINEER. The CONTRACTOR shall be responsible for any damage resulting from any dust originating from its operations. The dust abatement measures shall be continued until the CONTRACTOR is relieved of further responsibility by the ENGINEER. No separate payment shall be allowed for dust abatement measures and all costs thereof shall be included in the CONTRACTOR's Bid. The use of water resulting in mud on streets, sidewalks, driveways, shall not be permitted as a substitute for sweeping or other methods of dust control.

2. The CONTRACTOR shall not discharge smoke, dust, or any other air contaminants into the atmosphere in such quantity as will violate the regulations of any legally constituted authority.

3. The CONTRACTOR shall comply with the requirements of Title 8, California Code of Regulations, concerning handling of asbestos dust.

C. Rubbish Control

1. Through all phases of construction, including suspension of Work and until final acceptance of the Project, the CONTRACTOR shall keep the Worksite and other areas used by it in a neat and clean condition, and free from any accumulation of rubbish and debris. The CONTRACTOR shall dispose of all rubbish and waste materials of any nature occurring at the Worksite and shall establish regular intervals of collection and disposal of such materials and waste. The CONTRACTOR shall also keep its haul roads free from dirt, rubbish, and unnecessary obstructions resulting from its operations. Care shall be taken to prevent spillage on haul routes. Any such spillage shall be removed immediately and the area cleaned by the CONTRACTOR. Equipment and material storage shall be confined to areas approved by the ENGINEER. Disposal of all rubbish and surplus materials shall be off the site of construction, at the CONTRACTOR's expense, all in accordance with local codes and ordinances governing locations and methods of disposal, and in conformance with all applicable safety laws, and the requirements of the

OSHA Safety and Health Standards for Construction. All cleanup cost shall be included in the CONTRACTOR's Bid.

D. Sanitation

1. Fixed or portable chemical toilets shall be provided for the use of the CONTRACTOR's employees. These accommodations shall be maintained in a neat and sanitary condition. Toilets at construction sites shall conform to the requirements of Title 8, California Code of Regulations.

2. Wastewater conveyance and disposal shall not be interrupted. Should the CONTRACTOR disrupt existing sewer facilities, sewage shall be conveyed in closed conduits and disposed of in a sanitary sewer system. Sewage shall not be permitted to flow in trenches or be covered by backfill.

3. The CONTRACTOR shall establish a regular schedule for collection of all sanitary and organic waste. All wastes and refuse from sanitary facilities provided by the CONTRACTOR or organic material wastes from any other source related to the CONTRACTOR's operations shall be disposed of away from the site in a manner satisfactory to the INSPECTOR and in accordance with all laws and regulations pertaining thereto. Disposal of all such wastes shall be at the CONTRACTOR's expense.

E. Chemicals

1. The following paragraph does not relieve the CONTRACTOR from its responsibility for obtaining prior approval from the ENGINEER for chemical usage when otherwise required.

2. The CONTRACTOR shall provide four (4) copies of the MSDS to the INSPECTOR for all chemicals used during project construction or furnished for project operation, prior to bringing them on site, whether defoliant, soil sterilant, herbicide, pesticide, disinfectant, polymer, reactant, or of other classification, which shall show approval of either the U.S. Environmental Protection Agency or the U.S. Department of Agriculture. Use of all such chemicals and disposal of residues shall be in strict accordance with the printed instructions of the manufacturer and with all other applicable laws and regulations.

F. Lead paint notification

1. The CONTRACTOR is hereby notified that the facility under this Contract may contain Lead (Pb), Chromium (Cr) and Molybdenum (Mo).

2. If any paints containing Lead or Chromium are to be physically disturbed or made airborne during the progress of the Work by activities such as abrasive blasting, welding, cutting or torch burning, the CONTRACTOR shall provide appropriate worker protection in accordance with OSHA Lead in Construction Standard and in any other applicable regulations.

3. All paint which is removed or disturbed during the progress of the Work or any demolition debris which contains these paints, either of which contains in excess of 5 ppm (mg/l) Lead or Hexavalent Chromium when tested in accordance with the Waste Extraction Test (WET) method of the California Code of Regulations, Title 22, shall be disposed of as hazardous waste. The CONTRACTOR shall be responsible for such disposal in accordance with all applicable laws and regulations.

G. Hazardous Waste

1. Hazardous waste generated by the CONTRACTOR at the site shall be disposed of in accordance with NOTIFICATION OF HAZARDOUS SUBSTANCES of the General Conditions.

H. Odor Control

1. The CONTRACTOR shall furnish all labor, materials, and equipment required and shall carry out effective measures whenever and as often as necessary to prevent the discharge of a nuisance odor from its operation into the atmosphere in such quantity as will violate the regulations of any legally constituted authority. During construction, the CONTRACTOR shall notify the ENGINEER and the INSPECTOR at least forty-eight (48) hours in advance when potential odor-causing activities are scheduled for construction.

I. Drainage Control

1. The CONTRACTOR shall maintain drainage within and through the Work areas. Earth dams will not be permitted in paved areas. Temporary dams of sandbags, asphaltic concrete, or other acceptable material will be permitted when necessary. Such dams shall be removed from the site as soon as their use is no longer necessary.

J. Graffiti Control

1. Throughout all phases of Work, including suspension of work, and until final acceptance, the CONTRACTOR shall keep all equipment, field offices, storage facilities and other facilities free of graffiti. Graffiti shall be painted over, masked or cleaned off within twenty-four (24) hours after notification by the INSPECTOR

K. Vermin Control

1. At the time of acceptance, structures entirely constructed under the Contract shall be free of rodents, insects, vermin, and pests. Necessary extermination work shall be arranged and paid for by the CONTRACTOR as part of the work within the contract time, and shall be performed by a licensed exterminator in accordance with requirements of governing authorities. The CONTRACTOR shall be liable for injury to persons or property and responsible for the elimination of offensive odors resulting from extermination operations.

L. Pre and Post Construction Survey (PCS)

1. The CONTRACTOR shall be responsible for any damages to the adjacent properties caused by the CONTRACTOR or its Subcontractors. This includes damages to structures at Pledgerville Senior Citizen at 12991 Van Nuys Blvd, Pacoima Charter School at 11016 Norris Avenue, and the onsite David M. Gonzales Recreation Center at 10943 Herrick Avenue, Pacoima, CA.

2. The CONTRACTOR shall implement assessment damage prevention and measures as necessary. As a minimum, the CONTRACTOR shall secure the services of a property assessment company to prepare a PCS report for adjacent premises and structures at addresses and locations listed below to differentiate the existing conditions from post constructions:

   A. David M. Gonzales Recreation Center Structures and Buildings located onsite at 10943 Herrick Avenue, Pacoima, CA 91331.

   b. Structure within the Pacoima Charter School property located adjacent to western border of the site at 11016 Norris Avenue, Pacoima, CA 91331.

   c. Structure located within Whiteman Airport to the east of Diversion Structure No. 2 at 12780 Pierce Street #4, Pacoima, CA 91331.

3. The property assessment company shall have a minimum experience of 10 years performing similar work including have establish forms and procedures for petitioning right-of-entry from property owners and renters. The lead investigator/assessor of the property assessment company shall have a minimum of 5 years experiences in conducting this type of work on over 30 similar properties and / or structures

4. Report shall be in color, minimum three (3) hard copies, and an electronic (pdf) copy. Each property/structure shall have its own separate report. The interior and exterior survey includes, but is not limited to, visual observation of: the interior ceilings, walls, floors, windows, doors, basement, stairs, the exterior walls, roof, walkways, driveways, retaining walls, perimeter walls, and other special features currently on the properties, with accompanying photographs. All reports shall be signed by both the lead assessor and executive level representatives. Property owners shall be provided with a hard copy of each report.

5. Each photograph shall include date, time, location and direction of view. The PSC report includes attached “Notification Letter” to be signed by the property or/and rental owners. Also, any observed existing damage shall be identified as “low”, ”medium”, or of “high” severity, or similar rating system.

6. The preconstruction survey and report shall be conducted and prepared just prior to implementing any work adjacent to identified addresses and locations. However, ample time shall be scheduled to secure Right-of-Entry in advance of actual survey.

7. The post construction survey and report shall be conducted and prepared immediately after substantial completion of work at each address and/or location, or as directed in writing by the ENGINEER.

8. The CONTRACTOR shall be responsible for all the repair costs if the damages to existing facilities are caused by CONTRACTOR.

9. All costs for performing the PCS report shall be included in the Bid Items. The City has the option to cancel the need for conducting the post construction survey and related report for any identified item and receive corresponding credit

END OF SECTION

This page has been left intentionally blank.

SECTION 01562
ENVIRONMENTAL MITIGATION OR CONDITIONS

1.1 THE REQUIREMENT

A. The CONTRACTOR shall mitigate the adverse environmental impacts associated with the Work of the Contract. The CONTRACTOR shall indemnify and hold harmless the CITY from any and all fines, penalties or damages incurred by the CITY for violation of any environmental mitigation measures or permit caused by the CONTRACTOR's failure to comply with environmental Mitigation Measures (MM) and/or Best Management Practices (BMPs) of this Article. The measures that the CONTRACTOR shall take to mitigate environmental impacts include, but are not limited to the following:

1. Implement a Fugitive Dust and Erosion Control Plan (FDECP) that meets or exceeds SCAQMD requirements and the CITY'S FDECP for this site.

2. Comply with the General Construction Activity Storm Water Permit and the Storm Water Pollution Prevention Plan for this site.

3. Comply with the requirements of NOTIFICATION OF HAZARDOUS SUBSTANCES of the General Conditions.

4. Comply with all MM and BMPs contained in the Initial Study/Mitigated Negative Declaration (IS/MND). Note specific requirements for David M. Gonzales are sections HAZ-1, HAZ-2, NOI-2, and NOI-5 of the MMRP.

5. Protect sensitive habitats and species through the use of fencing, to prohibit construction personnel access to adjacent habitat areas, and with dust control measures of the FDECP.

6. Comply with the following emission control measures to minimize construction activity emissions, at no additional cost to the CITY:

a. Stop construction activities during Stage II smog alerts which will be announced to the CONTRACTOR by the ENGINEER;

b. Reduce construction equipment emissions by shutting off all equipment not in actual use;

c. Reduce construction-related traffic congestion;

d. Provide rideshare incentives for construction personnel;

e. Tune and maintain construction equipment properly;

f. Use low-sulfur/low nitrogen fuel for construction equipment, if available;

g. Provide transit incentives for construction personnel;

h. Configure construction parking to minimize traffic interference;

i. Minimize obstruction of through-traffic lanes;

j. Provide a flagperson to facilitate traffic flow and prevent traffic congestion;

k. Schedule operations affecting roadways for off-peak traffic hours.

l. The Contractor shall notify the LABOE Project Inspector and Construction Manager twenty-one (21) calendar days in advance of any vegetation disturbance or ground-disturbing activities during the avian season, February 1st to September 1st.

7. Comply with the Mitigation Monitoring Program (see Section 5 of "Draft Final Mitigated Negative Declaration Stormwater Capture Parks Program.") Mitigation measures and best management practices include, but are not limited to, the following:

a. AQ-1:

(1) The program shall use off-road diesel-powered construction equipment that meets or exceeds the CARB and USEPA Tier 4 off road emissions standards for equipment rated at 50 horsepower or greater and not identified under (2) or (3) below. Such equipment will be outfitted with Best Available Control Technology (BACT) devices, including CARB-certified Level 3 Diesel Particulate Filter or equivalent. These requirements shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply each equipment.

(2) All dumpers/tenders, used on site shall either be certified Tier 3 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent; certified Tier 4 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent or equivalent, or alternatively fueled (e.g., gasoline, electric, CNG).

(3) At the minimum, the following equipment shall be electric: air compressors, cement and mortar mixers, concrete saws, forklifts, pumps. Diesel generators shall be placed with electricity from the grid either permanent or temporary, or replaced with alternative (non-diesel) fuels.

(4) Equipment requirements identified under (1), (2), and (3) above all be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at time of mobilization of each applicable unit of equipment.

(5) During the site clearing and preparation, grading and excavation, and soil filling, revegetation, and park

improvement phases, watering must be conducted a minimum of 4 times per day during dry weather.

(6) The fleet shall be composed of a mix of 2014 or newer trucks. The contractor shall provide documentation as specified by LABOE Project Inspector and/or Construction Manager specifying the year/make/model of the trucks. The city shall ensure that on-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits:

The daily truck limit for this project shall not exceed 27 trucks per day.

(a) If the procurement of 2014 or newer trucks is unfeasible, the contractor shall provide a statement specifying why it is unfeasible. If the procurement of 2014 or newer trucks is unfeasible, the contractor may use older trucks, but the daily truck limits are the following:

The daily truck limit for this project shall not exceed 20 trucks per day.

b. BIO-1: Special-Status Wildlife Species. Construction activities at any of the nine project sites could result in impacts to the Cooper's Hawk (*Accipiter cooperii*), a California Species of Special Concern, where mature trees are present. Similarly, construction activities may also impact other nesting bird species that may nest in a variety of vegetation as well as man-made structures. Construction activities should occur outside of the avian nesting season. If the avian nesting season cannot be avoided and construction or vegetation removal occurs from February 1 to September 1, the City shall implement the following to avoid and minimize impacts to nesting birds and raptors:

(a) During the avian breeding season, a qualified biologist shall conduct a preconstruction avian nesting survey no more than 7 days prior to vegetation disturbance or ground-disturbing activities. If construction begins in the non-breeding season and proceeds continuously into the avian nesting season, no surveys are required. However, if there is a break of 7 days or more in construction activities during the nesting season, a new nesting bird survey shall be conducted before construction begins again.

(b) The preconstruction survey shall cover all reasonably potential nesting locations on and within 100 feet of the construction areas. A 300-foot radius shall be surveyed in areas containing suitable habitat for nesting raptors, such as trees and utility poles.

(c) If an active nest is found during the preconstruction avian nesting survey, a qualified biologist shall designate a suitable buffer for all passerine birds and raptor species. The nest site area shall not be disturbed until the nest becomes inactive, the young have fledged, the young are no longer being fed by the parents, the young have left the area, and the young will no longer be impacted by the Program. Buffer areas may be increased upon recommendation of a qualified biologist if any endangered, threatened, California Fully Protected, or California Species of Special Concern are identified during the preconstruction surveys.

(d) If the nest(s) are found in an area where ground disturbance is scheduled to occur, the City or its contractor shall avoid the area by delaying aground disturbance in the area until a qualified biologist has determined that the birds have fledged and are no longer reliant upon the nest or parental care for survival.

(e) Prior to removal of trees in any parks, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The surveys should encompass a minimum buffer area of 100 feet around the parks. The results of the surveys will be provided to CDFW. In the event that bat roots are identified, an additional bat species survey will be conducted using acoustic survey techniques necessary to confirm the species of bat using the area. If the species survey concludes that sensitive bat species are present, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted without prior approval from CDFW.

c. CUL-1: In the event Program designs are further refined and individual park project components change to encroach more closely than 50 feet to the clubhouse associated with the David M. Gonzales Recreation Center, the city shall retain a qualified architectural historian meeting the Secretary of the Interior’s Standard for Architectural history to review the design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, the qualified architectural historian shall also assess potential construction-related impacts resulting from ground-borne

vibration. Should ground-borne vibrations have the potential to impact the historical resources, the City and the qualified architectural historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources.

d. CUL-2: Prior to the start of ground-disturbing activities, the City shall retain a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (U.S. Department of the Interior, 2008) to carry out the following cultural resources mitigation measures.

e. CUL-3: Prior to start of ground-disturbing activities, the qualified archaeologist shall prepare a cultural resources sensitivity training. All construction personnel shall receive sensitivity training prior to beginning work onsite. Construction personnel should be informed of the types of archaeological resources that may be encountered, and of the proper procedures to be enacted om the event of an inadvertent discovery of archaeological resources or human remains. The City should ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.

f. CUL-4: Prior to the start of any project-related ground-disturbing activities, LADWP will provide a qualified archaeologist shall prepare a Cultural Resources Monitoring Plan (CRMP) in consultation with Tribes that requested consultation under AB52. Native American monitoring, which shall include all ground-disturbing activities The CRMP shall include monitoring protocols to be carried out during Program-related construction. The CRMP shall stipulate that Native American monitors associated with any of the Tribes that have been consulted with under AB52 be retained to monitor Program-related ground disturbance stipulated in the CRMP.

g. CUL-5: In the event of the unanticipated discovery of archaeological materials, paleontological materials, and/or human remains during the Program implementation, all work shall immediately cease in the area (within approximately 100 feet) of the discovery until it can be evaluated by the qualified archaeologist. Construction shall not resume until the qualified archaeologist has conferred with the City and the Native American monitors on the significance of the resource.

If it is determined that the discovered archaeological resource constitutes a significant resource, avoidance and preservation in place is the preferred manner of mitigation. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In event that preservation in place is demonstrated to be infeasible and data recovery through excavation is the only feasible mitigation available, a Cultural Resources Treatment Plan shall be

prepared and implemented by the qualified archaeologist in consultation with the City and Native American monitors that provides for adequate recovery of the scientifically consequential information contained in the archaeological resource. The City shall consult the appropriate Native American representatives in determining treatment and disposition for prehistoric or Native American resources for prehistoric or Native American resources to ensure cultural values ascribed to the resource beyond those that are scientifically important are considered.

h. GEO-1: In the event that the depth to groundwater rises to less than 50 feet bgs as measured in nearby wells, the stormwater infiltration process shall be stopped and the stormwater routed to the surface storm drain system until groundwater depths decrease to below 50 bgs.

i. GEO-3: Prior to start of any ground-disturbing activities, the Qualified Paleontologist shall contribute to any construction worker cultural resources sensitivity WEAP training (Worker Environmental Awareness Program), a program that educates project managers and workers about regulatory compliance and responsibilities for conserving environmental resources, materials outlined in Mitigation Measure CUL-2, either in person or via a training module provided to the Qualified Archaeologist. This training shall include information on what types of paleontological resources could be encountered during excavations, what to do in case an unanticipated discovery is made by a worker, and laws protecting paleontological resources. All construction personnel shall be informed of the possibility of encountering fossils and instructed to immediately inform the construction foreman or supervisor if any fossils are unexpectedly unearthed in an area where a paleontological monitor is not present. The Contractor shall ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance. Such documentation shall be made available to the City, whenever requested.

j. HAZ-1: The City or its construction contractor shall ensure that fueling of vehicles or storage of fuel or other chemicals would occur at the furthest extent possible from an existing school site.

k. HAZ-2: For all schools located adjacent to a proposed work area, the City shall coordinate school safety routes, which include, but not be limited to:

    (1) Maintaining in place all crosswalks along the safe from the school (for Pacoima Charter School these would include Norris Avenue, Van Nuys Boulevard, Pierce Street, and Herrick Avenue).

    (2) Designating a safe location for school buses and parents to drop and pick up students.

(3) Designating a safe parking area for parents to wait for/pick up school children.

(4) Maintaining sidewalks open to pedestrian traffic during construction.

(5) Additional safety measures must be adopted during construction to protect the students and the public, including k-railing, secured fencing with screen, clear signing, temporary striping, and a flagger for trucks entering and existing the construction zone. Flaggers should also be considered at crosswalks while students are present.

(6) Close coordination with the impacted school and the Los Angeles Unified School District for input on the school safety route design and frequent communication during construction.

(7) Extensive outreach program for the school and the community describing safety measures and construction schedules.

(8) Restrict construction times to avoid before and after school timeframes while children may be walking to and from school, and while school is in session, as feasible.

l. NOI-1: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), the contractor shall ensure that all construction equipment, fixed or mobile, are equipped with properly operating and maintained noise shielding and muffing devices consistent with manufactures' standards. The contractor shall use muffler systems (e.g., absorptive mufflers) that provide a minimum reduction of 5 dBA compared to the same equipment without installed muffler system, reducing maximum construction noise levels. The contractor shall keep documentation on-site demonstrating that the equipment has been maintained in accordance with the manufacturers' specifications. The contactor shall also keep documentation on-site verifying compliance with this measure.

m. NOI-2: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), where physically and technically feasible, the contractor shall provide an 8-foot-tall to 20-foot-tall temporary fence or other barrier placed between the project construction area and the sensitive receptor with a performance standard of achieving a 15 dBA noise level reduction at the sensitive receptor. The temporary fence or barrier shall be used during peak noise-generating construction phases when the use of heavy equipment is prevalent. A noise barrier is not required if it would pose a safety risk or unreasonably prevent access to the construction area as deemed by the on-site construction manager, such as in areas that have limited equipment maneuvering space or access.

n. NOI-3: Limit engine idling of construction equipment (e.g., haul trucks, loaders) to a minimum of 200 feet from any boundary of the nearest sensitive receptors.

o. NOI-4: Prior to commencement of construction activities, the City shall notify in writing adjacent residents, schools and businesses near the various park project sites, of proposed construction activities and the tentative schedule.

The notices shall also provide a contact person and hotline where local residents, schools, or business owners can call during active construction with questions or comments. The City shall respond to inquiries regarding construction noise and vibration. Notices and construction signs will include a website address which will be updated quarterly and will include Program-related information.

p. NOI-5: The operation of construction equipment that generates high levels of vibration, such as large bulldozers and loaded trucks, shall be prohibited within 45 feet of the property lines of existing residential and school uses adjacent to the various park project sites. Instead, rubber-tired equipment not exceeding 247 horsepower shall be used in these areas during construction within 45 feet from the sensitive receptor locations.

q. TR-1: For parks where construction would occur outside of park facilities or that may impact roadways surrounding park areas, a CTMP shall be developed by the City or its contractor and approved by LADOT prior to the start of construction. The CTMP may include, but is not limited to the following:

(1) Work area traffic control plans for all in-street construction sites to the satisfaction of LADOT, appropriate prior to the start of any construction work. The plans shall include such elements as the location of any lane closures, restricted hours during which lane closures would not be allowed, local traffic detours, protective devices and traffic controls (such as pavement markings, barricades, cones, flagmen, lights, warning beacons, temporary traffic signals, turning movement restrictions, warning signs), access to abutting properties, and provisions to maintain emergency access through construction work areas.

(2) The dates and locations where in-street and off-street construction activities are planned.

(3) If any street segments will be limited to one-way traffic, prepare detour plans over parallel routes.

(4) Require signage indicated alternative routes when construction will occur.

(5) Identify and consolidate staging areas for equipment and materials, as feasible.

(6) Consolidate truck trips, such that multiple worksites can be served, as feasible.

(7) Promote carpooling among workers.

(8) Contact emergency service providers in the project vicinity to notify of the location, hours, and duration of in-street construction. Provide advance notice of any lane closures and changes to local access and identify alternative routes where appropriate.

B. Comply with the more stringent requirements of the current CITY or local noise ordinances, which may include:

1. Construction of noise barriers;

2. Use of low-noise-generating construction equipment;

3. Maintenance of mufflers and ancillary noise abatement equipment;

4. Use of vibration pile drivers and other techniques that result in less noise than impact pile drivers;

5. Scheduling high noise producing activities during periods that are least sensitive;

6. Routing construction related truck traffic away from noise-sensitive areas;

7. Reducing construction vehicle speeds.

C. The CONTRACTOR, a minimum of thirty (30) days prior to beginning work on each new major activity, shall submit a written plan to the ENGINEER, for approval, detailing how the environmental impacts for the activity shall be mitigated in accordance with the Mitigation Monitoring and Reporting Program. The plan shall include, at a minimum:

1. Anticipated site conditions;

2. Equipment to be utilized;

3. Means and methods of construction.

4. Impacts likely to occur;

5. Mitigation methods to be employed.

6. Best Management Practices to be employed.

SECTION 5
Mitigation Monitoring and Reporting Program

The Mitigation Monitoring and Reporting Program (MMRP) for the proposed Program has been prepared in accordance with Public Resources Code section 21081.6 and State CEQA Guidelines section 15091(d). The City will use this MMRP to track compliance with the Program mitigation measures. The City will consider the MMRP during the certification hearing for the Final IS/MND. The MMRP will incorporate all mitigation measures adopted for the proposed Program.

This MMRP summarizes potentially significant impacts and mitigation commitments identified in the Stormwater Capture Parks Program IS/MND. Table 5-1 provides the MMRP which includes all mitigation measures, monitoring/reporting action, monitoring timing, and responsible person(s) for implementation. Impacts and mitigation measures are presented in the same order as in the IS/MND. The columns in the table provide the following information:

- **Mitigation Measures:** The action(s) that will be taken to reduce the impact to a less-than-significant level.
- **Monitoring /Reporting Action:** This column outlines the appropriate steps to implement and verify compliance with the mitigation measures.
- **Monitoring Timing:** This column indicates the general schedule for conducting each monitoring task, either prior to construction, during construction, and/or after construction.
- **Responsible Person(s):** This column lists the agency responsible for ensuring implementation of the mitigation measure.

TABLE 5-1
MITIGATION MONITORING AND REPORTING PROGRAM - STORMWATER CAPTURE PARKS PROGRAM

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
Air Quality			
AQ-1: Construction of the Program shall incorporate the following conditions: a. For all Program sites: The Program shall use off-road diesel-powered construction equipment that meets or exceeds the CARB and USEPA Tier 4 off-road emissions standards for equipment rated at 50 horsepower or greater and not identified under b or c. below. Such equipment will be outfitted with Best Available Control Technology (BACT) devices, including a CARB-certified Level 3 Diesel Particulate Filter or equivalent. These requirements shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. b. All dumpers/tenders used on-site shall either be certified Tier 3 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent; certified Tier 4 with a CARB-certified Level 3 Diesel Particulate Filter or equivalent, or alternatively fueled (e.g., gasoline, electric, CNG). c. At a minimum, the following equipment shall be electric: air compressors, cement and mortar mixers, concrete saws, forklifts, pumps. Diesel generators shall be replaced with electricity from the grid either permanent or temporary, or replaced with alternative (non-diesel) fuels. d. Equipment requirements identified under a, b, and c above shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment. e. During the site clearing and preparation, grading and excavation, and soil filling, revegetation, and park improvement phases, watering must be conducted a minimum of 4 times per day during dry weather. f. For Valley Plaza Park North only 2 dozers are allowed to operate on any portion of the site at one time. g. The City shall ensure: i. On-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits: 1. 185 trucks when 2 parks are concurrently under construction; 2. 180 trucks when 3 parks are currently under construction; 3. 170 trucks when 4 parks are concurrently under construction; 4. 160 trucks when 5 parks are concurrently under construction; 5. 150 trucks when 6 parks are concurrently under construction; 6. 140 trucks when 7 parks are concurrently under construction. Or;	Site Monitoring	Prior to Construction During Construction	The City Construction Contractor

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
ii. If the fleet is composed of a mix of 2014 or newer trucks, the City shall ensure that on-road haul trucks including delivery and those conveying excavated material do not exceed the following daily truck limits: 1. 240 trucks when 2 parks are concurrently under construction; 2. 230 trucks when 3 parks are concurrently under construction; 3. 220 trucks when 4 parks are concurrently under construction; 4. 210 trucks when 5 parks are concurrently under construction; 5. 200 trucks when 6 parks are concurrently under construction; 6. 190 trucks when 7 parks are concurrently under construction.			
Biological Resources			
BIO-1: Special-Status Wildlife Species. Construction activities at any of the nine park project sites could result in impacts to the Cooper's hawk (*Accipiter cooperii*), a California Species of Special Concern, where mature trees are present. Similarly, construction activities may also impact other nesting bird species that may nest in a variety of vegetation as well as man-made structures. Construction activities should occur outside of the avian nesting season. If the avian nesting season cannot be avoided and construction or vegetation removal occurs from February 1 to September 1, the City shall implement the following to avoid and minimize impacts to nesting birds and raptors: ● During the avian breeding season, a qualified biologist shall conduct a preconstruction avian nesting survey no more than 7 days prior to vegetation disturbance or ground-disturbing activities. If construction begins in the non-breeding season and proceeds continuously into the avian nesting season, no surveys are required. However, if there is a break of 7 days or more in construction activities during the nesting season, a new nesting bird survey shall be conducted before construction begins again. ● The preconstruction survey shall cover all reasonably potential nesting locations on and within 100 feet of the construction areas. A 300-foot radius shall be surveyed in areas containing suitable habitat for nesting raptors, such as trees and utility poles. ● If an active nest is found during the preconstruction avian nesting survey, a qualified biologist shall designate a suitable buffer for all passerine birds and raptor species. The nest site area shall not be disturbed until the nest becomes inactive, the young have fledged, the young are no longer being fed by the parents, the young have left the area, and the young will no longer be impacted by the Program. Buffer areas may be increased upon recommendation of a qualified biologist if any endangered, threatened, California Fully Protected, or California Species of Special Concern are identified during preconstruction surveys. ● If the nest(s) are found in an area where ground disturbance is scheduled to occur, the City or its contractor shall avoid the area by delaying ground disturbance in the area until a qualified biologist has determined that the birds have fledged and are no longer reliant upon the nest or parental care for survival. ● Prior to removal of trees in any of the parks, the City shall retain a qualified bat specialist to conduct bat surveys to confirm whether bats are using the trees as roosting sites. The	Site Survey by a Qualified Biologist	Prior to Construction During Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
surveys should encompass a minimum buffer area of 100 feet around the parks. The results of the surveys will be provided to CDFW. In the event that bat roosts are identified, an additional bat species survey will be conducted using acoustic survey techniques necessary to confirm the species of bat using the area. If the species survey concludes that sensitive bat species are present, the City shall consult with CDFW pursuant to the California Fish and Game Code section 2081. Removal of special status bats would not be conducted without prior approval from CDFW.			
Cultural Resources			
CUL-1: In the event Program designs are further refined and individual park project components change to encroach more closely than 50 feet to the North Hollywood Amelia Earhart Regional Library (P-19-167303), the pool house and maintenance building associated with North Hollywood Park, the clubhouse associated with the David M. Gonzales Recreation Center, and/or the 170 Freeway Pedestrian Overpass, the City shall retain a qualified architectural historian meeting the Secretary of the Interior's Standards for Architectural History to review design plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards). Should potential Program redesign not conform to the Standards, the City shall work with the qualified architectural historian to mitigate impacts to these resources. Should Program redesign place Program components within 50 feet of these resources, the qualified architectural historian shall also assess potential construction-related impacts resulting from ground-borne vibration. Should ground-borne vibrations have the potential to impact the historical resources, the City and the qualified architectural historian shall develop a plan to monitor ground-borne vibration during construction to ensure it does not exceed thresholds that could damage, or otherwise alter the historical resources.	Plan Preparation Site Monitoring by a Qualified Archeologist Historian	Prior to Construction During Construction	The City
CUL-2: Prior to the start of ground-disturbing activities, the City shall retain a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (U.S. Department of the Interior, 2008) to carry out the following cultural resources mitigation measures.	Site Monitoring by a Qualified Archeologist	Prior to Construction During Construction	The City
CUL-3: Prior to start of ground-disturbing activities, the qualified archaeologist shall prepare a cultural resources sensitivity training module to be used as part of the City's Worker Environmental Awareness Program (WEAP) training. All construction personnel shall receive sensitivity training prior to beginning work onsite. Construction personnel should be informed of the types of archaeological resources that may be encountered, and of the proper procedures to be enacted in the event of an inadvertent discovery of archaeological resources or human remains. The City should ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.	Personnel Training by a Qualified Archeologist	Prior to Construction During Construction	The City Construction Contractor
CUL-4: Prior to the start of any project-related ground-disturbing activities, the qualified archaeologist shall prepare a Cultural Resources Monitoring Plan (CRMP) in consultation with Tribes that requested consultation under AB52. The CRMP shall stipulate the location and timing of archaeological and Native American monitoring, which shall include all ground-disturbing activities in each of the nine parks that exceed the depths of undocumented fill as documented by geotechnical testing. The qualified archaeologist shall review engineering plans for each of the nine parks to determine where ground-disturbing activities will exceed the depths of undocumented fill at each park to determine the timing and locations of monitoring to be included in the CRMP. The CRMP shall include monitoring protocols to be carried out during Program-related construction. The CRMP shall stipulate that Native	Plan Preparation Site Monitoring by a Qualified Archeologist	Prior to Construction During Construction Post Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
American monitors associated with any of the Tribes that have been consulted with under AB52 be retained to monitor Program-related ground disturbance stipulated in the CRMP. The CRMP shall contain an allowance that the Qualified Archaeologist, based on observations of subsurface soil stratigraphy or other factors during initial grading, and in coordination with the Native American monitor(s) and the City, may reduce or discontinue monitoring as warranted if it is determined that the possibility of encountering archaeological deposits is low. The CRMP shall outline the appropriate measures to be followed in the event of unanticipated discovery of cultural resources during Program implementation, including that all ground disturbance within 100 feet of an unanticipated discovery shall cease until a treatment plan is developed by the qualified archaeologist in coordination with the City and the Native American monitor(s) and which will consider the resources archaeological and tribal value. The CRMP shall identify avoidance as the preferred manner of mitigating impacts to cultural resources. The CRMP shall establish the criteria utilized to evaluate the significance (per CEQA) of the discoveries, methods of avoidance consistent with CEQA Guidelines Section 15126.4(b)(3), as well as identify the appropriate treatment to mitigate the effect of the Program if avoidance of a significant resource is determined to be infeasible. The CRMP will also include provisions for the treatment of archaeological sites that qualify as unique archaeological resources pursuant to Public Resources Code Section 21083.2, which places limits on the costs of mitigation for unique archaeological resources. The plan shall also require the preparation of a monitoring report following the completion. The monitoring report will be submitted to the City for review and comment and a final copy will be filed at the SCCIC. The CRMP shall be submitted to the City and the appropriate Native American representatives who have been consulted with under AB52 for review prior to the start of Program-related ground disturbance.			
CUL-5: In the event of the unanticipated discovery of archaeological materials during Program implementation, all work shall immediately cease in the area (within approximately 100 feet) of the discovery until it can be evaluated by the qualified archaeologist. Construction shall not resume until the qualified archaeologist has conferred with the City and the Native American monitors on the significance of the resource. If it is determined that the discovered archaeological resource constitutes a significant resource, avoidance and preservation in place is the preferred manner of mitigation. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In the event that preservation in place is demonstrated to be infeasible and data recovery through excavation is the only feasible mitigation available, a Cultural Resources Treatment Plan shall be prepared and implemented by the qualified archaeologist in consultation with the City and Native American monitors that provides for the adequate recovery of the scientifically consequential information contained in the archaeological resource. The City shall consult the appropriate Native American representatives in determining treatment and disposition for prehistoric or Native American resources to ensure cultural values ascribed to the resource beyond those that are scientifically important are considered.	Site Monitoring by a Qualified Archeologist	During Construction	The City Construction Contractor
CUL-6: If human remains are encountered, all work shall halt in the vicinity (within 100 feet) of the find and the Los Angeles County Coroner shall be contacted in accordance with PRC Section 5097.98 and Health and Safety Code Section 7050.5. If the County Coroner determines that the remains are Native American, the NAHC will be notified in accordance with Health and Safety Code Section 7050.5, subdivision (c), and PRC Section 5097.98 (as amended by Assembly Bill 2641). The NAHC will designate a Most Likely Descendent (MLD) for the remains per PRC Section 5097.98. Until the landowner has conferred with the MLD, the City shall ensure that the immediate vicinity where the discovery occurred is not disturbed by further activity, is adequately protected according to generally	Site Inspection	During Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
accepted cultural or archaeological standards or practices, and that further activities take into account the possibility of multiple burials.			
Geology and Soils			
GEO-1: The City shall implement the recommendations provided in the geotechnical investigations for each of the park project sites. In the event that the depth to groundwater rises to less than 50 feet bgs as measured in nearby wells, the stormwater infiltration process shall be stopped and the stormwater routed to the surface storm drain system until groundwater depths decrease to below 50 bgs.	Site Monitoring	During Construction Post Construction	The City
GEO-2: Prior to the start of construction activities, the City shall retain a Qualified Paleontologist that meets the standards of the Society of Vertebrate Paleontology (2010) to carry out all mitigation measures related to paleontological resources.	Site Monitoring	Prior to Construction During Construction	The City
GEO-3: Prior to start of any ground-disturbing activities, the Qualified Paleontologist shall contribute to any construction worker cultural resources sensitivity WEAP training materials outlined in Mitigation Measure CUL-2, either in person or via a training module provided to the Qualified Archaeologist. This training shall include information on what types of paleontological resources could be encountered during excavations, what to do in case an unanticipated discovery is made by a worker, and laws protecting paleontological resources. All construction personnel shall be informed of the possibility of encountering fossils and instructed to immediately inform the construction foreman or supervisor if any fossils are unexpectedly unearthed in an area where a paleontological monitor is not present. The City shall ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.	Personnel Training by a Qualified Paleontologist	Prior to Construction During Construction	The City
GEO-4: The Qualified Paleontologist shall supervise a paleontological monitor meeting the Society for Vertebrate Paleontology standards (2010) who shall be present during all excavations exceeding 15 feet. Monitoring shall consist of visually inspecting fresh exposures of rock for larger fossil remains and, where appropriate, collecting wet or dry screened sediment samples of promising horizons for smaller fossil remains. Monitoring can be reduced to part-time inspections or ceased entirely if determined adequate by the Qualified Paleontologist in consultation with the City. Monitoring activities shall be documented in a Paleontological Resources Monitoring Report to be prepared by the Qualified Paleontologist at the completion of construction and shall be provided to the City and filed with the Natural History Museum of Los Angeles County within 6 months of Program completion.	Site Monitoring by a Qualified Paleontologist	During Construction	The City
GEO-5: If a unique geologic feature or paleontological resource is discovered during construction, the paleontological monitor shall be empowered to temporarily divert or redirect grading and excavation activities in the area of the exposed fossil to facilitate evaluation of the discovery. An appropriate buffer area shall be established by the Qualified Paleontologist around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. At the Qualified Paleontologist's discretion and to reduce any construction delay, the grading and excavation contractor shall assist in removing rock samples for initial processing and evaluation of the find. All significant fossils shall be collected by the paleontological monitor and/or the Qualified Paleontologist. Collected fossils shall be prepared to the point of identification and catalogued before they are submitted to their final repository. Any fossils collected shall be curated at a public, non-profit institution with a research interest in the materials, such as the Los Angeles County Natural History	Site Monitoring by a Qualified Paleontologist	During Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
Museum, if such an institution agrees to accept the fossils. If no institution accepts the fossil collection, they shall be donated to a local school in the area for educational purposes. Accompanying notes, maps, and photographs shall also be filed at the repository and/or school.			
Hazards and Hazardous Materials			
HAZ-1: The City or its construction contractor shall ensure that fueling of vehicles or storage of fuel or other chemicals would occur at the furthest extent possible from an existing school site.	Site Monitoring	During Construction	The City Construction Contractor
HAZ-2: For all schools located adjacent to a proposed work area, the City shall coordinate school safety routes, which should include, but not be limited to: ● Maintaining in place all crosswalks along the safe routes to and from the school (for Pacoima Charter School these would include Norris Avenue, Van Nuys Boulevard, Pierce Street, and Herrick Avenue). ● Designating a safe location for school buses and parents to drop off and pick up students. ● Designating a safe parking area for parents to wait for/pick up school children. ● Maintaining sidewalks open to pedestrian traffic during construction. ● Additional safety measures must be adopted during construction to protect the students and the public, including k-railing, secured fencing with screen, clear signing, temporary striping, and a flagger for trucks entering and existing the construction zone. Flaggers should also be considered at crosswalks while students are present. ● Close coordination with the impacted school and the Los Angeles Unified School District for input on the school safety route design and frequent communication during construction. ● Extensive outreach program for the school and the community describing safety measures and construction schedules. ● Restrict construction times to avoid before and after school timeframes while children may be walking to and from school, and while school is in session, as feasible.	Safety Planning Notification Site Monitoring	During Construction	The City Construction Contractor
HAZ-3: The City and its contractor shall conduct further investigation of the nature and extent of landfill materials and contaminated soil at the Strathern Park North site, under the oversight of the City of Los Angeles Local Enforcement Agency (LEA). Undocumented waste shall be delineated and sampled for chemicals of concern related to waste materials. The project shall avoid construction within the delineated waste mass, as feasible. If avoidance of the waste mass is not feasible, the City shall submit a work plan to the LEA that documents the results of the waste delineation, details the specifics of the construction project and how it relates to the onsite waste, describes the procedures for dealing with the waste, and outlines the environmental monitoring procedures that would be implemented during construction. Upon approval of the work plan, the City and its contractor shall remove the landfill materials and any soil with chemical concentrations above regulatory action levels to the satisfaction of the LEA and properly dispose of it at a permitted facility. An as-built report shall be submitted to the LEA after completion of the project.	Site Survey Plan Preparation	Prior to Construction During Construction Post Construction	The City

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
Noise			
NOI-1: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), the contractor shall ensure that all construction equipment, fixed or mobile, are equipped with properly operating and maintained noise shielding and muffling devices, consistent with manufacturers' standards. The contractor shall use muffler systems (e.g., absorptive mufflers) that provide a minimum reduction of 5 dBA compared to the same equipment without an installed muffler system, reducing maximum construction noise levels. The contractor shall keep documentation on-site demonstrating that the equipment has been maintained in accordance with the manufacturers' specifications. The contractor shall also keep documentation on-site verifying compliance with this measure.	Site Monitoring	During Construction	The City Construction Contractor
NOI-2: For construction activities adjacent to noise-sensitive receptors (e.g., residences and schools), where physically and technically feasible, the contractor shall provide an 8-foot-tall to 20-foot-tall temporary fence or other barrier placed between the project construction area and the sensitive receptor with a performance standard of achieving a 15 dBA noise level reduction at the sensitive receptors. The temporary fence or barrier shall be used during peak noise-generating construction phases when the use of heavy equipment is prevalent. A noise barrier is not required if it would pose a safety risk or unreasonably prevent access to the construction area as deemed by the on-site construction manager, such as in areas that have limited equipment maneuvering space or access.	Temporary Fence/Barrier Site Monitoring	During Construction	The City Construction Contractor
NOI-3: Limit engine idling of construction equipment (e.g., haul trucks, loaders) to a minimum of 200 feet from any boundary of the nearest sensitive receptors.	Site Monitoring	During Construction	The City Construction Contractor
NOI-4: Prior to commencement of construction activities, the City shall notify in writing adjacent residents, schools and businesses near the various park project sites, of proposed construction activities and the tentative schedule. The notices shall also provide a contact person and hotline where local residents, schools, or business owners can call during active construction with questions or comments. The City shall respond to inquiries regarding construction noise and vibration. Notices and construction signs will include a website address which will be updated quarterly and will include Program-related information.	Notification	Prior to Construction	The City
NOI-5: The operation of construction equipment that generates high levels of vibration, such as large bulldozers and loaded trucks, shall be prohibited within 45 feet of the property lines of existing residential and school uses adjacent to the various park project sites. Instead, rubber-tired equipment not exceeding 247 horsepower shall be used in these areas during construction within 45 feet from the sensitive receptor locations.	Site Monitoring	During Construction	The City Construction Contractor
Transportation			
TR-1: For parks where construction would occur outside of park facilities or that may impact roadways surrounding park areas, a CTMP shall be developed by the City or its contractor and approved by LADOT prior to the start of construction. The CTMP may include, but is not limited to the following:	Plan Preparation Site Survey Notification	Prior to Construction During Construction	The City Construction Contractor

Mitigation Measure	Monitoring / Reporting Action	Monitoring Timing	Responsible Person(s)
● Work area traffic control plans for all in-street construction sites to the satisfaction of LADOT, as appropriate prior to the start of any construction work. The plans shall include such elements as the location of any lane closures, restricted hours during which lane closures would not be allowed, local traffic detours, protective devices and traffic controls (such as pavement markings, barricades, cones, flagmen, lights, warning beacons, temporary traffic signals, turning movement restrictions, warning signs), access to abutting properties, and provisions to maintain emergency access through construction work areas. ● The dates and locations where in-street and off-street construction activities are planned. ● If any street segments will be limited to one-way traffic, prepare detour plans over parallel routes. ● Require signage indicated alternative routes where construction will occur. ● Identify and consolidate staging areas for equipment and materials, as feasible. ● Consolidate truck trips, such that multiple worksites can be served, as feasible. ● Promote carpooling among workers. ● Contact emergency service providers in the project vicinity to notify of the location, hours, and duration of in-street construction. Provide advance notice of any lane closures and changes to local access and identity alternative routes where appropriate.

SECTION 01563
POLLUTION CONTROL - SEWAGE SPILL PREVENTION AND RESPONSE REQUIREMENTS

1.1 THE REQUIREMENT

A. General

1. The CONTRACTOR shall observe and comply with the CITY's policy of "ZERO SANITARY SEWER OVERFLOWS".

2. The CONTRACTOR shall be in full charge and be responsible for the Jobsite, the construction Work of this Contract, and subject to the directions of the ENGINEER or the INSPECTOR.

3. The CONTRACTOR shall observe and comply with all Federal, State, and local laws, ordinances, codes, orders, and regulations which in any manner affect the conduct of the work, specifically as it relates to sewage spills.

4. The CONTRACTOR shall be fully responsible for preventing sewage spillage, containing any sewage spillage, recovery and legal disposal of any spilled sewage, any and all fines, penalties, claims and liability arising from negligently causing a sewage spillage and any violation of any law, ordinance, code, order, or regulation as a result of the spillage.

5. The CONTRACTOR shall exercise care not to damage existing public and private improvements, interrupt existing services and/or facility operations which may cause a sewage spill. Any reasonably anticipated utility and/or improvement which is damaged by the CONTRACTOR shall be immediately repaired at the CONTRACTOR's expense. In the event that the CONTRACTOR damages an existing utility, interrupts an existing service which causes a sewage spill, the CONTRACTOR shall immediately notify the CITY representatives. The CONTRACTOR shall request and obtain from the ENGINEER an emergency roster of the designated CITY representatives with their respective telephone numbers, pager numbers, and cellular phone numbers. The CONTRACTOR shall take all measures necessary to prevent further damage or service interruption, and to control, contain and clean up the resultant impacts of the damage, service interruption and any resulting sewage spill(s) as mentioned in Section 1.1.A. 6, below.

6. Prior to the start of construction, the CONTRACTOR shall develop and submit to the ENGINEER, for review and approval, a written Spill Response Plan. The Spill Response Plan shall be developed to respond to any construction related sewage spill. This shall include, but is not limited to:

a. The CONTRACTOR shall identify all nearby waterways, channels, catch basins and entrances to underground existing storm drains and furnishing all of the necessary materials, supplies, tools equipment, labor and other services.

b. The CONTRACTOR shall make arrangements for an emergency response unit comprised of emergency response equipment and trained personnel to be immediately dispatched to the Jobsite in the event of a sewage spill(s).

c. The CONTRACTOR shall develop and include an emergency notification procedure, which includes an emergency response roster with telephone numbers and arrangements for backup personnel and equipment and an emergency notification roster of the design CITY representatives. The CONTRACTOR shall designate a primary and secondary representative and include their respective phone numbers, pager numbers, and cellular phone numbers. The CONTRACTOR's representatives shall be accessible and available at all times to respond immediately to any construction related emergency.

7. If called for in the Plans and/or Specifications, or if sewer bypass is needed to construct the Project, the CONTRACTOR shall continuously monitor the flow levels downstream and upstream of the construction location to detect and possible failure that may cause a sewage backup and spill. The CONTRACTOR shall include the means and methods of monitoring the flow in their Spill Response Plan.

a. In case of sewage spill, the CONTRACTOR shall act immediately without instructions from the CITY, to control the spill and take all appropriate steps to contain it in accordance with their Spill Response Plan. The CONTRACTOR shall immediately notify the CITY representatives of the spill and all actions taken. The CONTRACTOR shall, within three (3) working days from the occurrence of the spill, submit to the ENGINEER a written confirmation describing the following information related to the spill: the location on a current Thomas Bros. guide map; the nature and volume; the date and time; the duration; the cause; the type of remedial and/or preventive action taken; and the water body impacted and results of any necessary monitoring. Requests for additional compensation for the handling of the spill shall be submitted to the ENGINEER as a construction claim. The CONTRACTOR shall assure the validity, accuracy, and correctness of the claim under penalty of perjury. The ENGINEER may institute further corrective actions, as deemed necessary, to fully comply with existing law, ordinance, code, order or regulation. The CONTRACTOR shall be responsible for all costs incurred for the corrective actions.

b. It shall be the CONTRACTOR's responsibility to assure that all field forces, including Subcontractors, know and obey all safety and emergency procedures, including the Spill Response Plan, to be maintained and followed at the Jobsite.

B. Sewer Bypass

1. The CONTRACTOR shall provide temporary means to maintain and handle the sewage flow in the existing system as required to complete the necessary construction.

2. The CONTRACTOR shall prepare and submit a detailed bypass plan to the ENGINEER for approval of the ENGINEER and the facility OWNER before the bypass is installed.

3. The CONTRACTOR shall size the bypass system to handle the peak flow of the system. The CONTRACTOR shall include a one-hundred percent (100%) backup in the bypass system. The CONTRACTOR shall utilize the backup system to mitigate any additional wet weather flows, perform the necessary maintenance and repairs on the bypass system, and exercise and ensure the operability of the backup system. Each pump, including the backup pumps, shall be a complete unit with its own suction and discharging pumping. The CONTRACTOR shall operate the backup bypass system for a minimum of twenty-five percent (25%) of the time on a weekly basis. The backup bypass system shall be fully installed and operational.

4. Prior to the full operation of the bypass system, the CONTRACTOR shall demonstrate, to the satisfaction of the ENGINEER and INSPECTOR, that both the primary and backup bypass systems are fully functional and adequate, and shall certify the same, in writing, to the ENGINEER in a manner acceptable to the ENGINEER.

5. The CONTRACTOR shall provide one dedicated fuel tank for every single pump/generator, if fuel/generator driven pumps are used. The CONTRACTOR shall provide a fuel level indictor outside each fuel tank. The CONTRACTOR shall continuously (while in use) monitor the fuel level in the tanks and ensure that the fuel level does not drop below a level equivalent to two (2) hours of continuous bypass system operation. The CONTRACTOR shall take the necessary measures to ensure the fuel supply is protected against contamination. This includes, but is not limited to, fuel line water traps, fuel line filters, and protecting fuel stores from precipitation.

6. The CONTRACTOR shall provide an emergency standby power generator, if electric power driven pumps are used.

7. The CONTRACTOR shall continuously (while in use) monitor the operation of the bypass system and all impacted facilities. The CONTRACTOR shall submit, as part of their bypass plan, their monitoring procedure and frequency. The CONTRACTOR shall maintain a log of the monitoring in a manner acceptable to the ENGINEER and INSPECTOR.

8. The CONTRACTOR shall continuously monitor the flow levels downstream and upstream of the bypass to detect any possible failure that may cause a sewage backup and/or spill. The CONTRACTOR shall include the means and methods of monitoring the flow in their Spill Response Plan.

9. The CONTRACTOR shall routinely inspect and maintain the bypass system, including the backup system. The CONTRACTOR shall submit as part of their bypass plans their maintenance procedures and frequency. The CONTRACTOR shall maintain a log of all pertinent

inspection, maintenance and repair records in a manner acceptable to the ENGINEER and INSPECTOR.

10. All costs associated with sewer bypass requirements listed above (Section B-1 through 9) shall be included in the Bid Item “Sewer bypass system”.

C. Additional Insurance Requirements

1. The CONTRACTOR shall obtain and maintain an additional insurance coverage for Pollution Liability with limits and requirements set forth in Part III of the Proposal for Federal Funded projects, or Part IV of the Proposal for City funded projects. The limits and requirements for Pollution Liability shall be in an amount sufficient to cover potential losses from sudden and accidental pollution. All costs associated with the requirements for “Sewage Spill Prevention and Response Requirements”, including additional insurance, shall be included in the prices bid for other related bid items. However, CONTRACTORS will be required to submit, with their bid, a cost breakdown for the items required by the “Sewage Spill Prevention and Response Requirements”.

END OF SECTION

SECTION 01571
STORMWATER POLLUTION CONTROL
MEASURES FOR CONSTRUCTION ACTIVITIES

1.1 THE REQUIREMENT

A. General

1. The Contractor shall exercise every reasonable precaution to protect channels, storm drains, and bodies of water from pollution.

2. Conduct and schedule operations to minimize or avoid muddying and silting channels, drains, and waters.

3. As required, obtain permits for erosion and water pollution control from the appropriate jurisdictional agency before starting Work. All costs for work required for compliance with this Section shall be included within the Bid Prices.

.

4. Provide any necessary water pollution control devices to prevent, control, and abate water pollution, and implement good housekeeping pollution control measures to reduce the discharge of pollutants from work sites to the maximum extent practicable. These water pollution control devices include drains, gutters, slope protection blankets and retention basins and shall be constructed concurrently with other Work at the earliest practicable time.

5. Exercise care in preserving vegetation and protecting property, to avoid disturbing areas beyond the limits of the Work. Promptly repair any damage caused by Contractor operations.

6. Comply with the specific requirements based on acreage of disturbed soil.

7. Penalties: Failure to comply with this Section may result in significant fines and possible imprisonment. The RWQCB or other prosecuting authority may assess fines of up to $32,500 per day for each violation. Should the City be fined or penalized as a result of the Contractor failing to comply with this Section, the Contractor shall reimburse the City for any and all fines, penalties and related costs.

8. Notification and Report: If pollution occurs in the work area for any reason or when the Contractor becomes aware of any violation of this Section, correct the problem and immediately notify the Inspector and also notify the LADWP Wastewater Quality and Compliance Group. In addition, submit a written report to the Engineer within seven (7) calendar days describing the incident and the corrective actions taken. If either the Inspector or Engineer is first to observe pollution or a violation, the Contractor shall also explain in the written report why the Work was inadequately monitored.

9. The provisions of this Section describe minimum compliance and do not preclude other more stringent stormwater pollution control measures that may be required in the Contract.

B. Definition

1. Construction Activity: Includes clearing, grading, excavation, stockpiling, and reconstruction of existing facilities involving removal and replacement. Construction activity does not include routine maintenance such as, maintenance of original line and grade, hydraulic capacity, or original purpose of the facility. If construction activity is part of a larger common plan of development, the amount of disturbed soil is the total land area of disturbed soil that results under the common plan.

C. Projects Having Less Than One Acre of Disturbed Soil

Projects with construction activity that will result in less than one acre of disturbed soil, the Contractor shall comply with the following minimum water quality protection requirements:

1. Retain eroded sediments and other pollutants on-site and do not allow transportation from the site by sheet flow, swales, area drains, natural drainage, or wind. Control slope and channel erosion by implementing an effective combination of best management practices (BMPs). Such BMPs include scheduling grading during non-rainy seasons, planting and maintaining vegetation on slopes and covering erosion-susceptible slopes.

2. Protect stockpiles of earth and other construction-related materials from being transported from the site by wind or water.

3. Properly store and handle fuels, oils, solvents, and other toxic materials to not contaminate the soil or surface waters, enter the groundwater, or be placed where they may enter a live stream, channel, drain, or other water conveyance facility. Protect all approved toxic storage containers from weather. Clean spills immediately and properly dispose of cleanup materials. Spills shall not be washed into live streams, channels, drains, or other water conveyance facilities.

4. Do not wash excess or waste concrete into the public way or any drainage system. Retain concrete wastes on-site until they can be appropriately disposed of or recycled.

5. Deposit trash and construction-related solid wastes in covered receptacles to prevent contamination of rainwater and dispersal by wind.

6. Do not allow sediments and other materials to be tracked from the site by vehicle traffic. Stabilize construction entrance roadways to inhibit sediments from being deposited onto public ways. Immediately sweep up accidental depositions. Do not allow depositions to be washed away by rain or by any other means.

7. Contain non-stormwater runoff from equipment or vehicle washing and any other activity at the work site.

8. At completion of the Work, clear the worksite of debris and restore to a condition at least equal to or better than prior to construction.

9. When construction activity with grading is likely to occur during the rainy season from October 1 through April 15, prepare a Wet Weather Erosion Control Plan

(WWECP) per LAMC Section 61.02. The WWECP must be submitted to the Engineer for approval within thirty (30) calendar days after Notice to Proceed.

Guidance on preparing the WWECP can be found in "Development Best Management Practices Handbook - Part A, Construction Activities", adopted by the Board and as authorized by LAMC Section 64.72. The handbook can be viewed at or obtained at cost at Bureau of Engineering public counters.

10. When working in live streams, these are additional water pollution control requirements.

11. Erect barriers sufficient to prevent muddying or polluting streams.

12. Prior to removing materials from a flowing stream, use a stream bypass or other equivalent means to keep the flow in the stream free of the mud or silt from the removal operations.

13. Avoid transporting materials across live streams. If not possible, the transportation operation must be designed to prevent materials from falling into the stream and cannot muddy the stream.

14. Equipment may not be operated in a live stream or channel unless the Contractor can demonstrate to the Engineer's satisfaction that no other practical alternatives exist. The equipment must be designed to prevent materials from falling into the stream and cannot muddy the stream.

15. Do not allow fresh portland cement or fresh portland cement concrete to enter the water flowing in streams, channels or drains.

16. Do not allow material derived from the Work to be deposited in a live stream, channel or drain.

D. Projects Having One Acre or More of Disturbed Soil

Projects, including Linear Underground Projects (LUPS), with construction activity that will result in one acre or more of disturbed soil, or less than one acre but part of a larger common plan of development, the Contractor shall comply with the requirements included in Section 1.1.C above, and the following requirements:

1. The Contractor shall comply with General Permit 2009-0009-DWQ for Discharges of Storm Water Associated with Construction Activities (General Permit). A copy of the General Permit may be downloaded from the California State Water Resources Control Board (SWRCB) website using the following link: https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html

2. The Contractor shall provide a Qualified Storm Water Pollution Prevention Plan (SWPPP) Developer (QSD) to prepare all Permit Registration Documents (PRDs), as defined in the General Permit. All PRDs must be uploaded to the SWRCB's General Permit web application called the Storm Water Multiple Application Report Tracking System (SMARTS) prior to commencement of construction activities. The SMARTS website link is: http://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.jsp. The PRDs include the Notice of Intent, Risk Assessment, Post-Construction Calculations, Site Map, SWPPP, and the first annual fee. The annual fee for this project is estimated to be $**509.00.** The

Contractor must submit the prepared SWPPP to the City for review and approval prior to uploading it to the SMARTS system. Upon City approval, the SWPPP shall be uploaded by the Contractor and certified by the City's Legally Responsible Person (LRP). At that time, the actual fee invoice will be provided by the City to the Contractor and the Contractor will submit payment to the State for the first annual fee. The Contractor is also responsible for all subsequent annual fees for this project.

3. This project has been determined to be a Risk Level 2. The Contractor shall comply with all visual monitoring, effluent water quality sampling, reporting, and record keeping requirements associated with this Risk Level, in accordance with the General Permit. For projects with Risk Level 2 or Risk Level 3, the Contractor must prepare and implement a Rain Event Action Plan, as described in the General Permit. The Contractor to submit all SWPPP related documents to the LADWP Wastewater Quality and Compliance Group to complete, certify, and submit the Annual Report in SMARTS.

4. The Contractor shall provide a Qualified SWPPP Practitioner (QSP) to implement all SWPPP requirements at the project site and monitor the effectiveness of the SWPPP, in accordance with the General Permit.

5. The Contractor shall prepare the Annual Report required by the General Permit and submit it to LADWP for review and approval by August 1st of each year. LADWP will prepare, certify and submit the annual report in SMARTS.

6. The Contractor shall provide and submit all reports and data necessary to LADWP for review and approval to complete the Notice of Termination (NOT) at the Completion of the Work, in accordance with the General Permit. LADWP will prepare, certify, and submit the NOT in SMARTS.

END OF SECTION

SECTION 01572
CONSTRUCTION AND DEMOLITION WASTE MANAGEMENT

1.1 The Requirement

A. The Construction and Demolition (C&D) Waste Management Specification includes procedures for ensuring optimal diversion of construction and demolition waste generated by the project, and documentation procedures for tracking waste generation and diversion.

B. Each construction and/or demolition project shall reuse or recycle a minimum of 80% of the inert debris and 65% of the remaining construction and demolition debris generated by the project.

C. Each construction or demolition project shall dispose of construction and demolition waste generated from the project in accordance with the City's C&D Waste Recycling Ordinance (Ordinance No. 181519). Los Angeles Municipal Code requires that all mixed C&D waste generated within the City of Los Angeles be taken to a City Certified C&D Waste Processing Facility and all source separated C&D waste be taken to a recycling facility or City Certified C&D Waste Processing Facility. Further, C&D waste can only be legally collected, removed, or transported by City of Los Angeles Permitted Solid Waste Haulers. If the Contractor plans on collecting, removing, or transporting its own waste, it must first apply for and obtain a Solid Waste Hauler Permit from the Solid Resources Citywide Recycling Division (SRCRD) of the Bureau of Sanitation.

D. Failure to meet the C&D waste recycling requirements as detailed above will result in the assessment of penalties up to $5,000 per each load of mixed C&D waste not taken to City Certified C&D Waste Processing Facility. Further, collecting, removing or transporting C&D waste within the City without a valid Solid Waste Hauler Permit is a criminal misdemeanor subject to fines and/or imprisonment.

E. The project shall promote the City's sustainable building efforts by creating a resource-efficient and environmentally sensitive project and maintaining optimum control of the construction and demolition waste generated during the project.

F. The project shall use products with post-consumer recycled content to the greatest extent feasible. Refer to the California Integrated Waste Management Board's website for information about recycled content construction products.

1.2 Abbreviations

A. CalMAX: California Materials Exchange
B. C&D: Construction and Demolition
C. CCR: California Code of Regulations
D. CDRG: Construction and Demolition Recycling Guide
E. LEA: Local Enforcement Agency
F. SWDD: Solid Waste Diversion and Disposal
G. WMP: Waste Management Plan

1.3 Definitions

A. "Certified C&D Waste Processing Facility" of "Certified C&D Waste Processor": A solid waste processing facility that accepts loads of C&D waste for the purpose of recovering re-usable and recyclable materials and disposing of the non-recyclable residual material. A Certified C&D Waste Processing Facility has been certified by the City of Los Angeles Bureau of Sanitation to have a facility specific

recycling rate for C&D waste and/or another facility specific recycling rate for C&D waste. For information on becoming a certified C&D waste processor, type in and search "waste hauler permit program" and then select the "waste hauler permit program" link at www.lacitysan.org. See CDRG for information on the current list of certified processors and recycling facilities.

B. "Class III landfill": A landfill that accepts non-hazardous solid waste such as household, commercial, and industrial solid waste. A Class III landfill is regulated by the LEA and must have a CalRecycle solid waste facilities permit.

C. "Construction and Demolition Recycling Guide": A publication by the Bureau of Sanitation's Solid Resources Citywide Recycling Division. The CDRG can be found by searching "waste hauler permit program" at www.lacitysan.org.

D. "C&D Waste" or "Mixed C&D Waste" or "C&D Debris or Mixed C&D Debris": Solid waste and recyclable materials, and building materials from construction, deconstruction, remodeling, repair, or demolition of buildings and other structures, do not contain hazardous waste (as defined in CCR Title 22, Section 66261.3, *et seq*.), and contain no more than one percent (1%) putrescible wastes by volume, calculated on a monthly basis. C&D waste includes, but is not limited to: asphalt, concrete, Portland cement, brick, lumber, drywall, roofing material, ceramic tile, pipe, glass, carpet and associated packaging.

E. "Deconstruction": The process of taking apart a structure with the primary goal of preserving the value of all useful building materials, so that they may be reused or recycled.

F. "Disposal": Acceptance of solid waste at a legally operating facility for the purpose of landfilling.

G. "Diversion": Activities that result in reducing the amount of solid waste disposed at a landfill. This can include source reduction activities, composting, recycling, and reuse.

H. "Inert Backfill Site": A location, other than inert fill or other disposal facility, to which inert debris is taken for the purpose of filling an excavation, shoring, or another soils engineering operation.

I. Inert Debris: Solid waste and recyclable materials that are source separated or separated for reuse and do not contain hazardous waste (as defined in CCR, Title 22, section 66261.3 et. seq.) or soluble pollutants at concentrations in excess of applicable water quality. Inert debris may not contain any putrescible wastes. Inert debris includes but is not limited to concrete, asphalt, crushed glass, fiberglass, asphalt or fiberglass roofing shingles, brick, slag, ceramics, plaster, clay, and clay products.

J. Inert Debris Engineered Fill Operation (IDEFO): An activity exceeding one year in duration in which only the following inert debris may be used: fully cured asphalt, uncontaminated concrete (including steel reinforcing rods embedded in the concrete), crushed glass, brick, ceramics, clay and clay products, which may be mixed with rock and soil. Those materials are spread on land in lifts and compacted under controlled conditions to achieve a uniform and dense mass which is capable of supporting structural loading, as necessary, or supporting other uses such as recreation, agriculture and open space in order to provide land that is appropriate for an end use consistent with approved local general and specific plans (e.g., roads, building sites, or other improvements) where an engineered fill is required to facilitate productive use(s) of the land.

K. "Non-Permitted Solid Waste Hauler": A company that does not possess a valid and current solid waste hauler permit from the City of Los Angeles to collect and transport solid waste from individuals or businesses in the City of Los Angeles.

L. "Permitted Solid Waste Hauler": A company that possesses a valid and current solid waste hauler permit from the City of Los Angeles to collect and transport solid waste from individuals or businesses in the City of Los Angeles.

M. "Recycling": The process of collecting, sorting, cleansing, treating, and reconstituting materials that would otherwise become solid waste, and returning

them to the economic mainstream in the form of raw material for new, reused, or reconstituted products that meet the quality standards necessary to be used in the marketplace.

1. On-site Recycling: Materials that are sorted and processed for use in an altered form in the project, (e.g. concrete is crushed for use as base for a parking lot on the site)
2. Off-site Recycling: Source-separated materials hauled to another location and used in an altered form in the manufacture of a new product.

N. "Recycling Facility": An operation that can legally accept materials for the purpose of processing the materials into an altered form for the manufacture of a new product. Depending on the types of materials accepted and operating procedures, a recycling facility may or may not be required to have a Solid Waste Facilities permit from CalRecycle or be regulated by the LEA.

O. "Reuse": Materials that are recovered for use in the same form. This includes materials that are reused on-site or off-site.

P. "Salvage": Materials recovered for reuse or sale or donation to a third party.

Q. "Source Reduction": Any action causing a net reduction in the generation of solid waste. Source reduction includes, but is not limited to, reducing the use of nonrecyclable materials, replacing disposable materials and products with reusable materials and products, reducing packaging, and reducing the amount of yard waste generated.

R. "Source-Separated Materials (Construction and Demolition Waste)": Material that is sorted at the site of generation by individual material type for the purpose of reuse or recycling, i.e., loads of concrete that are source-separated for delivery to an inert debris recycling facility to be crushed into road base material. Note: The Contractor may be able to save money on collection fees for source-separated material. Source-separated material is not subject to the City's 10% AB939 fee.

S. "Solid Waste": shall mean waste that CalRecycle has deemed acceptable for disposal at a Class III Landfill and shall not include source-separated material.

T. "Transfer Station": A facility that can legally accept solid waste for the purpose of temporarily storing the materials for re-loading onto other trucks and transporting them to a landfill for disposal or recovering some materials for reuse or recycling. Transfer stations must be permitted by CalRecycle and regulated by the LEA.

U. "Solid Waste Hauler" or "Waste Hauler": shall mean any Person engaged in the business of providing or responsible for the collection, removal or transportation or Solid Waste, Construction and Demolition Waste, Source-Separated Materials,

V. "Solid Waste Hauler Permit", "Waste Hauler Permit", or "AB 939 Compliance Permit": Persons who collect, remove or transport Solid Waste, including Construction and Demolition Waste, Source-Separated Materials or Co-Mingled Recyclables, generated within the City, must obtain, in addition to all other required permits, an AB 393 Compliance Permit from the Bureau of Sanitation.

1.4 DIVERSION REQUIREMENTS

A. The construction and demolition project shall reuse or recycle a minimum of 75% of the inert debris and 50% of the remaining construction and demolition debris generated by the project.

1.5 SUBMITTALS

A. Waste Management Plan (WMP): The Contractor shall conduct a site assessment and estimate the types and quantities of materials, generated during the project, that are anticipated for on-site or off-site processing, recycling, or reuse.

1. After the contract is awarded and prior to the commencement of the project, the City project manager will schedule and attend a meeting with the Contractor to discuss the Contractor's proposed WMP. This plan shall be submitted to allow the City and the Contractor an opportunity to develop a mutual understanding regarding the recycling and reuse requirements and programs.
2. Not more than 20 working days after the meeting, and before the commencement of the project, the Contractor shall prepare and submit to the City project manager a written WMP, Attachment A of this specification, and a copy of the contracted hauler's solid waste hauler permit. The plan shall show a minimum 80% recycling for inert debris expected from the project and 65% recycling for the remaining C&D waste expected from the project. The Contractor shall submit the plan in the format provided herein as Attachment A. Instructions for filling out the form are in Attachment A, -- INSTRUCTION SHEET. Work shall not begin until the project engineer approves the WMP for the project.
3. If the Contractor expects a circumstance that the Contractor believes make it infeasible to comply with the Diversion Requirement, the Contractor may submit a written request for an exemption at the time the WMP is submitted. If the exemption request is not approved by the Engineer, the Contractor shall revise and resubmit a WMP.
4. If the City determines that it is infeasible for the Contractor to meet the Diversion Requirement due to unique circumstances, the City shall determine the maximum feasible diversion rate for each material and shall indicate this rate on the WMP submitted by the Contractor. The City shall return a copy of the WMP to the Contractor marked "Approved for Infeasible Exemption". The Contractor will be required to meet the maximum feasible diversion rates as approved by the City. If the Contractor fails to meet the revised rates the Contractor will be subject to the stipulated penalties. Exempt projects are required to keep and submit all documentation for the project. This includes receipts, the WMP, SWDD Reports, and all supporting documentation as required herein.
5. The City's approval of the Contractor's WMP will not otherwise relieve the Contractor of responsibility for adequate and continuing control of pollutants and other environmental protection measures.

B. Solid Waste Diversion and Disposal Report (SWDD Report): With each submittal of the Contractor's application for progress payment, the Contractor shall prepare and submit to the project inspector a written SWDD Report quantifying all material generated, diverted, and disposed in the project during the time period covered by the SWDD Report and progress payment. Part 3 of each SWDD Report is a cumulative history of the diversion and disposal for the project. The Contractor shall submit the report in the format provided herein as shown in Attachment B. Failure to submit the report and the supporting documentation shall render the application for progress payment incomplete and delay payment until the proper documentation is submitted. The supporting documentation includes manifests, weight tickets, receipts, reports, invoices, and other supporting documents specifically identifying the projects, the recyclables and solid waste generated by the project, and where the material was sent. Instructions for filling out the forms are in Attachment B – INSTRUCTION SHEET. Together, all of the SWDD Reports should cover the complete time period of the project. The final SWDD Report and supporting documentation must be submitted within 30 days of the end of the project.

C. Substitutions: Should the Contractor desire to use materials, equipment, or products that meet the requirements of these specifications but are more environmentally responsive, the Contractor shall submit these substitutions in accordance with "Substitutions and "Or Equal" Submittals" of the General

Requirements.

1.6 PENALTY

A. If the diversion requirement has not been met, a per ton penalty will be applied to the disposed material over that allowed in the approved WMP.
B. The penalty will be calculated as follows: Tons over that allowed in the approved WMP times the per-ton penalty in effect at the time the contract was awarded. The penalty may not exceed the total payment retention for the project.
C. Tons of mixed C&D waste either not hauled to City Certified C&D Waste Processing Facilities or hauled by non-permitted waste hauler(s) will be assessed a per-ton penalty. The penalty may not exceed the total payment retention for the project.
D. The penalty is $100 per ton.
E. The recommended penalty will be determined by the Bureau of Contract Administration and Bureau of Sanitation and shall be considered by the Board of Public Works at the time of the project closeout.

1.7 REUSE, SALVAGE, AND RECYCLING OPTIONS

A. Construction projects shall make use of as many reuse and salvage options as is feasible. One option is the California Materials Exchange (CalMAX), a free program sponsored by CalRecycle. The most recent issue of CDRG, contains contact information for non-profit organizations, salvage facilities, and other reuse organizations.
B. Recycling shall include both on-site and off-site recycling of source-separated materials, as well as mixed C&D waste recycling efforts.
C. On-site recycling programs shall produce a quality product to meet the specifications identified in the contract documents, subject to approval. The Contractor shall estimate the amount of material to be used in the project and include a program for off-site recycling of any excess material that cannot be used in the project.
D. The Contractor shall develop and implement a program to include source separation of solid waste, to the greatest extent feasible, of the following types:
    1. Asphalt
    2. Concrete, concrete block, slump stone (decorative concrete block)
    3. Rock
    4. Wood (lumber)
    5. Green material (i.e. tree trimmings)
    6. Other materials, as appropriate, such as red clay brick, building fixtures, architectural details, dry wall, carpet, carpet padding, and corrugated cardboard
E. Mixed C&D Waste Recycling: The Contractor must develop and implement a program to transport all commingled construction and demolition materials that cannot be feasibly source-separated to a Certified C&D Waste Processing Facility.
F. Certified C&D Waste Processing Facility: These facilities have facility recycling rates, established by the City of Los Angeles for mixed C&D waste. Mixed C&D waste taken to these facilities are considered to have been recycled at the rate of the certified processing facility. For example, 100 tons of material taken to a facility with an 80% recycling rate results in 80 tons of recycling and 20 tons of disposal for the project A list of these facilities and their recycling rates is in the most recent issue of CDRG.
G. Recycling, Reuse, Mixed C&D Waste Processing, and Salvage Facilities: The CDRG is incorporated herein by reference and contains information about processing, recycling, reuse, and salvage facilities.

H. Revenue: Revenue or savings obtained from recycled, reused, or salvaged materials shall accrue to the Contractor unless otherwise noted in the Contract Documents. Note: The Contractor may be able to save money on collection fees for source-separated material. Source-separated material is not subject to the City's 10% AB939 fee.

I. AB 939 Fee: The AB 939 fee is assessed on all solid waste hauled within the City of Los Angeles in accordance with Section 66.32 of the Los Angeles Municipal Code.
   1. All solid waste haulers hauling material from City of Los Angeles locations must be permitted in accordance with Section 66.32 of the Los Angeles Municipal Code.
   2. Source-separated material is not assessed this fee.

1.8 HAULING AND DISPOSAL OPERATIONS

A. Hauling: The Contractor is responsible for arranging the collection and hauling of C&D waste by a solid waste hauler that is permitted by the City of Los Angeles in accordance with Section 66.32 of the Los Angeles Municipal Code.

B. Recycling and Processing Facilities: The Contractor shall be responsible for transporting C&D waste to recycling or processing facilities. The Contractor shall be familiar with the requirements for acceptance of C&D waste at the recycling and processing facilities before the material is delivered. The most recent issue of CDRG includes a partial list of these facilities. Always call facilities in advance.

C. Disposal Facilities: The Contractor shall be responsible for transporting C&D waste that cannot be accepted at a recycling or processing facility, to a transfer station or disposal facility that can legally accept the materials for the purpose of disposal. A load of C&D waste may be taken to a disposal facility only after it has been rejected by 2 different certified processing facilities and the driver is in possession of both rejection slips. The rejection slips and the weight ticket from the final destination must be kept together and submitted to the contractor.

D. Site Disposal: The Contractor may not burn, bury, or otherwise dispose of solid waste on the project job-site.

END OF SECTION

(SEE ATTACHMENTS)

ATTACHMENT A - INSTRUCTION SHEET FOR WASTE MANAGEMENT PLAN

1. For assistance, contact the Solid Resources Citywide Recycling Division of LA Sanitation & Environment at (213) 485-3460 or sansrcrd_cdrecycling@lacity.org.
2. Please print very clearly or type.
3. Waste Management Plan (WMP) is to be completed and approved prior to start of construction. Along with the WMP, the Contractor is to include a copy of the waste hauler's waste hauler permit.
4. Attachment A includes**:** **Part 1-**Inert Debris and **Part 2**-Metal, Wood, C&D waste, and all other materials.
5. Must meet ≥80% recycling rate in **Part 1** – Inert Debris such as concrete, asphalt, dirt, rock, and brick.
6. Must meet ≥65% recycling rate in **Part 2** – Metal, wood, green waste, C&D waste, and all other materials.
7. The information required includes but is not limited to, the following:
   a. Contractor and project work order number.
   b. Permitted solid waste hauler(s) and permit number(s).
   c. Facility names and addresses that are to process the C&D materials.
   d. Estimated quantities of **all** C&D materials listed in **tons**.
   e. Verify whether the Waste Management Plan meets the minimum recycling requirement of 80% for inert debris in Part 1. Verify whether the Waste Management Plan meets the minimum recycling requirement of and 65% for other C&D waste.
8. **Calculating recycling and disposal for mixed C&D waste taken to a certified processing facility: the total tons taken to certified processing facility times the recycling rate = amount to be recycled. Total tons taken to facility minus amount to be recycled = amount for disposal. E.g. 100 tons x 0.80 (80% recycling rate) = 80 tons diverted and 20 tons disposed.

ATTACHMENT B - INSTRUCTION SHEET FOR SOLID WASTE DIVERSION & DISPOSAL REPORT

1. For assistance, contact the Solid Resources Citywide Recycling Division of LA Sanitation & Environment at (213) 485-3460 or sansrcrd_cdrecycling@lacity.org.
2. Please print very clearly or type.
3. All **three (3) pages** of Attachment B and **all** manifests, weight tickets, receipts, reports, invoices, and other supporting documents specifically identifying the projects, the recyclables and solid waste generated by the project, and where the material was sent must be submitted to the inspector with each application for progress payment.
4. Attachment B includes**: Part 1** - Inert Debris, **Part 2** - All Other C&D Waste, **Part 3** - Project Cumulative Total.
5. Must meet ≥80% recycling rate for Inert Debris by end of construction.
6. Must meet ≥65% recycling rate in Metal, wood, green waste, C&D waste, and all other materials by end of construction.
7. In **Part 1 and Part 2,** record:
   a. Material type generated.
   b. Permitted solid waste hauler(s) and permit number(s).
   c. Facility names and addresses where materials were delivered.
   d. Tons diverted/disposed for a particular pay period.
   e. Verify whether Part 1 meets the minimum recycling requirement of 80% for Inert Debris. Verify whether Part 2 meets the minimum recycling requirement of 65% for other C&D Waste. Contractor is to meet the minimum recycling requirements by the end of construction.
8. In **Part 3**, record:
   a. Pay period beginning and period ending
   b. Diversion and disposal for the pay period and cumulative diversion and disposal for the project
   c. Cumulative waste generated (diversion + disposal) for the project
   d. Cumulative recycling rate for the project (diverted/generated)*100
9. The information required includes but is not limited to, the following:
   a. Contractor and project identification information
   b. Actual quantities of **all** materials listed in tons
10. Source-separated material taken to a recycling facility or certified processing facility is 100% recycled.
11. **Calculating recycling and disposal for mixed material taken to a certified processing facility: the total tons taken to certified processing facility times the recycling rate = amount to be recycled. Total taken to facility minus amount to be recycled = amount for disposal. E.g. 100 tons x 0.80 (80% recycling rate) = 80 tons diverted and 20 tons disposed.

SECTION 01573
EXCAVATION SHORING, FORMS, AND FALSEWORK

1.1 THE REQUIREMENT

A. The CONTRACTOR shall have at the Worksite, copies or suitable extracts of: Construction Safety Orders, Tunnel Safety Orders and General Industry Safety Orders issued by the State Division of Industrial Safety. The CONTRACTOR shall comply with provisions of these and all other applicable laws, ordinances, and regulations.

B. Before excavating any trench 1.5m (5 feet) or more in depth, the CONTRACTOR shall submit a detailed plan to the CITY showing the design of shoring, bracing, sloping, or other revisions to be made for the Workers' protection from the hazard of caving ground during the excavation of such trench. The plan and calculations shall be prepared by a California registered Civil or Structural ENGINEER. No excavation shall start until the ENGINEER has accepted the plan and the CONTRACTOR has obtained a permit from the State Division of Industrial Safety. A copy of the permit shall be submitted to the ENGINEER and INSPECTOR.

C. Whenever work under the Contract involves trench excavation five (5) feet or more in depth, or any kind of shoring, the CONTRACTOR shall design and prepare plans for the required shoring, bracing, and sloping. The shoring plans and calculations shall also be submitted to the City of Los Angeles Department of Building and Safety to obtain required plan check and permit, in advance of excavation to ensure workers' protection from the hazard of caving ground during the excavation and to support adjacent private property with zero lateral and vertical deflection of the shoring system. All costs therefore shall be included in the price named in the Contract for completion of the Work as set forth in the Contract Documents.

D. Nothing in this Section shall be deemed to allow the use of a shoring, sloping, or other protective system less effective than that required by the CAL/OSHA Construction Safety Orders.

E. Nothing in this Article shall be construed to impose liability on the CITY, ENGINEER, INSPECTOR, or any of their officers, agents, representatives, or employees.

F. The CONTRACTOR shall secure approval, in advance, from authorities concerned for the use of any bridges proposed by it for public use. Temporary bridges shall be clearly posted as to load limit and speed limits, with signs and posting conforming to current requirements set forth in the Traffic Manual published by the California Department of Transportation, covering "signs". This manual shall also apply to the street closures, barricades, detours, lights, and other safety devices required.

G. The INSPECTOR will provide a competent person trench/excavation certification form to the CONTRACTOR. It shall be completely filled out before any worker has access to trench or excavation and returned to the INSPECTOR before the end of the first working day. The CONTRACTOR shall certify by this form the

name of the competent person administering the Work, the soil classification, and the type of excavation protective system provided and/or installed.

H. The CONTRACTOR shall completely fence all excavations to provided protection against anyone falling into the excavation and to the satisfaction of the INSPECTOR. The fencing shall be in place at all times except when workers are present and actual construction operations are in progress.

I. The CONTRACTOR shall comply fully with the requirements of the CAL/OSHA Construction Safety Orders, regarding the design of forms, false work, and shoring for concrete placement, and the inspection of same prior to placement of concrete. Where the Construction Safety Orders requires the services of a Civil or Structural Engineer registered in the State of California to approve design calculations and Working Drawings of the false work or shoring system, to inspect such system prior to placement of concrete, the CONTRACTOR shall employ such engineer for these purposes, and all costs therefore shall be included in the price named in the Contract for completion of the Work as set forth in the Contract Documents.

J. No Work under this Section shall start until the ENGINEER has accepted the plans and the CONTRACTOR has obtained all permits required and furnished a copy to the ENGINEER and the INSPECTOR.

1.2 THE REQUIREMENT

A. The CONTRACTOR shall have at the Worksite, copies or suitable extracts of: Construction Safety Orders, Tunnel Safety Orders and General Industry Safety Orders issued by the State Division of Industrial Safety. The CONTRACTOR shall comply with provisions of these and all other applicable laws, ordinances, and regulations.

B. Before excavating any trench 1.5m (5 feet) or more in depth, the CONTRACTOR shall submit a detailed plan to the CITY showing the design of shoring, bracing, sloping, or other revisions to be made for the Workers' protection from the hazard of caving ground during the excavation of such trench. The plan and calculations shall be prepared by a California registered Civil or Structural ENGINEER. No excavation shall start until the ENGINEER has accepted the plan and the CONTRACTOR has obtained a permit from the State Division of Industrial Safety. A copy of the permit shall be submitted to the ENGINEER.

C. The INSPECTOR will provide a competent person trench/excavation certification form to the CONTRACTOR. It shall be completely filled out before any worker has access to trench or excavation and returned to the INSPECTOR before the end of the first working day. The CONTRACTOR shall certify by this form the name of the competent person administering the Work, the soil classification, and the type of excavation protective system provided and/or installed.

D. The CONTRACTOR shall completely fence all excavations to provided protection against anyone falling into the excavation and to the satisfaction of the INSPECTOR. The fencing shall be in place at all times except when workers are present and actual construction operations are in progress.

E. The fencing material shall be chain link fabric or welded wire fabric (6x6-W9xW9 minimum) and 1.5 m (5 feet) high, constructed according to one of the following:

1. Tensioned fencing material and have top and bottom tension wires securely fastened to driven steel posts or other equally rigid elements at a maximum spacing of 3.6m (12 feet); or

2. Untensioned fencing materials securely fastened to extended trench shoring elements at a maximum spacing of 2.4m (8 feet) and fastened to continuous top and bottom rails constructed of nominal 50mm x 100mm (2 in x 4 in) lumber or equally rigid material. Framed panels with suitable supporting elements fastened together to form a continuous fence may also be used.

F. Payment for performing all Work necessary to provide safety measures shall be included in the prices bid for other items of work except where separate bid items for excavation safety are provided, or required by law.

END OF SECTION

This page intentionally left blank

SECTION 01581
PROJECT SIGNS

1.1 THE REQUIREMENT

A. The Recipient shall include appropriate acknowledgement of credit to the District for its support when promoting the Funded Activity or using any data and/or information developed under this Agreement. When the Funded Activity involves the construction phase of an Infrastructure Program Project, signage shall be posted in a prominent location at Project site(s) or at the Recipients headquarters and shall include the Safe, Clean Water Program color logo and the following disclosure statement: “Funding for this project has been provided in full or in part from the Los Angeles County Flood Control District’s Safe, Clean Water Program.” At a minimum the sign shall be 2’ x 3’ in size. The Recipient shall also include in each of its contracts for work under this Agreement a provision that incorporates the requirements stated within this paragraph.

B. The size and content of the credit sign will be furnished by the ENGINEER at the time of construction. The INSPECTOR will determine the appropriate location(s). The CONTRACTOR shall provide submittal for ENGINEER’S approval prior to installation.

C. The names, addresses and specialties of CONTRACTORS, Subcontractors, architects, or engineers may be displayed on removable signs. The size and location shall be subject to the ENGINEER’S approval. Commercial advertising matter shall not be attached to or painted on the surfaces of buildings, fences, canopies, or barricades.

D. TIME and INFORMATION type construction notice signs (4 each) per Standard Plan S-791-1 are required. The Inspector will determine appropriate location(s). The time for the TIME sign and the telephone number for the INFORMATION sign will be furnished by the ENGINEER at the time of construction.

E. C-18 and C-13 ADVANCE CONSTRUCTION NOTICE SIGNS per Standard Plan S-791-1 are required. The INSPECTOR will determine the appropriate locations.

END OF SECTION

This page intentionally left blank

SECTION 01601
BUY CLEAN CALIFORNIA ACT

1.1 THE REQUIREMENT

A. For projects with bid due dates on or after 7/1/2021 that include eligible materials, CONTRACTOR shall provide current facility-specific Environmental Product Declarations (EPDs) of eligible materials **and** meet the State of California maximum limits for Global Warming Potential (GWP) as listed by the State's Department of General Services after project award. Additional information regarding GWP limits may be found at the following website:
https://www.dgs.ca.gov/PD/Resources/Page-Content/Procurement-Division-Resources-List-Folder/Buy-Clean-California-Act

B. Eligible Materials:

1. Steel: This includes structural steel (hot-rolled sections, hollow structural sections, and plates) and carbon steel reinforcement used in concrete or masonry.
2. Flat glass
3. Mineral wool board insulation

C. A submitted facility-specific Environmental Product Declaration (EPD) must be a current Type III as defined by the International Organization for Standardization (ISO) Standard 14025, and has been 3rd Party verified following applicable Product Category Rules (PCRs). Credentials of 3rd Party showing them to be subject matter experts must be provided by the CONTRACTOR upon request. Minimum stage of coverage for EPDs shall consist of the production life cycle (i.e. product stage) or "cradle to gate". PCR shall be as identified by California Department of General Services for the Buy Clean California Act (BCCA).

D. The EPDs shall be submitted with each eligible material submittal for the product(s) under the technical specification sections for approval by the ENGINEER. Depending on the number of facilities, and product types, more than one (1) eligible material submittal may be required. Once approved, the CONTRACTOR must also provide a copy of the approved EPDs with the payment request to the INSPECTOR. Where a submittal is conditionally approved, pending submission of required EPD, the applicable restrictions as noted below shall apply.

E. Restrictions:

1. For projects with bid due dates on or after 7/1/2021, the CONTRACTOR shall not install any eligible materials or incorporate into the work in any way until the required facility-specific EPDs have been provided and approved, unless otherwise agreed upon by the ENGINEER. Payment for specific eligible material will be withheld until the EPDs for these materials are approved by the ENGINEER and submitted along with the progress payment requests.
2. The CONTRACTOR may be assessed liquidated damages for failure to

complete the project within the time fixed by the terms of the contract resulting from Contractor delays associated with submission and approval of the required EPDs.

F. Optional Eligible Materials:
The following materials are being considered for addition to future Eligible Materials list by the City of Los Angeles. As such, Article E above does not apply to these materials at this time. Furthermore, when using one of the Optional Eligible Materials listed in this Article F below, the CONTRACTOR may submit either facility-specific EPDs as noted on Article C above or an industry average EPD. The Optional Eligible Materials are as follows:

1. Concrete (i.e. corresponding mix designs).

END OF SECTION

SECTION 01611
GUARANTY / WARRANTY

1.1 THE REQUIREMENT

A. The CONTRACTOR shall and does hereby warrant and guaranty that all work executed under this Contract will be free from defects of materials and workmanship for a period of one (1) year from the date of Final Field Acceptance of the project as evidenced by the issuance of a "Statement of Completion" by the Inspector, except for certain specific items of Work, materials and equipment requiring a guaranty or warranty for a greater period of time as may be required elsewhere in the Contract Documents. In the event, however, that portions of the Work are sufficiently complete to allow use or occupancy by the CITY in the manner and for the purposes intended prior to final completion and acceptance of the project, the guarantee period will commence on the date shown on the "Statement of Partial Completion."

B. The CONTRACTOR hereby agrees to indemnify and save harmless the CITY, and their officers, agents and employees against and from all claims and liability arising from damage and injury due to said defects. The CONTRACTOR shall repair or replace, at no cost to the CITY, any and all such defective Work and all other Work damaged thereby, which becomes defective during the term of the above-mentioned guaranties and warranties.

C. Within thirty (30) calendar days prior to completion of all Work, the CONTRACTOR shall submit to the CITY original copies of all manufacturers' product guaranties and warranties covering all supplied and installed equipment and, where applicable, systems.

D. In addition to the requirements of INSURANCE, Contract Bonds, of the GENERAL CONDITIONS, it shall be understood that the Surety for the faithful performance bond, submitted in conformance with the terms of the Contract for this project, is liable on its bond for all obligations of the CONTRACTOR including guaranty provisions. The "Performance Bond" shall remain in effect until the end of the guarantee period.

E. The CONTRACTOR shall, within twenty-four (24) hours of notice from the ENGINEER of any Work not in accordance with the requirements of the Contract, or any defects in the Work, commence and prosecute with due diligence all work necessary to fulfill the terms of this Section and to complete the Work within a period of time as approved by the ENGINEER. The CONTRACTOR shall notify the ENGINEER of the repair schedule before commencing the repairs and notify the ENGINEER to arrange for inspection. The CONTRACTOR shall submit a written report of the defect and methods of correction. In the event of failure by the CONTRACTOR and/or its Surety to respond to the notice or to complete the Work required by this Section within the time specified, the CITY shall proceed to have such Work done at the CONTRACTOR's expense. The CONTRACTOR or its Surety shall promptly reimburse the CITY all direct and indirect cost associated with performing this Work.

F. Repairs, replacements or changes made under the requirements of this Section shall be warranted for the specified guarantee period, but no less than one year, beginning on the date of acceptance of the repairs, replacements or changes.

END OF SECTION

SECTION 01630
SUBSTITUTIONS AND "OR EQUAL" SUBMITTAL

1.1 THE REQUIREMENT

A. The CONTRACTOR may supply any of the materials specified or offer an equivalent. The ENGINEER shall determine whether the material offered is equivalent to that specified. The CONTRACTOR shall make all "Or Equal" submittals within thirty (30) calendar days after issuance of Notice to Proceed. Any request or submittal received after the specified period will be considered as NOT EQUAL to that so specified and will be processed as a substitution described hereinafter.

B. Whenever any particular material, process, or equipment is indicated by patent, proprietary or brand name, or by name of manufacturer, such wording is used for the purpose of facilitating its description and shall be deemed to be followed by the words 'or equal.' A listing of materials is not intended to be comprehensive, or in order of preference. The CONTRACTOR may offer any material, process, or equipment considered to be equivalent to that indicated. The substantiation of offers shall be submitted as provided in the Contract Documents.

C. The CONTRACTOR shall, at its expense, furnish data concerning items offered by it as equivalent to those specified. The CONTRACTOR shall have the material tested as required by the ENGINEER to determine that the quality, strength, physical, chemical, or other characteristics, including durability, finish, efficiency, dimensions, service, and suitability are such that the items will fulfill its intended function.

D. Test methods shall be subject to the approval of the ENGINEER. Test results shall be reported promptly to the ENGINEER, who will evaluate the results and determine if the substituted items are equivalent. The ENGINEER'S findings shall be final. Installation and use of substituted items shall not be made until approved by the ENGINEER.

E. All manufacturers' data submitted to the ENGINEER for review and acceptance shall clearly identify each proposed substitute with the corresponding Contract Drawing detail and Specification Section. If the ENGINEER decides to accept for use in the Project a material, process or article which is not the equal of that specified, substitution shall be made in the manner described in CHANGES AND EXTRA WORK of the GENERAL CONDITIONS, with a credit to the CITY for the difference in value.

F. The ENGINEER shall determine whether the material offered is equivalent to that specified. Any revision to structures, piping, mechanical, electrical, instrumentation, or any other work made necessary by such substitution must be approved by the ENGINEER, and the entire cost both direct and indirect of these revisions shall be borne by the CONTRACTOR.

G. Any materials, process, or article may be requested as a substitution by the CONTRACTOR, in lieu of that specified, under the following conditions:

1. Requests must be submitted in writing and in the manner described in SHOP DRAWINGS / SUBMITTALS of these GENERAL REQUIREMENTS.

2. Requests must be submitted thirty (30) calendar days prior to starting the work, as established by the ENGINEER, so as not to cause any delay in completion of the Project. No other request will be considered after expiration of the period specified, except that in exceptional cases where it is determined to be in the best interest of the CITY, as approved by the ENGINEER.

3. The CONTRACTOR agrees to pay for all Engineering and design services, if required, to make all changes and adjustments in material and work of all trades directly or indirectly affected by the substitute, to the satisfaction of the ENGINEER, at no cost to the CITY.

4. All requests for substitution shall be made through the CONTRACTOR. Submissions by the CONTRACTOR shall imply the CONTRACTOR'S approval of such substitution.

5. No requests for substitutions will be considered during the bidding period.

6. The CONTRACTOR shall furnish adequate data with each request for approval of a substitute to enable the ENGINEER to evaluate the proposed substitution.

7. If a substitute offered by the CONTRACTOR is not found to be equal to the specified material, then CONTRACTOR shall furnish and install the specified material.

8. The specified Contract completion time shall not be affected by any circumstance developing from the provisions of this Section.

END OF SECTION

SECTION 01711
SITE INVESTIGATION

1.1 THE REQUIREMENT

A. CONTRACTOR shall investigate the Jobsite prior to Bid and during construction to ascertain all conditions affecting necessary procedures and sequencing of the Work operations in the execution of the Contracted Work in accordance with the requirements shown in Section 01731 – CUTTING AND PATCHING of the GENERAL REQUIREMENTS, herein and elsewhere.

1. Utilities in Abandoned Streets, Easements, and/or Alleys: CONTRACTOR is responsible for verifying and satisfying himself as to conditions under which work on such utilities will be done, such as what lines will be left in place, removed or rerouted. CONTRACTOR shall verify with Utility Map, Substructure Maps, District Maps & Street Lighting Map, etc., which are available at the Public Works Counter and in the Utility Companies. Should existing inactive utility lines (not shown or noted on the Drawings) be encountered, they shall be left-in-place and properly capped if not in way of new construction or if sufficiently below finish grade; as directed by the CITY ENGINEER. CONTRACTOR shall bear all costs involved in removing, rerouting or capping of such lines. CONTRACTOR shall contact the interested utility agencies as necessary to determine the Work operations involved.

2. CONTRACTOR shall report to the ENGINEER, prior to the Bid, any adverse condition(s), which would affect the proper execution of the Contracted Work and shall not proceed until instructed by the ENGINEER. Except as provided in GENERAL REQUIREMENTS Section 01253 – DIFFERING SITE CONDITION, failure to report any such conditions shall constitute acceptance of all site conditions, and any required removal, repair, or replacement caused by unsuitable conditions shall be performed by the CONTRACTOR at its sole cost and expense.

3. Start of Contracted Work at the Jobsite shall imply CONTRACTOR'S acceptance of job conditions.

B. Work Determination: CONTRACTOR shall satisfy itself regarding job/site conditions, the nature and types of work to be performed and shall be responsible for the determination of all classes of work to be accomplished at the Jobsite or at the manufacturer's plant.

C. Allotted Working Space: CONTRACTOR shall limit work operations to the "working site" or "Jobsite" or "Worksite," and areas immediately adjacent thereto, as shown on the Contract Drawings, specified or authorized by the CITY ENGINEER.

1.2 UTILITY LOCATION

A. **General**

1. Unless specified otherwise, prior to commencing any excavation or other work, it is the CONTRACTOR'S responsibility to verify and/or determine the location and the depth of underground main distribution conduits, such as, but not limited to, water, gas, sewer, storm water, electrical power, oil, telephone or cable television, in the area which is known, or reasonably should be known, to contain such subsurface installation. CONTRACTOR shall search known substructure records, contact and verify with the utility companies, and pothole existing subsurface installation to determine their locations and elevation, at no additional cost to the CITY as part of the Contracted Work and requirements of the Los Angeles City Ordinanec No. 150, 478.

2. The Permittee (in the case of Private Contracts) and the CITY (in the case of Cash or Assessment act contracts), will search known substructure records and furnish the CONTRACTOR with copies of documents which describe the location of utility substructures, or will indicate on the Plans for the Project those substructures (except for service connections) which may affect the Work. Information regarding removal, relocation, abandonment, or installation of new utilities will be furnished to prospective Bidders.

3. As provided in Section 4216 of the California Government Code, at least two (2) working days prior to commencing any excavation, the CONTRACTOR shall contact the regional notification center (Underground Service Alert of Southern California) and obtain an inquiry identification number. Refer to PROTECTION OF PERSONS AND PROPERTY AND RESTORATION OF EXISTING IMPROVEMENTS of the GENERAL CONDITIONS.

4. The California Department of Transportation is not required by Section 4216 of the California Government Code to become a member of the regional notification center. The CONTRACTOR shall contact it for location of its subsurface installation.

5. The CONTRACTOR shall determine the location and depth of all utilities, including service connections, which have been marked by the respective owners and which may affect or be affected by its operations. If no pay item is provided in the Contract for this work, full compensation for such work shall be considered as included in the prices bid for other items of work.

B. Coordination

6. The CONTRACTOR is advised that the Drawings usually depict the location of substructures as they existed when the project was designed. Present-day information may indicate that new facilities may have been added, or are going to be added, or that some of those substructures are now, or will be, relocated, abandoned, removed, lowered, raised, blanketed, encased, enlarged, protected, or altered in some other way.

The CONTRACTOR shall carefully examine the proposed construction site prior to Bid and during construction for any evidence of recent surfacing of excavations, or the possible conflict with surface or aerial installations, and the latest substructure maps, and bid accordingly. If further information or clarification is desired, CONTRACTOR is urged to immediately contact the following:

a. The appropriate utility companies;

b. The appropriate District Office of the Bureau of Engineering; and/or

c. City of Los Angeles, Utility Coordination Section of the Project Award and Control Division
1149 S. Broadway, Suite 140,
Los Angeles, CA 90015
(213) 847-0624.

7. Review and verify with the information indicated on the Contract Drawings, the Summary of First Notice Replies (see Attachment No. 01711-A1) and the information provided in the GENERAL REQUIREMENTS Section 01112 - DESCRIPTION OF WORK.

1.3 Utility Protection

A. The CONTRACTOR shall not interrupt the service function or disturb the support of any utility without authority from the owner or order from the CITY. All valves, switches, vaults, and meters shall be maintained readily accessible for emergency shutoff.

B. Where protection is required to ensure support of utilities located as shown on the Plans or in accordance with Subsection 1.2 – Utility Location, above, the CONTRACTOR shall, unless otherwise provided, furnish and place the necessary protection at its expense.

C. Upon learning of the existence and location of any utility omitted from or shown incorrectly on the Plans, the CONTRACTOR shall immediately notify the ENGINEER in writing. When authorized by the ENGINEER, support or protection of the utility will be paid for as provided in SECTION 01254 – CHANGE ORDERS of the GENERAL REQUIREMENTS.

D. The CONTRACTOR shall immediately notify the ENGINEER and the utility owner if any utility is disturbed or damaged. The CONTRACTOR shall bear the costs of repair or replacement of any utility damaged if located as noted above, in Subsection 1.2 – Utility Location.

E. When placing concrete around or contiguous to any non-metallic utility installation, the CONTRACTOR shall, at its expense:

1. Furnish and install a 50mm (2 inch) cushion of expansion joint material or other similar resilient material; or

2. Provide a sleeve or other opening which will result in a 50mm (2 inch) minimum-clear annular space between the concrete and the utility; or

3. Provide other acceptable means to prevent embedment in or bonding to the concrete.

1.4 Utility Removal

A. Unless otherwise specified, the CONTRACTOR shall remove all interfering portions of utilities shown on the Plans or indicated in the Bid documents as “abandoned” or “to be abandoned in place”. Before starting removal operations, the CONTRACTOR shall ascertain from the CITY whether the abandonment is complete, and the costs involved in the removal and disposal shall be included in the Bid for the items of work necessitating such removals.

1.5 Utility Relocation

A. When feasible, the owners responsible for utilities within the area affected by the Work will complete their necessary installations, relocations, repairs, or replacements before commencement of work by the CONTRACTOR. When the Plans or Specifications indicate that a utility installation is to be relocated, altered, or constructed by others, the CITY will conduct all negotiations with the owners and work will be done at no cost to the CONTRACTOR, except as provided in SSPWC Section 301-1.6. Utilities which are relocated in order to avoid interference shall be protected in their position and the cost of such protection shall be included in the Bid for the items of Work necessitating such relocation.

B. After award of the Contract, portions of utilities which are found to interfere with the Work will be relocated, altered or reconstructed by the owners, or the ENGINEER may order changes to the Work to avoid interference. Such changes will be paid for in accordance with SECTION 01254 – CHANGE ORDERS of the GENERAL REQUIREMENTS. However, for interfering City owned utilities identified on the Plans including but not limited to sewers, storm-drains, traffic signal or streetlight conduits and appurtenances, their restoration, alteration, or reconstruction shall be performed by the CONTRACTOR and the associated cost shall be included in the CONTRACTOR’s bid.

C. When the Plans or Specifications provide for the CONTRACTOR to alter, relocate, or reconstruct a utility, all costs for such work shall be included in the Bid for the items of work necessitating such work. Temporary or permanent relocation or alteration of utilities requested by the CONTRACTOR for its convenience shall be its responsibility and it shall make all arrangements and bear all costs.

D. The utility owner will relocate service connections as necessary within the limits of the Work or within temporary construction or slope easements. When directed by the ENGINEER, the CONTRACTOR shall arrange for the relocation of service connections as necessary between the meter and property line, or between a meter and the limits of temporary construction or slope easements. The relocation of such service connections will be paid for in accordance with the provisions of SECTION 01254 – CHANGE ORDERS of the GENERAL REQUIREMENTS. Payment will include the restoration of all existing improvements which may be affected thereby. The CONTRACTOR may agree with the owner of any utility to disconnect and reconnect interfering service connections. The CITY will not be involved in any such agreement.

1.6 Utility Delays

A. The CONTRACTOR shall notify the ENGINEER of its construction schedule insofar as it affects the protection, removal, or relocation of utilities. Said notification shall be included as part of the construction schedule required in SECTION 01321 - CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS OF THE GENERAL REQUIREMENTS. The CONTRACTOR shall notify ENGINEER in writing of any subsequent changes in the construction schedule which will affect the time available for protection, removal, or relocation of utilities.

B. The CONTRACTOR will not be entitled to damages or additional payment for delays attributable to the utility relocations or alterations if correctly located, noted, and completed in accordance with 1.2 Utility Location, above.

C. The CONTRACTOR may be given an extension of time for unforeseen delays attributable to the unreasonably protracted interference by utilities in performing Work correctly shown on the Plans

D. The CITY will assume responsibility for the timely removal, relocation, or protection of existing main or trunkline utility facilities within the area affected by the Work if such utilities are not identified in the Contract Documents. The CONTRACTOR will not be assessed liquidated damages for any delay caused by failure of CITY to provide for the timely removal, relocation, or protection of such existing facilities.

E. If the CONTRACTOR sustains loss due to delays attributable to interferences, relocations, or alterations not covered by Subsection 1.2 - Utility Location, above, which could not have been avoided by the judicious handling of forces, equipment, or plant, there shall be paid to the CONTRACTOR such amounts as the ENGINEER may find to be fair and reasonable compensation for such part of the CONTRACTOR'S actual loss as was unavoidable and the CONTRACTOR may be granted an extension of time.

F. Payment to the CONTRACTOR for actual loss due to a protracted utility delay shall be calculated based on wage increases, price increases of material and equipment, additional insurance costs and actual direct costs of maintaining the Worksite incurred because of the utility delay.

1.7 Utility Cooperation.

A. When necessary, the CONTRACTOR shall so conduct its operations as to permit access to the Worksite and provide time for utility work to be accomplished during the progress of the Work.

ATTACHMENT TO SECTION 01711

Attachment to General Requirements Section 01711 consists of one (1) document, as follows:

ATTACHMENT NUMBER	TITLE OF ATTACHMENT	NUMBER OF PAGES IN THIS ATTACHMENT
01711-A1	Summary of First Notice	2

See Appendix for First Notice replies.

NOTICE OF PROPOSED PROJECT **FIRST NOTICE**

CITY OF LOS ANGELES
DEPARTMENT OF PUBLIC WORKS
BUREAU OF ENGINEERING

Date: October 26, 2021

The Department of Public Works is scheduling the following improvements:

Project Title: **David M. Gonzales Recreation Center Stormwater Capture Project**
Work Order No.: **EW40078D** **Job ID:** **1453**

Work to Be Performed: The Project consists of installing a 2.6-acre underground infiltration gallery to capture and infiltrate stormwater. Construction of the underground infiltration gallery will include installation of a storm drain diversion structure, storm pipe, pretreatment device, desilting basin, flow measuring device, level sensors, and education signage. Runoff will be collected from approximately a 759-acre tributary area and diverted into the infiltration gallery. The galleries shall be sized to store approximately 1,596,000 cf.

The project will include restoration of existing park components as well as new improvements. Park improvements include park improvements such as two (2) improved baseball fields with the following amenities: backstops, dugouts, player benches, batting cage, bullpens, sports lighting, and bleachers. Other improvements include new exercise equipment, a multi-purpose field/open space, hydration stations, permeable pavement parking lot, landscaping, and an improved irrigation system.

Please fill out the following and return one copy to the Utility Coordination Group by **November 26, 2021**.
PLEASE UPLOAD A COPY OF YOUR AS-BUILT PLANS, IN THE LINK PROVIDED IN THE EMAIL, SHOWING THE LOCATION OF YOUR FACILITIES (IN OR AROUND THE PROJECT AREA).

Your replies will be transmitted to prospective bidders and used in coordinating this project. Please note proper location of any facilities, live or abandoned, that are not shown or are shown incorrectly on the attached plans. The City will not be responsible for any damage to facilities that are not shown or are shown incorrectly on the plans. Failure to reply may deprive you of the protection provided for in the Standard Specifications. Construction delays and/or expenses due to failure in providing accurate information shall result in an assessment of costs to you, per Los Angeles Municipal Code (LAMC) 62.01 or your Franchise Agreement with the City.

Upon receipt and review of your response(s), the City will contact you to formalize your utility relocation (or protect-in-place) plan, with a utility relocation agreement if necessary.

For questions, please contact the **Project Manager Bryan Powell** at (213) 485-5908 or **bryan.powell**@lacity.org.

SECTION 01712
SUBSURFACE DATA

1.1 THE REQUIREMENT

A. All soil and test hole data, water table elevation, and soil analyses shown on the Drawings or included in the Geotechnical Evaluation Report in the Specification Appendix apply only at the location of the test holes and to the depth indicated. Any additional subsurface exploration shall be done by the CONTRACTOR at their own expense. The indicated elevation of the water table is that level at the date the test hole data was obtained. It is the CONTRACTOR'S responsibility to determine and allow for the elevation of groundwater at the date of Project construction. A difference in elevation between the ground water shown in soil boring logs and groundwater actually encountered during construction will not be considered as a basis for extra work.

SECTION 01721
MOBILIZATION

1.1 THE REQUIREMENT

A. General

Whether Mobilization is included as a Contract Bid Item in the Bid Proposal Form or specified as part of the lump sum in the Contract Documents, the cost of labor, equipment, materials and incidentals for doing all the work in mobilization (in advance of construction operations and not directly attributable to any specific bid item) shall be included in the Contract Price Breakdown and progress payment estimate. If there is no mobilization bid item, the CONTRACTOR shall submit to the INSPECTOR for approval the Contract Price Breakdown with the amount established for mobilization.

Mobilization shall include, but not be limited to, the following items, all as required for the proper performance and completion of the Work:

1. Obtaining all permits, licenses, insurance, and bonds. Providing copies to the ENGINEER.

2. Moving onto the Jobsite all of CONTRACTOR'S plant and equipment as required.

3. Erecting temporary buildings and other construction facilities.

4. Installing temporary construction power and wiring.

5. Establishing fire protection system for its temporary facilities.

6. Developing construction water supply.

7. Providing field office trailers for the CONTRACTOR, complete with all specified equipment, furnishings and utility services.

8. Providing sanitary facilities or connecting to onsite sanitary facilities as specified.

9. Providing potable water facilities as specified. This includes a means by which all on site CONTRACTOR, Subcontractor or supplier personnel can wash their hands with soap.

10. Arranging for, and erection of, CONTRACTOR'S work and storage yards and sheds.

11. Submitting all required Subcontractor insurance certificates and bonds.

12. Posting all CAL/OSHA required notices and establishment of safety programs.

13. Having the CONTRACTOR'S representative at the Jobsite full time.

14. Furnishing of Construction Schedule, Contract Price Breakdown and Submittal Schedule.

15. Erecting all temporary fencing.

16. Erecting CONTRACTOR signs. The names, addresses, and specialties of CONTRACTORS, subcontractors, engineers or architects may be displayed on removable signs. The size and location shall be subject to the ENGINEER'S approval. Commercial advertising matter shall not be attached to or painted on the surfaces of buildings, fences, canopies or barricades.

17. Installing Building Credit signs and Advance Construction Notice signs. The Building Credit sign shall be submitted to the ENGINEER for approval prior to installation. Refer to GENERAL REQUIREMENTS Section 01581 – Project Signs, for additional requirements.

18. Providing an air-conditioned meeting room with a conference table, a minimum of [10] chairs and utilities for construction meetings within the CONTRACTOR'S field office.

19. Furnishing and set-up of field office(s) for the ENGINEER and INSPECTOR. If it is necessary to relocate the INSPECTOR'S job office to a new facility or relocation during the course of the Contract provide the required labor and equipment. The new facility shall be properly equipped and conform to the requirements shown in Subsection B.2, Field Offices herein. The CONTRACTOR shall obtain the ENGINEER'S approval of the new location thirty (30) days in advance.

B. Field Offices For The Inspector And The Engineer

1. Unless specified otherwise, the CONTRACTOR shall, at no cost to the CITY, furnish, install, maintain, and remove all temporary light, telephone, power and water (including piping, wiring, lamps and other equipment necessary for the field offices).

2. The CONTRACTOR shall furnish the ENGINEER and the INSPECTOR, for the duration of the Contract, and through the STARTUP ASSISTANCE period, at no additional cost to the CITY, a furnished field office with janitorial services and maintenance agreements for all equipment provided under this Section. This office shall have a minimum floor space of 300 square feet, at least 2 door(s), and window area of not less than 10 square feet. All exterior doors and windows shall be provided with screens. All exterior doors shall be provided with door handles with double deadbolt locks and the CONTRACTOR shall provide the INSPECTOR 3 keys as requested by the INSPECTOR. This field office shall be furnished as follows:

a. 2 plan table(s), 2 standard 5-foot double pedestal desk with a drawer suitable for holding files, 2 chairs, 1 drafting stool, 1 plan racks, 3 - 4 drawer filing cabinet suitable to hold legal or letter size hanging file folders, 2 storage cabinet with a minimum of 4 adjustable shelves.

b. Heating and air conditioning of sufficient capacity shall be provided at no expense to the CITY to adequately control the temperature at all times.

c. Bottled drinking water shall be provided within the office. Sanitary facilities shall be provided directly adjoining the office for the sole use of the ENGINEER and the INSPECTOR. [Sanitary facilities shall include a toilet and wash basin with hot and cold running water.]

d. One console type, dry, indirect electrophotographic process network-capable copier/printer/scanner capable of 60 letter size copies per minute. Copier shall be able to copy 11" X 17" ledger size paper and be able to reduce to 65% and enlarge to 154%. Copier shall have a sorter/finisher with a staple cartridge and have additional cassettes for letter, legal, ledger-size paper. The copier's primary paper supply shall be 8.5" X 11" size. The copier shall be installed new or like new in good working order and the CONTRACTOR shall maintain the unit in operating condition throughout the life of the Project.

e. One Color inkjet all-in-one machine capable of printing, copying, and scanning up to 11” X 17”. Printing shall be a minimum of 35 pages per minute in black and 28 pages per minute in color. Resolution shall be a minimum of 6000 x 1200 dpi. A 50-sheet document feeder shall be included. All toner cartridges shall be provided by the contractor for the duration of the project.]

f. Eight Duplex convenience outlets for electrical power [a minimum of four per staff person].

g. Three Outdoor lighting fixture with 300-Watt bulb to effectively light the area around the office facility.

h. One Maintenance and service agreements for all office equipment during the contract period.

i. The CONTRACTOR shall provide janitorial services twice-a-week for the field offices for the duration of the Contract Work.

j. Any computer equipment or software furnished under this section or under an Allowance for City Field Offices shall be the property of the City at the end of the project.

k. The CONTRACTOR shall provide a high speed internet connection for the duration of the Contract and through the start up assistance period.

C. Temporary Construction Utilities

1. Construction Water:

a. Potable water will be made available for the CONTRACTOR’S use from the existing fire hydrant system, as located on the

Plans, or as directed by the ENGINEER. The CONTRACTOR shall meter water usage and pay for the cost of water consumption. The CONTRACTOR shall make arrangements with the servicing water utility company. A backflow preventer shall be provided as per the Plumbing Code.

2. Construction Power:

a. The CONTRACTOR shall provide all electrical power required in performance of the Work and shall pay all installation charges and monthly bills in connection therewith. The CONTRACTOR shall provide and maintain all temporary and permanent power. The CONTRACTOR shall pay for all permits. All temporary connections for electricity shall be subject to approval of the ENGINEER and the power company representative, and shall be removed in like manner at the CONTRACTOR'S expense prior to final acceptance of the Work.]

3. Telephones:

a. The CONTRACTOR shall provide and maintain at all times during the progress of the Work, at its own expense, not less than three (3) telephones in good working order, at its own field construction office. Each such telephone shall be connected to an established exchange for toll service and with all other telephones utilized by the CONTRACTOR.

4. Temporary Ventilation:

a. The CONTRACTOR shall provide adequate means to furnish temporary ventilation within Work areas at CONTRACTOR'S own expense and conforming to applicable requirements and standards of Federal, State, County and the 2020 Los Angeles CITY Building Codes and Amendments.

D. Contractor's Temporary Storage Facilities

1. The CONTRACTOR shall provide an adequate temporary shed on the site in a location designated by the ENGINEER for the safe storage of material and equipment. The shed shall be weathertight with a wood floor above grade. The shed shall be removed upon completion of the Work, or when so ordered by the ENGINEER.

E. Sanitary Facilities

1. The CONTRACTOR shall provide adequate sanitary conveniences of an approved type for the use of persons employed on the Work, and properly secluded from public observation, shall be provided and maintained by the CONTRACTOR in such a manner and at such points as shall be required or approved by the INSPECTOR. These conveniences shall be maintained at all times without nuisances and their use shall be strictly enforced. Upon completion of the Contracted Work, they shall be removed from the premises, leaving the premises clean and free from a nuisance.

F. Job Bulletin Board

1. The CONTRACTOR shall provide and mount on the CONTRACTOR'S Field Office, where it can be readily seen by the CONTRACTOR'S employees, a substantially built 3-feet high x 4-feet wide bulletin board, with a framed glass door protected on the outside with a 2-inch x 2-inch galvanized mesh and lock.

G. Protection Enclosures

1. Precautions shall be exercised by the CONTRACTOR at all times for the protection of persons and property.

2. CONTRACTOR shall furnish (or cause to be furnished) and maintain for the duration of Contracted Work, all scaffolds, covers, tarpaulins, canopies, warning signs, steps, bridges and other temporary construction and other protective devices as required by the INSPECTOR and the Local and State Rules, Ordinances and/or Regulations necessary for protection of public and private property and public safety.

3. Such enclosures shall be of reasonably good appearance and shall be maintained free of signs, posters, writing, markings and any other thing which would detract from a reasonably good appearance.

H. Temporary Fencing and Gates

1. Provide and maintain for the duration of the Contracted Work temporary chain link fencing of design and type needed to prevent entry onto the Jobsite and exterior Work area by the public.

I. Plan Box

1. CONTRACTOR shall provide a plan box to store a full set of contract drawings and the project manual for the duration of the project. The box shall be of the appropriate size to contain the contract drawings and the project manual, and shall be temporary, weather tight, and include a cover, lock, and proper identification.

J. Construction Sign

1. Materials:

a. Posts: 4-inch x 6-inch redwood, C.R.A. Foundation grade.

b. Frame: Douglas fir solid stock, W.C.L.B., and Better, V.G. Finish.

c. Metal Panel: No. 22 gauge sheet steel.

d. CITY Seal: Provided by ENGINEER.

2. Fabrication:

a. Securely attach frame to posts with adequate fasteners.

b. Miter and nail frames, conceal fastenings and set nails.

c. Secure a sheet metal panel to frame with wood stops.

3. Painting:

a. By sign painters.

b. On all surfaces of posts, panel and frame, 1 coat of primer and 1 coat of finish paint on concealed surfaces not glued; 1 coat of primer and 2 coats of finish paint on exposed surfaces, and anti-graffiti coating.

c. With exterior wood primer and exterior oil paint**.**

d. White finish on all surfaces; black letters and black frames reveal.

4. Installation:

a. Set posts into natural ground; location as directed by the ENGINEER or where indicated on the Contract Drawings.

5. Removal:

a. Upon completion of Contracted Work or when directed by the ENGINEER.

6. Modifications:

a. During the course of the Contract, the CONTRACTOR may be required to make changes to lettering, as directed by the ENGINEER, up to forty (40) letters regardless of the letter size, without additional cost to the CITY.

b. Repair and recoat the modified area in a manner that will eliminate the evidence of the changes.

K. Permits

1. The CONTRACTOR shall be responsible for obtaining and paying for all permits, licenses and fees in a timely manner, in accordance with Section 00217 of the General Conditions. The CONTRACTOR shall be aware of the expiration date of all building permits, plan checks and/or extensions when the ENGINEER turns over such documents to the CONTRACTOR for construction use. If the CONTRACTOR does not obtain the permits in a timely manner, the CONTRACTOR shall be responsible for the delay, and the additional cost incurred as a result of the delay, in obtaining and paying for the permits or licenses (such as costs to re-plan check, plan modification due to code changes, etc).

2. The CONTRACTOR shall be familiar with all aspects of the Project. For the Project which requires a haul route hearing and haul route bonding as part of the Grading Permit approval process, CONTRACTOR shall

prepare and secure the Grading Permit as soon as the construction contract is awarded in order to mitigate any possible delays due to the haul route hearing, The haul route map preparations shall be as required by the Los Angeles CITY Department of Building and Safety, Grading Division, and Section 02220 – EARTHWORK of the Project Manual.

3. The CONTRACTOR shall obtain and pay for the following:

   a. Excavation “E” Permit

   b. Grading Permit from LADBS

   c. Electrical Permit from LADBS

   d. Los Angeles County Flood Control District

   e. Shoring Permit from CAL-OSHA

   f. Sign Permit

   g. Stormwater Pollution Prevention Plant (SWPPP) for stormwater pollution control measures for constr5uction activities.

   h. Caltrans Encroachment Permit (CITY will submit for plan check and pay for owner’s permit. CONTRACTOR shall submit pay for work permit.

L. Utility Services Connections

1. Within five (5) days after the Notice-to-Proceed, notify the serving utilities that the Project is under construction and furnish them dates on which the services will be required. Furnish the ENGINEER a duplicate copy of all service requests.

2. Should any major changes to the Work indicated be necessary to complete the utility installation, notify the ENGINEER in writing at once and cease all the Work affected until approval for the required modifications has been obtained from the ENGINEER.

3. Water Service Connections: Make all arrangements with the proper authorities for the domestic water service. The CONTRACTOR will pay for all fees and charges. Construction water is to be separately arranged and paid for by the CONTRACTOR. If the CONTRACTOR uses an existing water supply for construction the billing shall be transferred to the CONTRACTOR prior to the start of construction. A duplicate of the transfer documentation shall be provided to the ENGINEER.

4. Power Service Connections: Make all arrangements with the proper authorities for the new power service connections and testing of electrical equipment and control and removal of existing power service connections as part of the contract. The CONTRACTOR will pay for all fees and charges. Power for construction and testing equipment to be separately arranged and paid for by the CONTRACTOR. The

CONTRACTOR shall contact Daniela Rivera of LADWP at (818) 771-4286.

5. If the CONTRACTOR is delayed during the inspections by local authorized agencies or work by utility companies, not the fault of the CONTRACTOR and a critical path is impacted, the CONTRACTOR shall be entitled to a non-compensable time extension and shall have no claim for any other compensation for such delay.

SECTION 01722
SURVEYING

1.1 THE REQUIREMENT

A. Permanent Survey Control Network Markers

1. The CITY Surveyor will establish horizontal and vertical control by recovering or reestablishing city centerline control monuments and identifying city benchmarks. The CONTRACTOR shall be responsible to protect all preconstruction control network reference points. In the case, where the monuments are to be removed or damaged by the CONTRACTOR, the CONTRACTOR shall notify the ENGINEER / CITY Surveyor in writing seven (7) calendar days before starting the Work. There will be a charge to the CONTRACTOR for replacing monuments and benchmarks that are disturbed by the CONTRACTOR prior to the CITY Surveyor establishing adequate reference points.

   The CONTRACTOR shall furnish all additional surveying necessary for project and shall protect the CITY monuments from damage for the duration of the Project. The CONTRACTOR will be back charged for any CONTRACTOR damaged or destroyed survey control that has to be replaced by the CITY. For pipeline or street projects there shall be control points with coordinates at a maximum ¼ mile spacing. For all projects, at least two elevation benchmarks shall be provided. For projects greater than ½ mile in length, the elevation benchmarks shall be no more than ½ mile apart.

   The CONTRACTOR shall complete a survey request form at least seven (7) full working in advance by contacting the appropriate District Survey Office in the list below. Additional lead time will facilitate service. The form shall state exactly what and when the services are needed. A copy of the request can be faxed to the appropriate District Survey Office and a copy sent to the Engineer.

B. Layout of Contracted Work:

1. The CONTRACTOR shall be responsible for all surveys required to layout Work and for the accuracy of all survey work for construction. The CONTRACTOR shall include the cost of all such survey work in their Bid. The CONTRACTOR shall have all construction surveying performed by a 'Licensed Land Surveyor' or a 'Civil Engineer' registered by the State of California to perform such work. The ENGINEER reserves the right to verify all survey work done by the CONTRACTOR.

C. Construction Surveying Services

1. Construction Surveys shall conform to Chapter J 600 of the Bureau of Engineering Survey Manual, Part J. This manual may be purchased through the Bureau of Engineering Public Reference Center.

2. The CONTRACTOR shall provide all reference stakes and form checks necessary for construction and inspection of improvements. All construction staking shall be documented in survey field notes. This staking may include but is not limited to: removals, joins, rough grade, slope, utilities, storm drains, sewers, curbs, walks, paving, wall and building stakes; and any other staking necessary for construction and inspection.

D. Reference or Grade Stakes

1. A reference or grade stake shall be set for each grade change or angle point shown on the plan, standard plan, and shop drawing, in addition to the normal staking interval.

E. Form Checks

1. Forms shall be checked when durable points may be disturbed, removed, or are impractical to be used to verify the design location. The measured location shall be recorded in the survey field notes. All variations from the plan location shall be brought to the attention of the ENGINEER.

F. Staking Intervals and Offset Stake Lines

1. All staking intervals shall be in accordance with the Survey Manual, Figures J 615.224A&Am, J 615.225A, and J615.225Am. Stake lines shall be set at an offset distance from the improvement to ensure proper grade, station, and alignment.

G. Utility Stakes

1. The CONTRACTOR shall provide stakes for all utilities, public or private, that require location or relocation, unless otherwise stated.

H. Additional Survey Work

1. The CONTRACTOR may be required to furnish additional survey work, such as profiles, restakes, Change Orders, etc., at the request of the ENGINEER or the INSPECTOR.

I. Accuracy

1. The CONTRACTOR shall use appropriate surveying methods to obtain the following standards: For fixed works (i.e. cast-in-place concrete; asphalt pavement, pipes and drains; and other items determined by the ENGINEER) the following survey standards shall be used. The absolute horizontal accuracy, in relationship to the Engineer's control, shall be such that the semimajor axis of its 95% error ellipse is ±0.015 foot or less. The absolute vertical accuracy, in relationship to the Engineer's control, shall be such that its standard deviation is ±0.015 foot or less. The relative horizontal accuracy of survey points within the Project shall be such that the semimajor axis of its 95% error ellipse is ±0.015 foot or less. The relative vertical accuracy of survey points within the Project shall be such that its standard deviation is ±0.015 foot or less.

2. For excavation purposes, the following survey standards shall be used. The absolute horizontal accuracy, in relationship to the Engineer's control, shall be such that the semimajor axis of its 95% error ellipse is ±0.1 foot or less. The absolute vertical accuracy, in relationship to the Engineer's control, shall be such that its standard deviation is ±0.1 foot or less. The relative horizontal accuracy of survey points within the Project shall be such that semimajor axis of the 95% error ellipse is ±0.1 foot or less. The relative vertical accuracy of survey points within the Project shall be such that its standard deviation is ±0.1 foot or less.

J. Survey/Inspector

1. The CONTRACTOR shall provide to the INSPECTOR those measurements and control points necessary to determine the location and conformance to the plan, line, and grade of the improvements necessary for inspection purposes.

K. Survey/Engineer

1. The CONTRACTOR shall provide to the ENGINEER those measurements necessary for the expedient completion of the Project.

L. Survey Plan of Operations

1. Prior to construction, the CONTRACTOR shall submit to the ENGINEER for approval a survey plan describing methods and instrumentation to be used on the Project. The survey plan must be approved prior to any construction.

M. Survey Notes

1. The CONTRACTOR shall supply and keep notes on CITY standard format note sheets in conformance with Chapter J 600 of the Bureau of Engineering Survey Manual, Part J. The ENGINEER may request copies of, and otherwise review, survey notes at any time during the construction phase of the Project. Upon completion of the Project, the original survey notes shall become the property of the CITY and shall be delivered to the ENGINEER

(END OF SECTION)

SECTION 01723
RIGHT OF WAY

1.1 THE REQUIREMENT

A. The CONTRACTOR shall not allow its employees to use private property for any reason, or to use water or electricity from such property without written permission from the owner. The CONTRACTOR shall provide evidence of such permission, in writing, to the ENGINEER, before entering upon such lands.

END OF SECTION

This page intentionally left blank

SECTION 1731
CUTTING AND PATCHING

PART ONE - GENERAL

1.1 SUMMARY

A. This Section establishes general requirements pertaining to cutting (including excavating,) coring, fitting, and patching of the Contracted Work in existing or new CITY facilities (structures) required to:

1. Make the several parts fit properly;

2. Uncover work to provide for removal, installing, inspecting, or both, of ill-timed work;

3. Remove and replace work not conforming to requirements of the Contract Documents; and

4. Remove and replace defective work.

B. Related Work:

1. Documents affecting Works of this Contract include, but are not necessarily limited to, the GENERAL CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS and other Sections of the Project Manual.

2. In addition to other specified requirements, the CONTRACTOR shall, upon the Consultant's or ENGINEER'S request, uncover work to provide for inspection by the Consultant or ENGINEER of uncovered work and remove samples of installed materials for testing.

3. Do not cut or alter Work performed under separate Contracts without the Consultant's or ENGINEER'S written permission.

4. Shoring in Section 02240.

5. Waterproofing in Section 07290.

6. Joint Sealant in Section 07900.

7. Electrical in Division 16.

1.2 SUBMITTALS

A. Request For Consultant's or ENGINEER'S Consent:

1. Prior to cutting which effects structural safety, submit written request to the Consultant or ENGINEER for permission to proceed with cutting.

2. Submit, to the ENGINEER, for approval, the method(s) of cutting and patching, and protection plan for each. Submit structural calculation,

prepared by a California State licensed Engineer, as directed by the ENGINEER.

3. Should conditions of the Work or schedule indicate a required change of materials or methods for cutting and patching, so notify the Consultant or ENGINEER and secure written permission prior to proceeding.

1.3 QUALITY ASSURANCE

A. Use adequate numbers of skilled workers who are thoroughly trained and experienced in the necessary crafts, and who are completely familiar with the specified requirements and the methods needed for proper performance of the Work of this Section.

B. The safety provisions of applicable laws, building and construction codes shall be observed.

C. Field Mock Up: For each finish surface condition prepare a representative mock-up area which shall be completely cleaned and finished for review by ENGINEER. ENGINEER'S approval shall be obtained before proceeding with additional cutting and patching work.

D. Requirements for Structural Work: Do not cut and patch structural elements in a manner that would reduce their load-carrying capacity.

1. Obtain approval of the cutting and patching proposal before cutting and patching any structural elements.

E. Operational and Safety Limitations: Do not cut and patch operating elements or safety related components in a manner that would result in reducing their capacity to perform as intended, or result in increased maintenance, or decreased operational life or safety.

1. Obtain approval of the cutting and patching proposal before cutting and patching any operating elements.

F. If no deposition of existing detail of existing improvements or conditions is made on the Drawings or in the Project Manual, it shall be the CONTRACTOR'S responsibilities to provide necessary site investigations including testing, potholes, exposure, etc. to obtain site information at no additional cost to the CITY. CONTRACTOR shall submit site information as part of the submittal. CONTRACTOR shall repair all potholes, exposures, etc. as part of the Contract.

G. Visual Requirements: Do not cut and patch construction exposed on the exterior or in occupied spaces, in a manner that would, in the ENGINEER'S or Consultant's opinion, reduce the building's aesthetic qualities, or result in visual evidence of cutting and patching. Remove and replace work cut and patched in a visually unsatisfactory manner.

PART TWO - PRODUCTS

2.1 MATERIALS

A. General**:** Use materials that are identical to existing materials. If identical materials are not available, or existing materials do not meet codes or cannot be used where exposed surfaces are involved, use materials that match existing adjacent surfaces to the fullest extent possible with regard to visual effect. Use materials whose installed performance will equal or surpass that of existing materials. Submit method of repair including lapping, splicing and joining of new and existing materials.

B. For replacement of items removed, use materials complying with pertinent Sections this Project Manual.

C. All cut concrete shall be provided with steel dowels filled with non-shrink grout prior to patching or placement of new concrete.

PART THREE - EXECUTION

3.1 SURFACE CONDITIONS

A. Inspection:

1. Inspect existing conditions, including elements subject to movement or damage prior to the Bid, during cutting, excavating, patching, and backfilling.

2. Identify all existing utilities, protect and maintain service to occupied areas in accordance with GENERAL REQUIREMENTS Section 01140 –- CONTRACTOR'S USE OF THE PREMISES, and GENERAL REQUIREMENTS Section 01711 – SITE INVESTIGATION.

3. Unless specified otherwise, inspect and determine location of existing rebars in masonry and/or concrete walls or flooring prior to cutting.

4. After uncovering the work, inspect conditions affecting installation of new work.

B. Discrepancies:

1. If uncovered conditions are not as anticipated, immediately notify in writing the Consultant or the ENGINEER and secure needed directions.

2. Do not proceed until unsatisfactory conditions are corrected.

3.2 PREPARATION PRIOR TO CUTTING

Provide required protection including, but not necessarily limited to, shoring, bracing, and support to maintain structural integrity of the work. Provide duplicate copy of shoring permit and plan to the ENGINEER prior to start of Contracted Work.

3.3 PERFORMANCE

A. Perform required excavating and backfilling as required under other pertinent Sections of the Project Manual.

1. Perform cutting and demolition by methods, which will prevent damage to other portions of the Contracted Work and provide proper surfaces to receive a proper installation of repair and new work.

2. Perform cutting (excavating) in accordance with recommendations described in Soil Investigation Report. Over cutting (excavating) is prohibited.

3. Perform fitting and adjusting of products to provide finished installation complying with the specified tolerances and finishes noted in the Technical Sections of the Project Manual.

B. Cutting: Cut existing construction using methods least likely to damage elements to be retained or adjoining construction. Where possible, review proposed procedures with the original installer. If CONTRACTOR does not concur with the original installer's recommendations, CONTRACTOR shall notify the ENGINEER and request instructions.

1. In general, where cutting is required, use hand or small power tools designed for sawing or grinding, not hammering and chopping. Impact tools are not to be used in the building. Cut holes and slots neatly to size required with minimum disturbance of adjacent surfaces. Temporarily cover openings when not in use.

2. To avoid marring existing finished surfaces, cut or drill from the exposed or finished side into concealed surfaces, or spaces.

3. Cut through concrete and masonry using a cutting machine such as a carborundum saw or diamond core drill. Use methods or locations that could avoid cutting the rebars. All cut rebars, approved by the ENGINEER, shall be rounded off any sharp edges and dabbed with a coat of protective coating against rusting.

4. Comply with requirements of applicable Sections of DIVISION 2 where cutting and patching requires excavating and backfilling.

5. By-pass utility services such as pipe or conduit, before cutting, where services are shown or required to be removed, relocated or abandoned. Cut-off pipe or conduit in walls, partitions or floor slabs to be removed. Cap, valve or plug and seal the remaining portion of pipe or conduit to prevent entrance of moisture or other foreign matter after bypassing and cutting. No existing service shall be interrupted, in accordance with

Section 01140 – CONTRACTOR'S USE OF THE PREMISES of the GENERAL REQUIREMENTS.

6. Unless specified otherwise, all cut floor or roof wooden ledgers and blockings shall be repaired, spliced and installed with approved steel connectors. If necessary, install new double wooden ledgers or blocking without additional cost to the CITY.

7. Unless specified otherwise, all cut ceiling framing members shall be repaired or replaced with new framing members to the satisfaction of the ENGINEER. Re-install all ceiling, mechanical grills, and lighting fixtures affected by the cutting and repairs.

8. Unless specified otherwise, all existing masonry walls shall be removed to the nearest grout joint. All removed masonry units shall be protected, salvaged and reused.

C. Patching: Patch with durable seams that are as invisible as possible. Comply with specified tolerances.

1. Where feasible, inspect and test patched areas to demonstrate integrity of the installation.

2. Restore exposed finishes of patched areas and extend finish restoration into retained adjoining construction in a manner that will eliminate evidence of patching and refinishing.

3. All existing masonry wall shall be repointed and regrouted to the nearest wythe joint to match existing.

4. Restore all building insulation and fireproofing to match existing thickness and conditions.

5. Restore complete caulking, sealer, waterproofing, etc. to achieve maximum performance as required at no additional cost to the CITY.

3.4 CLEANING

Thoroughly clean areas and spaces where cutting and patching is performed or used as access. Remove completely paint, mortar, oils, putty and items of similar nature. Thoroughly clean piping, conduit and similar features before painting or other finishing is applied. Restore damaged pipe covering to its original condition.

3.5 TESTING

Demonstrate by appropriate water testing that repaired caulking, sealer, waterproofing, etc. are completely water tight and weather tight.

END OF SECTION

This page intentionally left blank

SECTION 01732
ADDITIONAL POTHOLING

1.1 THE REQUIREMENT

A. The CONTRACTOR shall conduct exploratory excavations by potholing to verify or to discover the actual locations and the size of existing underground utilities and improvements. The CONTRACTOR shall take care not to damage existing facilities during potholing operations. Any utility or existing facility (including those located by Underground Service Alert - USA) within 3 feet of any trench or excavation shall be potholed prior to starting the contract work in the vicinity. Potholing shall be done in each given area where excavation work is to occur at least fourteen (14) calendar days in advance of any excavation or construction in that area, to avoid possible delay in the progress of the Work.

B. Potholing shall consist of excavations at the locations of utilities or other underground facilities indicated on the Drawings, located by USA, or as directed by the ENGINEER. All costs of potholing operations for the utilities indicated on the Drawings shall be included in the CONTRACTOR'S Bid.

C. If an allowance for Additional Potholing has been established and included in the SCHEDULE OF WORK AND PRICES, this allowance shall only be used to reimburse the CONTRACTOR for potholing utilities not shown or otherwise referenced on the drawings, or as directed by the ENGINEER. If the total cost of the Work directed under the Additional Potholing allowance differ from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order. The adjustment shall be the difference between the total actual costs and the amount included in the Bid, as an additional amount due to the CONTRACTOR or a credit to the CITY, as appropriate.

D. In addition to the potholes indicated on the Drawings, or directed by the ENGINEER, the CONTRACTOR may opt to do further potholing deemed necessary at no additional cost to the CITY.

E. Potholing operations shall conform to all applicable requirements of INJURY AND ILLNESS PREVENTION - SAFETY MEASURES of the GENERAL CONDITIONS, as to sidewall slopes, sheeting and shoring, and all other excavation and trenching provisions specified herein.

F. Potholing operations shall be conducted in accordance with the requirements of PROTECTION OF PERSONS AND PROPERTY AND RESTORATION OF EXISTING IMPROVEMENTS of the GENERAL CONDITIONS, in order to ensure that the existing facilities will remain in operation with minimum interruptions. Attention is specifically directed to the limitations on street closures, altering of vehicular and pedestrian access in accordance with INTERFACE / COORDINATION REQUIREMENTS of these GENERAL REQUIREMENTS. Potholes shall be identified and protected in accordance with the City of LA Brown Book, the California Manual on Uniform Traffic Control Devices (MUTCD) and Work Area Traffic Control Handbook (WATCH) Standards.

G. The CONTRACTOR'S proposed method of potholing and schedule for potholing shall be submitted to the ENGINEER for approval, at least thirty (30) days prior to

the commencement of operation. Any utilities damaged during potholing shall be immediately reported to the ENGINEER and INSPECTOR and repairs made immediately in accordance with the requirements of PROTECTION OF PERSONS AND PROPERTY AND RESTORATION OF EXISTING IMPROVEMENTS of the GENERAL CONDITIONS.

H. A complete log of all potholes shall be kept by the CONTRACTOR, showing specific locations and dimensions of trenches. The log shall be verified by the INSPECTOR prior to the backfilling of the potholes. The verified log will be submitted to the ENGINEER and the INSPECTOR within two (2) working days after completion of potholing in each area. Payment for potholing utilities not shown or otherwise referenced on the drawings, or as directed by the ENGINEER will not be made unless these potholes are listed on the verified log.

I. The CONTRACTOR shall record the coordinates, elevations and dimensions of all utilities and improvements verified or discovered by potholing. The records shall be submitted to the ENGINEER within two (2) working days after the completion of potholing in each area. The records shall also include dates of the potholing operations and any additional discovered information or pertinent data.

J. Upon completion of potholing in each area, and after verification of the logs by the INSPECTOR, potholes shall be immediately backfilled and compacted in accordance with the specifications, or restored as directed by the ENGINEER.

END OF SECTION

SECTION 01740
REMOVAL, CLEANUP, AND DEMOBILIZATION

1.1 THE REQUIREMENT

A. Throughout all phases of construction, including suspension of work, and until the Final Acceptance, the CONTRACTOR shall keep the site clean and free from rubbish and debris. The CONTRACTOR shall also abate dust nuisance by cleaning, sweeping and sprinkling with water, or other means as necessary. The use of water resulting in mud on public streets will not be permitted as a substitute for sweeping or other methods.

B. The road(s) on the construction site shall be paved immediately after the installation of planned utilities and the constructions and underground/final inspection of SS, SD, curbs, and gutters. The exit road on the construction site shall be paved first.

C. Vehicles exiting the construction site shall have all dirt clods and mud removed from their tires.

D. When required by the Plans or Specifications, the CONTRACTOR shall furnish and operate a self-loading motor sweeper with spray nozzles at least once each working day for the purpose of keeping paved areas acceptably clean whenever construction, including restoration, is incomplete.

E. Materials and equipment shall be removed from the site as soon as they are no longer necessary. Before the final inspection, the site shall be cleared of equipment, unused materials and rubbish so as to present a satisfactory clean and neat appearance. All cleanup costs shall be included in the CONTRACTOR'S Bid.

F. Care shall be taken to prevent spillage on haul routes. Any such spillage shall be removed immediately and the area cleaned.

G. Excess excavated material from catch basins or similar structures shall be removed from the site immediately. Sufficient material may remain for use as backfill if permitted by the Specifications. Forms and form lumber shall be removed from the site as soon as practicable after stripping.

H. Failure of the CONTRACTOR to comply with the ENGINEER'S cleanup orders may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

END OF SECTION

This page intentionally left blank

SECTION 01750
STARTUP ASSISTANCE

1.1 THE REQUIREMENT

A. To satisfy the requirements of the ENGINEER during the startup of the facility, the CONTRACTOR may be required to provide STARTUP ASSISTANCE. Startup assistance shall commence immediately after a Statement Of Partial Completion or a Statement Of Completion is issued as specified in PARTIAL ACCEPTANCE and FINAL ACCEPTANCE of the GENERAL CONDITIONS and shall continue for a period of three months. Such services shall include the services of craft personnel supplied by the CONTRACTOR to satisfy the requirements of the ENGINEER during Startup. Such services shall be available for at least one (1) eight (8) hour shift per day until startup activities are concluded, and may also include the availability of said craft personnel on a twenty-four (24) hour on-call basis.

B. Such startup assistance shall include such modifications to the Work as deemed necessary by the ENGINEER to provide a complete and functional facility.

C. Commencing on the first day of startup assistance, and upon written notice by the ENGINEER, the CONTRACTOR shall provide the INSPECTOR with daily labor timesheets, material invoices, and rented equipment invoices required for startup assistance activities.

D. Direct costs of startup assistance activities shall be in strict accordance with the Cost Reimbursement (Time and Materials) portions of the GENERAL REQUIREMENTS Section 01254, CHANGE ORDERS. However, Part 1.1.E, MARKUPS – OVERHEAD AND PROFIT, shall not be applicable to the direct costs of startup assistance. Instead, provisions for overhead and profit applied to the direct costs of startup assistance are included below:

DIRECT COST PERFORMED IN ONE MONTH	% OVERHEAD[2] AND PROFIT WHEN PRIME CONTRACTOR PERFORMS WORK	% OVERHEAD[2] & PROFIT PAID TO PRIME CONTRACTOR FOR WORK DONE BY ITS SUBCONTRACTORS[1]
Under $20,000	24%	11%
$20,000 - $50,000	22%	9%
$50,000 - $100,000	20%	7%
Over $100,000	18%	5%

[1] Subcontractors will mark up[2] their direct costs for startup assistance in accordance with the SSPWC available at the time of the Bid. Subcontractors at all tiers shall not be paid overhead and profit on their Subcontractor's work.

[2] Overhead for CONTRACTOR or Subcontractor shall consist of the following, but is not limited to:

1. Home office overhead expenses

2. All insurance requirements

3. Other needed insurance

4. Field office overhead including, but not limited to:

   a. Bookkeeping, accounting, estimating (whether done at the field or home office);

   b. Photocopying and/or office automation (whether done at the field or home office);

   c. Salaried superintendent or any other person with superintendent duties during the course of the Work;

   d. Any salaried staff and/or temporary office services;

   e. Trailers, electricity, water, telephone, etc.;

   f. Vehicles assigned to any salaried staff and/or temporary office services;

   g. Small tools and consumables. Small tools are defined as any equipment or tool, which has a replacement value of $1,000 or less;

   h. Travel of home office or field office staff, including transportation and expenses.

E. All items included in overhead shall not be billed as direct costs. The derivation of an extended overhead (field and/or office) rate and its application to contract time extensions shall not be applicable to startup assistance activities for this Contract. The duration of startup assistance will not be considered in the determination of the completion date for liquidated damages. That date will be determined by the completion of other work. Likewise, the duration of startup assistance will not be the basis in whole or in part for any claims for delay or extended overhead.

F. Each month the amount billed by the CONTRACTOR for startup assistance will be deducted from the amount stipulated in the SCHEDULE OF WORK AND PRICES of Bid Proposal. In the event that the stipulated amount is exhausted, the CITY will continue to approve payment via Change Orders. The cost of these Change Orders will be calculated in the manner described hereinbefore in this Article. In the event that the stipulated amount is not exhausted when the startup activities are concluded, the balance of the stipulated amount will not be due the

CONTRACTOR and a deductive Change Order will be issued for the remaining balance.

END OF SECTION

This page intentionally left blank

SECTION 01770
PROJECT CLOSEOUT

PART ONE - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and General Provisions of Contract, including GENERAL CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS and other Sections of the Project Manual, applies to this Section.

1. SHOP DRAWINGS / SUBMITTALS in Section 01330.

2. Section 01140 – CONTRACTOR'S USE OF THE PREMISES.

3. MOBILIZATION in Section 01721.

4. REMOVAL, CLEAN-UP AND DEMOBILIZATION in Section 01740.

5. RECORD DRAWINGS AND RECORD PROJECT MANUAL in Section 01783.

1.2 SUMMARY

A. This Section specifies administrative and procedural requirements for a Project Closeout, including but not limited to:

1. Inspection procedures.

2. Project record document submittals.

3. Operation and Maintenance Manual submittal.

4. Submittal of warranties.

5. Final cleaning.

B. Closeout requirements for specific construction activities are included in the appropriate Technical Sections in Divisions 2 through 16 of the Project Manual.

1.3 FINAL INSPECTION

A. Preliminary Procedures: Before requesting final inspection for the Contracted Works, the CONTRACTOR shall complete the following.

1. In the "Request for Payment" that coincides with, or first follows, the date the final inspection is requested, show one-hundred percent (100%) completion for the portion of the Contracted Work claimed as complete. Include supporting documentation for completion as indicated in these Contract Documents and a statement showing an accounting of changes to the Contract Sum.

a. Include a list of incomplete or outstanding works established during a Pre-final walk-thru as required in Section 01452 - INSPECTION OF THE WORK of the GENERAL REQUIREMENTS, and all supporting evidence or documentation for completion.

b. If one-hundred percent (100%) completions cannot be shown, include a list of incomplete items and all correction notices, the value of incomplete construction, and reasons as to why the Work is not complete.

2. Advise CITY of pending insurance changeover requirements.

3. Submit specific warranties, reduced faithful performance bonds for guarantee work, maintenance agreements, final certifications and similar documents.

4. Obtain and submit releases from local authorized agencies enabling the CITY unrestricted use of the Work and access to services and utilities; include the certificate of occupancy, permits or operating certificates and similar releases. Return all Building & Safety's sign-off sheet and Inspection Records to the CITY.

5. Submit Record Drawings and Record Project Manual, maintenance manuals, final Project photographs, damage or settlement survey, property survey, and similar final record information.

6. Deliver tools, spare parts, extra stock, and similar items.

7. Make a final changeover of permanent locks and transmit keys to the ENGINEER. Advise the CITY'S personnel of the changeover in security provisions.

8. Complete start-up testing of systems, and instruction**/**training of the CITY'S operating and maintenance personnel. Discontinue or change over and remove temporary facilities from the Jobsite, along with construction tools, mockups, and similar elements.

9. Complete all required testing including balancing test, bacteriological analysis, etc. Submit all test reports.

10. Return all original permits and manifests to the ENGINEER.

11. Advise the CITY of pending change over of the utility services upon start-up testing of the systems and completion of final inspection.

12. Complete final clean up requirements, including touch-up painting. Touch-up and otherwise repair and restore marred exposed finishes.

13. Make ready to proceed with the 90 day plant establishment period. Submit the maintenance schedules and logs.

B. Inspection Procedures: The INSPECTOR, with cooperation from the Consultant and the ENGINEER, will prepare a Final Inspection Correction list to that effect following inspection, or advise the CONTRACTOR of construction that must be

completed or corrected before the construction work can be considered complete**.** The Contract time shall continue to be assessed.

1. The INSPECTOR, Consultant and ENGINEER will repeat the inspection when requested and assured that the Contracted Work has been satisfactorily completed.

2. The INSPECTOR, Consultant and ENGINEER will inspect the Work of the plant establishment period upon completion.

3. Results of the completed inspection will form the basis of requirements for Final Acceptance. The Contract time shall stop when all corrections are considered complete by the CITY.

C. Reinspection Fees: Should the Consultant and the CITY'S personnel perform reinspection due to failure of the Work to comply with CONTRACTOR'S claim of completion, the CONTRACTOR will compensate the CITY for such additional services. The CITY will deduct the amount of such compensation from the Final Payment to the CONTRACTOR.

1.4 FINAL ACCEPTANCE

A. Preliminary Procedures: Before requesting Final Acceptance and Final Payment, the CONTRACTOR shall complete the following and list exceptions in the request.

1. Submit the Final Payment request with releases and supporting documentation not previously submitted and accepted. Include certificates of guarantee for products and completed operations where required.

2. Submit an updated final statement, accounting for final additional changes to the Contract Sum.

3. Submit a certified copy of the INSPECTOR'S (combined with Consultant's and ENGINEER'S) final inspection list of items to be completed or corrected, stating that each item has been completed or otherwise resolved for acceptance, and the list has been endorsed and dated by the INSPECTOR, the Consultant or ENGINEER.

4. Submit a certified copy of the INSPECTOR'S, Consultant's and ENGINEER'S final inspection correction list for the maintenance services and items to be completed or corrected.

5. Submit final meter readings for utilities, a measured record of stored fuel, and similar data as of the date of Final Acceptance, or when the CITY took possession of and responsibility for corresponding elements of the Work.

6. Submit consent of surety to Final Payment.

7. Submit a final liquidated damages settlement statement.

8. Submit evidence of final, continuing insurance coverage complying with insurance requirements.

9. Submit all required certified weekly payroll records, ethnic composition of work force reports.

B. Reinspection Procedure: The INSPECTOR**,** Consultant and ENGINEER will reinspect the Contracted Work upon receipt of notice that the Work, including inspection list items from earlier inspections, has been completed, except items whose completion has been delayed because of circumstances acceptable to the INSPECTOR**,** Consultant or ENGINEER.

1. After all correction works are completed and inspected, ENGINEER and INSPECTOR of Bureau of Contract Administration shall establish the construction completion date.

1.5 RECORD DOCUMENTS SUBMITTALS

A. General: Do not use Record Documents for construction purposes; protect from deterioration and loss in a secure, fire-resistive location; provide access to record documents for the Consultant's or ENGINEER'S reference during normal working hours.

B. Record Drawings: Maintain a clean, undamaged set of blue or black line white-prints of Contract Drawings and Shop Drawings. Mark the set to show the actual installation where the installation varies substantially from the Contracted Work as originally shown. Mark whichever drawing is most capable of showing conditions fully and accurately; where Shop Drawings are used, record a cross-reference at the corresponding location on the Contract Drawings. All Record Drawings, Record Project Manual and new markings shall be submitted to the ENGINEER for review prior to the approval of the Progress Payments. Give particular attention to concealed elements that would be difficult to measure and record at a later date. Upon completion of the Work, submit Record Drawings, Record Project Manual etc, to the Consultant or ENGINEER for review and for the CITY'S records.

1. Mark Record Sets with a red erasable pencil; use other colors to distinguish between variations in separate categories of the Work.

2. Mark new information that is important to the CITY, including detail from "Request-for-Information" which was not shown on Contract Drawings or Shop Drawings, as soon as it is made available**.** Any subsequent revision or changes, to the details from an earlier "Request-for-Information", shall also be marked immediately on the Record Drawings.

3. Note related finalized or pending "Change Order" numbers where applicable**.**

4. Note all addenda, drawing modification, etc. on Record Drawings.

5. Where Shop Drawings are used for actual performance of the Contract Work and are most capable of showing actual details, conditions, and dimensions fully and accurately, record all the Shop Drawings and place them in good order with the Record Drawings. Properly identified and bound of field, and ready for continued use and reference.

6. Organize Record Drawing sheets into manageable sets, bind with durable paper cover sheets, and print suitable titles, dates and other identification on the cover of each set.

C. Record Project Manual: Maintain one complete copy of the Project Manual, including addenda, and one copy of other written construction documents such as "Change Orders" and modifications issued in printed form during construction. Mark these documents to show the variations in actual Contracted Work performed in comparison with the text of the Project Manual and modifications. Give particular attention to substitutions, selection of options and similar information on elements that are concealed or cannot otherwise be readily discerned later by direct observation. Note related Record Drawing information and Product Data.

1. Upon completion of the Work, submit record Project Manual to the Consultant or ENGINEER for review and for the CITY'S record.

D. Record Schedule: Provide one (1) copy of a computer diskette of the Construction Schedule. Record this document to show the actual schedules and sequences the actual Works were performed in comparison with Baseline Construction Schedule approval in accordance with GENERAL REQUIREMENTS Section 01321 – CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS.

E. Record Product Data: Maintain one (1)copy of each Product Data submittal. Mark these documents to show significant variations in actual Work performed in comparison with information submitted. Include variations in products delivered to the site, and from the manufacturer's installation instructions and recommendations. Give particular attention to concealed products and portions of the Work, which cannot otherwise be readily discerned later by direct observation. Note related Change Orders and markup of Record Drawings and Project Manual.

1. Upon completion of a markup, submit a complete set of Record Product Data to the Consultant or ENGINEER for review and for the CITY'S records.

F. Record Sample Submitted: Immediately prior to the date or dates of Substantial Completion, the CONTRACTOR will meet at the Jobsite with the Consultant or ENGINEER and the CITY'S personnel to determine which of the submitted Samples that have been maintained during progress of the Work are to be transmitted to the CITY for record purposes. Comply with delivery to the CITY'S Sample storage area.

G. Miscellaneous Record Submittals: Refer to other Sections of the Project Manual for requirements of miscellaneous record-keeping and submittals in connection with actual performance of the Contract Work. Submit to the Consultant or the ENGINEER miscellaneous records for the CITY'S records.

H. Maintenance Manuals: Organize operating and maintenance data into suitable sets of manageable size. Bind properly indexed data in individual heavy-duty 2-inch, 3-ring vinyl-covered binders, with pocket folders for folded sheet information. Mark appropriate identification on front and spine of each binder. Include the following types of information:

1. Emergency instructions.

2. Spare parts list with model/part numbers.

3. Copies of work permits and warranties.

4. Wiring diagrams.

5. Recommended "turn around" cycles.

6. Inspection procedures; Operation and Maintenance Instructions.

7. Shop Drawings and Product Data.

8. Small scale of "Record" Drawings of such operating equipment.

9. Fixture lamping schedules.

PART TWO - PRODUCTS (NOT APPLICABLE)

PART THREE - EXECUTION

3.1 CLOSEOUT PROCEDURES

A. Operation and Maintenance Instructions: Unless specified otherwise, in addition to the maintenance manuals described hereinabove, arrange for each installer of equipment that requires regular maintenance to meet with the CITY'S personnel to provide instruction in proper operation and maintenance. If installers are not experienced in procedures, provide instruction by manufacturer's representatives. Include a detailed review of the following items:

1. Maintenance Manuals.

2. Permit and Record Documents.

3. Spare parts and materials.

4. Tools.

5. Lubricants.

6. Fuels.

7. Identification systems.

8. Control sequences.

9. Hazards.

10. Cleaning.

11. Warranties and bonds.

12. Maintenance agreements and similar continuing commitments.

B. As Part of Instruction for Operating Equipment, Demonstrate the Following Procedures:

1. Start-up.

2. Shutdown.

3. Emergency operations.

4. Noise and vibration adjustments.

5. Safety procedures.

6. Economy and efficiency adjustments.

7. Effective energy utilization.

3.2 FINAL CLEANING

A. General: General cleaning during construction is required by the GENERAL CONDITIONS and GENERAL REQUIREMENTS.

B. Cleaning: Employ experienced workers or professional cleaners for final cleaning. Clean each surface or unit to the condition expected in a normal, commercial building cleaning and maintenance program. Comply with manufacturer's instructions.

1. Complete the following cleaning operations before requesting inspection prior to CITY'S acceptance of Contracted Work.

a. Remove labels that are not permanent labels.

b. Clean transparent materials, including mirrors and glass in doors and windows. Remove glazing compound and other substances that are noticeable vision-obscuring materials. Replace chipped or broken glass and other damaged transparent materials at no added cost to the CITY.

c. Clean exposed exterior and interior hard-surfaced finishes to a dust-free condition, free of stains, films and similar foreign substances. Restore reflective surfaces to their original reflective condition. Leave concrete floors broom clean. Vacuum carpeted surfaces.

d. Wipe surfaces of mechanical and electrical equipment. Remove excess lubrication and other substances. Clean plumbing fixtures to a sanitary condition. Clean light fixtures and lamps.

e. Clean the site, including landscape development areas of rubbish, litter and other foreign substances. Sweep paved areas broom clean; remove stains, spills and other foreign deposits. Rake grounds that are neither paved nor planted, to a smooth even-textures surface.

f. Remove all temporary detour stripping by the wet sandblasting method.

C. Pest Control: Engage an experienced exterminator to make a final inspection, and rid the Project of rodents, insects and other pests.

D. Removal of Protection: Remove temporary protection and facilities installed for protection of the Contracted Work during construction.

E. Compliance: Comply with regulations of authorities having jurisdiction and safety standards for cleaning. Do not burn waste materials. Do not bury debris or excess materials on the CITY'S property. Do not discharge volatile, harmful or dangerous materials into drainage systems. Remove waste materials from the site and dispose of in a lawful manner.

1. Where extra materials of value remaining after completions of associated Work have become the CITY'S property, arrange for disposition of these materials as directed.

END OF SECTION

SECTION 01781
SPARE PARTS

1.1 THE REQUIREMENT

A. General

1. The Spare Parts supplier must be the manufacturer or a factory authorized representative of the manufacturer. The manufacturer will be responsible for any default of the representative that is not corrected by the representative in a timely and efficient manner. This responsibility includes replacing incorrect or defective parts, trouble shooting, and correcting problems that are traceable to the manufacturer's parts. The supplier shall provide, along with the Spare Parts List, a formal letter of certification from the manufacturer that the supplier is an authorized representative of the manufacturer.

2. The supplier shall be a stocking facility of the manufacturer of the proposed parts, or the manufacturer must maintain a stocking facility of these parts on the West Coast, or the supplier can guarantee delivery of spare parts within seventy-two (72) hours.

3. Spare Parts should be supplied in the manufacturer's original packaging and shall be new and unused. A statement shall be included to clearly indicate that the Spare Parts are new and unused.

4. The Spare Parts list shall be in addition to any other lists required under any other sections of these Specifications. This list shall include but is not limited to the following:

a. Current prices including delivery to the Jobsite.

b. Original Equipment Manufacturer (OEM) part numbers, which identify interchangeability.

c. Make and type of equipment as well as Model number.

d. Size.

e. Supplier's address and telephone number.

f. Letter of certification from the manufacturer.

g. Materials.

h. Special tools.

i. Estimated delivery lead times.

j. Warranty: State terms of warranty of spare parts offered.

k. Cross-sectional, exploded view or assembly-type drawing with part numbers.

l. Manufacturer’s price list catalog.

m. Applicable trade discount (for budget purposes)

5. Delivery of all required Spare Parts shall be a condition precedent to receipt of Partial Completion or a Statement of Completion.

6. The CONTRACTOR shall be responsible for proper storage and protection of the Spare Parts until delivered to the CITY.

7. To ensure proper tracking of the Spare Parts the CONTRACTOR shall fill out and submit required information, on the forms provided by the ENGINEER, to the INSPECTOR with the delivery of Spare Parts. The CONTRACTOR'S cost of preparing and submitting the Spare Parts List(s), procuring, and inspection of the Spare Parts shall be included in the CONTRACTOR'S lump sum bid, and therefore, no overhead or profit shall be added to the cost of the Spare Parts.

B. Required Spare Parts

1. The Required Spare Parts lists shall be included with the equipment submittal to the ENGINEER.

2. The CONTRACTOR shall include in the Bid the cost of providing the Required Spare Parts described under individual equipment Specifications.

C. Recommended Spare Parts

1. The CONTRACTOR shall submit with each equipment submittal a list from the manufacturer of the Recommended Spare Parts adequate to ensure two (2) continuous years of normal operation after expiration of the equipment warranty. The cost of preparing and submitting the Spare Parts List(s) shall be included in the CONTRACTOR'S lump sum bid.

2. The Recommended Spare Parts List(s) shall include items requiring replacement under the following conditions:

a. Wear, corrosion, or erosion during normal operation.

b. Failure which causes a shutdown of equipment or systems.

c. Damage or breakage during routine maintenance or inspections of equipment.

d. Custom or specially fabricated parts, and

e. Long lead items.

3. If an allowance for RECOMMENDED SPARE PARTS has been included as a bid item in the SCHEDULE OF WORK AND PRICES in Vol. 1 of the Proposal, the CONTRACTOR shall procure such Recommended Spare Parts as directed by the ENGINEER. The ENGINEER will compile, from the CONTRACTOR’S submittal, a list identifying which recommended Spare Parts are approved for purchase. The CITY will pay, from the

RECOMMENDED SPARE PARTS allowance, the vendor-invoiced prices plus delivery cost only, without markup for overhead or profit. If the total cost differs from the amount set forth in the SCHEDULE OF WORK AND PRICES, the Contract Price shall be adjusted by a Change Order for the difference as an additional amount due the CONTRACTOR, or a credit to the CITY, as appropriate.

4. Approval of the individual equipment submittal does not constitute authorization to procure the Recommended Spare Parts.

D. Prices charged to the CITY are based on a percentage discount from the manufacturer's published price list(s) shall not be subject to change for a period of sixty (60) calendar days after bid opening. If prices on the price list(s) are raised, the CITY reserves the right to accept the raise or to cancel such items from the contract. The CITY is to be given benefit of any decline in prices immediately upon the manufacturer's effective date of such decline. Changes in price list(s) shall be effective on the date of the manufacturer's effective date of change. Increase in prices shall not be retroactive.

END OF SECTION

SECTION 01782
TECHNICAL MANUALS

1.1 THE REQUIREMENT

A. **Definitions:**

1. EMPAC: EMPAC is an acronym for Enterprise Maintenance Planning and Control. This is the system used for the identification and maintenance management of all [treatment plant or pumping plant] equipment. This EMPAC number is typically the equipment identification number used in the Contract Documents.

2. Connective Wiring Diagrams: Connective Wiring Diagrams are electrical diagrams that show how an equipment or instrumentation item is to be connected to the Plant or equipment system electrical power system or instrumentation system.

3. Internal Wiring Diagrams: Internal Wiring Diagrams are electrical diagrams that show how an equipment or instrumentation item is internally electrically connected.

4. Maintenance Summary Forms: The Maintenance Summary Forms are a series of forms including the Equipment Maintenance Summary Form (MSF), Mechanical Component MSF, Electrical Component MSF, Instrumentation Component MSF, and Valve Gate Component MSF. These forms are used to summarize the identification, nameplate data, maintenance requirements, recommended lubricants, and recommended spare parts for the various equipment and instrumentation. (See Attachments 01782-A1 through 01782-A4.)]

B. Technical Manuals:

1. Unless otherwise specified, Technical Manuals shall, as a minimum, include the following:

a. Table of Contents.

b. Itemized list of all data provided.

c. Consistent tabulation or indexing method within each technical manual and when compiling technical manual into the final Operations & Maintenance (O&M) Manual.

d. Manufacturer, supplier, spare parts and servicing location information including name, address, phone number of the manufacturer and local representative.

e. Approved Shop Drawing Submittal information applicable to O&M, including operating curves, manufacturer's recommended tolerances and clearances, and approved fabrication drawings.

f. Recommended installation, adjustment, start-up, calibration and troubleshooting procedures.

g. Lubrication recommendation and yearly quantity requirements.

h. Recommended step-by-step procedures for all modes of operation including start-up, operation, shutdown, load changes, and emergency shutdown. Manufacturer's literature shall be included.

i. Complete internal and connection wiring diagrams. Circuit diagrams and schematics shall be down to component level.

j. Recommended preventive maintenance and maintenance procedures, including lubrication and calibration schedules.

k. Complete parts list, by generic title and identification number, with exploded views and schematics of each assembly.

l. Complete programming procedures and ladder logic documentation for all computer controlled, programmable logic controllers and automated equipment.

m. Electrical, instrumentation, control system and piping schematics.

n. Recommended spare parts list and list of special tools and equipment required for O&M.

o. Disassembly, overhaul, reassembly, realignment and testing instructions.

p. Complete equipment O&M Manuals.

q. All contents of the technical manual shall be suitable for compilation into a standard size, three-ring binder.

r. Approved isometric drawings of piping systems

C. Additional requirements are contained in individual Divisions of the Technical Specifications [i.e. Division 16: ELECTRICAL, Division 17: INSTRUMENTATION AND CONTROL, etc.]. The CONTRACTOR shall be responsible for reviewing all said reference requirements and including them in the Bid price. In the event of a conflict, the requirements of the individual Technical Specifications shall prevail. Repetition of requirements in two or more specification references shall not be cause for CONTRACTOR claim of conflict.

D. The CONTRACTOR shall submit two (2) copies of all Technical Manuals to the ENGINEER for review prior to sixty percent (60%) completion of Contract Amount as measured by Monthly Progress Payments at least sixty (60) calendar days prior to the use of any new equipment. The ENGINEER will review and return one copy of each submittal within thirty (30) calendar days following their receipt by the ENGINEER. The CONTRACTOR shall make all revisions and additions and resubmit to the ENGINEER six (6) copies of the corrected

Technical Manuals prior to seventy-five percent (75%) completion of the Contract Amount.

E. The ENGINEER will review the corrected Technical Manuals within twenty-one (21) calendar days following their receipt by the ENGINEER. The CONTRACTOR shall then compile all of the corrected Technical Manuals into a single O&M Manual, which shall be arranged according to a Table of Contents, provided by the ENGINEER.

F. The CONTRACTOR shall furnish to the ENGINEER four (4) hard copies and one (1) electronic, searchable Portable Document Format (PDF) copy of the final O&M Manual. Each hard copy manual shall consist of one or more volumes, each of which shall be bound, in a standard size, three-ring, loose-leaf, vinyl plastic hard cover binder, suitable for bookshelf storage. Binder ring size shall not exceed two-and-one-half inches (2.5 inches). All reprints shall be done on margin-reinforced papers. The searchable PDF copy shall be an exact duplicate of the hard copy of the final O&M Manual and be submitted on media approved by the ENGINEER. All submittal materials shall be in English. The final O&M Manual shall be submitted to the ENGINEER prior to eighty-five percent (85%) completion of the Contract Amount as measured by Monthly Progress Payments. Submittal of the Technical Manuals, the Corrected Technical Manuals and/or the O&M Manuals within the specified time frame, as detailed above, shall be a condition precedent to the making of the monthly payments.

G. If TECHNICAL MANUALS have been stipulated as a separate bid item in the SCHEDULE OF WORK AND PRICES in the Bid Proposal, the CONTRACTOR shall be entitled to receive Progress Payments upon submittal and approval of the Technical Manuals. This bid item is not an allowance but is a fixed amount and the CONTRACTOR is not entitled to receive additional compensation for technical manuals. The CONTRACTOR shall be entitled to receive fifty percent (50%) of the bid breakdown amount upon approval of all required draft Technical Manuals by the ENGINEER. Partial submittal of the required Technical Manuals shall not entitle the CONTRACTOR to any payment of this amount. The CONTRACTOR is entitled to receive one-hundred percent (100%) of the bid breakdown amount at the time the ENGINEER gives full approval to all Technical Manuals. Partial approval, or approval of some of the Technical Manuals, shall not entitle the CONTRACTOR to any payment. Failure to list TECHNICAL MANUALS as a separate bid item in the SCHEDULE OF WORK AND PRICES does not relieve the CONTRACTOR from preparing the Technical Manuals and including all associated costs in the Bid.

ATTACHMENTS TO SECTION 01782

Attachments to General Requirements Section 01782 consists of four (4) documents, as follows:

ATTACHMENT NUMBER	TITLE OF ATTACHMENT	NUMBER OF PAGES IN THIS ATTACHMENT
01782-A1	Equipment Summary Data Forms Information Sheet	1
01782-A2	Equipment Summary Data Form	1
01782-A3	Information Sheet for Equipment Maintenance Summary Form	1
01782-A4	Typical Maintenance Summary Form	1

EQUIPMENT SUMMARY DATA FORMS
INFORMATION SHEET

Equipment Summary Data Forms are intended to provide the Maintenance Department with sufficient information to catalogue newly purchased equipment items installed at the facility. This information is used for inventory purposes as well as for equipment performance tracking purposes. Each item of equipment installed at the facility must be documented on one of three Forms; Electrical Summary Data Form, Equipment (Mechanical, HVAC, etc.) Summary Data Form, and/or Pump Summary Data Form. Examples of each form are attached. Additional requirements regarding submittal format, quantities, etc, are found elsewhere in this Specification.

1. Equipment item (included industry-accepted nomenclature).

2. CITY Equipment Identification Number (EMPAC)

3. Manufacturer
   Address Phone/Fax Numbers

4. Supplier (if different than (3)
   Address Phone/Fax Numbers

5. Equipment Serial Number(s)

6. Equipment Model Number

7. Size

8. Capacity

9. Rated Output

10. Drive Motor Data (as appropriate).

In addition, information specific to the item described shall be provided as indicated on **the example Forms.**

INFORMATION SHEET FOR
EQUIPMENT MAINTENANCE SUMMARY FORMS

Equipment Maintenance Summary forms are intended to provide the Maintenance Division with information sufficient to properly diagnose (troubleshoot, repair, check-out, and return an item of equipment to service. Standard information contained in each Form shall be as follows:

In addition, Maintenance information required to troubleshoot, repair, and return electrical/electronic equipment to service (including set point, derivatives, etc.) Shall be included as required. The Maintenance Summary Form attached in intended to serve as a (minimum) guide to the information required per item of equipment. Additional requirements regarding submittal format, quantities, etc. are found elsewhere in this Specification.

1. Equipment Item (include industry-accepted nomenclature)

2. CITY Equipment Identification Number (EMPAC)

3. Manufacturer
   Address Phone/Fax Numbers

4. Equipment Serial Number(s)

5. Weight of Individual Components (over 100 pounds)

6. Nameplate Date (including voltage, horsepower, lubrication requirements, speed, etc.)

7. Manufacturer's Local Representative
   Address Phone/Fax Numbers

8. Maintenance Operation(s) Required. Listing shall include (1) Maintenance Operation to be performed. (2) frequency of said Maintenance Operation based on actual service conditions of installed equipment (i.e., type of duty, environmental factors). Reference shall be made to the appropriate section of the manufacturer's technical literature.

9. Lubricant List. List shall include a primary and two secondary manufacturer-approved lubricants.

10. Spare Parts required for a minimum of one (1) year of equipment operation based on anticipated actual service conditions. Also to be included in the name, address, and **phone number of the** recommended source of spare parts if different than (7) above.

SECTION 01782
TECHNICAL MANUALS

1.1 THE REQUIREMENT

A. **Definitions:**

1. EMPAC: EMPAC is an acronym for Enterprise Maintenance Planning and Control. This is the system used for the identification and maintenance management of all [treatment plant or pumping plant] equipment. This EMPAC number is typically the equipment identification number used in the Contract Documents.

2. Connective Wiring Diagrams: Connective Wiring Diagrams are electrical diagrams that show how an equipment or instrumentation item is to be connected to the Plant or equipment system electrical power system or instrumentation system.

3. Internal Wiring Diagrams: Internal Wiring Diagrams are electrical diagrams that show how an equipment or instrumentation item is internally electrically connected.

4. Maintenance Summary Forms: The Maintenance Summary Forms are a series of forms including the Equipment Maintenance Summary Form (MSF), Mechanical Component MSF, Electrical Component MSF, Instrumentation Component MSF, and Valve Gate Component MSF. These forms are used to summarize the identification, nameplate data, maintenance requirements, recommended lubricants, and recommended spare parts for the various equipment and instrumentation. (See Attachments 01782-A1 through 01782-A4.)]

B. Technical Manuals:

1. Unless otherwise specified, Technical Manuals shall, as a minimum, include the following:

a. Table of Contents.

b. Itemized list of all data provided.

c. Consistent tabulation or indexing method within each technical manual and when compiling technical manual into the final Operations & Maintenance (O&M) Manual.

d. Manufacturer, supplier, spare parts and servicing location information including name, address, phone number of the manufacturer and local representative.

e. Approved Shop Drawing Submittal information applicable to O&M, including operating curves, manufacturer's recommended tolerances and clearances, and approved fabrication drawings.

f. Recommended installation, adjustment, start-up, calibration and troubleshooting procedures.

g. Lubrication recommendation and yearly quantity requirements.

h. Recommended step-by-step procedures for all modes of operation including start-up, operation, shutdown, load changes, and emergency shutdown. Manufacturer's literature shall be included.

i. Complete internal and connection wiring diagrams. Circuit diagrams and schematics shall be down to component level.

j. Recommended preventive maintenance and maintenance procedures, including lubrication and calibration schedules.

k. Complete parts list, by generic title and identification number, with exploded views and schematics of each assembly.

l. Complete programming procedures and ladder logic documentation for all computer controlled, programmable logic controllers and automated equipment.

m. Electrical, instrumentation, control system and piping schematics.

n. Recommended spare parts list and list of special tools and equipment required for O&M.

o. Disassembly, overhaul, reassembly, realignment and testing instructions.

p. Complete equipment O&M Manuals.

q. All contents of the technical manual shall be suitable for compilation into a standard size, three-ring binder.

r. Approved isometric drawings of piping systems

C. Additional requirements are contained in individual Divisions of the Technical Specifications [i.e. Division 16: ELECTRICAL, Division 17: INSTRUMENTATION AND CONTROL, etc.]. The CONTRACTOR shall be responsible for reviewing all said reference requirements and including them in the Bid price. In the event of a conflict, the requirements of the individual Technical Specifications shall prevail. Repetition of requirements in two or more specification references shall not be cause for CONTRACTOR claim of conflict.

D. The CONTRACTOR shall submit two (2) copies of all Technical Manuals to the ENGINEER for review prior to sixty percent (60%) completion of Contract Amount as measured by Monthly Progress Payments at least sixty (60) calendar days prior to the use of any new equipment. The ENGINEER will review and return one copy of each submittal within thirty (30) calendar days following their receipt by the ENGINEER. The CONTRACTOR shall make all revisions and additions and resubmit to the ENGINEER six (6) copies of the corrected

Technical Manuals prior to seventy-five percent (75%) completion of the Contract Amount.

E. The ENGINEER will review the corrected Technical Manuals within twenty-one (21) calendar days following their receipt by the ENGINEER. The CONTRACTOR shall then compile all of the corrected Technical Manuals into a single O&M Manual, which shall be arranged according to a Table of Contents, provided by the ENGINEER.

F. The CONTRACTOR shall furnish to the ENGINEER four (4) hard copies and one (1) electronic, searchable Portable Document Format (PDF) copy of the final O&M Manual. Each hard copy manual shall consist of one or more volumes, each of which shall be bound, in a standard size, three-ring, loose-leaf, vinyl plastic hard cover binder, suitable for bookshelf storage. Binder ring size shall not exceed two-and-one-half inches (2.5 inches). All reprints shall be done on margin-reinforced papers. The searchable PDF copy shall be an exact duplicate of the hard copy of the final O&M Manual and be submitted on media approved by the ENGINEER. All submittal materials shall be in English. The final O&M Manual shall be submitted to the ENGINEER prior to eighty-five percent (85%) completion of the Contract Amount as measured by Monthly Progress Payments. Submittal of the Technical Manuals, the Corrected Technical Manuals and/or the O&M Manuals within the specified time frame, as detailed above, shall be a condition precedent to the making of the monthly payments.

G. If TECHNICAL MANUALS have been stipulated as a separate bid item in the SCHEDULE OF WORK AND PRICES in the Bid Proposal, the CONTRACTOR shall be entitled to receive Progress Payments upon submittal and approval of the Technical Manuals. This bid item is not an allowance but is a fixed amount and the CONTRACTOR is not entitled to receive additional compensation for technical manuals. The CONTRACTOR shall be entitled to receive fifty percent (50%) of the bid breakdown amount upon approval of all required draft Technical Manuals by the ENGINEER. Partial submittal of the required Technical Manuals shall not entitle the CONTRACTOR to any payment of this amount. The CONTRACTOR is entitled to receive one-hundred percent (100%) of the bid breakdown amount at the time the ENGINEER gives full approval to all Technical Manuals. Partial approval, or approval of some of the Technical Manuals, shall not entitle the CONTRACTOR to any payment. Failure to list TECHNICAL MANUALS as a separate bid item in the SCHEDULE OF WORK AND PRICES does not relieve the CONTRACTOR from preparing the Technical Manuals and including all associated costs in the Bid.

SECTION 01783
PROJECT RECORD DOCUMENTS

PART 1 - GENERAL

1.1 THE REQUIREMENT

A. The CONTRACTOR shall maintain at the Jobsite a current record copy of all Contract Documents including, but not limited to, Contract Drawings and Project Manual which are marked up during construction to delineate the actual in-place constructed conditions. Project Record Documents including Record Drawings (also known as “As-Built” Plans), Record Project Manual, Record Schedule, Record Product Data, Record Samples, and Miscellaneous Record Submittals shall be provided by the CONTRACTOR for this Project. Requirements for Record Documents, as specified elsewhere, shall supplement the requirements specified herein.

B. Record Documents, particularly the Record Drawings and Record Project Manual, shall include a copy of all changes including those issued as Change Orders, Plan Clarifications, Addenda, Notice to Bidders, responses to Requests for Information (RFI’s), Jobsite Memos, and any additional details needed for the construction of the Project, but not shown on the Contract Drawings or included in the Project Manual.

C. Record Drawings and Record Project Manual shall be marked with red ink on one (1) set of full size prints to produce a record of the complete installation. Any additional drawings that may be required to indicate record conditions shall be prepared on 24" x 36" paper. All additions to Contract Drawings shall employ and use drafting standards which are consistent with the drafting standards used in the Contract Drawings.

D. The Record Drawings and Record Project Manual, including those of all Subcontractors, shall be kept by the CONTRACTOR in the CONTRACTOR’S Jobsite office, shall be updated during construction, and shall be available for the ENGINEER'S inspection and copying at all times. The ENGINEER will review the Record Drawings and Record Project Manual prior to submittal of all Monthly Payment Requests. If, in the opinion of the ENGINEER, the Record Drawings and/or Record Project Manual are not current, approval of the Monthly Payment may be withheld until the Record Drawings and the Record Project Manual are made current. In addition, the CONTRACTOR shall submit a signed certification with each Monthly Payment Request stating that all Record Drawings and record Project Manual are complete and accurate as of the date of the payment request.

1.2 PROJECT RECORD DOCUMENTS

A. This Section includes administrative and procedural requirements for Project Record Documents, including the following:

1. Record Drawings
2. Record Project Manual
3. Record Schedule
4. Record Product Data
5. Record Samples
6. Miscellaneous Record Submittals

B. Related Sections:

1. Section 01321 – Contractor's Construction Schedule and Reports
2. Section 01330 – Shop Drawings/Submittals
3. Section 01770 – Project Closeout
4. Section 01782 – Technical Manuals
5. Section 01810 – Fundamental Commissioning Requirements

1.3 CLOSEOUT SUBMITTALS

C. Required Documents: GENERAL REQUIREMENTS Section 01770 – PROJECT CLOSEOUT, describes administrative requirements for submission, number and type of copies required for Contract closeout requirements.

PART 2 – PRODUCTS

2.1 RECORD DRAWINGS

A. GENERAL: Maintain one set of marked-up paper copies of the Contract Drawings and Shop Drawings onsite, incorporating new and revised Drawings as modifications are issued. Review Record Drawings and Shop Drawings monthly with the Engineer and/or Inspector, for approval.

1. Preparation: Mark the Record Drawings and Shop Drawings to show the actual installation where installation varies from that shown originally. Require individual or entity who obtained record data, whether individual or entity is Installer, subcontractor, or similar entity, to provide information for preparation of corresponding marked-up Record Drawings.

a. Give particular attention to information on concealed elements that would be difficult to identify or measure and record later.
b. Accurately record information in an acceptable drawing technique.
c. Record data as soon as possible after obtaining it.
d. Record and check the markup before enclosing concealed installations.

2. Content: Types of items requiring marking include, but are not limited to, the following:

a. Dimensional changes to Contract Drawings.
b. Revisions to details shown on Contract Drawings.
c. Depths of foundations below first floor.
d. Locations and depths of underground utilities.
e. Revisions to routing of piping and conduits.
f. Revisions to electrical circuitry.
g. Actual equipment locations.
h. Duct size and routing.
i. Locations of concealed internal utilities.
j. Changes made by Change Order.
k. Details not on the original Contract Drawings.
l. Field records for variable and concealed conditions.
m. Record information on the Work that is shown only schematically.

3. Mark the Record Drawings and Record Shop Drawings completely and accurately. Use personnel proficient at recording graphic information in production of marked-up as-built prints.

4. Mark Record Drawings set using red-colored ink. Use other colors to distinguish between changes for different categories of the Work at same location.

5. Mark important additional information that was either shown schematically or omitted from original Contract Drawings.

6. Note Change Order numbers, and similar identification, where applicable.

2.2 RECORD PROJECT MANUAL

A. Preparation: Mark Specifications to indicate the actual product installation where installation varies from that indicated in the Specifications, Addenda, and Contract modifications.

1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.

2. Mark copy with the proprietary name and model number of products, materials, and equipment furnished, including substitutions and product options selected.

3. Record the name of manufacturer, supplier, Installer, and other information necessary to provide a record of selections made.

4. For each principal product, indicate whether record Product Data has been submitted in operation and maintenance manuals instead of submitted as record Product Data.

5. Note related Change Orders**,** Record Product Data**,** and Record Drawings where applicable.

2.3 RECORD SCHEDULE

A. Final Schedule: Submit to the Engineer a final schedule update. The “As-Built” Schedule shall reflect the exact manner in which the project was actually constructed including actual start and finish dates, activities, sequences and logic.

1. The Contractor shall certify the final schedule update as being a true reflection of the way the project was actually constructed.

2.4 RECORD PRODUCT DATA

A. Preparation: Mark Product Data to indicate the actual product installation where installation varies substantially from that indicated in Product Data submittal.

1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.

2. Include significant changes in the product delivered to the Project site and changes in manufacturer's written instructions for installation.

3. Note related Change Orders**,** Record Specifications, and Record Drawings, where applicable.

2.5 MISCELLANEOUS RECORD SUBMITTALS

A. Assemble miscellaneous records required by Individual Specification Sections for miscellaneous record keeping and submittal in connection with actual performance of the Work. Bind or file miscellaneous records and identify each, ready for continued use and reference.

B. Format: Submit miscellaneous record submittals.

1. Include miscellaneous record submittals directory organized by specification section number and title, electronically linked to each item of miscellaneous record submittals.

PART 3 - EXECUTION

3.1 RECORDING AND MAINTENANCE

A. Maintain Change Log: Maintain and submit a written change log to the Engineer, monthly for review, indicating items incorporated in the Project Record Documents concurrent with progress of the Work, including modifications, concealed conditions, field changes, product selections, and other notations incorporated.

B. Recording: Maintain one copy of each submittal during the construction period for Project Record Document purposes. Post changes and modifications to the Project Record Documents as they occur; do not wait until the end of the Project.

C. Maintenance of Record Documents and Samples: Store Record Documents and Samples in the field office apart from the Contract Documents used for construction. Project Record Documents are not to be used for construction purposes. Maintain Project Record Documents in good order and in a clean, dry, legible condition, protected from deterioration and loss. Provide access to Project Record Documents for the Engineer’s reference during normal working hours during performance of Contract.

END OF SECTION

SECTION 01810
FUNDAMENTAL COMMISSIONING REQUIREMENTS

PART 1 - GENERAL

1.1 DESCRIPTION

A. This section includes administrative and procedural requirements as well as a detailed description of the commissioning process. This section supplements other Division 1 Commissioning Sections and applies to Sections in Divisions 15 and 16 that specify testing of components and systems.

B. Basic Commissioning is intended to achieve the following objectives:

1. Verify that applicable equipment and systems are installed according to the manufacturer's recommendations and to industry accepted minimum standards and that they receive adequate operational checkout by installation contractors.

2. Verify and document proper performance of equipment and systems.

3. Verify that Operations and Maintenance (O&M) data is complete.

4. Verify that the City's operating and maintenance personnel are trained in accordance with the specifications.

C. Related Work:

1. 01330 Shop Drawings / Submittals

2. 01770 Project Closeout

3. 15270 Mechanical Systems Commissioning

4. 15280 Mechanical Testing Requirements

5. 16100 Basic Electrical Materials and Methods

6. 16560 Electrical Systems Commissioning

7. 16570 Electrical Testing Requirements

1.2 SUBMITTALS

A. Provide submittal documentation relative to commissioning as described in Section 01330 Shop Drawings/Submittals.

B. Contractor to submit the names of three independent Los Angeles City Fire Department certified testers to the Engineer. The Engineer will select one of the submitted testers to schedule and perform Regulation No. 4 testing

1.3 DEFINITIONS

A. Commissioning Process: A systematic process which verifies that the building systems perform interactively according to the Design Intent Document. The commissioning process coordinates system documentation, equipment startup, control system calibration, testing and balancing, performance testing and training.

B. Commissioning Authority (CA): An entity contracted by the City that plans, schedules, and coordinates the Commissioning Team to implement the Commissioning Process.

C. Commissioning Plan: A document that provides the structure, schedule, and coordination for the commissioning process.

D. Design Intent Document: A written document that details functional requirements of the Project including expectations of how the Project will be used and operated. The Design Intent Document includes design goals, measurable performance criteria, success criteria, and supporting information.

E. Functional Test (FT): A documented test of the dynamic functioning and operation of equipment and systems with the goal of verifying that the Design Intent is met. Test requirements are included in these specifications. Test procedures are developed and results documented by the Commissioning Authority. Test procedures are completed by the Contractor.

F. Prefunctional Checklist (PC): A written checklist that includes checks and tests prerequisite to the equipment's Functional Test. Draft checklists are included in the specifications. The Commissioning Authority assists the Contractor in finalizing the checklists. The Checklists are completed by the Contractor and verified by the Commissioning Authority.

1.4 COORDINATION

Items listed below require the Contractor to coordinate between the sub-contractors, INSPECTOR, GSD building maintenance representative, and the Commissioning Authority. Details regarding each item are given elsewhere in this Section and/or other commissioning sections of the specifications.

A. Pre-Commissioning Meeting: Conducted by the City's Project Manager during which the CA reviews the commissioning process with the commissioning team members.

B. Coordination Meetings: Attend meetings throughout construction, scheduled by the ENGINEER, to plan, coordinate, schedule future activities, and resolve problems.

C. Start-up Plans: Work with the CA to develop startup plans and startup documentation formats, including prefunctional checklists.

D. Equipment Start-up: Utilize start-up plans to coordinate equipment start-up, manufacturers' testing, and other required testing to minimize duplication of work.

E. Testing, Adjusting, and Balancing: Coordinate testing, adjusting, and balancing with the Commissioning Authority so that the CA can witness the processes.

F. Functional Testing: Coordinate functional testing with the Commissioning Authority so that they can witness testing.

G. Training: Coordinate training of owner's staff with Commissioning Authority so that the CA can verify that training is conducted per commissioning requirements.

1.5 SYSTEMS TO BE COMMISSIONED

A. The following systems will be commissioned in this project.

1. Irrigation System and Controls

a. Irrigation System

2. Infiltration Gallery System and Controls

a. Gate Vault and level indicator control system

3. Electrical Systems

a. Lighting System and Controls

b. Automatic gate operators and control

c. Baseball scoreboard systems

PART 2 - PRODUCTS

2.1 TEST EQUIPMENT

A. Provide all testing equipment required by the Commissioning Process except data logging equipment. Data logging equipment is provided by the CA.

B. Provide any special equipment, tools, and instruments that are only available from the equipment supplier, which are specific to the equipment, and which are required for testing.

PART 3 - EXECUTION

3.1 MEETINGS

A. Commissioning Pre-Construction Meeting: Within 60 days of commencement of construction, the ENGINEER will schedule a commissioning pre-construction meeting with the commissioning team in attendance. Commissioning Authority shall distribute meeting minutes to commissioning team. Attendance is mandatory for the following team members:

1. Commissioning Authority

2. Contractor's Site Supervisor

3. Contractor's Project Scheduling personnel

4. Mechanical sub-contractor

5. Electrical sub-contractor

6. Air Balance sub-contractor

7. GSD Building Maintenance Division representative

8. INSPECTOR

B. Miscellaneous Meetings. The ENGINEER will schedule other meetings, generally in conjunction with regularly scheduled site meetings as construction progresses. Meetings will cover coordination, deficiency resolution, and planning issues with particular subcontractors.

3.2 START-UP AND PREFUNCTIONAL CHECKLISTS

A. Perform a full pre-functional checkout of each piece of equipment. The pre-functional testing for a given system must be successfully completed prior to formal functional testing.

B. Equipment shall not be “temporarily” started (for heating and cooling) until the Start-Up Plan is completed.

C. The Contractor shall prepare start-up plans for equipment to be commissioned. Subcontractors responsible for pre-functional checklists and startup will be identified at the pre-commissioning meeting. Submit start-up plans to the Engineer for review and approval; start-up plans shall consist of, but not be limited to:

1. The manufacturer’s standard written start-up procedures copied from the installation manuals, with check boxes by each procedure and a signature block at the end.

2. Field checkout sheets normally used by the sub-contractor.

3. Forms normally issued by the sub-contractor to document tests required in the specifications.

4. Final pre-functional checklists (drafts are included in the specifications). The checklists for mechanical systems include sensor and actuator calibration as described in Section 01811.

5. Schedule that includes equipment installation, contractor start-up, manufacturer start-up, and other tests required by the specifications. Schedule shall state when documents in the start-up plan will be completed.

D. At least 90 days prior to the start of commissioning, the Contractor shall submit a commissioning package for the equipment to be commissioned. This package shall include the following information:

1. Equipment manufacturer’s operating & maintenance instructions.

2. Equipment manufacturer’s installation and start-up manual.

3. Start-up plans as required in this section.

3.3 REQUIREMENTS FOR FUNCTIONAL TESTING

A. Complete the following prior to functional testing:

1. Arrange for commissioning observations to be performed by the Commissioning Authority, and GSD Building Maintenance Division representative.

2. Complete and approve the Start-up Plan.

3. Correct deficiencies identified during start-up.

4. Record pretest set points.

3.4 FUNCTIONAL TESTING

A. Perform functional testing after the testing requirements listed in Paragraph 3.3 are completed.

B. Perform functional testing under the observation of the commissioning authority who will record the results of the functional test procedures.

C. Perform all specified tests according to approved testing procedures.

1. Verify and test performance using actual conditions whenever possible.

2. Simulate conditions by imposing an artificial load when it is not practical to test under actual conditions and when written approval for simulated conditions is received from Commissioning Authority. Before simulating conditions, calibrate testing instruments. Set and document simulated conditions and methods of simulation. After test, return settings to normal operating conditions.

3. Alter set points when simulating conditions is not practical and when written approval to do so is received from Commissioning Authority.

4. Overwrite sensor values with a signal generator when actual or simulated conditions and altering set points are not practical. Do not use the sensor to act as the signal generator to simulate conditions or overwrite values.

D. The Commissioning Authority will review and approve functional testing results. Deficiencies found during testing shall be corrected by the Contractor and retested. Where there is a dispute over a deficiency, the ENGINEER shall be the final authority.

E. Problem Solving: The CA will recommend solutions to problems found, however, the burden of responsibility to solve, correct and retest problems is with the contractor and the design team.

3.5 COST OF RETESTING

A. Costs for retesting beyond one retest will be the responsibility of the Contractor, if the ENGINEER determines that the contractor is responsible for the deficiency. These costs shall include charges for the CA's time, Engineer and Inspector.

B. For a deficiency identified during functional testing but not included in the approved Start-up Plan: The CA will direct the retesting of the equipment once the deficiencies are corrected.

C. Retesting will not be considered a reason for a claim of delay or for a time extension by the contractor.

3.6 DEFERRED TESTING

A. Unforeseen Deferred Tests: Checks or tests not completed due to the building structure, required occupancy condition, or other condition may be delayed upon approval of the ENGINEER. These tests will be conducted in the same manner as the seasonal tests as soon as possible.

B. Seasonal Testing: Complete seasonal testing (tests delayed until weather conditions are closer to the system's design conditions) during the warranty period, as part of this contract. The CA will coordinate this activity. Tests shall be executed, documented and deficiencies corrected by the appropriate Subs, with facilities staff and the CA witnessing. The Contractor shall make adjustments to the Operations and Maintenance Data, as necessary.

3.7 WRITTEN WORK PRODUCTS

A. The commissioning process generates a number of written work products described in the Specifications. A summary of the written products follows. Where the product is developed by the subcontractors, the contractor shall be responsible for their production.

Product	Developed By
1. Design Intent Document	A/E
2. Commissioning Plan	CA
3. Commissioning schedules	CA, Contractor and Subcontractors
4. Equipment & commissioning submittals	Subcontractors
5. Draft prefunctional checklists	CA with specifications
6. Startup Plan	Subcontractors
7. Completed Startup Plan	Subcontractors
8. Issues log (deficiencies)	CA
9. Deficiency reports	CA
10. Blank functional test forms	CA
11. Completed functional test forms	CA
12. O&M manuals	Subcontractors
13. Overall training plan	CA and Subcontractors
14. Specific training agendas	Subcontractors
15. Commissioning report	CA
17. Commissioning meeting minutes	CA or A/E consultants
18. Warranty Documents	Subcontractor

END OF SECTION

SECTION 01820
OPERATIONS AND MAINTENANCE TRAINING

1.1 THE REQUIREMENT

A. General

1. This section covers the development and implementation of training programs that will identify skills and knowledge necessary to safely and efficiently operate and maintain the Project Facilities.

2. The CONTRACTOR shall furnish all tools, equipment, materials, and supplies, and shall perform all functions and services required to complete the Work as specified herein. With the exception of safety and overview training, training shall be divided into separate categories for operations training and maintenance training with maintenance training further broken down to specific crafts.

3. The training requirements specified in other Sections of the Specifications shall be in addition to those specified in this Section.

4. No actual operations training of a piece of equipment will be permitted until the equipment is properly installed and is operational.

5. Operations training shall be a prerequisite to the beneficial use of the facility or any portion thereof and be completed a minimum of one week prior to the beneficial use of the Project Facilities. Maintenance training shall occur after and within thirty (30) days of the beneficial use of the facility.

B. Related Work Specified Elsewhere

1. LIQUIDATED DAMAGES of the GENERAL CONDITIONS.

2. SUBMITTALS of the GENERAL REQUIREMENTS.

3. CONTRACTOR'S CONSTRUCTION SCHEDULE AND REPORTS of the GENERAL REQUIREMENTS.

4. DIVISIONS 11, 16, and 17 as applicable.

C. Training Scope

1. Manufacturer/Vendor Training

a. Manufacturer supplied (VENDOR) equipment training for all major plant equipment and subsystems shall be provided for the Operations and Maintenance groups as outlined in this section. The VENDOR training shall be provided by qualified instructors of the equipment manufacturers, i.e.: equipment field startup technician or their representative, as approved by the ENGINEER and may include both on and off-site training

venues. Generally, manufacturer sales representatives will not be acceptable.

b. Classroom training shall be structured to develop a basic understanding of the design, function and capabilities of the equipment and the interrelationship with the process. In addition, routine operational and preventive maintenance, safety considerations, responses to abnormalities and startup, shutdown and troubleshooting will be covered.

c. Field training shall be scheduled to commence immediately following the classroom training and shall stress hands-on, performance based application of the classroom training. Equipment shall be started and relevant systems and components shall be demonstrated.

d. Off-site training, primarily for the technical crafts including Electricians, Instrument Technicians and Mechanics, shall focus on specialized, technical training and shall be provided by the manufacturer at their factory or training facility. In the event, the CITY requests specialized factory training on a particular piece of plant equipment, the contractor shall make arrangements with the applicable equipment manufacturer to provide such training.

2. Process Overview, Operations and Safety Training

a. Process overview and safety training for the Operations group, if deemed necessary, will be prepared and conducted by the CITY utilizing approved material supplied by the equipment vendors. In the event the CITY is unable to provide the process training, the CONTRACTOR shall enter into an agreement with a training specialist approved by the ENGINEER. Any and all work performed by the training specialist will be paid as stated in Paragraph I, “Fixed Cash Allowance,” herein. The CONTRACTOR shall submit invoices for payment from the training specialist, which have been previously approved by the ENGINEER and paid by the CONTRACTOR.

3. General

a. Training Material: Sections of the manufacturers O&M manuals, selected by the CITY for the installed equipment, shall be used as classroom training material. The CONTRACTOR shall then reproduce the selected text for each piece of plant equipment and compile the training material to be used in the classroom by the manufacturer’s field technician.

b. Training schedule: The CONTRACTOR shall provide an operation and maintenance training schedule to be conducted immediately following vendor equipment startup of the equipment. All training shall be scheduled for Tuesday through Thursday only.

D. Training Requirements

1. The technical position titles of trainees for the Operational and Maintenance groups are listed below:

a. Operations Group

(1) Shift Superintendents and Process Control Engineers

b. Maintenance Group

(1) Mechanics/Plumbers

(2) Electricians

(3) Instrument Technicians

2. Major equipment and plant subsystems for the various crafts which require training include, but are not limited to the following:

a. Instrumentation and Controls (I&C)

(1) Distributed Control Systems (DCS)

(2) Programmable Logic Controllers (PLC)

(3) Local Control Panels (LCP)

(4) Loop Descriptions and Drawings

(5) Instrument Installation and Calibration

b. Electrical Systems:

(1) Transformers and Substations

(2) Motor Control Centers (MCC)

(3) High and Low Voltage Systems

(4) Wiring Diagrams/Schematics

(5) Lighting and Power Panels

(6) Starters and Controllers

c. Operating Systems

(1) Gate actuator

(2) Level indicators

(3) Local and Remote Control Devices

E. Operation Training

1. The VENDOR shall conduct **5** courses as described herein for the General Operations Group. Each course shall consist of both classroom and field training as specified herein. Each class size shall consist of 12 trainees. The courses shall not be conducted concurrently.

2. The classroom training shall consist of 10 hours of instruction and include, but not be limited to, the following subjects. This training shall be conducted by qualified representatives of the equipment manufacturers as follows:

a. Safety precautions and procedures for 2 hours
b. Equipment description and function for 2 hours
c. Operating procedure for 2 hours
d. Operational Maintenance for 2 hours
e. Emergency procedures for 2 hours

F. Maintenance Training

1. The maintenance training shall include the function, adjustment, repair, and replacement of all components related to the trainee's trade. Emphasis shall be placed on those areas listed in item number 3, below. Safety aspects shall also be stressed.

2. The field training shall stress hands-on instruction.

3. The training shall include, but not be limited to, the following:

a. Preventive and corrective maintenance procedures, including replacement of parts; lubrication quantities, types, frequencies, and application points; and an estimate of time to perform such procedures.

b. Special tools, techniques, or procedures required for either preventive or corrective maintenance of equipment, or its auxiliary or support systems.

c. Procedures to perform adjustments required for alignment, wear and calibration for all preventive and corrective maintenance, and an estimate of time required to perform such procedures.

d. Assembly and disassembly procedures, including parts lists required for appropriate preventive and/or corrective maintenance. Models, "exploded" views, and/or audiovisual materials shall be used for this training. These materials shall be turned over to the ENGINEER upon completion of training. Hands-on field training shall be provided, subject to the approval of the ENGINEER.

e. Maintenance, overhauls, troubleshooting of equipment, and auxiliary or support systems.

4. Maintenance training shall be conducted as described in the following subsections.

a. Mechanic Training

(1) Conduct 8 hours of both classroom and field training for the Mechanics Group. The class size consist of 12 trainees.

(2) The training shall consist of hours of instruction, including but not limited to, the following topics for each major equipment system:

(a) Equipment Description and Function for 0.5 hours

(b) Corrective and Preventive Maintenance Procedures for 1 hour

(c) Disassembly and Assembly 1 hour

(d) Spare Parts for 0.5 hours

(e) Troubleshooting for 1 hour

(3) The field training shall consist of 4 hours of hands-on instruction.

b. Electrician Training

(1) Conduct 8 hours of both classroom and field training for the Electrician Group. The class size will consist of 12 trainees.

(2) The classroom training shall consist of 8 hours of instruction, including but not limited to, the following:

(a) Transformers and Unit Substations for 1 hour

(b) High and Low voltage Systems for 1 hour

(c) Motor Control Centers for 1 hour

(d) Control Panel Wiring Diagrams/Schematics for 1 hour

(3) The field training shall consist of 4 hours of hands-on instruction.

c. Instrument Technician Training

(1) Conduct 8 hours of both classroom and field training for the Instrument Technicians Group. The class size will consist of 12 trainees.

(2) The classroom training shall consist of 8 hours of instruction, including but not limited to, the following subjects:

(a) PLC and/or DCS for 1 hour

(b) Loop and PID Drawings, Schematics **for 1 hour**

(c) Programming for 1 hour

(d) Operator Interface for 1 hour

(3) The field training shall consist of 4 hours of hands-on instruction.

G. Execution

1. The training specified herein shall be provided at the "**To Be Determined Location"**. The CITY will make available one room for the training.

2. Due to limitations of plant manpower available for dedicated training purposes, no more than one group course shall be taught at a time for any individual trade discipline.

3. Training shall be conducted so that home study will not be required. The training shall include courses, which combine classroom and field hands-on training that is structured and scheduled to facilitate trainee comprehension of the subject material. Courses shall be continuous, and the field training shall immediately follow the classroom instruction.

4. The CITY reserves the right to videotape any and all training materials and presentations, except for proprietary material, and retain all rights for usage of such recorded material to train CITY personnel.

H. Evaluation

1. All training sessions will be monitored and approved by the ENGINEER. Any session or portion thereof deemed unsatisfactory, based on evaluation of the training, shall be repeated by the manufacturer or manufacturer's representative at no additional cost to the CITY.

2. When deemed appropriate by the ENGINEER, field instruction to CITY personnel designated to receive training may be acceptable as a training session. The instruction shall be provided by a field service technician qualified to perform corrective or preventive maintenance, troubleshooting, or related field services.

I. Fixed Cash Allowance

1. A fixed cash allowance has been allocated for the Facility Overview and Operations/Safety training and is included as an item of the bid breakdown. Overhead and profit shall be as per Section 01212 – FIXED CASH ALLOWANCE ITEMS of the GENERAL REQUIREMENTS.

2. However, if Facility Overview and Operations/Safety training are not executed or partially executed or partially expended, or over expended (with the ENGINEER'S prior approval), then an appropriate change order shall be executed in accordance with the provisions the GENERAL REQUIREMENTS Section 01254 -- PAYMENT FOR CHANGES AND EXTRA WORK.

J. Submittals

1. The CONTRACTOR shall submit training packages for the ENGINEER'S review and approval. The training submittal shall be tied into the CONTRACTOR'S overall submittal process.

2. The CONTRACTOR shall provide the training submittals in the following order for review and approval by the ENGINEER.

   a. First draft sixty (60) days prior to proposed instruction date.

   b. Final draft thirty (30) days prior to proposed instruction date.

3. The "first draft" of the training material shall, as a minimum, contain the following:

   a. Instructional text that details the specific topics of training for the system. These topics are detailed previously in the training submittal. All text must be complete. Incomplete sections, paragraphs, etc., shall not be acceptable.

   b. Clean legible photocopies of all overhead transparencies to be used in the delivery of the lesson plan.

   c. Slides, videos (Digital Media), and any other type of visual training aid that will be used in conjunction with the training plan.

   d. Reference materials as detailed in the lesson plan (e.g. handout, manufacturer catalogues, brochures, and pamphlets). All material shall be reviewed by the ENGINEER to determine applicability and functionality. Reference materials that do not pass this review shall be modified and resubmitted within two weeks for approval.

   e. No actual classroom or field training shall be scheduled unless this material is approved.

f. The CONTRACTOR shall not proceed to the "final draft" stage of training material until the ENGINEER has approved the "first draft".

4. With the final draft of the training material, the CONTRACTOR shall submit a Training Agenda that provides the following information:

   a. Company name, address, and telephone number(s) for the vendor.

   b. Name and telephone number(s) of the vendor training representative.

   c. Duration of class (total hours).

   d. Breakdown of class and duration in hours of each training activity.

   e. Target audience (e.g. operators, maintenance personnel etc).

   f. Audiovisual requirements (i.e. slide projector, television, VCR, overhead projector, etc.).

5. After the CONTRACTOR has received approval of the "final draft" of the training material and the training agenda from the ENGINEER, only then can the actual training be scheduled. CONTRACTOR shall submit his proposed training schedule to the ENGINEER for approval. The proposed training schedule shall be submitted a minimum of sixty (60) calendar days prior to the start of the training. If the proposed training schedule is approved, then it becomes the final training schedule.

6. Any compensation that is paid to CITY personnel as a result of class cancellations of classes that begin more than thirty (30) minutes after the scheduled start time shall be reimbursed to the CITY by the CONTRACTOR. An exception is when a class is canceled or delayed due to actions by the CITY. The ENGINEER, or his/her representative, will monitor the starting times of scheduled classes.

7. The review of the training material does not constitute its approval unless specifically stated so. The training material submittal shall contain, but not be limited to, the following:

   a. Sufficient background information on each instructor for various sessions shall be provided to allow evaluation of the proposed instructor's qualifications and his capability of training the specific discipline.

   b. At the completion of the training, the CONTRACTOR shall forward to the ENGINEER three (3) complete sets of training materials and support material for each defined training category. This forwarding of materials is to take place at a closeout meeting between the CONTRACTOR and the ENGINEER.

8. Failure to submit training schedule or changes made to the final training schedule, that are not due to actions by the CITY, shall subject the CONTRACTOR to liquidated damages. Liquidated damages shall be assessed at the rate of **$500** per day should the CONTRACTOR fail to meet the schedule's submittal requirements.

SECTION 02210
CLEARING, GRUBBING AND STRIPPING

PART ONE - GENERAL

1.1 DESCRIPTION

A. All site clearing and grubbing on the job-site.

B. Site clearing shall consist of removing all vegetable growth such as trees, roots, stumps, shrubs, brush, limbs; and stone, boulders, clods, wood and other vegetative growth from the growth surface. Clearing shall also include the removal and disposal of trash piles, rubbish, etc.

C. Grubbing shall consist of the removal and disposal of wood roots, stumps, shrubs, brush, stone, boulders, clods, vegetable growth, etc. below the ground or subgrade surface.

D. CONTRACTOR shall furnish all tools, equipment materials and supplies and shall perform all labor to complete the work associated with removal of all natural and artificial objectionable material from the designated areas of work as indicated in the Contract Documents.

E. This work shall also include the protection from injury and preservation of existing improvements, adjacent property, utility, vegetation and existing objects designated to remain.

F. Prior to commencing the work, obtain acceptance from the ENGINEER regarding methods to be used and disposal of removed materials.

G. Related Sections:

1. Documents affecting work of this Section included, but are not necessarily limited to the GENERAL CONDITIONS, SUPPLEMENTARY CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS and other Sections of the Project Manual.

2. Earthwork in Section 02310.

3. Irrigation System in Section 02810.

4. Concrete work in Section 03300.

1.2 QUALITY ASSURANCE

A. Labor: Use adequate numbers of skilled laborers thoroughly trained in site-clearing operations and experienced in the necessary crafts and completely familiar with the specified requirements and methods needed for the proper performance of the work of this Section.

Codes and Regulations: Perform all work of this Section in strict accordance with applicable Government Codes and Regulations especially meeting all safety standards and requirements of CAL/OSHA, County and 2019 Los Angeles City Building Code and applicable Amendments. Conform to all storm water pollution control measures as required and provided in Section 02310 - EARTHWORK of the Project Manual. Provide additional measures, added materials and devices as may be needed as directed by the City Engineer or the Consultant at no added cost to the City.

B. Miscellaneous Requirements:

1. Erection and maintenance of protections.

2. Dust Control.

3. Repair of Damages.

4. Cleaning and Removal of Rubbish.

C. Permits and Licenses: Procure all City, County and State Permits and Licenses, including Municipal Business License and pay all charges and fees for the same.

D. Contractor Submittals - Submit schedule of clearing, grubbing, and erosion control measures to be put in place for all work scheduled during the rainy season (October - April).

PART TWO - PRODUCTS

2.1 MATERIALS

A. Soil Sterilant: As specified in Section 02310 - EARTHWORK.

B. Soil Treatment for Termite Control: As specified in Section 02310 - EARTHWORK

C. Provide Materials not specifically described but required for completion of the work of this Section as selected by the Contractor subject to the approval of the City Engineer or the Consultant.

PART THREE - EXECUTION

3.1 SITE CONDITIONS

Examine the job-site and conditions under which work of this Section will be performed. Correct conditions detrimental to timely and proper site-clearing operations, as directed by the City Engineer or the Consultant. Do not proceed until such detrimental conditions have been corrected.

3.2 PROTECTION

A. Protect Existing Structures and Site Improvements indicated to remain from damage by approved methods and/or as authorized by the City Engineer. Removal of all protections shall be when work of this Section is completed or when so authorized by the City Engineer or the Consultant. Apply protections to adjacent properties as required and directed by the City Engineer.

B. Protect Existing Utilities Indicated on Plans traversing the job-site and serving existing adjacent facilities.

C. Protect Existing Trees and Shrubs indicated on Plan by providing temporary surrounding fencing so located a sufficient distance away so that trees and shrubs will not be damaged by site-clearing operations.

D. Protection of Persons and Property (existing structures and site improvements).

1. Provide barricades, warning signs at open depressions and holes on adjacent property and public accesses.

2. Provide operating warning lights during hours from dusk to dawn each day or as otherwise required.

3. Protect existing remaining structures, utilities, sidewalks, pavements other facilities from damage as caused by settlement, undermining, washout or other hazards created by site-clearing operations of this Section.

4. Provide and maintain pedestrian and vehicular access in accordance with Work Area Traffic Control Handbook (WATCH), latest edition.

E. Use means necessary to prevent air pollution or dust from becoming a nuisance to the public, to neighbors and to others performing work on or near the job-site. Comply with governing regulations.

E. Maintain access to the job-site, other neighboring property, street and alley at all times.

F. The project site shall be maintained in conformance with Section 7-8 - PROJECT SITE MAINTENANCE of the Standard Specifications for Public Works Construction (SSPWC) and the requirements of this Project Manual.

G. Contractor shall comply and remain compliant with the Storm Water Pollution Prevention Plan Construction Activities.

3.3 SITE CLEARING AND GRUBBING

A. General:

1. For drawing clarity, not all trees, shrubs, brush, grass, weeds, or exact amount of trash or debris are shown on the drawings. Contractor shall carefully study the Contract Drawings, Geotechnical Report, Phase 2 Environmental Site Assessment Report, , visit the job site and verify the extent of the work to be done prior to the Bid.

2. Prior to starting job-site clearing operations in the company of the City Engineer or Consultant Architect, Soil Engineer and Inspector; visit the job site and verify the extent of the work.

3. Site clearing and grubbing shall conform to Section 300-1 - CLEARING AND GRUBBING of SSPWC and applicable requirements of the Project Manual.

4. Site clearing and grubbing shall be done in the presence of the Soil Engineer. Contractor shall notify the City Engineer 72 hours prior to clearing operation.

B. Site Clearing and Grubbing Operations

1. To a depth of at least 12 inches below existing ground surfaces or new graded surfaces, whichever is lower, Clean out all vegetable growth, roots, stomps, clods

and other objective materials.

2. Treat roots remaining in the soil with a weed killer approved and as directed by the City Engineer or the Consultant.

3. Remove all concrete and masonry debris. Remove stones, boulders, clods which are one (1) inch or larger. Remove stones, boulders, clods which are one (1) inch or larger from all utility trenches.

4. Remove all existing rubbish and debris or those resulting from work operations of this Section as soon as possible, do not allow to pile up. Do not burn rubbish and debris on the job-site.

5. Remove all growths including trees and shrubs on the job-site within property lines including trees in tree wells and elsewhere as noted on the Contract Drawings.

6. Where active utility lines need to be capped or plugged, perform such work in accordance with requirements of the Utility Company or government agency having jurisdiction and conform to provisions of Section 01140 – CONTRACTOR'S USE OF THE PREMISES, and Subsection 3.2B of this Section.

7. Existing Services to remaining structures are to be maintained at all times.

3.4 STRIPPING

A. Stripping shall include the removal and disposal of all organic sod, topsoil, grass and grass roots, and other objectionable material remaining after clearing and grubbing from the areas designated to be stripped. The depth of stripping shall be as shown on the Drawings and specified herein.

B. Topsoil from the strippings shall be stockpiled and used for the finished site grading. Excess topsoil will be placed in the waste disposal areas designated by the ENGINEER.

C. Prior to beginning any excavation or fill, strip the topsoil to a depth sufficient to remove all organic material **and stockpile for future use.** In general, topsoil shall be removed where structures are to be built, trenches dug, and roads, parking lots, walks, and similar improvements constructed within the areas presently covered with topsoil. Topsoil shall be stored clear of the construction area. Take reasonable care to prevent the topsoil from becoming mixed with subsoil. In lieu of reusing stockpiled, use imported topsoil as required for final grading.

3.5 TOPSOIL

A. Strip and remove existing sod, and stock pile existing sod if specified for reuse in the Contract Works.

B. After proposed planting area(s) has been cleared of vegetation and grubbed, strip the existing topsoil to a depth needed to allow the top 24" of fill as "Class A" topsoil in accordance with Earthwork, Section 02310 and Landscape Planting, Section 02932.

C. If on site topsoil is specified for reuse, stock pile topsoil in an area clear of new

construction or where directed by the City Engineer or the Consultant.

D. Remove and dispose of the stock pile topsoil prior to the delivery of any new imported top soil.

3.6 REMOVAL AND DISPOSAL OF CLEARING AND GRUBBING DEBRIS

A. General: All materials removed shall be disposed of outside of the right-of-way. No accumulation of flammable material shall remain on or adjacent to the right-of-way. The roadway and adjacent areas shall be left with a neat and finished appearance.

B. Bituminous Pavement: Bituminous pavement removal shall be in conformance with SSPWC Section 300-1.3.2.

C. Concrete Pavement: Concrete pavement removal shall be in conformance with SSPWC Section 300-1.3.2.

D. Concrete Curb, Walk, Gutters, Cross Gutters, Driveways, and Alley Intersections: Concrete removal shall be in conformance with SSPWC Section 300-1.3.2.

3.7 STORAGE OF MATERIALS AT THE JOB-SITE

Storage not permitted beyond brief accumulation awaiting pick up by removal trucks. Delays in the removal of site-clearing materials from the job-site shall be subject to the approval of the City Engineer or the Consultant.

SECTION 02235
DEWATERING

PART 1 – GENERAL

1.1 Related Documents

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.

1.2 Summary

A. This Section includes construction dewatering.

B. Related Sections include the following:

1. Division 2 Section "Earthwork" for excavating, backfilling, and site grading.

1.3 Performance Requirements

A. Dewatering Performance: Design, provide, test, operate, monitor, and maintain a dewatering system of sufficient scope, size, and capacity to control ground-water flow into excavations and permit construction to proceed on dry, stable subgrades.

1. Work includes removing dewatering system when no longer needed.

2. Maintain dewatering operations to ensure erosion is controlled, stability of excavations and constructed slopes is maintained, and flooding of excavation and damage to structures and utilities are prevented.

3. Prevent surface water from entering excavations by grading, dikes, or other means.

4. Accomplish dewatering without damaging existing buildings and utilities adjacent to excavation.

5. Identify steps to minimize the volume, monitor and pre-treat dewatering effluent to improve its quality prior to disposal.

1.4 Submittals

A. Shop Drawings: For dewatering system. Show arrangement, locations, and details of wells and well points; locations of headers and discharge lines; and means of discharge and disposal of water.

1. Include a written report outlining control procedures to be adopted if dewatering problems arise.

2. If retaining "Performance Requirements" Article, retain subparagraph below to meet requirements of authorities having jurisdiction or to follow

customary practice in Project's location.

3. Include Shop Drawings signed and sealed by a California registered professional engineer responsible for their preparation.

B. Dewatering Plan: The dewatering plan shall include all the requirements of Bureau of Engineering Special Order No. 001-0204. Submit Dewatering Plan to the Bureau of Sanitation (BOS), Regional Water Quality Control Board and National Pollutant Discharge Elimination System (NPDES) for plan check review, approval and permit. Steps shall be identified to minimize the volume, to monitor and pre-treated to improve the quality of dewatering effluent prior to disposal.

C. BOS Industrial Waste Permit: Obtain a BOS Industrial Waste Permit for disposing dewatering effluent into sanitary sewers. Sewers are primary disposal sites for dewatering effluent. Disposal into storm drains may only be used as a last resort and will be heavily regulated.

D. Qualification Data: For firms and persons specified in "Quality Assurance" Article to demonstrate their capabilities and experience. Include lists of completed projects with project names and addresses, names and addresses of architects and owners, and other information specified.

E. Photographs or videotape, sufficiently detailed, of existing conditions of adjoining construction and site improvements that might be misconstrued as damage caused by dewatering operations.

F. Record drawings at Project closeout identifying and locating capped utilities and other subsurface structural, electrical, or mechanical conditions.

1.5 Quality Assurance

A. Installer Qualifications: Engage an experienced installer to assume engineering responsibility and perform dewatering who has specialized in installing dewatering systems similar to those required for this Project and with a record of successful in-service performance.

B. Professional Engineer Qualifications: A California registered profesional engineer who is experienced in providing engineering services for designing dewatering systems that are similar to those indicated for this Project in material, design, and extent.

1. Engineering Responsibility: Engage a qualified professional engineer to prepare or supervise the preparation of data for the dewatering system including drawings, testing program, test result interpretation, and comprehensive engineering analysis that shows the system's compliance with specified requirements.

C. Regulatory Requirements: Comply with water disposal requirements of authorities having jurisdiction.

1.6 Project Conditions

A. Existing Utilities: Do not interrupt utilities serving facilities occupied by the Owner or others unless permitted in writing by the Engineer and then only after

arranging to provide temporary utility services according to requirements indicated.

B. Project Site Information: A geotechnical report has been prepared for this Project and is attached to the Project Specifications for information only. The opinions expressed in this report are those of the geotechnical engineer and represent interpretations of the subsoil conditions, tests, and results of analyses conducted by the geotechnical engineer. Owner will not be responsible for interpretations or conclusions drawn from this data by Contractor.

1. Make additional test borings and conduct other exploratory operations as necessary.

C. Survey adjacent structures and improvements, employing a qualified professional engineer or surveyor, establishing exact elevations at fixed points to act as benchmarks. Clearly identify benchmarks and record existing elevations.

1. During dewatering, resurvey benchmarks weekly, maintaining an accurate log of surveyed elevations for comparison with original elevations. Promptly notify Architect if changes in elevations occur or if cracks, sags, or other damage is evident in adjacent construction.

PART 2 – PRODUCTS

NOT USED

PART 3 - EXECUTION

3.1 Preparation

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by earthwork operations.

1. Prevent surface water and subsurface or ground water from entering excavations, from ponding on prepared subgrades, and from flooding site and surrounding area.

2. Protect subgrades and foundation soils from softening and damage by rain or water accumulation.

B. Install dewatering system to ensure minimum interference with roads, streets, walks, and other adjacent occupied and used facilities.

1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction. Provide alternate routes around closed or obstructed traffic ways if required by governing regulations.

3.2 Dewatering

A. Install dewatering system utilizing wells, well points, or similar methods complete with pump equipment, standby power and pumps, filter material gradation, valves, appurtenances, water disposal, and surface-water controls.

B. Before excavation below ground-water level, place system into operation to lower water to specified level, a minimum of three feet below the bottom of planned excavations, and then operate it continuously until drains, sewers, and structures have been constructed and fill materials have been placed, or until dewatering is no longer required.

C. Provide an adequate system to lower and control ground water to permit excavation, construction of structures, and placement of fill materials on dry subgrades. Install sufficient dewatering equipment to drain water-bearing strata above and below bottom of foundations, drains, sewers, and other excavations.

1. Do not permit open-sump pumping that leads to loss of fines, soil piping, subgrade softening, and slope instability.

D. Dispose of water removed from excavations in a manner to avoid endangering public health, property, and portions of work under construction or completed. Dispose of water in a manner to avoid inconvenience to others. Provide sumps, sedimentation tanks, and other flow-control devices as required by authorities having jurisdiction.

E. Provide standby equipment on-site, installed and available for immediate operation, to maintain dewatering on a continuous basis if any part of system becomes inadequate or fails. If dewatering requirements are not satisfied due to inadequacy or failure of dewatering system, restore damaged structures and foundation soils at no additional expense.

1. Remove dewatering system from Project site on completion of dewatering. Plug or fill well holes per the current requirements of City of Los Angeles.

F. Damages: Promptly repair damages to adjacent facilities caused by dewatering operations.

END OF SECTION

SECTION 02240
SHEETING, SHORING AND BRACING SYSTEMS

PART 1 – GENERAL

1.1 SUMMARY

The Contractor shall provide shoring at open excavations and elsewhere where greater than 5-feet in depth, or as needed to ensure a stable excavation at less than 5 feet depth. Shoring shall be furnished, placed, maintained and removed by the Contractor, as needed to protect workers, materials, other properties and the public.

1.2 SYSTEM DESCRIPTION

A. General:

1. Shoring systems are not fully detailed on the Drawings, which are diagrammatic and show design intent of finished profiles, shapes and forms.

2. Specifications are of the performance type and include the minimum requirements of the excavation support system without limiting the Contractor to methods of achieving such performance.

B. Survey of existing conditions:

1. Employ California licensed surveyor or civil engineer to make a survey of existing adjacent structures and improvements.

   a. Establish precise elevations at fixed points to act as benchmarks.

   b. Clearly identify benchmarks and record existing elevations.

2. Photograph conditions encountered to highlight defects in existing construction. Notify the Engineer and registered owners of adjacent properties in writing when the survey is to be made and photographs taken so they may have representatives present.

   a. Have those representatives present sign the survey and photographs as witnesses.
   b. Upon completion of this work, make a similar examination of the properties originally surveyed, giving similar notice to all interested parties so they may be present during the final examination of the properties. Send a record of the original and final examinations to all concerned parties.

C. Design Requirements:

1. Shoring: Design shoring in accordance with all applicable codes, and in accordance with the specific requirements shown on the Contract Drawings and specified in the Soil Report. All wood components of the shoring system shall be constructed of pressure treated wood in conformance with the code requirements.

2 Loading: Design and construct shoring to withstand all soil and hydrostatic loading that might occur during the various stages of construction and for any surcharging loading caused by equipment loads, loads from material or soil stockpiles, and earthquake-induced loads.

a. Determine the soil, surcharge, and hydrostatic loading, but in no case shall the loading be less than the earth and minimum equipment surcharge pressures.

b. Determine the proper load distributions caused by such activities and assure that those conditions are not exceeded in the field during construction.

c. Design the shoring for lateral earth and water pressures and surcharge loads that could result from construction methods and dewatering activities.

d. Consider the intermediate stages during sequence of excavation and backfilling, including placement and removal of the lateral support elements, in the shoring design.

3 Allowable deflection: Refer to paragraph 3.4B of this Specification Section.

4 Existing pipes or structures shall not be used to support any portion of the open excavation unless approved by the Engineer in writing.

5 The design of shoring shall conform to accepted engineering practice in this field. Approval of the Contractor's plans and methods of construction by the Engineer or the authorized agencies does not relieve the Contractor of his responsibility for the adequacy of the shoring system.

D. Performance Criteria:

1. The Contractor shall be solely responsible for and bear the sole burden of cost for any and all damages resulting from improper shoring or failure to shore.

2. The safety of workers, the protection of adjacent structures, property and utilities, and the installation of adequate supports for all excavations shall be the sole responsibility of the Contractor.

3. The design, planning, installation, and removal of all shoring shall be accomplished in such a manner as to maintain stability of the required excavation, or trench section, and to prevent any movement of soil that may cause damage to adjacent structures and utilities, damage or delay the work, or endanger life and health.

1.3 RELATED WORK SPECIFIED ELSEWHERE

A. Section 02310 Earthwork

B. Section 02550 Lined Reinforced Concrete Pipe

C. Section 02585 Maintenance Manhole and Precast Vault Construction

D. Section 02810 Irrigation System

E. Section 03300 Cast-in-Place Concrete

F. Section 03400 Precast Concrete

G. Section 07290 Waterproofing

H. Section 13200 Modular Stormwater Infiltration System

I. Division 15 Mechanical

J. Division 16 Electrical

1.4 CONTRACTOR SUBMITTALS

A. Comply with pertinent provisions of Section 01330 - SUBMITTALS of DIVISION 1 - GENERAL REQUIREMENTS.

B. Design and Calculations: The Contractor shall design and prepare shoring drawings and make calculations of materials used structurally in excavations, footings and foundation in accordance with the code requirements.

C. Shop Drawings: After submitting drawings for shoring to the Engineer for review, the Contractor shall incorporate all comments or corrections in the drawings, and submit to the authorized governing agencies for approval, at least three (3) weeks prior to commencement of work. After the approval is obtained, the Contractor shall submit [seven (7)] duplicate copies of the approved drawings to the Engineer. No excavations shall start until all the reviews and approval of the shoring design, which includes the following minimum items, have been obtained from the authorized agencies, or the Engineer:

1. Design assumptions, analysis calculations, and information on Contractor's proposed method of installation and removal of all shoring.

2. The maximum design load to be carried by the various members of the support system.

3. Detailed excavation support drawings, showing all pertinent dimensions, spacing, and relationships among the components of the shoring, as well as construction sequence and scheduling. Drawings shall show adjacent existing improvements including utilities within a lateral distance equal to the depth of excavation.

4. The method of bracing and preloading, if any.

5. Detailed utility and structure support drawings, where necessary.

6. The full excavation depth and depth(s) below the main excavation to which the support system will be installed.

7. Detailed sequence of construction and loads for various stages of bracing installation and removal.

8. Detailed drawings and descriptions of the method to be used by the Contractor to monitor shoring movements.

9. Types of construction equipment intended to be used in this Project.

10. Method of removing the soil from the trench or excavation.

11. Backfill materials and method of backfill and compaction.

12. Dewatering Plans (if applicable).

D. Quality Control Submittals:

1. Design Data: All the design and calculations and shop drawings shall be sealed and signed by a Civil or Structural Engineer licensed in the State of California and experienced in the design of earth retaining structures. The professional engineer shall be obtained and paid for by the Contractor.

E. Permits:

1. Submit in accordance with provisions in Section 01112 – DESCRIPTION OF WORK in DIVISION 1 - GENERAL REQUIREMENTS and other Sections of the Project Manual.

2. Obtain permit(s) as required by Title 8, Division 1-DEPT. OF INDUSTRIAL RELATIONS, Chapter 4 –DIVISION OF INDUSTRIAL SAFETY of the California Code Of Regulation, and pursuant to Subsection 7-10.4.1 - SAFETY ORDERS of SSPWC, prior to excavating to the depth of 5-feet or greater. A duplicate copy of the permit shall be submitted to the Engineer for review prior to the start of excavation.

F. Certification Form: Contractor shall completely fill out a Competent Person Trench/Excavation Certification Form provided by Inspector of Bureau of Contract Administration prior to any worker access to trench or excavations, and return it to the Inspector. Contractor shall certify by this form: the name of the competent person administering the work, the soil classification, and the type of excavation protective system provided/installed.

G. Shoring Monitoring Data: As Specified herein.

[H. Notification: As required by Section 3301.2 of the Los Angeles City Building Code, before commencing any excavation of 12 feet below the grade, the Contractor shall notify in writing the owners of adjoining buildings not less than 10 days before such excavation is to be made and that the adjoining buildings should be protected.

1.5 QUALITY ASSURANCE

A. Use adequate numbers of skilled workers who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with the specified requirements and the methods needed for proper performance of the work of this Section.

B. Employ a qualified registered engineer having at least five (5) year experience to

design the shoring system and to inspect and report on the quality of its construction.

C. Comply with pertinent requirements of governmental agencies having jurisdiction.

D. Coordinate the shoring design and construction with:

1. Soil Investigation Report prepared for this Work;

2. Structural system established for the Work, including location of columns, pilasters, walls, and other features.

3. Utilities established in the site.

E. Regulatory Requirements:

1. Conform to provisions of Section 01410 - REGULATORY REQUIREMENTS in the GENERAL REQUIREMENTS.

2. Comply with applicable requirements, including but not limited to, those shown on the Contract Drawings; latest adopted version of the Los Angeles City Building Code, Section 1802 – QUALITY AND DESIGN and Section 3301 – EXCAVATION AND FILLS; State of California, Code of Regulations, Title 8 – INDUSTRIAL RELATIONS, Division 1- DEPARTMENT OF INDUSTRIAL RELATIONS, Chapter 4 – DIVISION OF INDUSTRIAL SAFETY, Subchapter 4 – CONSTRUCTION SAFETY ORDERS, Section 1539, 1540, and 1541.

1.6 PROTECTIONS

A. Protect adjacent existing improvements against damage by the Contractor's operations. Protect all excavation so that the soil of adjoining property will not cave in or settle. Repair or replace damaged items to the full satisfaction of the Engineer, at no extra cost to the City.

B. Shore, crib or lag excavations and earthbanks, as necessary, to prevent caving in, erosion or gullying of the sides.

C. Divert or pump water out of all excavations and trenches until all installation work and backfilling are completed and inspected.

1.7 INSPECTIONS

A. Excavation of existing fills, reworking of natural soils and compaction of all required fills will be inspected and tested by the City of Los Angeles Building and Safety Inspector and the Soils Engineer **[who will be responsible to the Engineer and will be paid for by the City].**

B. Place all such backfill under the full supervision of the Soils Engineer.

PART 2 – PRODUCTS (NOT USED)

PART 3 -- EXECUTION

3.1 SURFACE CONDITIONS

A. Examine the areas and conditions under which the work of this Section will be performed. Correct conditions detrimental to timely and proper completion of the work. Do not proceed until detrimental conditions are corrected.

B. Existing Utilities: Contract Drawings show major utilities, but all utilities may not be shown. The Contractor will obtain all as-built records of existing utilities from local government authorities or Utility Companies and field check locations of utilities with representatives of the Utility Company. Protect from damage and provide utility trench support to any sewer, storm drain, water, gas, electric or other pipelines or conduits uncovered during work.

1. Excavate by hand or other excavation methods acceptable to the utility owner.

2. If existing utilities interfere with Contractor's proposed method of support, any required modification to the shoring system or relocation of interfering utilities shall be performed at no additional cost to the City.

3. Contact Underground Service Alert, (800) 422-4133, and obtain underground service alert inquiry I.D. Number 48 hours prior to digging. Report the I.D. Number to the Bureau of Contract Administration when calling for inspection.

C. Provisions for Contingencies:

1. Provide a contingency plan or alternative procedures to be implemented, if unfavorable performance is evidenced from the shoring monitoring program.

a. Keep on hand the necessary materials and equipment to implement the contingency plan.

2. If support elements project beyond the vertical projection of the right-of-way shown on the Contract Drawings onto adjoining property, **[the City] [the Contractor]** shall obtain permission of the adjoining property owner in writing. **[The Contractor shall bear the cost required to obtain such permission]**.

3. Subsurface Conditions: Evaluate subsurface conditions as excavation occurs.

4. Differing Conditions: Notify the Engineer of differing conditions that could affect the shoring design assumptions.

5. Acceptance: Proceeding with work means acceptance of existing conditions.

6. Notifications: The Contractor shall make all the necessary notifications to the adjacent properties, as described herein.

3.2 PREPARATION

A. Protection:

1. Protect or repair utilities damaged by operations of this Section.

2. Protect adjacent structures and property from damage and disfiguration.

B. Dewatering:

1. Where applicable, no excavation shall commence until the Contractor has demonstrated to the satisfaction of the Engineer that the groundwater has been lowered to the required level and that the soils inside the excavation are in the dewatered condition that was assumed in the Contractor's shoring design and submittal.

3.3 INSTALLATION

A. All trench and excavation openings shall be illuminated and fenced or barricaded during nights, weekends, and other times, as necessary, and meet CAL/OSHA safety requirements.

B. All shoring shall be installed to the lines and elevations shown on the Contractor's approved Construction Drawings. No component of the shoring system shall infringe on the minimum dimensions of any permanent structure shown in the Contract Drawings.

C. The excavation shall be staged as shown in the Construction Drawings or on required work documents and in such a manner as to provide a stable system of support at all times.

D. Should the shoring system utilize steel H-beams, piles, or other similar vertical supports, driving of said vertical supports will not be permitted in proximity of existing structures or sensitive utilities, except for the last 4-feet. The vertical supports shall be placed in holes drilled to a depth of 4-feet above the proposed bottom of the pile, except where this procedure is impracticable. The vertical support may then be driven to the required depth, not to exceed 4-feet. During the drilling and driving operations, the Contractor shall take care to avoid damage to utilities.

At locations where the drilling of such holes is impracticable despite reasonable mitigation methods because of the existence of obstructions or rocks, running sand, or other adverse condition, and provided said impracticability is demonstrated to the satisfaction of the Engineer by actual drilling operations by the Contractor, the Engineer may, upon request of the Contractor, approve the use of means other than drilling for the purpose of placing the vertical support. Such other means, however, must be of a nature which will accomplish, as nearly as possible, the purpose of the drilling, namely, the prevention of damage to existing surface or subsurface improvements, both public and private.

3.4 MONITORING

A. Employ a California-licensed surveyor or civil engineer to design, construct and maintain an on-going monitoring system of the horizontal and vertical deflections of the excavation support systems and the settlement of the adjacent ground and structures.

1. Regularly resurvey benchmarks specified during installation of excavation support systems.

2. Monitor excavation support and protection systems daily during excavation progress and for as long as the excavation remains open.

3. Regularly survey adjacent ground and structures to verify that no settlement is occurring or has occurred as a result of the construction activities.

4. Maintain an accurate log of surveyed elevations and positions for comparison with original elevations and positions. Maintain accuracy within 1/100 of a foot and keep records in a readily understandable form, such as a tabular form of both the net and total deflections (both horizontal and vertical) of each soldier pile.

B. Submit a copy of all the daily readings to the Engineer at the end of each week. Notify the Inspector or the Engineer immediately of any excessive movements or deflection.

1. If changes in elevations or positions occur or if cracks, sags, or other damage is evident in adjacent construction, promptly notify the Engineer and immediately take steps to remedy the situation.

2. Horizontal and lateral deflections into the excavation at any location on the shoring shall be limited to a maximum of 1 inch, or to a maximum of 0.5 inch within the influence zone of an existing structure, adjacent to a utility sensitive to deflection, or other special circumstances as determined by the Engineer for work in or affecting the public right-of-way. Deflection in private property not affecting the public right-of-way shall be limited to 0.5 inch.

3. The total of the allowable calculated deflection for secondary members (lagging or sheeting) added to the calculated deflection for primary members may be 50 percent greater than the limits identified when struts are placed no more than 5 feet apart on center, or piles are spaced no more than 8 feet apart on center.

4. If at any time the measured deflection exceeds the allowable maximum deflection, immediate corrective measures shall be taken by the Contractor to prevent any further deflections.

5. The Contractor shall stop the excavation work until corrective measures have been taken and the deflections have been reduced to acceptable limits, as specified.

3.5 REMOVAL OF SHORING

A. Shoring shall be designed to be gradually removed as necessary to allow backfill to be placed and compacted. All voids existing behind the shoring which remains in place shall be backfilled with structural concrete, as specified in Section 02310 - EARTHWORK.

B. Shoring shall be removed as backfilling progresses. Removal shall be conducted in such a manner so as to avoid any damage to adjacent facilities, or to other

members of the shoring system. Impact loading or in members of the shoring system will not be allowed. All wood forms, loose or casual wood and debris shall be removed. Areas that cannot be accessed or achieve adequate compaction shall be backfilled with structural backfill at no additional cost to the City.

C. During backfilling, temporary support elements shall not be removed until alternative support is available, such as substituted struts, backfill, or ability of the support system to act as a cantilever without detrimental deflection.

D. Portions of shoring used to support excavations for installation of sanitary sewer and storm drain facilities shall be [removed] [left in place, with permission of the Engineer] or the pipe bedding and side support shall be recompacted to the satisfaction of the Engineer.

(END OF SECTION)

This page intentionally left blank.

SECTION 02310
EARTHWORK

PART ONE - GENERAL

1.1 SUMMARY

A. Provided and executed earthwork, **as indicated on the Contract Drawings or** in the Project Manual including, but not limited to the following:

1. General excavating and trenching for various trades.

2. General exterior grading and cutting.

3. General excavating for site improvements.

4. Select base materials for under concrete slab and under paving.

5. Filling and Backfilling.

6. Structure excavation, unclassified fill and borrow excavation defined in Section 300 – EARTHWORK of the "Standard Specifications for Public Works Construction (SSPWC)".

B. RELATED WORK SPECIFIED ELSEWHERE

1. Documents affecting the work of this Section include, but are not necessarily limited to the GENERAL CONDITIONS, SUPPLEMENTARY CONDITIONS, DIVISION 1 - GENERAL REQUIREMENTS and other applicable Sections of the Project Manual.

2. Drawing Sheets GI02 and GI03 for additional requirements for structure subgrade preparation, fill material, placement and compaction

3. Demolition in Division 2

4. Clearing, Grubbing and Stripping in Section 02210.

5. Shoring in Section 02240.

6. Yard and Street Work in Section 02710.

7. Storm Drain System in Section 02545.

8. Irrigation and Landscaping Work in Division 2.

9. Concrete Work in Division 3.

10. Disabled Accessibility Parking Signage in Section 10443.

11. Electrical Work in Division 16.

12. Geotechnical Evaluation Report in Appendix

1.2 QUALITY ASSURANCE

A. Labor: Use adequate numbers of skilled laborers who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with specified requirements and the methods needed for proper performance of the Work of this Section.

B. Equipment: Use equipment adequate in size, capacity, and numbers to accomplish the work of this Section in a timely manner.

C. Codes and Standards: Perform excavation work in compliance with applicable ordinance of governing authorities having jurisdiction including, but not limited to, the 2022 or latest edition L. A. City Building Code and applicable Amendments; Division 1-DEPARTMENT OF INDUSTRIAL RELATIONS of Title 8 of the California Code of Regulations; Section 300 - EARTHWORK of SSPWC, as amended by the Brownbook.

1. In addition to complying with Codes and Standards having jurisdiction, comply with directions of the Soil Engineer.

D. The Contractor shall provide necessary measures for storm water pollution control and water quality protection. The Contractor shall meet the standards of good housekeeping at all times.

E. Testing and Inspection Services**:** The City will engage a qualified soil testing and inspection service for quality control testing during earthwork operations. Testing shall be performed in accordance with the soil investigation reports and testing standards, the instructions of the Soil Engineer and the applicable Sections of General Conditions.

F. Soil Engineer: The City will retain the services of a Soil Engineer for the purpose of soil investigations and testing, all the necessary inspections and observations, and certifications.

G. Survey: The Contractor shall employ the services of a California licensed surveyor for the purposes of survey control, layout, grade and cross-sections required to control work. Survey work shall conform to Section 01722-SURVEYING.

1.3 SUBMITTALS

Conform to provisions of Section 01330 of DIVISION 1 - GENERAL REQUIREMENTS.

A. Shop Drawing of the Shoring System in Section 02240.

B. Sources of imported materials.

C. Method of Back-Filling and Compaction.

D. Dewatering Plans.

E. California General Construction Activity Stormwater Permit, Waste Discharge Identification Number, Wet Weather Erosion Control Plan or Stormwater Pollution Prevention Plan.

F. Competent Person Trench/Excavation Certification Form in Section 02240 –

SHORING.

G. Test Reports-Excavating: Contractor shall submit the following reports directly to the Los Angeles City Department of Building & Safety, prepared by the Soil Engineer and the testing service, with a copy to the Engineer.

1. Test reports on borrow material.

2. Verification of each footing subgrade.

3. Field density test reports.

4. One optimum moisture-maximum density curve for each type of soil encountered.

5. Other test reports as required by the Soil Engineer and the local cognizant agency.

1.4 PERMITS

A. Required: In addition to the requirements specified herein, and in applicable Section 01112 – DESCRIPTION OF WORK of DIVISION 1 - GENERAL REQUIREMENTS of the Project Manual.

B. The Contractor shall perform all work in accordance with the permit requirements of the Los Angeles City Department of Building and Safety, including obtaining the grading permit, hauling permit and bond, and making the notification to the adjacent property owners; no additional compensation will be allowed therefore.

C. The Contractor shall furnish to the Engineer a duplicate copy of the OSHA excavation permit, and all other required permits prior to the start of the excavation work.

D. The Contractor shall obtain and pay for the Bureau of Engineering's Shoring (Lateral Support) Permit.

E. The Contractor shall obtain and pay for the California State Regional Water Quality Control Board (LARWQCB) Construction Water Discharge Permit. The Los Angeles Department of Water and Power (LADWP) will submit and obtain the Ground Water Dewatering Permit. The Contractor shall work with LADWP to provide necessary information to complete the application process.

F. The LADWP will submit and obtain and pay for Calif General Construction Activity Stormwater Permit. The Contractor shall work with LADWP to provide necessary information to complete the application process. The Contractor shall obtain Waste Discharge Identification Number after submitting Wet Weather Erosion Control Plan (WWECP) pursuant to Section 61.02 and 64.72 of L.A.M.C. Stormwater Pollution Prevention Plan (SWPPP) pursuant to Section 91.106 of L.A.M.C. to the Los Angeles City Dept. Building and Safety for reviews.

G. The Contractor shall make all necessary notifications, obtain and pay for required permits and file manifests with the South Coast Air Quality Management District (SCAQMD).

1.5 JOB CONDITIONS

A. Required Work Coordination: The Contractor shall fully coordinate the work operations of this Section with that of other trades involved and with the Engineer to assure proper sequence of work, limitations, methods and time of work so as to minimize or avoid interference with the existing utilities as well as performance of work by the other Contractors. Contractor shall include minimum two weeks in its Construction Schedule to allow the Soil Engineer to prepare final Soil Report to be submitted to the Los Angeles City Department of Building and Safety Grading Division for final approval if the Soil Engineer is obtained by the City. The Contractor shall coordinate and arrange for all the inspections with the local authorized agencies and the Bureau of Contract Administration.

B. Trench Safety: Attention is directed to the provisions of Section 6705 of the Labor Code and Section 02240 – SHORING of the Project Manual concerning trench excavation safety plans.

C. Air Pollution Control: The Contractor shall comply with all air pollution control rules, regulations, ordinances and statutes which apply to work performed pursuant to the Contract, including any air pollution control rules, regulations, ordinances and statutes, specified in Section 1107 of the Government Code.

D. Use of Pesticides: The Contractor shall comply with all rules and regulations of the Department of Food and Agriculture, the Department of Health, the Department of Industrial Relations and all other agencies which govern the use of pesticides required in the performance of the Work on the Contract.

1. Pesticides shall include, but shall not be limited to herbicides, insecticides, fungicides, rodenticides, germicides, menatocides, bactericides, inhibitors, fumigants, defoliants, soil sterilants, and repellents.

2. Any substance or mixture of substances intended for preventing, repelling, mitigating or destroying weeds, insects, diseases, rodents, or nematodes and any substance of mixture for substances intended for use as a plant regulator, defoliant shall be considered as a pesticide.

E. Sound Control Requirements: The Contractor shall comply with all local sound control and noise level rules, regulations and ordinances which apply to any work performed pursuant to the Contract.

Each combustion engine, used for any purpose on the job or related to the job, shall be equipped with a muffler of a type recommended by the manufacturer. No internal combustion engine shall be operated on the project without said muffler.

F. Use of Explosives: The use of explosives is not permitted.

1.6 PROTECTIONS

A. General: Comply with provisions of Section 00309 - PROTECTION OF PERSONS AND PROPERTY AND RESTORATION OF EXISTING IMPROVEMENTS in GENERAL CONDITIONS. Protect and guard all excavations against damage to life, limb and property as prescribed by Los Angeles City Department of Building and Safety.

B. Protections of Persons and Property: Provide and install signs, lights and

barricades at danger points on and off the job-site to guard against accidents, etc.

1. Barricade open excavations occurring as part of this work and post with warning lights.

2. Operate and maintain warning lights as recommended by authorities having jurisdiction.

3. Protect structures, utilities, sidewalks, pavements and other facilities from damage caused by settlement, lateral movement, undermining, washout and other hazards created by earthwork operations.

4. Perform excavation within drip-line of large trees to remain by hand, and protect the root system from drainage or dry out to the greatest extent possible. Maintain moist condition for root system and cover exposed roots with burlap. Paint root cuts of 1" diameter and larger with emulsified asphalt tree paint.

C. Existing Improvements (including trees and shrubs Indicated to Remain): Protect against damage resulting from Contractor's operations. Repair or replace damaged items to the full satisfaction of the City at no added cost to the City.

D. Shoring, Cribbing and Lagging: Required of excavations and earth banks as necessary to prevent caving in, erosion or gullying of sides. Conform to applicable provisions in Section 02240 – SHORING of the Project Manual.

1. Design and calculations of shoring, etc. shall be in accordance with requirements of with the latest Los Angeles City Building Code, Section 2811 and Safety Orders of State of California, Division of Industrial Safety, Title 8, Subchapter 4, Article 6, Sections 1540 and 1541.

2. Upon completion of the project or when no longer needed or otherwise directed by the authority having jurisdiction, remove all such shoring from the job-site.

E. Water: Divert or pump out of all excavations until concrete and other items are placed therein, forms are removed, and backfilling is completed. The Contractor shall provide a means for solids removal before discharging the water.

F. Existing Utilities: Utilities shown on the drawings are shown pursuant to a search of available records and are shown as a matter of information and not as a matter of fact. Conforming with Section 01112 - SUMMARY OF THE WORK, Section 01140 – CONTRACTOR'S USE OF THE PREMISES and other Sections of the Project Manual, the Contractor shall locate existing underground utilities in areas of work. If utilities are to remain in place, provide adequate means of support and protection during earthwork operations.

1. Should uncharted or incorrectly charted piping or other utilities be encountered during excavation, consult City immediately for directions. Cooperate with City and utility companies in keeping respective services and facilities in operation. Repair damaged utilities to the satisfaction of the utility company.

2. Do not interrupt existing utilities serving facilities occupied and used by City and others, during occupied hours, except when permitted in writing

by the Engineer and then only after acceptable temporary utility services have been provided.

3. Provide a minimum of 48-hour notice to the Engineer, and receive written notice to proceed before interrupting any utility. Obtain clearance and notify all utility companies in the area and contact Underground Service Alert by calling (800) 422-4133. Deliver utility clearance ticket number to the Engineer prior to the start of any work.

4. Demolish and completely remove from site existing underground utilities indicated to be removed. Coordinate with utility companies for shut-off of service if lines are active.

1.7 INSPECTION

A. Required: All excavations and trenches shall be inspected by the Los Angeles City Building and Safety Inspector, and the Soil Engineer before filling, backfilling and/or other subsequent work is placed therein.

1. Earthwork backfill for structures shall comply with requirements of Section 300-3.5 - STRUCTURAL BACKFILL of SSPWC and/or requirements in the Project Manual.

1.8 SOILS INFORMATION

Available soils information include *Geotechnical Evaluation LABOE TOS No. 25 Stormwater Capture Parks Program David M. Gonzales Recreation Center* dated August 31, 2020.

Contractor shall comply with all Soil Report recommendations specified and other instruction directed by the Engineer. In case of conflicts between other parts of the Project Manual and the Soils Report, the most restrictive condition shall govern unless otherwise approved by the Soil Engineer.

1.9 MATERIAL HANDLING

A. Delivery: All materials, tools, equipment, etc. to be delivered to the job-site, in such a manner that it is coordinated with progress of work of this Section.

B. Material Storage: Stockpile satisfactory excavated materials where directed, until required for backfill or dispose of in accordance with Section 300-2.6 - SURPLUS MATERIALS of SSPWC. Place, grade and shape stockpiles for proper drainage.

1. Locate and retain soil materials away from edge of excavations. Do not store within drip line of trees indicated to remain.

2. Dispose of excess soil material and waste materials as herein specified.

PART TWO – PRODUCTS

2.1 SOIL MATERIALS

A. Suitable Excavated Material: Suitable materials from excavations for use in fill and embankments shall be free from shale, sod, large clods or hard lumps of

earth, roots, trash or other debris; that has a liquid limit of less than 30 and a plasticity index of less than 9; and is readily compatible to specified density. No rock, cobbles or broken concrete exceeding 2 inches in maximum dimension shall be placed in compacted fill without the specified approval of the Engineer. No rock, cobbles or broken concrete exceeding 1 inch in maximum dimension shall be placed in compacted fill of a utility trench.

B. Fill Material: Furnish imported earth material as necessary; if specified in the contract requirements or if the amount of suitable earth materials obtained from the job-site excavations is not sufficient to properly construct the required fill, subject to the approval of the Engineer or the Soil Engineer prior to use.

1. Submit imported fill material samples and testing results for the Engineer's approval prior to importing to the job site in accordance with Section 300-5 BORROW EXCAVATION of SSPWC.

2. Imported fill material shall be free of foreign materials, vegetable growths, sod, rocks, expansive soils and all debris.

3. Lime for Treatment of Imported Fill Material: As hereafter specified in accordance with Section 301-5 - LIME-TREATED SOIL of SSPWC.

4. Where fill material exhibits a wide variation in consistency, the Engineer may require blending to stabilize and upgrade the material as directed by the Engineer.

5. In landscape (planting area), fill shall not be saline or contain anything that would prevent normal plant growth: See LANDSCAPING, Section 02900 of the Project Manual for verification of required or approved fill material.

C. Base Material: "Crushed Aggregate Base", or "Crushed Miscellaneous Base", 1-1/2-inch maximum size aggregate, as specified in Section 200-2 - UNTREATED BASE MATERIALS of SSPWC.

D Pipe Bedding and Trench Backfill Material:

1. For all pipe bedding follow CASE 4 per COLA STD Plan S-251-1.

2. Use clean earth materials previously removed from job-site excavations or use imported fill materials as above specified free from clay, rock or gravel larger than 1-inches for utility trenches, clay, rock or gravel larger than 2" inches in an area other than utility trench subject to the Soil Engineer's approval prior to use.

3. For sanitary sewer pipe, use Case I bedding material and extend 12-inch above said pipe, the balance of backfill to be approved clean earth materials.

4. For storm drain pipe, use approved washed sand and extend 12 inches above said pipe, the balance of backfill to be approved clean earth materials. For storm drain pipe section located beneath the sidewalk paving and connected to concrete curb outlet, sand bedding and backfill are not applicable.

5. For water pipe or pipe rise**,** use approved washed sand and extend 12-

inches above said pipe, the balance of backfill to be approved clean earth materials.

6. For electrical conduits, use approved washed sand and extend 4 inches above said conduits, the balance of backfill to be approved clean earth materials. For utility service connection, provide bedding and backfill material in accordance with utility company's instructions.

7. For the landscape irrigation piping, use approved washed sand and extend 4-inches above said pipe, the balance of backfill to be an approved clean earth materials.

8. Conforming to applicable Sections of the Project Manual for the pipe bedding widths and depths.

E. Soil Cement: Use soil-cement to form a dense, uniform mass conforming to the lines, grades and cross sections [shown on the Contract Drawings.] The soil cement shall be mixed, placed and compacted at least 95% of the relative compaction, in accordance with Section 301-3 of SSPWC and the instructions of the Soil Engineer.

F. Structural Backfill: The structural backfill shall have a sand equivalent of not less than 20 in accordance with Section 300-3.5 - STRUCTURAL BACKFILL and Section 300-4.5 - PLACING MATERIALS FOR FILLS of SSPWC and placed and compacted to 90% of relative compaction.

G. Slurry Backfill: Slurry backfill shall be 60 E 0.7 (Class 100-E-100) and placed in accordance with Section 306-1.3.1 - BACKFILL AND DENSIFICATIONS of SSPWC.

2.2 WEED KILLER/SOIL STERILANT

Provide a dry, free-flowing, dust-free chemical compound, soluble in water, capable of inhibiting growth of vegetation, and approved for use on this Work by governmental agencies having jurisdiction.

A. Tinted for visual identification, shall be as follow:

1. United States Borax Corp. "Polyborchlorate" or equal.

2. Pacific Coast Borax Co. "Polyborchlorate".

3. Amspray Corp. "Pavex".

4. Elanco "Spike 801".

2.3 TOPSOIL

A. Where required by [and shown on the Landscape Drawings or otherwise required], provide topsoil consisting of friable, fertile soil of loamy character, containing an amount of organic matter normal to the region, capable of sustaining healthy plant life, and reasonably free from subsoil, roots, heavy or stiff clay, stones larger than 2 inches in greatest dimension, noxious weeds, sticks, brush, litter, and other deleterious matter.

B. Obtain topsoil from sources within the project limits, provide imported topsoil from

approved sources outside the project limits, or from both sources.

2.4 OTHER MATERIALS

Provide other materials, not specifically described but required for a complete and proper installation, as selected by the Contractor subject to the approval of the Engineer.

PART THREE - EXECUTION

3.1 SURFACE CONDITIONS

Examine the areas and conditions under which the Work of this Section will be performed. Correct conditions detrimental to timely and proper completion of the Work. Do not proceed until detrimental conditions are corrected.

3.2 WATER QUALITY PROTECTION

A. Eroded sediments and other pollutants must be retained on site and may not be transported from the site via sheet flow, swales, area drains, natural drainage, or wind.

B. Stockpiles of earth and other construction-related materials must be protected from being transported from the site by wind or water.

C. Fuels, oils, solvents, and other toxic materials must be stored in accordance with their listing and are not to contaminate the soil ~~n~~or the surface waters. All approved toxic storage containers are to be protected from the weather. Spills must be cleaned up immediately and disposed of in a proper manner. Spills may not be washed into the drainage system.

D. Excess or waste concrete may not be washed into the public right-of-way or any drainage system. Provisions shall be made to retain concrete waste on-site until they can be appropriately disposed of or recycled.

E. Trash and construction-related solid waste must be deposited into a covered receptacle to prevent contamination of rainwater and dispersal by wind.

F. Sediments and other materials may not be tracked from the site by vehicle traffic. The construction entrance roadways must be stabilized so as to inhibit sediments from being deposited into the public right-of-way. Accidental deposits must be swept up immediately and may not be washed down by rain or by any other means.

G. Comply with requirements shown in Wet Weather Erosion Control Plan (WWECP).

3.3 SITE PREPARATION

A. Remove the existing soil including fill material, debris, roots and foreign materials to natural soil at the proposed building site. Removal shall be continued to at least 5 feet beyond the exterior faces of the exterior foundation. Removal shall be done in accordance with Section 02210 - SITE CLEARING and Grubbing of the Project Manual.

B. Remove the upper 6 inches of existing soil including debris, roots and foreign materials under the landscape.

C. Subgrades: Scarify for recompaction to a depth of 6-inches, bring to optimum moisture content and then recompact to at least 95% maximum density for subgrade as per ASTM D1557 - TESTED METHOD FOR LABORATORY COMPACTION CHARACTERISTICS OF SOIL USING MODIFIED EFFORT (56,000 FT - LBF/FT^3.). Prepare subgrade in accordance with Section 301-1 - SUBGRADE PREPARATION of SSPWC.

E. Holes and trenches existing on the jobsite or resulting from Contractor's operations shall be filled with clean existing or imported earth materials (free of large clods and stone).

Unless indicated otherwise, construct fill in accordance with Section 300-4.5 - PLACING MATERIALS FOR FILLS of SSPWC in 8-inch layers and each layer compacted to 95% relative compaction and finished to elevations necessary to require cutting by fine grading. Inspection by Los Angeles City Building and Safety Inspector and the Soil Engineer are required prior to filling. Obtain minimum one compaction test for each layer or volume specified by Code.

F. Grading: To elevations of existing adjoining street surfaces, private property and surfaces immediately adjacent to the job-site limits indicated on the Contract Drawings; make all grades in a straight line from any point to any other perimeter point.

G. Dewatering:

1. Remove all water, including rainwater, encountered during trench and sub-structure work to an approved location by pumps, drains, and other approved methods.

2. Keep excavations and site construction area free from water.

H. Dust Control: Use means necessary to prevent dust becoming a nuisance to the public, to neighbors, and to other work being performed on or near the job-site.

I. Moisture Control: Where subgrade or layer of soil material must be moisture conditioned before compaction, uniformly apply water to surface of subgrade, or layer of soil material. Apply water in manner to prevent free water appearing on surface during or subsequent to compaction operations.

1. Remove and replace, or scarify and air dry, soil material that is too wet to permit compaction to specified density.

2. Soil material that has been removed because it is too wet to permit compaction may be stockpiled or spread and allowed to dry. Assist drying by discing, harrowing, or pulverizing until moisture content is reduced to a satisfactory value.

J. Rework: Any previously compacted or tested subgrade and fill material, which are affected or disturbed, in the opinion of the Soil Engineer, by the inclemency of the weather such as rains, floods, earthquake or others shall be reworked, retested and re-inspected at no additional cost to the City.

K. Approval of Subgrade**:** By the Soil Engineer and the Los Angeles City Building and Safety Inspector prior to placing any fill.

L. Subgrade Preparation Where Extensive Fills Will Occur:

1. Remove disturbed existing soils and stockpile materials approved by the Soil Engineer for use in fills and as backfill materials. Dispose unsuitable materials off the jobsite.

2. Subgrade to be approved by the City of Los Angeles Building and Safety Inspector and the Soil Engineer.

3. Scarify the upper 6 inches of the soil over the entire rough grade site and recompact to a minimum relative compaction of 95%.

4. Bring to designated rough grades, using existing on-site imported materials, as approved by Soil Engineer, regrade by removing and replacing materials in loose lifts and bringing to optimum moisture content and compacting to 90% relative compaction as above specified for exposed soils to receive fills. The lifts should not generally exceed 8 inches in loose thickness depending on the type of compaction equipment. Use granular material for fills behind retaining walls.

5. Testing of Fills: Test the fill for conformance with code requirements; under continuous control supervision of a qualified representative of the City. The City's representative shall keep a log of the tests performed which will be filed with the Engineer upon completion of the work. Contractor to bear the costs of rework, retesting and re-inspection because of non-conformance.

3.4 GRUBBING AND GRADING

A. Remove entire roots under the footings and elsewhere to three feet below the subgrade of each surface.

B. Rough: Leave cut and fill sufficiently high to require cutting by fine grading.

C. Fine: To elevations required to ensure proper drainage or finished elevations indicated on drawings; finish elevations for planting areas as specified for top soil fill in Section 02900 – LANDSCAPING.

D. Subgrade Preparation: Required for all areas, other than filled or backfill areas, over which moisture barrier material, slabs, walks or pavement will be placed; in accordance with provision specified herein and Section 301-1 - SUBGRADE PREPARATION of SSPWC.

E. Inspection Required: Prior to placing base material, concrete or other materials.

F. Grading for Demolition Jobs: To specified elevations or elevations of existing sidewalks, adjacent property lines or surfaces immediately adjacent to the sites. Make all grades straight-line from any point to any other perimeter point.

G. Grading for New Asphalt Concrete Paving:

1. Rough: Cut and fill to be left sufficiently high to require cutting by fine grading and preparation of the surface for placement of the required select base material to thickness noted on the Contract Drawings or matching that of adjacent existing select base materials.

2. Fine: To exact elevations necessary for required new paving and paving repairs.

3. Testing and Inspection Required: Prior to placing of select base and asphalt paving materials.

3.5 EXCAVATING

A. General:

1. Excavation consists of the removal and disposal of materials necessary to establish required grade elevations and certified compacted fill for new construction pursuant to Section 300-2 UNCLASSIFIED EXCAVATION of SSPWC.

2. Excavated materials suitable for use as fill and/or backfill to be stockpiled where directed by the Engineer.

3. Non-approved and excess excavated materials to be legally removed and disposed of from the jobsite.

4. Shoring, Bracing and Bulkheading of Trenches: All to be provided, installed and maintained where required to support trenches, See Subsection 1.6 of this Section. Conform to the requirements prescribed by the Los Angeles City Department of Building and Safety, CAL/OSHA, Section 02240 - SHORING and other Sections of the Project Manual.

5. Access to Trenches: Conform to Section 306-1.1.4 - ACCESS TO TRENCHES of SSPWC. Provide safe and suitable ladders, which project 2 feet above the top of the trench. It shall be provided for all trenches over 4 feet in depth. A minimum one ladder shall be provided for each 50 feet of open trench or fraction thereof and be so located that the workers in the trench need not move more than 25 feet to a ladder.

6. Encountered Existing Underground Piping or Conduits: Immediately stop the trench operations at the point of encounter, notify the Engineer of such condition and submit support drawings to the Engineer for approval. The support drawings shall be in conformance with the Los Angeles City Bureau of Engineering Standard Plans S-253, SUPPORTS FOR STORM DRAIN AND SEWER PIPES ACROSS TRENCHES, latest edition; CAL/OSHA and the utility company's requirements.

B. For Substructure Concrete:

1. When Earth Banks are Stable: To net sizes of concrete, except as otherwise specified or indicated on the Contract Drawings.

2. When Earth Banks are not Stable: Sufficiently wider than concrete to allow for forms and inspection thereof.

3. Where Rock Occurs: Surface to be leveled to a clean, even hard surface.

4. Depth: As indicated on Contract Drawings.

5. Excessive Width and Depth: Where excavation is made wider and deeper than required, fill with concrete specified in Section 03300 of the Project Manual, at Contractor's expense.

6. Inspection Required: After excavation and before placing concrete and before backfilling, the exposed soil or subgrade will be carefully inspected by the City of Los Angeles Building and Safety Inspector and the Soil Engineer to verify removal of additional unsuitable soil.

7. Protections and Shorings: See Subsection 1.6 of this Section.

8. Excavation for Grade Beams: Omit forms when sides will stand to a cut face, make such excavation 1-inch wider on each side.

9. When excavating adjacent to existing remaining structures, do so in a sequence as required and approved by the Engineer to avoid displacement or damage to the existing adjacent structure.

C. For Site Improvements:

1. Masonry Yard Walls: As necessary for required footing and setting of forms for concrete work, to depth indicated.

2. For Planter Curbs: To exact curb limit, without excessive removal of adjacent paving or subgrade for new paving.

3. Planter Areas: Remove the upper 6 inches of existing sub-soils as necessary to receive topsoil fill as specified in Section 02900 - LANDSCAPING.

4. For Bumper Posts: To dimensions and depths noted on the Contract Drawings.

5. For Flagpole, to exact size and depth for concrete foundation.

6. For Concrete and Asphaltic Site Improvements such as concrete and/or asphalt pavements, concrete walkways, driveways aprons, concrete curb and gutter: Excavate to exact limits of such work without excessive removal of existing subgrade. Scarify and compact top 6 inches of subgrade and compact at 95% relative density.

D. For Walls (including wall footings): Width not less than 18-in. from face of wall and sufficient for necessary forms, cribbing, bracing, inspection, and application for watering on walls, where required.

E. Conduit and Piping: Conforming to the requirements as specified on the drawings, Los Angeles City Plumbing Code, SSPWC and other sections of the Project Manual. Any piping with 8 feet or less cover or backfill, Case 1 Bedding Installations of Los Angeles City Bureau of Engineering Standard Plan S-251, latest edition, shall be used for all piping laying unless otherwise specified on the drawings or noted.

1. Depth and Width of Trench For Storm Drainage Piping: To depth necessary for installation of piping and construction of catch basin in accordance with requirements of Section 02545 - STORM DRAIN SYSTEM, PLUMBING Section in Division 15 of the Project Manual and

as noted on the Contract Drawings. Provide minimum 7-½ inches side clearance from side of the piping. Make the sides vertical and the bottoms smooth, firm, level or uniformly sloped as required, slope to not exceed a downward slope of two horizontal to one vertical in a manner to prevent formation of water pockets in the pipe. For backfill or earth cover exceeded 8 feet, refer to Los Angeles City Bureau of Engineering Standard Plan S-251, latest edition, for maximum allowable trench width and bedding material. Unless specified otherwise, provide minimum 2 inches washed sand bedding below the pipe barrel.

2. Depth and Width of Trench for Plumbing Piping: As necessary for complete installations of the piping, fixtures and controls; provide minimum 7-1/2 inches side clearance from side of the piping; make the sides vertical and bottoms smooth, firm, level or slopes, as required by the code for proper drainage. Final elevations shown on Contract Drawings shall mean the invented pipe elevations. Pipe thickness and bedding thickness shall be used in determining trench depths. Conform to the requirements as specified in the Los Angeles City Plumbing Code and in Division 15 of the Project Manual. For backfill or earth cover exceeded 8 feet, refer to Los Angeles City Bureau of Engineering Standard Plan S-251, latest edition, for maximum allowable trench width and bedding material. Unless specified otherwise, provide minimum 4 inches washed sand bedding below the pipe barrel.

   If final elevation is not shown on contract drawings, place all piping to a depth no less than 24 inches.

3. Depth and Width of Trench for Electrical Conduit and Pull Box: As necessary for complete installation of the electrical conduits and pull box, unless specified otherwise, provide minimum 7-1/2 inches side clearance from the side of the conduit and pull box and 2 inches sand bedding in accordance with the Contract Drawings and requirements of the Utility Company.

   Conduit shall be placed to a depth of not less than 24 inches and 36 inches under the driveway.

4. Depth and Width of Trench for Landscape Irrigation Piping: As necessary for complete installations of the piping fixtures and controls; provide a minimum of 7-1/2 inches side clearance from the side of the piping and 4 inches washed sand bedding. Depth of piping shall be conformance with Section 02810 – IRRIGATION SYSTEMS of the Project Manual. All trenches for electrical conduit and wiring shall be in accordance with requirements listed hereinbefore.

F. Corrections: Required of all unauthorized excavations made below indicated depths, as recommended by the Soil Engineer at no added cost to the City.

3.6 FILLING

A. General: Construct in accordance with Section 300-4- UNCLASSIFIED FILL of SSPWC and place in layers not exceeding 8-inches thickness, compacted to a relative compaction of not less than 95% when tested in accordance with Section 211-2 - COMPACTION TESTS of SSPWC, except that fill in planting areas may be compacted to 90% relative compaction.

B. In Planting Areas and Tree Wells: If flooding method is specified for fill material, place saturated fill (exclusive of topsoil fill) prior to construction of adjacent improvements to minimize settlement as follows:

1. Planting Areas and Holes: Cultivate and soak the specified backfill mix for a minimum of two days using a common lawn soaker.

2. Tree Wells: Excavate a sump approximately 3-feet square by 3-feet deep and flood each sump for about 3 days.

C. Fill all holes on the existing job-site or resulting from site-clearing or demolition operations.

D. Topsoil Fill: Specified in Section 02900 - LANDSCAPING of the Project Manual.

E. Inspection Required: Prior to placement of fill materials. See Subsection 1.7A of this Section.
